CONGRESSIONAL RECORD:

CONTAINING

THE PROCEEDINGS AND DEBATES

OF THE

SIXTY-SECOND CONGRESS, THIRD SESSION.

VOLUME XLIX.

WASHINGTON:
1913.

VOLUME XLIX, PART IV.

CONGRESSIONAL RECORD,

SIXTY-SECOND CONGRESS, THIRD SESSION.

SENATE.

THURSDAY, *February 13, 1913.*

(Legislative day of Tuesday, February 11, 1913.)

The Senate reassembled at 12 o'clock meridian on the expiration of the recess.

Mr. GALLINGER. Mr. President, I would suggest the absence of a quorum.

The PRESIDENT pro tempore (Mr. BACON). The Senator from New Hampshire suggests the absence of a quorum. The Secretary will proceed to call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Clark, Wyo.	Kenyon	Root
Bacon	Crane	La Follette	Sheppard
Bankhead	Crawford	Lodge	Simmons
Borah	Cullom	McLean	Smith, Mich.
Bourne	Cummins	Martin, Va.	Smoot
Bradley	Curtis	Martine, N. J.	Stephenson
Brady	Dillingham	Myers	Sutherland
Brandegee	Dixon	Nelson	Swanson
Bristow	du Pont	Newlands	Thornton
Brown	Foster	Overman	Tillman
Bryan	Gallinger	Owen	Townsend
Burnham	Gamble	Page	Warren
Burton	Gronna	Percy	Webb
Catron	Jackson	Perkins	Wetmore
Chamberlain	Johnston, Ala.	Pomerene	Williams
Clapp	Jones	Richardson	Works

Mr. ASHURST. I was requested to announce that the junior Senator from New York [Mr. O'GORMAN] is absent attending to business of the Senate.

The PRESIDENT pro tempore. Upon the call of the roll of the Senate 64 Senators have responded to their names, and a quorum of the Senate is present. Senate bill 8033 is pending.

CONNECTICUT RIVER DAM.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8033) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

Mr. ROOT. Mr. President, there has been a good deal of discussion about this bill which has proceeded upon an impression as to the effect of the legislation proposed as a precedent; and as almost always happens in a discussion of that character the true nature of the bill before the Senate has been somewhat lost sight of, and many questions have been discussed which do not really arise upon this measure.

Let me try to state what I understand to be the true nature of the proposed law which the committee has reported. It proposes to give the assent of the United States to the Connecticut River Co., a corporation organized and doing business under the laws of the State of Connecticut, to relocate its Enfield Dam, so called, and to construct, maintain, and operate such relocated dam, as described in the act, with a proviso that the work shall be in accordance with the general dam act of 1906, as amended by the act of June 23, 1910; and it imposes as a condition of the giving of consent by Congress a provision that a reasonable charge upon the proceeds realized from the sale of water power which will be developed by the construction of the dam shall be paid over to the United States, to be applied in improving the navigation of the Connecticut River and the waters connected therewith.

There is no question involved here of title of property, of franchise, of conveyance whatever. The Connecticut River Co., which is proposing to construct this dam, owns all the property which it requires. It is the riparian proprietor. It does not ask from the United States a grant of property. The Connecticut River Co. has a franchise from the State of Connecticut, which gives it corporate capacity to erect the proposed dam upon and through the use of the property that it owns, and which gives it the right of eminent domain through which it may acquire any further property that may be needed. It does not ask the United States to confer upon it any franchise of any description whatever.

The only thing that the proposed statute undertakes to do is to give the consent of the United States, as the protector, the guardian, the promoter of navigation upon the navigable streams of the United States, to the erection of this dam upon the property of this corporation under the authority of the State of Connecticut.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from California?

Mr. WORKS. May I ask the Senator from New York a question?

Mr. ROOT. Certainly.

Mr. WORKS. Assuming what the Senator has said with respect to the franchise owned by the Connecticut River Co. and its ownership of the property as a riparian owner, would not the company have the right to divert the waters of the stream for its use so long as that diversion did not interfere with the navigable quality of the stream?

Mr. ROOT. It depends upon the action of the United States. If the United States chose to give its consent, it would.

Mr. WORKS. Has the United States any power to withhold its consent, so far as the mere matter of the diversion of the stream for beneficial purposes is concerned, except to preserve the navigable quality of the stream?

Mr. ROOT. It has.

Mr. BORAH. Mr. President——

Mr. ROOT. I yield to the Senator from Idaho, and when he has asked his question and I have answered it, if I am able to, I will ask to be allowed to proceed with what I have perhaps mistakenly considered to be an argument.

Mr. BORAH. I do not think the Senator will make any mistake about that; he never does. I was going to say that that raises the particular question about which we of the West are so greatly concerned, and if I do not interrupt the Senator's able argument I should like before he concludes that he would state for our benefit what right the National Government has in a stream except to protect navigation.

Mr. ROOT. I will try to do so, Mr. President.

Mr. WORKS. Mr. President——

Mr. ROOT. I was relieved when the Senator from Idaho finished his sentence regarding the raising of particular questions, for it would seem to me that this bill has raised not only particular questions, but particular disturbances.

The PRESIDENT pro tempore. Does the Senator from New York yield further to the Senator from California?

Mr. McLEAN. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Connecticut suggests the absence of a quorum. The Secretary will proceed to call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Cummins	Kenyon	Smith, Ariz.
Bacon	Curtis	Kern	Smith, Ga.
Bankhead	Dillingham	La Follette	Smoot
Borah	Dixon	McCumber	Stephenson
Bradley	du Pont	McLean	Sutherland
Brady	Fletcher	Martine, N. J.	Swanson
Brandegee	Foster	Myers	Thornton
Bristow	Gallinger	Newlands	Tillman
Bryan	Gamble	Overman	Townsend
Catron	Gardner	Owen	Warren
Chamberlain	Gore	Page	Webb
Clarke, Ark.	Gronna	Perkins	Wetmore
Crane	Guggenheim	Pomerene	Williams
Crawford	Jackson	Root	Works
Cullom	Jones	Sheppard	

Mr. ASHURST. I wish to announce that the junior Senator from New York [Mr. O'GORMAN] is absent on business of the Senate.

The PRESIDENT pro tempore. On the call of the roll of the Senate 59 Senators have answered to their names. A quorum is present. The Senator from New York will proceed.

Mr. ROOT. I yield to the Senator from California, who was about to ask a question.

Mr. WORKS. Mr. President, I am sorry to interrupt the Senator from New York after the statement made by him that he does not desire to be interrupted, but I asked him because the question presents the crux of this whole matter so far as I am individually concerned. I am morally certain that the answer of the Senator from New York is absolutely wrong, and I am equally certain that the Government, in dealing with this question, is acting upon precisely that wrong theory of the law relating to this subject.

Mr. ROOT. Mr. President, if I were less certain myself I should be shaken in my position by the expression of the Senator from California, for whose judgment I have very high regard. I wonder if the Senator from California realizes just what his question was; I wonder if the Senator from Idaho [Mr. BORAH] realizes just what his question was. Perhaps I have mistaken them, but I understood——

Mr. BORAH. Mr. President——

Mr. ROOT. I understood their questions to be whether the United States had any interest or right except to protect navigation or to preserve navigation—one of those words was used, I think one by one Senator and the other by the other—"to preserve or to protect navigation."

Mr. WORKS. Evidently the Senator from New York has wholly misapprehended my question.

259690

Mr. ROOT. I may have misapprehended the question the Senator from California meant to ask, but I think I accurately recall the question he actually asked.

Mr. WORKS. I think the Senator from New York is equally mistaken in that respect. My question was whether the Government of the United States had the right to prevent a riparian owner upon a stream from diverting water for beneficial uses so long as that diversion did not in any way interfere with the navigable quality of the stream?

Mr. ROOT. Yes. I have answered that question; but the other question was entirely different. The question was put as to whether the United States had any right or power except to preserve navigation.

Mr. BORAH. Mr. President, I put that question, and I repeat it, in order that the Senator may not be mistaken. What I want to know is, what right and what power the National Government has in the water of a stream other than to keep that stream open for navigation and to control it for that purpose?

Mr. ROOT. Mr. President, that is another question, but I think the Senators must assume that I would not undertake to detain the Senate on that subject without expressing some views on that particular point.

The right of the United States and the correlative duty of the United States in respect of navigable streams or streams that are capable of being made navigable is not only to preserve and to protect, but it is to promote, and, if it deems it wise, to make navigation; and the whole system——

Mr. BORAH. Mr. President——

Mr. ROOT. I want the Senator from Idaho to let me go on—the whole system, the great system of slack-water navigation, upon which we are spending money by the millions, is in the exercise of that function of the National Government to make navigation, not merely to preserve it, not merely to protect it, but it is to promote it, to extend it, to create it, and if, in the judgment of this Government, the diversion of the water from any stream is likely to interfere with the Government's making it navigable, it is the right of the Government to prevent that diversion.

Now, let me say that it is in the exercise of that function that a large part of the river-improvement work of the United States of recent years has been carried on. I will illustrate by recalling the minds of Senators to the improvement on the Ohio, on the Monongahela, on the Muskingum, the Little Kanawha, the Great Kanawha, the Big Sandy, the Kentucky, the Green, and the Barren Rivers. The United States is engaged in creating waterways which shall furnish control over the cost of transportation, creating waterways that will furnish new avenues of transportation, and it is entitled, it is its duty, to look ahead and see where not only to-day but to-morrow and next year and in the next generation it may be found for the best interests of our people that water communication shall be created by the methods of modern engineering.

It is well settled, of course, we all recognize, that the United States has plenary power to enter upon a system of river improvement, and if there be obstructions require them to be removed, or, if they are not removed, to remove them itself in order that it may discharge its function. It is well settled that a State has the right and the authority paramount over the rights of riparian proprietors to improve the navigation of the streams within the State for purposes of intrastate commerce, and that the United States has still paramount authority whenever that navigation forms a part, as it ordinarily does, of the avenues of interstate or foreign commerce to supersede the action of the State and itself to improve and to create navigation; and it is for the protection of that right and duty of the United States that it is made necessary to obtain the consent of the United States whenever anyone wishes to do work which will obstruct navigation. The consent in ordinary cases under the general law of an officer designated by Congress—ordinarily the Secretary of War—is required to excavations and constructions in navigable waters of the United States under the provisions of the river and harbor act of 1909, I think, which have been carried along since that time.

As to the building of dams, the consent of Congress has to be obtained, and we have passed carefully framed statutes to regulate the form in which the authority shall be granted and in which it shall be exercised.

Now, let me undertake to state some very simple propositions regarding the exercise of this power of the United States in regard to protecting the field of future navigation and the field of present navigation. The consent of Congress must be obtained for the building of a dam, whether that dam affects present navigation or prospective navigation.

The first proposition that I make—and it seems almost too simple to take up time in stating—is that Congress has the power to give or to withhold its consent to persons or corporations seeking to build a dam in a navigable river or a river that can be made navigable, whether that dam will or will not create water power.

Second. The power to give or to withhold the consent of the United States to the building of such a dam results from the right and duty of the Government to preserve and improve navigation under the commerce clause of the Constitution.

Third. The power to give or withhold consent to the building of a dam is absolute and uncontrolled, except by the discretion and judgment of Congress. No power on earth can compel Congress to give its consent or compel Congress to withhold its consent. That power is vested by the people of the United States in their Congress. No court can mandamus it; no court can enjoin it; no Executive can control it. The judgment of Congress alone must determine whether the consent be given or be withheld.

Fourth. The just exercise of the power to give or to withhold must be determined by reference to the object to attain which the power has been granted, and that is the object of preserving or improving navigation.

Fifth. Congress may impose conditions upon the consent which it gives in the exercise of its power to give or withhold. This right to impose conditions is inherent in the power. The right to give or to withhold carries necessarily the right to say, "We give, provided such and such things are done; otherwise we withhold," and that power to impose conditions is illustrated by the statutes which are ordinarily spoken of as the general dam laws. The statute of June 23, 1910, provides:

That in approving the plans, specifications, and location for any dam, such conditions and stipulations may be imposed as the Chief of Engineers and the Secretary of War may deem necessary to protect the present and future interests of the United States, which may include the condition that the persons constructing or maintaining such dam shall construct, maintain, and operate, without expense to the United States, in connection with any dam and accessory or appurtenant works, a lock or locks, booms, sluices, or any other structure or structures which the Secretary of War and the Chief of Engineers or Congress at any time may deem necessary in the interests of navigation, in accordance with such plans as they may approve, and also that whenever Congress shall authorize the construction of a lock or other structures for navigation purposes in connection with such dam, the persons owning such dam shall convey to the United States, free of cost, title to such land as may be required for such constructions and approaches, and shall grant to the United States free water power or power generated from water power for building and operating such constructions: *Provided further*, That in acting upon said plans as aforesaid the Chief of Engineers and the Secretary of War shall consider the bearing of said structure upon a comprehensive plan for the improvement of the waterway over which it is to be constructed with a view to the promotion of its navigable quality and for the full development of water power; and, as a part of the conditions and stipulations imposed by them, shall provide for improving and developing navigation, and fix such charge or charges for the privilege granted as may be sufficient to restore conditions with respect to navigability as existing at the time such privilege be granted or reimburse the United States for doing the same, and for such additional or further expense as may be incurred by the United States with reference to such project, including the cost of any investigations necessary for approval of plans and of such supervision of construction as may be necessary in the interests of the United States.

The act which is now before Congress reproduces by reference these conditions from the act of 1906, as amended June 23, 1910, and imposes a single further condition. I have ventured to take the time of the Senate in reading this condition imposed by existing general law, because I think in this discussion we have wandered far away from the true nature of the particular bill which is reported by the committee. I venture to say to the Senate that this bill does nothing which is not in its nature identical with the imposition of the conditions contained in these general dam acts.

Mr. CUMMINS. Mr. President, I should like to understand one proposition that the Senator from New York announced a moment ago.

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Iowa?

Mr. ROOT. I yield.

Mr. CUMMINS. Possibly I misunderstood it, but as I heard it the Senator from New York declared that no dam could be constructed in a navigable stream, nor in a stream that might be made navigable, without the consent of Congress. Have I correctly stated the proposition?

Mr. ROOT. The consent may be an implied consent with regard to a nonnavigable stream. If Congress should undertake to make the stream navigable, it can sweep away the dam that has been built, require it to be removed, or remove it itself.

Mr. CUMMINS. But the Senator from New York did not mean to say, I assume, that a dam built across a nonnavigable stream becomes instantly an unlawful structure?

Mr. ROOT. No; I did not. I do not consider that it does.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Idaho?

Mr. ROOT. Yes.

Mr. BORAH. The Senator stated a few moments ago that we could not compel Congress to give its consent to the construction of a dam, and therefore when it did give its consent it could attach such conditions to it as it saw fit. That is true, in a certain sense, but suppose I put the reverse of that proposition. Suppose some one does construct a dam in a navigable stream, and he is asked to take it out, and he discloses beyond question that it does not interfere with navigation, can he be compelled to take it out?

Mr. ROOT. Mr. President, Congress itself, the Government of the United States itself, must be the judge of that.

Mr. BORAH. Mr. President, I dispute that proposition. The Supreme Court of the United States is the judge of that question, and it will determine it. If it does not interfere with navigation, the person who has constructed the dam can not be compelled to take it out.

Mr. ROOT. If it interferes with the purposes of the United States to create navigation, its removal can be compelled.

Mr. BORAH. That does not change the position I have taken. It must interfere with navigation.

Mr. ROOT. Then the position that the Senator takes does not interfere with the position I take.

Mr. BORAH. But it completely answers the proposition that only one party has an interest in the stream.

Mr. ROOT. I made no such proposition at all. On the contrary, I started with the proposition, and I will restate it, that the only interest the United States has is the interest of preserving and promoting navigation or creating navigation.

Mr. BORAH. Mr. President, that is precisely the position I took in regard to it when I asked the question—whether or not the United States had any interest in the stream except that which relates to navigation.

Mr. ROOT. Ah, Mr. President, that was not the question the Senator asked; but I will ask the Senator not to detain me by going back to discuss questions that have been asked and answered.

Mr. BORAH. Very well; I shall not detain the Senator; but I would like the Senator, when he looks over the RECORD, to see that that is the question I asked.

Mr. ROOT. I will now make my apologies to the Senator from Idaho on the assumption that I shall find that he is right and I am wrong regarding the question that he asked.

I think I was about to state the sixth proposition in the series which I was undertaking to state; that is, that the just limitation upon the conditions to be imposed upon the exercise of the power to grant or withhold consent to the construction of a dam in a stream that is navigable or to be made navigable is to be found in the interest to subserve which the power has been granted to Congress—that is to say, the interest of navigation—and that there is no other limitation upon the just exercise of that power. Congress can not be compelled to grant its consent or to withhold its consent. It may impose conditions upon the granting of its consent, and a refusal to accept the conditions is a refusal of consent. The conditions which it imposes should justly be adapted to promote the interests for which the power to consent was conferred upon Congress—that is to say, the interests of navigation.

The seventh proposition is that Congress alone can determine whether a given condition does or does not subserve those interests. Congress alone can determine the question, because Congress alone has the power to grant or to withhold the consent.

These propositions are so elementary, so simple, that I do not apprehend any controversy about them. But, sir, they lead inevitably to the conclusion that when Congress imposes as a condition of granting consent to the construction of this dam the requirement not only that a lock shall be provided for the passage of vessels but that a part of the proceeds of the water power developed shall be applied to the improvement of navigation of the stream Congress is acting within its power and is performing the duties that the Constitution imposes upon it to preserve and promote the interests of navigation.

There is another line of thought which leads from accepted premises inevitably to the same conclusion. It frequently happens, when one in this illogical world happens by chance to be right, that different lines of consideration will be found converging to the same conclusion. I have reached the specific conclusion of the competency of Congress to impose this condition by considering the nature of the power to give or to withhold consent. Let me now take another line.

The report prepared by the Senator from Minnesota [Mr. NELSON] as chairman of a Subcommittee of the Judiciary of the Senate, acting under a Senate resolution which called upon the Judiciary Committee to give an opinion regarding the power and authority of the National Government over the development and use of water power, treats of the power of the Federal Government to take possession of a portion of the stream and of its banks, and to construct works for the purpose of improving or creating navigation. That report has been referred to frequently here in the course of the argument, and I will state just what it is.

In the Sixty-second Congress, I think at the first session, the Senate passed a resolution directing the Committee on the Judiciary to report to the Senate as early as possible at the next regular session of Congress upon the power and authority of the National Government over the development and use of water power within the respective States, following that with a series of specific questions on the subject.

The Judiciary Committee referred that matter to a subcommittee of which the Senator from Minnesota [Mr. NELSON] was chairman; and the Senator from Minnesota prepared a very careful and very able discussion of the subject. With that paper, as a member of the subcommittee, I was prepared to agree in general, and I joined in reporting it to the Judiciary Committee. It was the subject of extended discussion in the Judiciary Committee, and such a difference of opinion was developed in the committee that the committee came to the conclusion that it had better deal with concrete cases than undertake to report to the Senate an essay upon a general topic, and accordingly it has never reported.

In that statement, which was reported to the Judiciary Committee, were some propositions regarding the matter to which I am now addressing myself—that is, the power of the Federal Government itself to construct such a dam as this that is under consideration, and itself to improve navigation by the expenditure of its own money—and the further view, that in case the Government, in the course of improving or creating navigation upon a stream, incidentally develops water power, it has the same right that any other property owner has to make that contribute toward the performance of the work.

Let me read a few sentences from the statement of the Senator from Minnesota:

> For the purpose of promoting and regulating foreign and interstate commerce Congress is given plenary power over all the navigable waters of the United States to the end of improving and maintaining their navigability; and this power is not limited to the navigable sections of streams, but extends to the tributaries and feeders of the same, for without the control of these the power over the navigable sections might become wholly impotent. (United States v. Rio Grande Co., 174 U. S., 690.) Neither can any limits be placed upon the methods of improving the navigability of streams nor upon the means by which commerce can be carried on upon the same.
>
> Science has in recent years evoked from the great storehouse of nature the hidden and well-nigh limitless power of electricity and utilized the same in various ways for the promotion of commerce, industry, and the domestic and social well-being of mankind. The bounds of such power and use can not well be defined or foretold. That such power has become and may still much further become one of the great instrumentalities of commerce is evident. While sail, aside from the oar, was the only known motive power on water, the limits of navigation was confined to tidewater. The discovery of steam extended navigation on our streams far beyond the limits of tidewater, and who can tell how much further hydroelectrical power generated by a dam in a stream may extend navigation on that or some other stream? The water in a stream may not only be used to float and carry a vessel, a boat, or a barge, but it may also be used to furnish the motive power for the navigation of the same. And a dam erected in a stream carrying interstate commerce can well be utilized for this double purpose; and Congress, having jurisdiction over the improvement and regulation of an interstate navigable stream, has ample power to resort to all reasonable means for the improvement of navigation and the promotion of commerce on such a stream. (Gibbons v. Ogden, 9 Wheat., 1.)
>
> If for the purpose of improving the navigability of a stream carrying interstate commerce the Federal Government constructs and maintains a dam, with locks and gates, the Government has the undoubted right to establish and maintain, in connection with such dam, an electric-power plant for the purpose of furnishing motive power to operate such locks and gates. And the Federal Government has the right to sell, lease, or rent, for compensation, any surplus power that may arise from and be an incident to such an improvement of navigation. (Kaukauna Water Power Co. v. Green Bay & Mississippi Canal Co., 142 U. S., 254.)

In considering those statements we must bear in mind that when Congress undertakes to construct a dam it of necessity becomes the riparian proprietor, and, subject to minor statutory modifications in all the States that follow the course of the common law, as Connecticut and Massachusetts have followed it, the riparian proprietor has the right to the usufruct in the flow of the water.

We talk about ownership of water. Senators have discussed the question whether the State owns this water or the riparian proprietor owns this water, and have seemed to be impressed by the idea that the United States was attempting to assert ownership of the water. Mr. President, under the system which

prevails in Connecticut and Massachusetts, and generally in the States following the common law, there is no ownership of running water whatever.

Both the rights of the riparian proprietor and the rights of the State are based upon the old maxim that water runs and ought to run as it has been accustomed to run. The riparian proprietor is entitled to whatever benefit may come from the flowage of the water past his door. Whether the riparian proprietor owns the bed of the stream or the State owns the bed of the stream makes no practical difference, for if the riparian proprietor owns it he owns it subject to the public right of passage and in general of fishery and the public right to have the water flow on for the benefit of all below on the stream.

Mr. President, that does not apply in the States which have established the right of prior appropriation. The so-called arid or semiarid States have adopted, by the necessity of the conditions existing there, a different system, and any discussion of the rights of the Government and of the propriety of legislation in those States would necessarily have to proceed upon different lines and from different starting points than a discussion of legislation relating to water rights in one of the old States which proceed according to the common law.

If the riparian proprietor owns the bed of the stream, he owns it subject to the common right. If the State owns the bed of the stream, the State owns it as trustee for the public, for the preservation of those same common rights, and subject to the rights of the riparian proprietor. There is and can be no conflict between the two, and the question of title to the bed of the stream is quite immaterial.

I have said that when the Government enters upon an enterprise of this kind it of necessity becomes the riparian proprietor, for it can not build a dam without title, and it can not take property without compensation. So it in some manner acquires the title, and having acquired the title its title is good, because it is acquired in the exercise of its clear and unquestionable constitutional rights and the performance of its constitutional duty. The title is as clear as a title to land acquired for a post office or a customhouse or an Army post.

Having title, two things follow: One, that it is entitled to use the property it has acquired for this constitutional purpose in every way that would be lawful for anybody else seeking to accomplish such a purpose; and the other, that it has right to such use of it as any other proprietorship gives to the owner of property. That being so, the right to sell or lease the water power or the electricity created by the water power from the increased flowage caused by a dam built by the Government in the exercise of its constitutional functions to improve navigation is a necessary incident to the performance of the function.

Mr. President, so long as it is competent for the Government of the United States to go upon the Connecticut River and build the dam described in this bill and so long as it is also competent for the United States to apply the power produced by its building of the dam to promote the interests for which it builds a dam, it follows necessarily that the Government of the United States can avail itself of the instrumentality of this corporation to cause the same thing to be done. It has as clear a right to make a contract with this corporation to do that thing which the Government can do itself for the promotion of its interests in the performance of its duty to improve navigation as it has to hire a contractor to dredge the Potomac to improve the Washington channel.

Let me call your attention to the real situation as it exists in the Connecticut River. Three years ago the Board of Engineers for Rivers and Harbors reported to the War Department regarding the improvement of the navigation of the Connecticut River, and in their report occurred this statement, which I read:

> The difficulty of surmounting the Enfield Rapids involves such an expenditure that unless water power can be developed in connection with the improvement, the work can not be justified under present conditions. If the coordination of water power and navigation interests can be effected in such a manner as to permit the development of both at a cost to the United States not out of proportion to expected benefits to general navigation and commerce, the improvement will become justifiable.

There is the attitude of the United States toward this improvement of navigation. Then comes to the Government of the United States the Connecticut River Co. and says, "We will improve this navigation if you will give your consent that we build a bigger dam than we have now. We will improve this navigation; we own the banks; we have the corporate capacity and the authority from the State of Connecticut; and if you will consent we will do what your engineers have declared you could not afford to do unless the expense could be in some part borne by the power that was created." And the United States in this bill will say, if we pass it, "Yes; we will avail ourselves of your instrumentality to do what we could not afford to do except by taking and selling power, provided you will agree that a reasonable charge upon what you make by the end of the business that you are specially interested in, that is, the water power, shall be turned over to be applied to the improvement of navigation upon this stream and its connected waters. That is to say, we will consent to your improving this navigation provided you will do two things for the benefit of navigation; one, improve the navigation at this point, and the other, contribute to improving the navigation of the whole stream."

Mr. President, a waterway is a whole. Navigation at a particular point does not stand by itself. The streams that we have been working upon for many years we improve step by step, mile by mile, beginning with a dam here, making a pool above it, and going on and building another and another and another. Each is as much a whole as any transcontinental line. The Supreme Court of the United States based its decision in the Rio Grande case in the one hundred and seventy-fourth United States upon that proposition, that although the portion of the Rio Grande, the treatment of which was called in question, was not navigable, nevertheless, the Rio Grande must be treated as a whole, and the treatment of that nonnavigable part must be considered with reference to its effect upon the navigation of the lower part of the stream. Therefore, Federal authority could deal with it.

Upon no other ground, sir, do we justify ourselves in the purchase of Appalachian forest reserves except to preserve and give out gradually the water which flows down through the navigable streams of the Atlantic seaboard.

From the mouth to the source and in all the contributory feeders a water system of navigation must be treated as a whole; and that is what this condition does.

It treats the Connecticut River system of water transportation as a whole, which, for example, will enable the people of that region, that hive of industry, to have the benefit of competition with the New York & New Haven Railroad.

The justice of the remarks which I have just made is very acutely presented by a consideration of the charter of the Connecticut River Co. Something was said here the other day about the motive of building this dam, and I undertook then to say that there were ordinarily two motives in such a transaction. Some Senator had been speaking about the motive of this company as being to create power and not to improve navigation. It seems quite plain that in most transactions in this world there are two motives. If I get upon a street car to go from the Capitol to my home, my motive is to get home; the motive of the street car company is to get my 5-cent piece. It is difficult to conceive of a bargain in which the promisor and the promisee have not each a different motive. In this case, Mr. President, I assert that the motive of the United States is the improvement of the navigation of the Connecticut River system of water transportation and that, if this bill be passed, we shall be availing ourselves of the willingness of this company to subserve that great constitutional purpose of our Government in no other way than I avail myself of the service of a street car to subserve my purpose of getting to my home from the Capitol. The fact that the company may have a desire for a profit does not affect the rights, powers, and duties of the United States Government to go on and subserve the interests of navigation upon that river any more than the fact that a dredging contractor is moved by the motive of profit rather than the motive to improve the stream which the Corps of Engineers employs him to dredge.

But, sir, this company is a company formed by the State of Connecticut to improve navigation. Its lawful purpose is and has to be to improve navigation. Here is their charter, passed in May, 1824:

> *Resolved by this assembly—*
>
> The Assembly of Connecticut—
>
> That John T. Peters, David Porter, Charles Sigourney, with all such persons as are or may be associated with them for the purpose of improving the boat navigation of Connecticut River, and their successors, be, and they are hereby, incorporated and made a body politic, by the name of The Connecticut River Co.

The charter goes on to say, after various details of organization:

> SEC. 7. That said corporation, for the purpose of widening the channel of said river, and deepening the same, shall have power to dig, cleanse, and remove obstructions from the channels and bars of said river, from and above the bridge at Hartford, to Springfield, and to erect and build wharves and piers and hedges in said river or on the banks thereof, as they may judge necessary.
>
> And said corporation is empowered to lock the falls at Enfield on said river, and to make channels to aid them, and to construct a canal on either bank of said river, near said falls, and to construct a dam or dams for the purpose of entering and leaving the locks in still water, provided the extension and form thereof shall be such as shall not prevent the convenient passage of boats and lumber down the river, nor obstruct the passage of fish; and said corporation shall have the right to procure and possess any steamboat or boats which they may judge necessary to commerce on said river.

Then there is the right of eminent domain; there is the right to purchase and hold stock of the several incorporated lock and canal companies upon the Connecticut River; there is the right to impose tolls upon boats passing up and down the river. There is a provision that—

Whenever the profits accruing to said corporation shall be more than 8 per cent over and above the annual expenses of improvements on said river, and the repairs of said locks and canals, and the works connected therewith, the commissioners shall have the right to reduce the toll allowed by this act.

Then there were from time to time amendments, one of which was passed in 1825, providing:

The capital stock of said company, so far as shall be deemed necessary and expedient, may be expended between Hartford and the north line of this State to Longmeadow and West Springfield in the State of Massachusetts, and also in improving said navigation above this State toward the sources of Connecticut River and toward Lake Memphremagog in the State of Vermont, as far as shall be deemed practicable and expedient, lawful authority for so doing being had and obtained.

That is from Vermont or Massachusetts.

You will perceive, sir, that this charter is a charter which looked to the improvement of the whole stream, the creation of a transportation line by the Connecticut River Co.

Mr. BRANDEGEE. I will say that the company was also incorporated by the State of Vermont.

Mr. ROOT. So I understand. I think I have read enough to indicate the character of this corporation, with the added statement of the Senator from Connecticut [Mr. BRANDEGEE] that it also received a charter from the State of Vermont consistent with this legislation of Connecticut. So, sir, we have a navigation company chartered by the States of Connecticut and Vermont, whose sole corporate purpose is to improve navigation, coming to the United States, whose sole constitutional purpose is to improve navigation, and it appears that the powers which this company had from the State of Connecticut and the powers which the United States Government has under the Constitution to improve navigation, which have lain dormant with regard to this river because it would be too expensive to make the improvements, may be called into activity by reason of the fact that, under the new discoveries in electrical engineering, it is possible to make the fall of the water over the dam that is necessary to improve the navigation contribute toward the performance of the work.

Here is something that this company was chartered to do, and which it can do if we consent; here is something that we have the constitutional power and duty to do. As a condition of our consent, instead of the company taking all the profit that comes from the fall of water at this particular point and putting it in their pockets, we impose the condition that they shall apply a reasonable amount toward the performance of their and our full duty, which is improving the navigation of the whole stream.

Mr. SMITH of Arizona. Mr. President, at that point will the Senator from New York permit me to interrupt him? I am much interested in his argument.

The PRESIDING OFFICER (Mr. FOSTER in the chair). Does the Senator from New York yield to the Senator from Arizona?

Mr. ROOT. Certainly; I yield.

Mr. SMITH of Arizona. The Senator concedes that they have a right to make this charge, but what application are they to make of it? How far can the Government apply the money obtained from these sources? In other words, must not the money brought from this power into the Treasury of the United States be used exclusively in the navigation of the stream, or can they devote it to a separate purpose?

Mr. ROOT. Mr. President, I conceive that the fund would be a trust fund in the Treasury of the United States, applicable only to the improvement of the navigation of that stream, using the term "that stream" in its comprehensive sense, with its feeders and connections. I conceive that to be quite clear from the language of this bill, and I think that it is right that it should be made so; although, sir, I do not consider that it is by any means clear that the Government of the United States may not create a general improvement fund, which might be used for the improvement of navigation elsewhere than upon the stream from which a particular fund comes. That question is not raised here, however. This bill proposes to confine the application of this trust fund to the improvement of the navigation of this river, to confine it to substantially the same limits which are laid down in the charter of this company as the measure of its duty.

Mr. President, there are two general considerations which affect this bill. I conceive that it does not materially affect the interests of the arid and semiarid States. I conceive that it does not raise any question about title or property or corporate franchises whatever. It is a simple case of the Government being asked for the same kind of consent that it has given a thousand times, and to impose a condition—a thing that it has done a hundred times—which is limited in its character to the attainment of the purposes for which the power to give or withhold consent is granted Congress, to impose a condition which will accomplish nothing more than the Government itself could accomplish by having contractors go on and do the work. I think the competency of Congress to pass the law and the justice and the wisdom of its passing the law are clear.

As I have said, however, there are two general considerations which have been much referred to in the discussion, both of which, it seems to me, lead to the same conclusion and tend to strengthen the duty of Congress to grant this consent upon this condition. One is the general consideration of the improvement of navigation. Of course we are in this country very far behind many of the older countries on the other side of the Atlantic in the provision which we have made for water communication. Our Government has spent many, many millions of dollars in improving the navigation of our streams; it has constantly engaged in that work; but, nevertheless, we are far behind the older countries. In recent times we have been developing a system of slack-water navigation, by which it is possible to carry water navigation far up into the region of the hills through which our great streams flow, and to give to the people living in the uplands the benefit of water lines in competition with the railroads; but it costs very much more to do that than it does to improve the navigation of streams running through level country. You can dredge out the channel of a stream such as the Hudson at comparatively little expense; but the State of New York is spending over a hundred million dollars in canalizing the Mohawk River, which runs through the hills by my own home, and the Oneida and Oswego Rivers, and in constructing canals to connect them with each other and with Lake Erie.

The question, I think, we ought to ask ourselves is, How shall we decide as between three possible courses of conduct? One is to do as we have, in general, done in the past, refrain from improving because it costs too much, costs more than the business to be developed would justify; or, second, shall we go on and improve these streams and tax the entire people of the country for the improvement? Or, third, shall we avail ourselves of this new discovery by which a stream can be made to improve itself, by which a stream can be made to pay the expense of fitting itself for navigation, so that this great work of internal improvement may go on? Which of the three shall we do?

Mr. President, of course it is very desirable that the flowage of streams converted into electricity shall be made available for the uses of the inhabitants along their banks; but is there nothing to be said for the paramount right, the paramount duty, we have to promote navigation? Is that to be left out of consideration when we are thinking of the possible utilities of this great new wealth that has been discovered, a wealth that riparian proprietors never dreamed of when they got their title to their lands? When for the public interest, when for the benefit of all the people of all our country, we consider the exercise of our paramount power as to the utilization of this new and hitherto unsuspected wealth are we to leave out of consideration altogether the one interest that we are charged by the Constitution with subserving, maintaining, and advancing?

This provision undertakes to discharge the duty of the Congress of the United States, as the preserver and promoter of water navigation, by requiring that a little fragment of this new wealth to be realized with our consent by this company, also bound to subserve navigation, shall be applied to that paramount purpose in this stream—a little fragment of it.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Colorado?

Mr. ROOT. Certainly. It is very pleasant for me to see the Senator from Colorado renew the situation of 30 years ago, when we first met in the Supreme Court of the United States.

Mr. THOMAS. Yes, Mr. President; that was our first meeting, with the Senator upon one side and myself upon the other, in an important controversy in which I was, of course, unsuccessful.

Mr. BRANDEGEE. I hope it was a parallel case to this.

Mr. THOMAS. Not entirely. My purpose in interrupting the Senator was to correct a possible impression which I might have created yesterday in my remarks upon this bill.

I recognize the paramount authority of the Government of the United States over navigable streams and its duty to all the people to improve them for purposes of navigation. But does not the Senator lose sight of the fact that this paramount power is being utilized as an agency or medium, through the

operations of the Government or by contract with private parties, whereby improvements in water power are effected? In other words, is not this great sovereign attribute of the National Government being utilized and degraded into an agency for the production of water power to generate electricity as an asset in the hands of these great corporations?

Mr. ROOT. Mr. President, that is a queer view to be suggested in support of opposition to requiring this great corporation to pay something to promote navigation. As I look back at the case in the Supreme Court of which we were speaking, it was nothing but the fact that I happened to be on the right side of the case that led to the conclusion the Senator has mentioned; and I am afraid he is in as bad luck now as he was then.

Mr. THOMAS. On the contrary, I may be in as bad luck in the outcome. But the fact that this great corporation is willing to spend huge sums of money in order that it may acquire a profit to itself, and is ready to agree, as the Senator from Ohio [Mr. BURTON] said, to enter into this agreement and to perform it, indicates that its purpose is to obtain, through the agency of the Government, a property in water which belongs either to the riparian owner or to the State, or to both, under the pretense that it is engaged in promoting and developing the navigability of the river.

I do not think any such power should be used for such a purpose unless it is done openly and without any pretense that it is being done for the improvement of navigation, independently of the fact that the power or the property, whatever it may be, which is created, instead of belonging to the Government, belongs either to the riparian proprietor or to the State, or both; so that the agency of the National Government in the exercise of a sovereign power is developed into a proprietary right and then conferred upon private parties for their benefit.

Mr. BANKHEAD. Mr. President——

Mr. ROOT. Mr. President, I am about concluding, and I will ask the Senator not to interrupt me further. I want to answer what has been said by the Senator from Colorado.

As I have already stated, this corporation, which is not a very big one, is the riparian proprietor, and it has from the State a grant of power and authority to do this thing. There is not anybody concerned but that corporation, trying to do what it was incorporated for, and the Government of the United States, trying to have it do what it was incorporated for. Of course it would not do it unless it could make some money out of it. Why should we spend our time objecting to having things done by people who are willing to do them when we can not compel them if they are not willing to do them? Of course this company expects to make money out of the power. What is objected to in the case of this bill is that we are going to require them to pay over part of the money they make toward the improvement of navigation.

Mr. THOMAS. That is not my objection.

Mr. ROOT. I am glad to hear the Senator say that. Perhaps he will vote for the bill, then.

Mr. THOMAS. No, no.

Mr. ROOT. In every transaction, sir, there are two motives. The seller has one and the buyer has another. The passenger has one and the railroad company or the steamboat owners have another. The Government, charged with improving navigation, finds that a corporation is willing to do for it what it can not conveniently or profitably do for itself to subserve its object. It has one object; the corporation has another. We would not consent to this if it were not a benefit to navigation. They would not ask the consent if it were not a benefit to their pocket. The question is whether there is reason in the proportion of things. The question is so often, however, whether the benefit to the pocket of the corporation is not a million times the advantage it gives to the public. The opposition to this bill is based upon the very provision which requires the corporation to contribute toward the object for which it was chartered and toward the object to which we are asked to give consent, instead of taking all the profit to itself.

Mr. THOMAS. Mr. President——

Mr. ROOT. I will conclude in a moment.

Mr. THOMAS. I should like to ask a question of the Senator.

Mr. ROOT. I will conclude in a moment and give the Senator full opportunity to discuss the matter.

There is one other great subject which this discussion touches, and any consideration of that, I think, must tend toward approval of the bill rather than toward opposition to it. That is the general subject of conservation.

Of course every candid mind familiar with the history of the growth and development of our country must realize that in the extravagance of our vast natural wealth the Government has given away franchises and property with a lavish hand, and that probably the time has come when it would be wise and reasonable for Congress, as trustee for the people, to exercise somewhat more care in conferring upon individuals or particular corporations large blocks of our natural wealth. The lavishness with which our natural wealth has been portioned out has applied equally to the States. Some States have been cautious, but some States have been very incautious and reckless in the way in which they have granted franchises and property rights to corporations. I think there is a general feeling throughout the country among the people of the States that there ought to be greater restraint exercised in that respect by the State governments.

We were waked up to that situation by a tremendous row being made. It required somebody to stand up and scream loudly before we realized it. I think reasonable, candid, thoughtful men must come to the conclusion, when they consider that subject, that we are under obligations to certain gentlemen who made so great a noise about this subject as to rivet the attention of the people of the country upon it. There are some Members of this body to whom I make my acknowledgment for the activity, the ability, and the persistency with which they have demanded attention to this subject.

The first thing that was done, and, in the nature of things, the first thing that could be done toward accomplishing this object was to put a stop—and we put a stop here in Congress and in our National Government—to the process as it applied to handing out valuable things that belonged to the people of the United States. In the nature of things, also, the complete stoppage of the process presently led to inconvenience, and people began to complain. We had a joint committee here, on which I sat for months, listening to testimony in which the two ideas were exhibited. I refer to the Ballinger committee. It was quite plain that there were two ideas, each one an idea that nobody need be ashamed of, but coming in conflict, because neither had adjusted itself to the other—the idea of stopping the wasteful and extravagant parceling out to individuals of the property of the whole public and the policy of utilizing our wealth for the benefit of the people of the country, and that can not be done without leaving somebody to make a profit by the utilization of that wealth.

A good deal of the opposition to this bill is the result of an impatience that is felt, and very naturally felt, by people in the West, over the long continuance of the cessation, the halt that was called, in order to prevent undue extravagance and lavishness and favoritism and all sorts of abuses in the way of handing over to individuals and corporations the public wealth.

The third step which must follow, if we do our duty and understand our business, is not to go back to the old plan of handing out public property to oblige this, that, and the other man because it will make activity and expenditure, but to evolve some reasonable method by which these great natural resources shall be not held for far-distant generations alone, but utilized in such a way that the public will get its fair benefit, and the individual will get only his fair benefit.

Nobody is going to dispute any of the things I have been saying for several minutes past. What is the conclusion? It is that when we deal with this bill we should deal with it, not upon the old plan, not upon the plan of stagnation, but trying to apply a reasonable view as to what shall be done in this instance in regard to the utilization of the wealth and the productive power that exists in this country.

Mr. President, you can not solve the question solely by reference to the old rules of property. They are not wholly adequate to produce a satisfactory conclusion. I am not afraid of having anybody think that I am unduly iconoclastic——

Mr. CLARKE of Arkansas. Progressive.

Mr. ROOT. Or progressive; not unduly so. I used to be a reformer; but I rode on a freight train, and the express train went by so fast that I seemed to be standing still. So I say I am not afraid of being misjudged in that direction when I say, as I do, that the old rules of property, which I would not disturb on any account—property which is one of the bases of civilization, and which we must protect—do not by themselves alone lead to an altogether satisfactory conclusion on this subject.

One reason why is that modern discovery and invention have produced a realization of the existence of wealth wholly unknown before. When this company was chartered by the State of Connecticut no one dreamed of any source of income for the company except from tolls. You see the charter treats of tolls and the regulation of tolls, how much they can charge and how they may be regulated.

It appears that now in doing the very work that was contemplated by this company for the improvement of navigation

out of which they expected to get a moderate profit by tolls they are creating wealth beyond the dreams of avarice. Nobody knew it when the charter was granted. Nobody knew it when the people bought their land. Nobody knew it when they exercised their right of eminent domain and took land from the farmers there.

All over the country there are vast reservoirs of wealth the existence of which nobody knew when lands were settled under the homestead act, when lands were purchased and when lands were granted; and while we must preserve the rights of the owners, yet so far as those rights are subject to lawful control, so far as those rights are subject to laws that existed when the titles were acquired, to laws under which the titles are held, so far we ought to see that by the application of those laws in lawful ways and without taking away anybody's right we give to the whole people of the United States such benefit from this great new work as they may lawfully have.

I say, sir, that the truest policy and the highest respect for every object which government is designed to subserve dictate that when we exercise an undoubted legal power and impose a condition upon the use by this corporation of this property some slight part of the wealth produced shall be devoted to the improvement of the navigation of that stream for the common benefit of the people of the United States.

Mr. WORKS obtained the floor.

Mr. BANKHEAD. Will the Senator excuse me one moment?

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Alabama?

Mr. WORKS. Certainly.

Mr. BANKHEAD. Before the Senator from New York takes his seat I should like to call his attention to a provision of the bill which he has been discussing so ably, and I should like to have his view about it some time, a little later, if he prefers to make it later.

Section 3 of the bill requires the Connecticut River Co. to construct a lock and equip it under the direction of the Secretary of War and the supervision of the Chief of Engineers, and the bill provides that when thus completed it shall be turned over to the United States Government free of cost. The bill makes no provision whatever for the company to turn the dam over to the Government. Therefore the Government is the owner of the lock and the Connecticut River Co. is the owner of the dam.

The inquiry I wanted to make is, if there is a power created out of this situation, whether it is in the lock which the Government owns or in the dam which the private company owns. There can be no power unless it is produced by reason of the construction of the dam which belongs now and always has belonged to the private owner. If there is surplus water and that surplus water is utilized for power, it is a surplus not needed at all for navigation. Does the Senator from New York think it does not properly belong to the owner of the dam?

Mr. ROOT. Mr. President, I think it properly belongs to the owner of the dam, subject to a charge imposed by this bill upon it as a condition to granting consent to build it.

Mr. BANKHEAD. I understand that.

Mr. ROOT. The Senator from Alabama asks whether the power is in the lock or in the dam. The power comes from the flowage of the water which is raised above the level by the dam. The lock does not produce any power.

Mr. BANKHEAD. Of course not.

Mr. ROOT. The dam raises the water and the fall of the water produces the electric power.

Mr. BANKHEAD. Certainly.

Mr. ROOT. The Senator from Mississippi [Mr. WILLIAMS] suggests to me a question which I will make bold to put to the Senator from Alabama, and that is whether the egg produces the chicken or whether the chicken produces the egg.

Mr. BANKHEAD. Mr. President, one word further and I am through. The Senator's argument on this whole question reminds me of two boys who went fishing. As they went along one said to the other, "If you will furnish the pole, and the line, and the hook, and the bait, you can have half the fish you catch." The other said, "Well, I will take what I catch, and you may have what is left." That is the whole question here.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had approved and signed the following acts and joint resolution:

On February 7, 1913:

S. J. Res. 156. Joint resolution to appoint George Gray a member of the Board of Regents of the Smithsonian Institution.

On February 11, 1913:

S. 3225. An act providing when patents shall issue to the purchaser or heirs of certain lands in the State of Oregon.

On February 12, 1913:

S. 7160. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors; and

S. 8084. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

SENATOR FROM COLORADO.

Mr. GUGGENHEIM presented the credentials of JOHN FRANKLIN SHAFROTH, chosen by the Legislature of the State of Colorado a Senator from that State for the term beginning March 4, 1913, which were read and ordered to be filed.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Connecticut?

Mr. WORKS. I yield to the Senator.

Mr. BRANDEGEE. I did not object to the reception of credentials, of course, but I hope as the matter will appear in the RECORD it will not be appealed to as a precedent for violating the unanimous-consent agreement. Under it no morning business is allowed.

The PRESIDING OFFICER. The Chair holds that the filing of the credentials of a Senator elect is a question of the highest privilege.

CONNECTICUT RIVER DAM.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8033) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

Mr. WORKS. Mr. President, the people of my State have a deep and an abiding interest in the question presented by this bill. We believe thoroughly in the doctrine of the conservation of the natural resources of the country, for with us the conservation of the waters of flowing streams in the State is a practical question. We are not in favor of conserving the waters in the streams to look at as they flow down to the sea, but for actual use by the people of the State.

It is for that reason, Mr. President, that I shall take up a very little of the time of the Senate in discussing the pending bill. In order to consider it intelligently, we must distinguish clearly in the beginning between the right of the National Government to deal with the question of the navigability of a stream and the right of the States and their inhabitants to use the waters of a stream for beneficial purposes.

The Senator from New York [Mr. ROOT] has stated very broadly the right of the Government in that respect. I am not disposed to question his view of the law with respect to the power of the Government to deal with the question of the navigable quality of a stream. For the purposes of this discussion I am willing to concede that the Government has not only the right to protect the navigation of a stream that is now navigable but that it has the right also to promote navigation and to make streams navigable that are not so now.

But when you come to the last proposition you must deal with the people who have acquired rights in the waters of the streams. So far as the use of the water is concerned, so long as it does not interfere with navigation, the Government has no power or control over it. That is a matter which must be dealt with by the States. Any right to the use of the water flowing in a stream, whether it be navigable or nonnavigable, is governed and controlled by the laws of the State and not of the National Government.

The Senator from New York has discussed this question as if it were one solely between the Government and this corporation. He has left out of account entirely the people who may become consumers under the corporation and who will eventually, as I will show after a little, be compelled to pay the charge that is imposed by the Government upon the corporation. What does the corporation care whether the Government imposes this burden upon it or not if it can, under the law, shift that burden to the people who take the power that is generated by the use of the waters of the stream?

In most of the Western States the old common-law right of a riparian owner to the use of a stream has been absolutely abolished by constitutional provision. In some of the States it is declared in terms in the constitution that the waters flowing in the streams in the State belong to the people. That was unnecessary. Without such a provision they belong to the State, and the people are the State. It is only a popular way of declaring the rights of the people of the State to the waters of the streams.

Every State in the West has statutory provisions under which rights to the use of the water in the streams may be acquired.

For example, in my own State we have statutory provisions providing for the filing upon the streams to be diverted for beneficial use by giving notice of the fact. The notice must state the amount of water proposed to be appropriated and the use to which it is to be applied. The right to the use of the water is acquired by complying with this statute. It may be done by a municipality, by the State, or by a private individual. So long as there are waters in the stream unappropriated any individual who may use the water for beneficial purposes has a right to enter upon the stream, make his filing, take out the water, and apply it to those uses.

That may be done, Mr. President, by a corporation that does not expect to use the water for its own purposes but to distribute and sell it to other persons as a means of making money. Whenever the water is diverted by that means and for that purpose the rates to be charged become subject to regulation, not by the National Government but by the State; and when you come to the question of fixing rates it is settled by a long line of authorities, not only in the State but by decisions of the Supreme Court of the United States, that the persons who take the water from corporations of this kind may be charged such rates as will repay to the corporation all of its fixed charges, interest upon its investment, and a reasonable profit to the corporation.

Now, what would be the result in this case under the well-settled rule on that subject? If, upon one of these corporations taking water from the stream for the purpose of carrying the water itself to a beneficial use, as in the case of irrigation or for the development and generation of power, the National Government should impose $100,000 for that purpose, that amount of money would be charged up by the corporation as a part of its operating expenses, and the consumers would be compelled to pay it. The fact that the money thus acquired by the Government is to be applied to the improvement of navigation on the river makes it no better. In that case the consumers of power furnished by this company will have to bear the whole burden of this improvement, which should, as in other cases, be borne by the whole people.

So there is somebody else interested in this question of the amount to be paid by the corporation besides the corporation itself. In fact, it has very little interest in the question, because it is entitled to have every dollar of the money that it pays out in that way returned to it by the consumers.

Let us apply that condition of the law to the provisions of this bill. It is unfortunate, Mr. President, that the right and desire of the State of Connecticut to have this privilege granted to this corporation should be complicated by the effect it is bound to have upon people in the Western States.

It is said that this is but one case, and that it can not be considered as a precedent that will affect other dealings with questions of this kind; but the truth about it is that that is just exactly what the Government proposes to make it, and that is the policy the Government is insisting upon in dealing with the question of granting rights of this kind.

The bill, after granting the right to construct this dam and lock, has this provision:

And provided further, That the Secretary of War, as a part of the conditions and stipulations referred to in said act, may, in his discretion, impose a reasonable annual charge or return, to be paid by the said corporation or its assigns to the United States, the proceeds thereof to be used for the development of navigation on the Connecticut River and the waters connected therewith. In fixing such charge, if any, the Secretary of War shall take into consideration the existing rights and property of said corporation and the amounts spent and required to be spent by it in improving the navigation of said river, and no charge shall be imposed which shall be such as to deprive the said corporation of a reasonable return on the fair value of such dam and appurtenant works and property, allowing for the cost of construction, maintenance and renewal, and for depreciation charges.

It is said here, Mr. President, that this is not intended to be a tax upon the water or to interfere with the use of the water, but for the mere privilege of erecting this structure in the stream. But what is the effect of it? The only purpose for which this structure is placed there is to divert and use the waters of the stream, and the tax that it imposes, as I have said already, will be charged up against the consumers themselves. Therefore, whether it is intended to be so or not, it is a direct charge upon the use of the water or the power that is developed by its use.

It is provided in the bill, in substance, that it shall not deprive the corporation of a reasonable return upon the cost of the structure. That shows an utter lack of appreciation of the law as it exists, because it will have no effect under the law upon the returns to be received by the corporation itself, for the simple reason that that charge, as I have already said, is imposed upon the people themselves and not upon the corporation, and could not deprive it of any part of the revenue that it is entitled to receive.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. FOSTER in the chair). Does the Senator from California yield to the Senator from Idaho?

Mr. WORKS. I yield to the Senator.

Mr. BORAH. I wish to make a suggestion in that connection. Suppose a public-utilities commission were created in Connecticut—I do not know whether the State has one or not—and this corporation should come before it for the purpose of having its rates fixed, the public-utilities commission in fixing the rates for this corporation would be compelled to include the charge which the Secretary of War is putting upon the corporation for the purpose of fixing rates for the consumers.

Mr. WORKS. Certainly. I have so stated.

Mr. BORAH. It would enter that under the law, not as a matter of discretion but as a matter of necessity, in testing the question whether the corporation was getting any return and its property was not being confiscated. You would have to insert that in the question of the expenditure.

Mr. WORKS. Undoubtedly so. Let me pursue the provisions of the bill a little further in order to show what is really intended by its provisions. There is another provision on page 5:

And the said corporation shall furnish to the United States, free of charge, water power, or power generated from water power, for operating and lighting the said constructions; and no tolls or charges of any kind shall be imposed or collected for the passage of any boat through the said lock or through any of the locks or canal of said corporation.

By that provision it is evidently intended that the National Government shall acquire some right to the use of this water, and acquire it without compensation, while the other consumers are compelled to pay for the power that they receive in that way and the added amount that the Government is imposing on the corporation.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Connecticut?

Mr. WORKS. I yield.

Mr. BRANDEGEE. The provision the Senator has just read is embodied in every bill of this character. It is one of the conditions imposed by the general-dam act, subject to which all these bills are granted.

Mr. WORKS. That may be so, but it does not make it any better.

Mr. BRANDEGEE. Of course not.

Mr. WORKS. If we have been erring in that respect, it is about time that the policy of the Government should be changed.

Again, it is provided in section 4:

That compensation shall be made by the said Connecticut River Co. to all persons or corporations whose lands or other property may be taken, overflowed, or otherwise damaged by the construction, maintenance, and operation of the said dam, lock, and appurtenant and accessory works, in accordance with the laws of the State where such lands or other property may be situated; but the United States shall not be held to have incurred any liability for such damages by the passage of this act.

That provision of the bill is entirely unnecessary. There is no reason why the National Government should attempt to protect the interest of the land owners who are under the control of the laws of the State and should be protected by the State. In other words, the Government is attempting all along through the bill to infringe upon the laws and the rights not only of the States, but of individuals within the State.

Then, the bill provides in section 5:

That upon the termination for any cause whatever of the authority, rights, and privileges granted hereby, or any renewal thereof, the United States may renew the same or the grant may be made or transferred to other parties.

The Senator from New York [Mr. ROOT] has insisted that this does not constitute a grant, that it does not convey any right to anybody, that it is nothing more nor less than a simple permit given to this corporation to enter upon the stream as it asks to be allowed to do; but it is provided that not only the Government may regrant to somebody else, but it also provides that the Government itself may take over this property and use it, and itself become a public-utility corporation. It further provides that—

Unless the grant is renewed to the original grantee or its assigns, as herein provided, the United States shall pay or require its new grantee to pay to said original grantees or its assigns, as full compensation, the reasonable value of the improvements and appurtenant works constructed under the authority of this act and of the property belonging to said corporation necessary for the development hereby authorized, exclusive of the value of the authority hereby granted.

The Government proposes to purchase not only the structure that is placed in the stream, but it proposes to take over this whole system by which power is generated and transferred to

the consumers. By what right may the National Government under a grant or permit of this kind, whichever we may call it, provide that it shall become the purchaser of the entire system of this corporation to be used for the distribution of power?

> Said improvements and appurtenant works and property shall include the lands and riparian rights acquired for the purposes of such development, the dam and other structures, and also the equipment useful and convenient for the generation of hydroelectric power or hydromechanical power, and the transmission system from generation plant to initial points of distribution, but shall not include any other property whatsoever.

The Government proposes under the bill to purchase not only the structure I have mentioned, but the riparian lands of the corporation and its entire system for the distribution of power. Then the bill provides that—

> The basis for determining the value shall be the cost of replacing the structures necessary for the development and transmission of hydroelectric power by other structures capable of developing and transmitting the same amount of marketable power with equal efficiency, allowance being made for deterioration, if any, of the existing structures in estimating such efficiency, together with the fair value of other properties herein defined, to which not more than 10 per cent may be added to compensate for the expenditure of initial cost and experimentation charges and other proper expenditures in the cost of the plant which may not be represented in the replacement valuation herein provided.

Mr. President, how can it be said under the various provisions of this bill that it is not a grant? If it is not a grant, what has the Government to buy of this corporation? What property interest is there as a result of the action taken by the National Government that could be bought by the Government itself?

These structures so placed in this stream are simply for the purpose of diverting and appropriating the water to beneficial uses. The question of the use of the waters of the stream is a matter with which, as I have said, the State alone may deal; the National Government has no power or control over it whatever—no right to legislate with respect to it; and certainly it has no right to impose a burden upon the corporation that must eventually be paid by the consumer, and thereby interfere directly with the use of the water by increasing the compensation necessary to be paid for it.

Let us consider just for a moment, Mr. President—for I am not going to take up much of the time of the Senate—the proposition submitted by the Senator from New York [Mr. ROOT], that the National Government has the right to promote navigation and to go to the extent of making a stream navigable that is not so already. If that be true, what becomes of the vested rights in the waters of the stream when the Government undertakes to pursue that course? Does the Senator from New York mean that the National Government may enter upon a stream of this kind, where all of the waters have been appropriated to a beneficial use, and destroy all of those rights and make it a navigable stream? Why, Mr. President, the right of one who has appropriated water from a stream and applied it to his land for the purpose of irrigation is a right that is just as sacred, just as tangible, as the ownership of his land.

Let us take a concrete case as illustrating what might be the effect of such an exercise of power. The Colorado River, that flows partly in this country and partly within the territory of the Mexican Government, is a navigable stream nominally; it has been recognized as such by treaties between the two nations. The waters of that stream have been appropriated under the laws of the State of California and applied to beneficial uses. There are hundreds of thousands of acres of land as fine and as fertile as can be found anywhere in the world that have been made so solely by the application of the waters of that stream to irrigation, thickly populated, and worth millions of dollars; yet, according to the doctrine of the Senator from New York, the National Government could enter upon the stream, so improve it as to make it actually navigable, and thereby destroy the rights of all of the people who are living upon those lands to-day. Do Senators believe that the National Government has any such right or power as that?

It may be, and for the purposes of this argument I am willing to concede it to be true, that the National Government would have the right to enter upon the stream and make it actually navigable; but when it does so it must make just compensation to every man who has acquired a water right in the stream. The National Government has no more right to interfere with the use of the waters of the stream than the State or its inhabitants have to interfere with the navigable quality of the stream. The two are absolutely separate and distinct; and the individuals in the State, or the State itself, notwithstanding the answer made by the Senator from New York, have a right to enter upon a navigable stream just as well as a nonnavigable stream and take out of it water for beneficial uses so long as the navigable quality of the stream is not interfered with. That is being done all over the western part of the country. Of course, the Government has a perfect right to interfere with such diversion of the stream if it is apparent that it is interfering with navigation, but its right goes no further than that. If we keep these two rights of the National Government and of the States and their inhabitants separate and distinct, there is no reason why we should make any mistake with respect to this matter.

I have not the slightest objection to the provisions of this bill for the erection of a dam. If the Government wants it and the corporation wants it and the people of Connecticut are satisfied, it does not make any difference to me; but whenever the National Government adopts the policy of imposing a fixed charge upon a corporation for such use of a stream, then I protest because of the consequences that will follow from such action, as I have already pointed out.

Mr. President, I have had no intention of discussing the legal questions involved here, because they have been thoroughly and most exhaustively discussed by Senators who have preceded me. I only desired to point out, in a very brief way, the effects that it seems to me would follow from the provisions of this bill, and to give my reasons in a brief way for objecting to its passage. I know it is said that the people who are contending against this sort of thing are contending against the conservation of our natural resources. Well, I am not afraid of any criticism that may be passed upon me for trying to protect the people of my State from being deprived of the use of water, every drop of which, at least in the southern part of the State, is necessary for actual use in the development of that portion of the State which in part I represent in this body.

It is for these reasons, Mr. President, and for these alone, that I am objecting to the passage of the pending bill.

Mr. BORAH. Mr. President, I regard this bill as opening up in a very broad and general way not only the subjects which may be properly associated with the bill, but the general subject of the proper treatment of the natural resources of the country. There was published yesterday in the CONGRESSIONAL RECORD a statement from which I desire to take a single sentence:

> Water power belongs to the people. The sites where it is produced should never be permitted to pass out of their hands, for only in this way can effective control be secured.

I agree with the statement that water power, in the proper sense, belongs to the people. I desire to discuss this matter in the light of that general proposition. Not only does the water-power question but the conservation question generally involve the proposition that our natural resources undeveloped in the proper sense belong to the people of this country. It is for the very reason that it seems to me the people's property is not being properly protected and their interest in it properly shielded that I desire to offer some criticisms of this bill.

Before taking up the bill proper, I am going to call attention, in a general way, but briefly, to the subject of conservation and to the proposition that we are wandering away from the rule that the resources belong to the people, and that we have reduced the conservation movement almost entirely to a revenue proposition. We are tending more and more to get all out of our resources possible in the way of revenue and less and less toward making these resources available to those of limited means.

As the conservation movement was inaugurated in the first instance very few people could find fault, and very few people did find fault, with the theory or the principles upon which it was organized. The original purpose of the movement was to protect our natural resources from waste and from monopoly, and certainly to that extent no right-thinking person could object to the policy or purpose of the movement. But in the practical application of those principles the people have either been lost sight of or by reason of the difficulty of applying the principles they have been ignored to such an extent that they are not getting the benefit of this conservation movement. Those who desire to see the natural resources of the country protected from the old system which at one time prevailed must necessarily find some practical means to apply these principles, or the conservation policy will break down of its own weight. Unless these natural resources can be made beneficial to the people generally, unless they are going to receive some benefit which is substantial in its import, a policy which is bound to be expensive will in the end fall of its own weight.

I see no reason why conservation should not work to the benefit of the people. In saying this I do not wish to be misunderstood. I do not desire to leave the inference that those responsible for the administration of our policy are knowingly or corruptly favoring a few to the injury of the many. I assert, however, that that is the effect in many instances of the

present policy. I do not believe that any considerable portion of the people of the West are opposed to the theory of conservation, and they are not opposed to an intelligent, practical application of the theory of conservation. The great majority of these people have a well-settled and most earnest desire to see the great natural resources of our country conserved—protected from waste and monopoly. But they believe that it is practicable and also indispensable to a permanent and successful policy of conservation that we not only withhold these resources from waste and monopoly, but that they should be utilized and dedicated to the benefit of the people.

The most important thing which we have to consider in regard to this matter is, first, whether or not the policy is being administered in such a way as to aid the people generally or to give them any benefit, and, second, if not, what changes should be made in order that they may have the benefit of these natural resources?

It will be said, I presume, that I am wandering far afield, for the reason that this bill in large measure relates to a local situation; but it is now pretty generally understood that it is the initiation of a policy with reference to these matters, and if I view this bill and the proposed contract under it correctly and have a proper conception of them, they are going to lead to a condition of affairs where the people generally, to whom it is said this property belongs, will have absolutely no protection whatever.

I do not for a moment question the good faith of those who advocate this measure with its peculiar addenda; but if we can demonstrate that they are putting a load upon the people's property which the people can not bear, in order to enjoy the property, we will certainly demonstrate that, even though it does belong to the people, we are not properly administering it; and if I, as I say, read this contract correctly or the bill and contract which has been made under it, so far as those to whom it is said the property belongs are concerned, they have no protection from what might prove so burdensome as to make the "people's property" worthless.

But before going into that, I am going to go a little further upon the general proposition of the conservation movement. I read from a speech delivered by President elect Wilson at Chicago a few days ago. It will not be charged that the President elect is embarrassed by the prejudices or the preconceived opinions which, it is stated, attach to people who come from the West and have come in contact with the conservation movement. It will not be said, either, that he is opposed to the conservation policy; and yet he has stated with searching accuracy the defect of the present conservation policy and has suggested the very thing for which we for a good while have been contending in vain. He says:

> In the first place, we have to husband and administer the common resources of this country for the common benefit.
>
> Now, not all business men in this country have devoted their thought to that object. They have devoted their thought very successfully to exploiting the resources of America, but very few business men have devoted their thought to husbanding the resources of America; and very few, indeed, have the attitude of those who administer a great trust in administering those natural resources. Until the business men of America make up their minds, both to husband and to administer as if for others, as well as for their own profit, the natural resources of this country some of the questions ahead of us will be immensely difficult of solution. It has come to be believed, and I repeat what is generally believed to be true is true, that the raw materials—the resources of the country as yet undeveloped—are not as available to the poor man who needs them most as to the rich man whose need is for raw material to exploit to his further gain.

Mr. President, in my judgment, that states the indictment accurately against the present trend of the conservation policy. It is removing farther and farther from the poor man or the man who needs them most these resources, or making it more difficult for him to receive any benefit whatever from them. The expense, the red tape, the procrastination, and the expenditures, not only upon the part of the man who desires to enjoy the resources, but upon the part of the Government, have raised such a barrier that a man of limited means can not now approach the natural resources of this country. Our forests, our timber, our coal, our power sites, and the other great natural resources of the country are being removed from all those who have not a vast amount of means to acquire them. Our agricultural lands and those things which have heretofore been supposed to be within the reach, or designed to be within the reach, of the man of most limited means have been placed practically beyond his reach. The great desire to secure revenue has overriden and come in contact with the desire to reach the man of limited mean, and the former theory is prevailing.

> These things are wrong. We must not try to say how justice must be meted out or how resources may be available, but we must see that they are equally available.
>
> Some of our difficulties have arisen from the fact that we did not start with the correct premise. We must remember, and you must not cause people to believe otherwise, that reservation is not conservation.
>
> Reservation is not conservation, where a national life grows as rapidly and as surely as American life grows, for mere reservation—which is a synonym for delay—and preservation, which is old fashionedism, in the future are not true conservation.

It is said that the West, Mr. President, is opposed to conservation. I do not believe that 3 per cent of the people of the West are opposed to conservation; but we are opposed to reservation. Reservation withdraws and locks up. Conservation, when rightly understood, conserves those resources for the use and benefit of the people generally. Reservation must necessarily, I presume, to some extent precede conservation and to that extent is not to be opposed. But the fact is we have never gotten beyond the point of reservation. The proposition of making these resources available and useful and beneficial to all the people is true conservation, and that stage in the work we seem not yet to have reached. Our coal lands, our power sites, our agricultural lands to the extent of vast areas, our mineral lands, are all withdrawn, locked up, sealed, and delivered over to eternal night. How we shall unlock them without permitting them to be wasted and monopolized has not yet been determined. It is easy to withdraw these resources from use. It is far more difficult to provide the means by which to give the people the benefit of them after they are withdrawn. But we must determine how this shall be done or our whole plan will come to naught. Those who are opposed to any policy of conservation at all, who would go back to the old system, could have no better advocate of their cause than the incomplete, impracticable, theoretical, red tape, stifling, harassing system with which we are now burdened. I do not myself want to see the old system return. But I know that must be the result unless we insure the people some of the benefits which the people were promised in the beginning.

Now, as was said by the Senator from New York, and justly said, a great deal of credit is due to those who inaugurated this movement. It was necessary, in a certain way, to tie up the natural resources in order that they might be protected from the monopolists or those who were grabbing them upon a large scale; but now the time has come, and has been here for some time, when we must either find a policy of conservation which means practical application of its principles, or else, as I have said, this policy is going to break down of its own weight. I am going, briefly, to illustrate what I mean by beginning with our Forestry Service. Before I do so, however, I want to read another sentence from the President elect's address, because it states the other proposition with which we have to contend:

> We must devise some process of general use; and why have we not done so? Why, if I am not very much mistaken, because the Government at Washington was tremendously suspicious of everybody who approached it for rights in the water powers and forest reserves and mineral reserves of the great western country which the Federal Government still controls.

Mr. President, the President elect there has stated three propositions which most succinctly state the objections which the western people have to the present method of administering our natural resources. First, that they are being removed from the man of limited means; secondly, that they are being administered upon the policy of reservation, a locking up; and thirdly, that the administration has been unduly controlled by a prejudice against those people who have approached the natural resources with a desire in good faith to utilize them. There was some justification for this suspicion, because there can be no question that before the conservation policy was inaugurated there was a grabbing of the natural resources. A great many things had been done which ought not to have been done; but it does seem to me that it is possible to secure an administration of this policy which will discriminate between the man who is doing wrong and the man who is doing right.

The difficulty at the present time is that the impediments, the embarrassments, and the difficulties are just as great and just as strong against the bona fide dealer as against the man who is charged with fraud. Take, for instance, our agricultural interests and our homesteaders—and I confess that they are much nearer to my heart in this matter than any other part of the people who are seeking to use these resources, because they are building up our country—the policy of the Government's agents is to go to the land office and throw a blanket contest over every proof that is offered by a homesteader. They either do not provide means or else they do not know of any means by which to give the man who is there in good faith and with limited means the benefit of his good faith and to impede the man who is there in bad faith; they do not have any rules and regulations which discriminate between the two. They simply offer a blanket protest, and the man of limited means, who is there in good faith, must go to the same expense,

suffer the same delay, endure the same hardships and the same adversity as the man who is a criminal and who is there for the purpose of stealing.

I am not mistaken as to the situation. Neither do I exaggerate it. I have the good fortune to live in that country. But that alone is not sufficient to give one accurate knowledge of the true situation. You must go out and see for yourself—you must visit the settlers and see their surroundings and the adverse conditions with which they contend. That for the last five years annually I have done. You must inquire for yourself as to the business interests which are seeking, many in good faith and some in bad faith, to develop these resources. You must look upon these rangersteads for yourself and see how they are located. You must see these things in order to realize that this conservation policy has been wrenched wholly from its original purpose. I repeat, Mr. President, that in saying this I do not charge corrupt wrongdoing. But I do charge that suspicion, and prejudice, and procrastination, and red tape, and an utter lack of information gained at first hand have led to precisely the same result.

Mr. SMITH of Arizona. They make it as hard for one to get it as the other.

Mr. BORAH. Yes. Mr. President, we have an immense forest reserve in this country. When you come to measure it by the size of the old countries, it seems tremendous indeed. According to the report of the Forestry Bureau, filed this year, we have about 190,000,000 acres of forest reserves; that is, land which is in the forest reserves. The larger portion of this land has timber upon it. On page 33 of this report, the Forester says:

> The national forests contain nearly 600,000,000,000 feet of merchantable timber. Nearly 350,000,000,000 feet are ripe for the ax and deteriorating in value, rapidly on areas swept by fire, gradually on areas where the forest is mature and the trees are slowly yielding to decay.

Nearly 350,000,000,000 feet of lumber, ripe and ready for the ax, ripe; and yet, under our present system, you can not purchase that ripe, ready to fall, and rotting timber any cheaper of the Government of the United States by reason of the fact that it is in a reserve than if it were owned and controlled by private companies, of whose prices the Government is complaining. The man of limited means or the man who desires to build a home can receive no possible benefit from the fact that the forest reserves have 350,000,000,000 feet of lumber that ought to be out of them, and which it would be greatly to the advantage of the forest reserves if it were out of them. In this connection I call attention to an editorial in the Saturday Evening Post, a paper which has been a supporter of conservation:

> PHILADELPHIA, *January 25, 1913.*
>
> SELLING GOVERNMENT TIMBER.
>
> The Government's windmill battle against monopoly is admirably illustrated by its timber policy. Its own reports show a monopolistic situation with regard to standing timber.
>
> An important part of the total supply, aside from that owned by the Government, is in few hands. A rise of more than 60 per cent in the price of lumber since 1897 indicates that owners of the commodity have had a leverage on the market.
>
> Now, the Government itself owns one-fifth of all the standing timber in the country, many billion feet of which are ripe for the ax and even deteriorating from overripeness. In offering this ripe timber for sale the Government "makes a close estimate of the cost of manufacturing it into boards and of the market price of the product." It then fixed a minimum selling price, based on the two foregoing factors, which will "give a fair operating profit to the purchaser on his investment, but no more."
>
> The words quoted are from the report of the Secretary of Agriculture. Obviously under this policy the Government's timber can never be sold on the market any cheaper than the monopolized timber in private hands is sold, because the Government's price is based on the market price; and the market price, of course, is fixed—or largely controlled—by private owners of timber.
>
> If private owners boosted prices 50 per cent, the price of Government timber would automatically advance 50 per cent; and, though the public owns one-fifth of all the standing timber of the country, it can not get lumber any cheaper than private owners offer it.
>
> Another effect of this policy is that the Government's ripe timber is not cut, but stands and decays. The "fair profit on his investment, but no more," which the Government offers to the timber operator, does not attract him, as is shown by the fact that it is selling only one-tenth of the timber it should sell to keep the forests in a healthy condition.
>
> Having adopted a policy that in fact amply protects monopoly at every point, the Government then goes through a great rigmarole of restrictions and conditions designed to prevent its timber from falling into the hands of monopolists.
>
> The whole thing beautifully illustrates our antimonopoly policy, which consists in putting a lot of words on paper and ignoring essential facts.

Why, Mr. President, it would be far better for the reserve if private individuals were invited to go in there and take out the ripe timber free of charge than to leave it there in its present condition.

I want to say, in passing, that I do not think the Chief Forester should bear the entire brunt of this situation. I realize the fact that in all probability, under the present laws and the present conditions, it would be very difficult for him to administer the law in a different way. But here are the facts stated by the Chief Forester; and they present to the Congress a condition with which the Congress must deal, or else, as I say, this forest-reserve policy will break down of its own weight, because it is benefiting no one. In addition to that, it is very expensive, costing the Government from five to five and one-half million dollars per annum.

A few days ago, while I was traveling upon a train from the West, a gentleman who is largely interested in timber in the West told me he trusted the forestry policy of the Government would not be changed. I asked why he thought there ought not to be any change. He told me that he had just purchased a sufficient amount of timber to run his sawmills for three years. He had been relieved of insurance, of buying the timber, and taking the chances of fire; the Government had kept it intact, had relieved him of insurance, and had sold it to him. I asked him if, by reason of that fact, he would be able to undersell his competitors in the market and the people would get the benefit of it. "Oh, no," he said; "certainly not. We fix the price before it reaches the retail dealer or the consumer."

Practically every foot of this timber, when it passes out in such an amount as in any way to affect the market, must pass through the hands of the people who are now in control of the market and fixing the price of lumber before it reaches the ultimate consumer. What are we going to do? Are we going to continue to hold these lands in reserve and pay out five and a half million dollars a year for administering the reserve, and still deprive the people of any possible benefit, putting them in the same relation to the timber organizations of the country as they have been before? If so, as I say, undoubtedly in time the people will get tired of that policy.

We do not desire to throw these timber lands out of the reserves. So far as the West is concerned, there is no considerable sentiment in favor of that course. Neither is there any considerable sentiment, so far as I know, at the present time and under present conditions, in favor of turning these timber lands over to the State. But one of those two things will in the end happen if the National Government can not get that 350,000,000,000 feet of ripe timber into the hands of the consumers of this country. We may have approached the proposition in such a way that nothing less than the Government operating its own sawmills and selling the lumber will do that, but it will have to be done in some way. If the department feels it can not work out a plan as the law is at present, then upon a report to that effect Congress must work out a plan which will permit the people to have this timber, which is now ripe for the ax and will soon fall and rot.

Taking up now this particular bill, I want to refer to the provision of the bill which first attracts my attention. It is found upon page 2:

> *And provided further*, That the Secretary of War, as a part of the conditions and stipulations referred to in said act, may, in his discretion, impose a reasonable annual charge or return, to be paid by the said corporation or its assigns to the United States, the proceeds thereof to be used for the development of navigation on the Connecticut River and the waters connected therewith. In fixing such charge, if any, the Secretary of War shall take into consideration the existing rights and property of said corporation and the amounts spent and required to be spent by it in improving the navigation of said river, and no charge shall be imposed which shall be such as to deprive the said corporation of a reasonable return on the fair value of such dam and appurtenant works and property, allowing for the cost of construction, maintenance and renewal, and for depreciation charges.

Taking for the basis of our argument the premise that the hydroelectric power created at these power sites either belongs to the people or should be administered so that they may have the benefit of it, let us analyze this bill so far as the people's interests are concerned. Where is there any power or tribunal here created or erected to be interposed between this corporation and any charge it sees fit to put upon the consumers of power?

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from California?

Mr. BORAH. I do.

Mr. WORKS. Does the Senator from Idaho believe that the Government could provide any body or commission that could do that thing?

Mr. BORAH. If I understand correctly, this power is transmitted across State lines.

Mr. WORKS. It could do it, then, only because it is interstate?

Mr. BORAH. I understand that this power is transmitted through two or three States. If that is so, I have no doubt but that when it comes to transmit hydroelectric power, the corporation doing so would be subject to the regulation, for instance, of the Interstate Commerce Commission, if we should see fit to place it under the jurisdiction of that body. But I agree

with what I think is in the mind of the Senator—that if it is intrastate development and use, the National Government would not have anything to do with it.

Mr. WORKS. That was exactly my view of the matter. I had overlooked the fact that the power could be transmitted into another State.

Mr. BORAH. Upon that somewhat inoffensive and modest-appearing provision of the bill, Mr. President, there is already being built up what one would naturally anticipate would come, but not quite so quickly. Here is the contract which has been formulated in contemplation of Congress passing this bill; and keep in mind that this is the people's property.

Mr. THOMAS. Does the Senator say that this contract has already been entered into?

Mr. BORAH. I understand so.

Mr. CLARK of Wyoming. Well, no; this is an agreement already entered into between the company and the Secretary of War setting forth what will be the contract if this bill passes.

Mr. BORAH. Yes; technically, that is true. I read from the agreement the following:

From the gross receipts of the company for the water power produced by it there shall be deducted as operating expenses the following costs:

(a) The amount of all regular or annual taxation paid to any Federal, State, or local authority.

(b) An amount not to exceed $48,000 per year, which is to be fixed by agreement between the Chief of Engineers and the company as a reasonable rate for depreciation on its plant and machinery.

You will notice as I proceed what a tender and sensitive regard they have, all the way through, expressed for the people. How the consumer is conspicuous by his absence:

(c) The actual and bona fide cost of all labor, material, supplies, and other expenses of maintenance and operation, excluding depreciation. Such cost of operation shall be taken to the initial points of distribution, to be fixed subject to the approval of the Chief of Engineers.

Of the net profits of the company as thus ascertained the company shall be entitled to all of the said profits up to an amount equivalent to 8 per cent of the actual amount of capital invested as provided in section 1 of this memorandum.

The company is taken care of upon all its investment to the extent of 8 per cent—a pretty fair percentage:

The said net profits beyond 8 per cent and not exceeding 9 per cent shall be divided between the United States and the company equally. The net profits beyond 9 per cent shall be divided between the company and the United States at ratios and in manner to be provided in the above-mentioned permit and agreement, but in no event is the share of the United States to be less than 50 per cent of such excess profits.

The United States enters into a copartnership with this corporation, by which the United States and the corporation divide the profits. The United States and the corporation are both desirous of taking out of it all the possible profit that it will produce. The charge is fixed indirectly by a tribunal, which is interested in raising the rate as high as it can—that is, interested in seeing the profits increase.

It is a pure business proposition, between the National Government and the corporation, of fixing the freight, and "Jones pays the freight." What means of subsistence or of profit has this corporation other than that which it gets from the people who use the power created? What profits are going to flow into its exchequer except the profits which are derived from the masses of the people who surround or live in that community? Whose profits are they dividing here?

You would understand from the argument which has been made here that there is somebody here to be taxed, aside from the people themselves, and that it is a righteous thing to proceed to tax the institution to its full limit. But, as said by the Senator from California [Mr. WORKS], the great weight of this must inevitably be paid by those who use the power. Does the Senator from Connecticut know of any means or resource by which to increase the profits of this company other than that which will come from the use of the power which it will generate?

I read further from this agreement:

These terms are imposed, in view of all the conditions and circumstances on the Connecticut River affecting this particular project, as being fair and just to both parties.

Both parties! That is, the corporation and the United States.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from California?

Mr. BORAH. I do.

Mr. WORKS. This bill provides that the money realized by the Government shall be applied to the improvement of navigation upon this stream. The effect of that is that the consumers of power furnished by this corporation alone contribute the money to improve the navigation of the stream.

Mr. BORAH. Yes; that part of it which ever gets to the stream.

Mr. BRANDEGEE. Where does the money come from that is taken out of the Treasury now and spent in improving the navigability of navigable streams?

Mr. BORAH. It comes from all the people of the United States. Raised by general taxation. I conceive that there is a vast difference between imposing a special tax upon a part of the people for dredging a stream for everybody's use and in raising money by general taxation for dredging a stream which all may use.

In one breath we are told that these resources belong to the people and are the people's property. In the next we are presented with a plan which taxes them and burdens them in every conceivable way. We must be taxing the people's property and the people will have to pay the taxes. In the matter of public utilities, if we are seeking to serve the people, we should make the cost and expenditures in the matter of development as small as possible, and then fix the rate to be charged the people upon the basis of the cost and expenditure. The higher the cost, the higher the expenditure, the higher will be the toll, necessarily. If you sell these natural resources at exorbitant prices and fix the tolls upon that theory, as you will have to, then the toll in the end simply pays the price originally charged. If we burden these resources with tolls to dredge the streams of the country it is certain that it means an extra burden to the ultimate consumer. These general expenses, such as the improvement of navigable streams, should be borne by general taxation while the special taxes should be made as light as possible in order to give the people at large as cheap a service as possible.

Mr. BRANDEGEE. Why, of course; and this money that is going to be spent on the Connecticut River will come from the people of Connecticut.

Mr. BORAH. That is, it would come from the people who use the power from this particular plant.

Mr. BRANDEGEE. Precisely.

Mr. BORAH. The other people would not bear any portion of the tax.

Mr. BRANDEGEE. Just as the money spent on the general improvement of navigation comes from those who pay the taxes on the things they consume.

Mr. BORAH. Mr. President, if the Senator from Connecticut wants the consumers of power in the State of Connecticut to dredge his rivers, of course I am not going to quarrel with him about that. But when I look at the history of the rivers and harbors bills for the last few years in the United States Congress, and particularly when I read the article by the Senator from Ohio [Mr. BURTON] in the last number of The World's Work upon the extravagance and the waste which is connected with the dredging of these rivers, I do not want the people in my part of the country to have to pay it by means of a special tax. It is bad enough when they pay it as a general tax.

I was saying that this is the people's property. So says this article. What are we doing with reference to the management of the people's property?

In the first place, we are putting it just as far away from the people as it is possible to get it under our form of government. We put it under the control and regulation of an officer whom the people do not elect, whom they can not discharge, from whose judgment there is no appeal, and in whose presence the people are very seldom permitted to stand.

Let us take a case a little nearer home. Suppose the Government should build a dam across what is known as the Snake River, in Idaho. Some time I expect to see every farmer in the Snake River Valley lighting and heating his home by means of electricity. I expect to see it take the place of coal and fuel and to supply those things which are conceded to be growing scarcer and dearer every year. We will assume that the Government has built a dam and made a contract such as this, and that the Secretary of War is about to fix a charge upon the corporation which ultimtely will have to be paid by these people. What opportunity is there for them to be heard? What chance have they to submit any showing so that they may be indirectly protected, if not directly?

I do not understand why it is necessary to remove that matter from the tribunals which we have created for the purpose of fixing rates, where the people can be heard, where their rights can be determined according in some measure to judicial rules and regulations, and place it in the hands of an executive officer from whose judgment or decision there is no appeal and with whose original action the people have absolutely nothing to do.

I think those who say the bill ought to pass with this provision in it, and who still say that this is the people's property, have lost sight of the fact that there is no provision whatever in the bill to protect the people to whom the property belongs.

I noticed this morning in a newspaper published somewhere in the State of Massachusetts the statement that "Senator

BORAH was not progressive on the subject of power sites," and that he was "a reactionary upon that question." There is some consolation in the fact that this measure, which is characterized as a progressive measure, has been the means of bringing together again the Republican Party, because I find the leading progressive from New York [Mr. ROOT], and the leading progressive from Connecticut [Mr. BRANDEGEE], and the President of the United States, and Mr. Pinchot, and Mr. Garfield, and Mr. William Draper Lewis all combined in supporting this progressive measure. While I should dislike very much to see the bill become a law, if it carries with it the possibility of bringing together all these pronounced progressives it will have some benefit to distribute to the people of the country even if they do not get any cheaper light. But in view of this combination I am led to examine it for myself, and I conclude that it is not progressive to levy all extra taxes possible upon the "people's property" and to place it under the control of an officer whom the people do not elect.

Mr. President, I have offered here an amendment which provides that all corporations engaged in transmitting hydroelectric power and electricity from one State to another, or from a Territory to a State, or from the District of Columbia to a State, or to a foreign country shall be subject to the provisions of the interstate-commerce act. I offer that amendment for the reason that I do not myself desire that these power sites shall pass beyond public regulation and control. I do not desire to place them beyond the reach of the public in the matter of fixing charges and rates. I do not see why it would not be a perfectly feasible proposition to place them under the control of the rate-fixing body which has been created by the Government. If that should be done, Mr. President, at least this would be accomplished—we would have a tribunal whose sole object would be to fix a reasonable rate, taking into consideration the corporation and the public, and not a tribunal whose sole interest would be to secure profits and revenue. In addition to that, we would have an opportunity to submit evidence and to have a hearing, the same as we do with reference to the fixing of rates upon other commodities that are transmitted from one State to another.

I have offered a second amendment, Mr. President, which I want to discuss for a few moments, although I think perhaps I shall have some difficulty in satisfying some Members of the Senate that it is germane to this proposition. It is germane only in the sense that, as I said a while ago, this is the beginning of a policy with reference to these matters.

Under the reclamation law a number of dams have been built throughout the western country with the object of diverting water for the purpose of reclaiming the arid lands of the West. Those dams have been constructed by the Government, and they are charged up, as it were, to the settlers upon the land. When the settlers come to pay for the expense of putting the water upon the land they not only pay for the canals and the ditches, but they pay for these dams, and also for the reservoir expenses.

In the reclamation law we find this provision:

> The said charges shall be determined with a view of returning to the reclamation fund the estimated cost of construction of the project, and shall be apportioned equitably.

Under that provision the expenses of these dams are charged up to the settler. The act further says:

> *Provided*, That the title to and the management and operation of the reservoirs and the works necessary for their protection and operation shall remain in the Government until otherwise provided by Congress.

It will be seen, therefore, that while these construction works are charged up in the price which the settler pays, the title to them remains in the Government. The Government in some instances is now creating hydro-electric power, electricity, and selling it back to the same people who have paid for the construction of the dam.

I maintain, Mr. President, that if we are going to adopt the policy of putting these power sites and the proceeds from them under the control of the Government and giving over to the Government the benefit of them, it is but fair that the settlers should be relieved of the cost of building these dams. In time the settlers would repay for them in the power charges they would pay to the Government. I have, therefore, introduced an amendment providing that the charge for the construction of these dams shall be eliminated from the charges made to the settlers upon these lands.

One of two things ought to be true: Either the title to these dams should pass over to the settlers who have paid for them, and they should have the benefit of any proceeds arising from the use of the power; or else, if the proceeds from the use of power are to pass to another person, they ought to be relieved from the payment for these dams.

As I say, I know it will be said that it is far-fetched to attach this amendment to a bill providing for the construction of a dam in Connecticut. But, as I say, in view of the policy which is being created, and in view of the fact that we are building up this policy, not by a general bill, not by a bill which takes in the entire country, but step by step, by means of bills relating to a locality, it is necessary, if we are to work out a general policy and a general system which will pertain to the entire country, to insert these different amendments in bills which are ostensibly local in their character.

I had intended to discuss the legal phase of this controversy, but since listening to the Senator from Colorado [Mr. THOMAS] upon that subject, I feel that I should be wholly trespassing upon the time of the Senate if I should undertake to do inadequately what he has done so well. I shall not therefore enter upon that phase of the discussion.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from Michigan?

Mr. BORAH. I do.

Mr. TOWNSEND. I have listened a great many times to the suggestions of the Senator from Idaho in reference to the control and management of our national resources, especially those relating to forest reservations. I should like to ask, for information, whether the Senator from Idaho has ever prepared and presented to the Senate any bill embodying his ideas of how our water powers and our forest reservations should be administered?

Mr. BORAH. Yes; I have prepared some bills, and have been fortunate enough to get some of them through—the three-year homestead bill and others. So far as the Forestry Service is concerned, I will say to the Senator from Michigan that, while we have formulated no general bill, at the last session of Congress, I believe, a bill passed Congress providing for the sale of the timber upon all of these lands which had been burned over, and providing for the sale upon the part of the homesteader himself of the timber upon the land upon which he had filed.

Mr. TOWNSEND. I remember that bill.

Mr. BORAH. While it was not a general bill, it was in the direction of appropriating a part of this timber, which is confessedly going to waste, to the immediate benefit of the settlers, and if it had been sold in pursuance of the bill it would have been to the immediate benefit of a great many people, because they would have purchased the timber under the bill undoubtedly to their advantage.

That is one of the things of which we complain. That bill passed Congress and it was vetoed, as the President said, upon the recommendation of the Secretary of the Interior. And why? It was vetoed because it was feared that the homesteader would get pay for his timber and might not thereafter acquire title to his land. With 350,000,000 feet of timber ripe and ready to be harvested the bill was vetoed for the reason that some man might get $100 worth of timber and thereafter abandon his land.

The discouragement in the small effort to relieve the situation has been sufficient to deter me in undertaking anything greater.

Since the Senator has referred to what the Senator from Idaho has attempted to do, I had the honor to join in the preparation and the urging here upon the floor of the Senate of an amendment which would take out of these various reserves the agricultural lands and permit settlers to enter and use the agricultural lands. That was defeated for the reason they said that it had a tendency to break the integrity and destroy the wholeness of the forest reserves, and was, they undertook to satisfy the public, a raid upon the whole conservation policy.

Mr. President, I do not suppose that within my lifetime or yours the West will ever be able to convince the good people of the East that we do not desire to have the forests of this country turned over to the grafter. The West has never asked, and does not now ask, that the old system of grabbing and waste be restored. And the West pays its tribute of respect to those who initiated the movement which prevented that. But it does hope that in time it will come to be understood that there must be a different policy and a different spirit of administration.

For the last few years every time a man would raise his voice against the effects of this manner of administration, against the impractical and shortsighted policy of driving out settlers and retarding legitimate growth, he has been assailed as an opponent of conservation. This cry will be raised again. Any effort to do justice to the settlers, to give them an intelligent, discriminating administration of the public-land laws, any effort to introduce a practical application of the real principles of conservation or to give the West an opportunity to develop along legitimate lines—any effort to give these natural

resources to the people, relieved of heavy taxes, tolls, and bureau red tape, will be characterized by some as enmity to conservation.

When we come here with the most modest appeal and the most modest proposition to relieve the situation the press of the country is immediately saturated with the idea that there is a powerful conspiracy to break down the forestry policy. I do not know of a single instance in which the West has ever asked for anything which could in good faith be interpreted as an attack upon the forestry policy—that is, in its general conception and purpose. We want, if we can, as the President elect said, to remove, if possible, all suspicion which rests upon us every time we approach it.

I said upon the floor of the Senate, and I repeat, that the vetoing of that burnt-timber bill was an indication that there was no possible relief to be granted.

So far as the power-site proposition is concerned, I say to the Senator that I have not prepared any bill upon the subject; but I have indicated by amendments to this bill, with reference to the proposition of transmitting power across State lines, how in my judgment it should be regulated and controlled. I have no pride of opinion and no pride of authorship over that proposition. I am perfectly willing to accept any man's theory or any man's policy which will give a system of regulation and control which will take into consideration the interests and the welfare of the people for whom we are fixing these rates. I am utterly opposed—and I do not propose to consent to it under any circumstances, if I can help it—to a system which will fasten upon this property the great burden of dredging the rivers and put the control of the compensation up to a tribunal whose prime object is to secure as much money as possible.

I believe that answers the Senator from Michigan.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from New Hampshire?

Mr. BORAH. I do.

Mr. GALLINGER. I notice the Senator suggested that he was not quite sure that one of his proposed amendments would be germane to this bill. The Senator need not trouble himself about that, because we have no rule in the matter of amendments being germane, except one relating to appropriation bills. In this body, under our liberal rules, I think almost anything is germane to any bill that may be under consideration.

But I rose to ask the Senator this question: Some of us gave our very warm support to the irrigation legislation because of the fact that we were assured that the Government would have returned to us every dollar which was expended in that great project. I will ask the Senator if the dams that he says now ought to be passed over to the settlers instead of being in the hands of the Government are not a necessary and an inevitable part of the money that the Government expends to carry on this work? I do not see how the Senator differentiates between that expenditure and the digging of ditches or anything else connected with this great project.

So far as the Government selling the power is concerned, I am not very clear about that, because I have not examined it, but, after all, it seems to me that if the Government has fulfilled its contract with the settlers and has expended the money and they are to pay back every dollar, as the Senator from Idaho assured us they would and as I understand they are doing, I do not see why we should take out a portion of the expenditure that the Government has been to and differentiate that from the other expenditures which have been made.

Mr. BORAH. Mr. President, I am obliged to the Senator from New Hampshire for his suggestion about the amendment being germane. Of course, I understood that parliamentarily it was not necessary to be germane, but I was arguing from a logical view as to whether the Senate would be willing to take up such a subject in connection with this bill from the broad standpoint that it is fairly relative to the subject.

Mr. GALLINGER. The Senator from Idaho is perhaps aware of the fact that Congress once attached a land bill of very considerable proportions to a private pension bill, and it so appears on the statute books to-day. In this body I think the question as to whether an amendment is germane or not relates only to appropriation bills. I think the Senator will find that to be the case.

Mr. BORAH. That is unquestionably true.

Mr. BRANDEGEE. The Senate placed a meat-inspection bill on an agricultural appropriation bill.

Mr. BORAH. I know. I am aware the Senate will do all these things when it gets ready.

As to the other proposition which is suggested by the Senator from New Hampshire, of course I was not here when the reclamation act was passed. I understand that there were some assurances upon the part of western Senators that the settlers should pay back all the expenditures. I am not going to enter into a discussion as to whether there is any moral obligation upon succeeding legislators to regard a mere oral statement in debate or not. I will assume for the sake of the argument that we ought to regard it at present. But, Mr. President, these dams, and so forth, are not turned over to the settlers. The title is retained in the Government, and the Government in time will have a property of great value from which it will be again collecting revenue from the same settlers who paid for its construction.

Mr. GALLINGER. But, Mr. President, if the Senator will permit me, I will ask him if, when the Government supplied the water to irrigate the land of the settlers, did not the Government fulfill absolutely all that it had promised to do in the legislation?

Mr. BORAH. You mean in the law itself?

Mr. GALLINGER. In the law itself.

Mr. BORAH. The Government undoubtedly fulfilled the law, but it has retained, as I said, the title to these dams. The settlers did not contract with the Government that it should create power and sell that power back to the settlers. That is a thing aside. It is not covered by any debate which took place here. It is not covered by any provision of the law. It is not covered by any contract.

If the Government sees fit to retain this title and to put the property to such use as that an extra burden is thereby imposed upon the settler, it seems to me that one of two things must be true. Either the settler is entitled to the proceeds, to apply it upon the land, because he has built the dam, or else, if the Government is going to retain it, it ought to take the responsibility of the cost of construction.

The power developed in these dams will in time pay for the dams and in time pay for them again. Yet the community will be paying each time, as it consumes the power for the construction of the dams. I would just as soon have the Government turn over the dams to the settlers, transfer them absolutely, and let them run them, and if there is any power to be manufactured let them have the benefit of it. But the Government does not propose to do that. It has discovered the necessity of holding them in order that this property which is created by the construction of the dam may be used to the advantage of the Government.

Mr. CLARK of Wyoming. Will the Senator right on that point permit an interruption?

Mr. BORAH. Certainly.

Mr. CLARK of Wyoming. Is it not a fact that corporations engage, under another general irrigation law passed by the Congress of the United States, in the construction of great works, and after they have been repaid for that construction, when the land under the construction has been developed, does not the corporation then go out of business and turn over the works to the settlers for their operation? I refer to the operations under the Carey Act.

Mr. BORAH. Yes; I think that is true; but that is not under the reclamation law.

Mr. CLARK of Wyoming. It is not under the reclamation act, but under an act of Congress.

Mr. BORAH. I want here to call the attention of the Senator from Michigan to a letter which I intended to refer to in my original remarks. I read it in answer to the inquiry which he made. This is a letter written to me from Sumpter, Oreg., only a few days ago. The writer says:

> In the forest reserve along the rivers and creeks of eastern Oregon there are thousands of acres of flat bottom and bench land of the very best soil and where water can be gotten on every foot of it for irrigation.
>
> This land can not be taken up by the many who would like to settle on it for homes, because there are a few trees on it.
>
> * * * * * * *
>
> All open spaces along the creeks which could be taken up by the settlers are reserved as ranger stations to keep out the settlers. In Baker and Grant Counties there are 83 of these stations, embracing over 10,000 acres.

I suggest to the Senator from Michigan, what possible use could the Government have for 83 ranger stations in two counties? What possible advantage can the Government gain by it, so far as properly administering the reserves is concerned? The secret of that is that under the act of 1906 settlers would have a right to go in there and make applications for these agricultural lands, and if they were agricultural they would have a right under the law, if it was administered properly, to acquire title to them. But there was an exception to the law, and that was that if the lands were needed for governmental purposes the Government would have the right to retain them in spite of the other provisions of the law. So, wherever there is an agricultural area which a settler might utilize to

his advantage, in order to prevent its being entered by a bona fide settler they have established thereon a ranger station.

I think everyone will agree with me that that is not conservation. It is no part of conservation. It is what the President elect called reservation. It is impeding the settlement of our country. It is that class of administration, Mr. President, from which I ask relief, and nothing else.

If anyone shall go into the northern part of the State which I have the honor in part to represent, he will find scattered all through those reserves these ranger stations. Some of them are upon lands which had originally been entered by the settler. Some of them are upon lands which had not been entered, but undoubtedly would have been entered. In that way the law is so administered as to turn our settlers from our own lands into the lands of Canada. We have, as the statistics of the country will show, lost at the rate of 100,000 citizens each and every year for the last five years, who have gone over into Canada, and expatriated themselves, taking the oath of allegiance to another country, in order to get land, when there were lands at home which they desired but could not get.

Give the West, Mr. President, a bona fide administration of the forestry policy, give them a bona fide and fair administration of the conservation policy, give them an opportunity to send the honest settler to the agricultural land and the honest business man to the natural resources to develop them in a legitimate way, so that the benefit will flow to the masses of the people, and you will never hear a word of complaint from the western people in regard to this conservation policy.

As to power sites, I presume we are all agreed as to the great necessity of holding them under public regulation and control. Few men having regard for the public interest would want for a moment to see them turned over without retaining any direction or control for the benefit of the public. In fact, these power sites constitute a public utility and must necessarily be regulated and controlled by the public in the public interest. If there is any instrumentality coming from nature's generous hand which seems peculiarly to belong to the people and peculiarly adapted to be a servant of the people it is hydroelectric power. But I do not propose myself to be stampeded into an ill-considered, half-hatched scheme which, while ostensibly dedicating these natural resources to the people, is simply burdening them for their use, so that they will have to bear the burden. The true purpose in regard to this matter should be to give the people a cheap service, but the present movement is in the direction of giving them an expensive and burdensome service. No effort, not a single step is being taken to see that the people get cheaper power, cheaper light, cheaper heat, cheaper cooking facilities. But while feigning our desire to serve the people we are in fact preparing to tax them in another form and another more insidious way. If Congress can find a way to levy a new tax, it deliriously hastens to the pleasure. If it can accentuate or accelerate extravagance the ecstasy which accompanies its work is difficult to describe. The people are deriving no benefit from our forest reserves. Although billions of feet of lumber are ripening and rotting year by year they are paying the same prices and watching the rise of prices the same now as before these forests were reserved. Under our proposed power plan they will be in precisely the same position with reference to these great natural resources. The scheme is to tax these powers in every way possible, and everyone must know that this charge will all be paid by the people who use the power, the ultimate consumer.

Mr. BRANDEGEE. Mr. President, I did not hear, at least if I did I do not recall, the provision in the amendment which the Senator said he was going to propose, subjecting this company to the Interstate Commerce Commission. If I recall it, it declares the company to be a common carrier, does it not?

Mr. BORAH. Yes, sir.

Mr. BRANDEGEE. What I was going to ask the Senator is in what respect would the duties or obligations of this public-service corporation be changed by its being declared to be a common carrier? I ask for information. I did not see the legal effect of it; that is all.

Mr. BORAH. In what respect would it change it?

Mr. BRANDEGEE. Would its duties be changed by being a common carrier?

Mr. BORAH. I do not know that its duties would be changed as a corporation, but our relations to it is solely for the purpose in that amendment to fix rates.

Mr. BRANDEGEE. The Senator's idea in declaring it to be a common carrier is not to affect any of its obligations, but for the purpose of bringing it under the control of the Interstate Commerce Commission.

Mr. BORAH. Precisely.

Mr. BRANDEGEE. That is all?

Mr. BORAH. Yes, sir.

Mr. SMITH of Arizona. Mr. President, it had been my purpose to go into a somewhat lengthy discussion of the pending bill, but the ground was so well covered by the Senator from Colorado [Mr. THOMAS] and by a speech formerly made, that is now before the Senate, by the Senator from Idaho [Mr. BORAH], who has just given up the floor, that I feel on this particular bill the question has been more fully and better discussed than I could do it. I therefore will postpone to some other time what I have to say on the general question of the conservation of the West, and to express, as far as I can, my objection to the principle involved in the bill before the Senate.

I will say, however, to the Senator from Connecticut that the Senator from Alabama [Mr. BANKHEAD] apprehended, and I use the word advisedly, that I would probably hold the floor for several hours, and he did not expect a vote on the bill this evening. He is now in the Committee on Commerce, and if that Senator is called to the Chamber and acquainted with the fact, I shall not attempt a discussion of the bill at this time.

Mr. JONES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ASHURST in the chair). The Senator from Washington suggests the absence of a quorum, and the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McCumber	Sutherland
Bacon	Foster	McLean	Swanson
Borah	Gallinger	Martine, N. J.	Thomas
Brady	Gamble	Oliver	Thornton
Brandegee	Gardner	Overman	Townsend
Bristow	Gore	Page	Warren
Bryan	Gronna	Paynter	Watson
Chamberlain	Johnson, Me.	Perkins	Webb
Clark, Wyo.	Johnston, Ala.	Poindexter	Wetmore
Clarke, Ark.	Jones	Pomerene	Williams
Cummins	Kenyon	Richardson	Works
Dillingham	Kern	Sheppard	
du Pont	La Follette	Smith, Ariz.	

The PRESIDING OFFICER. Fifty Senators have answered to their names, and a quorum of the Senate is present.

Mr. BRANDEGEE. Mr. President, there are two or three Senators who have told me that they desire to address the Senate briefly on this bill. One of them is here and is now ready to proceed, and two others are absent on committee work and can be here at any time. Besides those Senators, I know of no other Senators who desire to speak upon the bill, except that I shall want, perhaps, five minutes myself. In view of that, and in order to get the sense of the Senate, I ask unanimous consent that the vote on the bill be taken under the unanimous-consent agreement which exists, to-morrow, not later than 4 o'clock.

The PRESIDING OFFICER. The Senator from Connecticut asks unanimous consent that the vote upon the pending bill be taken to-morrow, not later than 4 o'clock.

Mr. GALLINGER. And on the amendments.

Mr. BRANDEGEE. Mr. President, the reason I stated the request in that way was because the unanimous-consent agreement, as it stands, to vote upon the legislative day of Tuesday, includes all amendments and the bill itself to final disposition, so that I have simply asked that the vote shall be taken under the unanimous-consent agreement on the calendar day of to-morrow, Friday, not later than 4 o'clock in the afternoon.

Mr. CLARK of Wyoming. Mr. President, I merely want to make a parliamentary inquiry of the Senator from Connecticut, which is, whether or not that would be a change or modification of the unanimous-consent agreement we have already entered into; and, if so, whether the unanimous consent which he now asks should be granted? I am not urging the suggestion, for I should like to see a vote on the bill as soon as possible, but I am putting the question in view of the precedent it might establish as to the violation of the terms of a unanimous-consent agreement.

Mr. BRANDEGEE. That question has been raised before, and I can only answer the Senator from Wyoming that in my opinion it would not. It would be a unanimous-consent agreement within a unanimous-consent agreement, in my opinion, and not at all in conflict with it. The unanimous-consent agreement as it stands is that we shall vote on the legislative day, which simply means that instead of adjourning we will take recesses, and that nothing else can be done in the way of business until we shall vote.

Mr. GALLINGER. And the Senate has agreed——

Mr. CLARK of Wyoming. Mr. President, it seems to me——

The PRESIDING OFFICER. To whom does the Senator from Connecticut yield?

Mr. BRANDEGEE. I yield the floor.

Mr. CLARK of Wyoming. Mr. President, it seems to me that this proposed unanimous-consent agreement would change the unanimous-consent agreement that we have heretofore entered into. Under the unanimous-consent agreement heretofore entered into the discussion could proceed for a week.

Mr. BRANDEGEE. Yes, it could; but if the Senate is done talking about the matter it is not necessary that the discussion should go on forever.

Mr. CLARK of Wyoming. No; that is true; but the effect of the unanimous-consent agreement which we entered into was that we agreed not to fix a limit for debate.

Mr. BRANDEGEE. I do not regard it so, Mr. President. If we had entered into a unanimous-consent agreement that we would vote upon the matter on the calendar day of to-morrow, and Senators had debated the subject to their hearts' content, and some Senator asked unanimous consent that the vote be taken at 4 o'clock, that would be another unanimous-consent agreement; but it would not be inconsistent with the first one, in my opinion. I know there is a difference of opinion about it.

Mr. CLARK of Wyoming. I am not seeking to dispute it. I am simply suggesting the matter to the Senator as it occurs to me.

Mr. GALLINGER. Mr. President, on at least one former occasion we did precisely what the Senator from Connecticut [Mr. BRANDEGEE] now asks, and I quite agree with the Senator from Connecticut that his present request, if granted, would not be a violation of the unanimous-consent agreement. So I hope the Senator's request will be granted.

The PRESIDING OFFICER. Is there objection?

Mr. JONES. Mr. President, if it is the understanding that the vote will not be taken to-day, I shall not object.

Mr. BRANDEGEE. I had assumed that a vote would not be taken, because there are three speeches which I know of yet to be made, and we probably shall not sit more than an hour longer this afternoon.

The PRESIDING OFFICER. The Secretary will read the request for unanimous consent submitted by the Senator from Connecticut.

Mr. BRANDEGEE. I did not submit the request in writing, Mr. President, but I can restate it. I ask unanimous consent that the vote be taken, in accordance with the existing unanimous-consent agreement in relation to this bill, to-morrow, Friday, not later than 4 o'clock in the afternoon.

The PRESIDING OFFICER. Is there objection to the request for unanimous consent as stated by the Senator from Connecticut?

Mr. JONES. Mr. President, I understand that notice has been given that appropriation bills are to be taken up to-morrow.

Mr. BRANDEGEE. That notice will stand for what it is worth. The existing unanimous-consent agreement is subject to appropriation bills; but I assume that the Senator who gave the notice that he would ask to have the Army appropriation bill taken up to-morrow, if the Senate should agree unanimously to vote not later than 4 o'clock to-morrow on the pending measure, would rather have it out of the way so that morning business may be transacted hereafter.

Mr. JONES. While it is true that the existing unanimous-consent agreement is subject to the consideration of appropriation bills, yet there is no limitation upon the time when the vote shall be taken.

Mr. BRANDEGEE. It would be possible that the whole of to-morrow might be spent upon the Army appropriation bill if the Senate wants to take it up; but if we can come to an agreement to vote on the pending bill to-morrow, I assume the Senator who has the matter in charge would not press the appropriation bill.

Mr. WARREN. Mr. President, in my judgment an appropriation bill will be taken up in the morning to-morrow after routine business, but I assume——

Mr. BRANDEGEE. There is now no routine morning business.

Mr. WARREN. I understood that the Senator proposed to arrange for a vote to-morrow and to have that vote on the calendar day and not on the legislative day.

Mr. BRANDEGEE. That is the proposition.

Mr. WARREN. But if we proceed along the line we are now proceeding, certainly the appropriation bills are in order and could be taken up and proceeded with.

Mr. BRANDEGEE. In order; yes.

Mr. WARREN. But I imagine there will be no difficulty about ceasing their consideration in time to take this suggested vote, if we decide upon it. I think, however, the Army appropriation bill will be taken up and proceeded with for a time, at least, and perhaps finished.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Connecticut?

Mr. BANKHEAD. Mr. President, I should like to have the proposed agreement stated, so that I may know exactly what it is.

The PRESIDING OFFICER. The request for unanimous consent was not reduced to writing, but the Chair will attempt to state it. The Senator from Connecticut [Mr. BRANDEGEE] has asked unanimous consent that to-morrow, not later than 4 o'clock in the afternoon, the Senate will vote upon the pending bill.

Mr. BANKHEAD. And amendments?

The PRESIDING OFFICER. And amendments thereto submitted.

Mr. BANKHEAD. Well, Mr. President, so far as I am individually concerned, that arrangement would suit me; but there are several Senators who desire to be heard on the bill, among them the chairman of the Commerce Committee [Mr. NELSON], who has not had an opportunity to speak upon the bill because of the fact that he has been attempting to perfect the river and harbor bill, on which his committee is now in session. Under these circumstances I shall be compelled to object.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from California?

Mr. BRANDEGEE. I do.

Mr. WORKS. The only difficulty I see about the matter is that, if the appropriation bill should be taken up to-morrow, it will practically end discussion of the pending bill.

Mr. BRANDEGEE. I will say to the Senator from California that objection has already been made.

Mr. WORKS. I did not intend to object. I only wanted to call attention to the situation.

The PRESIDING OFFICER. Objection has been made.

Mr. BRANDEGEE. I will inquire, Mr. President, of the Secretary whether there is anything on the calendar for Monday in the way of a unanimous-consent agreement?

Mr. MARTINE of New Jersey. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from New Jersey?

Mr. BRANDEGEE. Before we leave this particular matter will the Senator from New Jersey allow me a moment to ask the Senator from Alabama [Mr. BANKHEAD] whether he would feel constrained to object in behalf of absent Senators to the same request if made for next Monday?

Mr. BANKHEAD. Mr. President, I will suggest to the Senator from Connecticut that he can make that suggestion to-morrow morning just as well as now. I have no disposition to delay the vote, so far as I am concerned, but have objected only for the reason I have stated.

Mr. BRANDEGEE. I understand perfectly well. Then I will state that to-morrow, upon the meeting of the Senate, I shall make a request for a unanimous-consent agreement concerning a vote on the pending bill.

Mr. MARTINE of New Jersey. Mr. President, I ask the Senate now to reconsider the votes by which House bill 17256 was read the third time and passed.

Mr. BRANDEGEE. I did not hear the request of the Senator from New Jersey.

The PRESIDING OFFICER. The Senator will restate his motion. He was not heard.

Mr. MARTINE of New Jersey. Very well.

The PRESIDING OFFICER. As the Chair understands the request, it is not now in order.

Mr. BRANDEGEE. I wanted to hear the Senator's motion myself.

Mr. BACON. Of course the motion is not in order, Mr. President. No other business except that embraced in the unanimous-consent agreement under which the Senate is now proceeding is in order.

The PRESIDING OFFICER. The Senate is proceeding under a unanimous-consent agreement, and the request of the Senator from New Jersey is not now in order.

Mr. BRANDEGEE. I did not hear the request of the Senator from New Jersey; I do not know what the request was.

Mr. MARTINE of New Jersey. I withdraw my request.

Mr. JOHNSTON of Alabama. Mr. President, I ask unanimous consent for the present consideration of a bill on the calendar.

Mr. BRANDEGEE. That is not in order, Mr. President.

The PRESIDING OFFICER. The Chair is obliged to say that the Senator's request is not now in order, proceeding, as the Senate is, under a unanimous-consent agreement.

Mr. POINDEXTER. Mr. President, after the very elaborate and able discussion which has already been had upon the pending bill, it is not my intention to undertake to discuss at length the principles involved in it. I would hesitate even to make the

few observations which I shall make upon the bill and the interests which it involves were it not for the fact that the State which I represent in part is deeply concerned in the question of water-power development and that for many years it has been a very vital question with our people, as it has been throughout the West, what the relations of the Federal Government, of the State governments, and of private individuals should be in the ownership and development of water power.

There have been a great many collateral issues injected into the debate which are not involved in the pending measure. I say "collateral," although in many respects they are entirely irrelevant. The general question of conservation has been discussed. Of course, in one sense this bill involves the question of conservation, but in a very different phase from the question of the preservation of forests or the reservation of public lands for forest purposes by the Government of the United States. Whatever may be done as to the regulation and control, the granting or the withholding of permission to construct a dam in the Connecticut River or any other river; whatever provisions may be made for regulating the charges for power developed there or for taxes upon the property, still the water power will remain. Whoever may own it, whoever may use it, under whatever authority it may be developed, whether the reward or the profits from the development of this power shall be properly distributed, there is no possibility that the power itself, the natural resource which is concerned, shall be wasted or destroyed. In the case of forest reserves an entirely different question is involved—the issue of whether that great natural resource shall be preserved or whether it shall be wasted and extinguished forever.

Before making the brief observations which I intend to make as to the rights and the policy of the Federal Government in the regulation of power development in the streams of the country, I want to say a word, in passing, with reference to the question of forest reserves, which has been injected into the discussion by some Senators who are hostile to forest reserves and by other Senators who are in favor of forest reserves, as I understand is the Senator from Idaho [Mr. BORAH], who objects to such an extent to the administration of the present forest law and who continually attacks that administration with such force and virulence that it at least creates the impression that as the laws are administered he is opposed to the entire policy.

It would seem to be an illogical course for the Government of the United States to pursue to be expending $11,000,000 in the very start of the proposition to buy forest lands from private parties in order to establish forest reserves in the East and at the same time to abandon forest lands which it already owns in the West, and turn them over, without restriction, either to the States or to private individuals, as a great many opponents of the forest-reserve policy advocate. If the retention by the Federal Government of certain portions of the mountains of the West, of the forested lands of the West, and perhaps same lands in connection therewith that are not forested is an injury to the people inhabiting those States, it seems incredible that the people of a great State like New York should be expending, out of the treasury of the State, $14,000,000, and more, for the purpose of purchasing lands upon which forests are to be conserved by the State, for the same purpose and with the same effect upon the condition of the people and the conservation of natural resources, of course, as the preservation of forests by the National Government.

I am perfectly free to say that I am in entire agreement with many criticisms which the Senator from Idaho [Mr. BORAH] and the Senator from Colorado [Mr. THOMAS] have made as to certain details of the administration of the forest reserves; but the verdict upon the policy of forest reserves is not to be rendered by a review of the actions of a lot of subordinate agents of the United States Government distributed among the forest reserves and changed from time to time as the administration changes; but it is to be rendered, and ought to be rendered, upon a reading of the statute and a consideration of the principles under which forest reserves are established. The remedy for any maladministration is not an attack upon the policy of forest reserves, but it is by a recourse to those remedies which may be invoked to improve the administration, to correct error, and not, because it has certain imperfections in its application, to destroy the entire policy.

I only heard a portion of the very able and forceful address of the Senator from Colorado [Mr. THOMAS]; but, as I understood, he very clearly enunciated his position as being in entire opposition to the retention at all of public lands for forest-reserve purposes by the Government; at least, he announced the proposition that in general the State administration of public lands had been superior to that of the Nation. So far as I am concerned, I expect to vote and to advocate the retention by the States of every authority and every power which they have to conserve forests upon State lands or upon any lands which may hereafter become State lands by the grant of the Federal Government or otherwise; but I also expect to vote for and advocate, as a corollary to that and as supplementary to that authority, the retention by the Federal Government of every authority and every power which it has in a reasonable way to conserve the forests of the Nation.

The reservoirs of water with which our arid wastes are to be reclaimed are in these mountain forests. The very power under discussion, the mighty forces hidden in our falling streams, have their source and sustenance in the mothering forests of the mountain slopes. Electric power, the subtle slave of man, swift and terrible in its movement but obedient to his gentlest touch, sees its creator in the soft rains and clinging snows the forests hold and filter. Ruthless private avarice would slaughter and destroy the forests, but upon their preservation and upon guarding from private extortion the power of their flowing streams, depend the comfort and prosperity of our people. With a fair distribution of land and its sister water under the fecund sun of the west, and the protection of water power from monopoly, the industrious people of those States will develop a splendid citizenship and enjoy the comforts of an advanced civilization. With the forests destroyed a rich land would revert to waste and desolation.

Now, Mr. President, as to the bill that is under consideration, the debate is somewhat confused because the question of policy is confounded with the question of the power of the Federal Government. Some Senators are opposed to this bill because it does not grant enough. The Senator from Alabama [Mr. BANKHEAD] is opposed to it because it is not an unconditional grant. Other Senators are opposed to the bill because it grants too much. Some Senators have asserted that if the Federal Government has the power to make a grant of this kind it should not exercise that power, but should construct a dam and develop the water power directly through the agencies of the Federal Government.

Mr. BRANDEGEE. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Connecticut?

Mr. POINDEXTER. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. At that point in the Senator's address I want to suggest to him that while the word "grant" does appear in one or two sections of the bill, in my opinion it is not legitimately to be considered a grant any more than the money condition attached to it is a tax. There is a good deal in the point of view and in the way a person looks at a project, because of the language in which it is described; but Senators will bear in mind that the only function of the Federal Government in this matter is because the petitioners who come here asking for the passage of this bill are obliged to get the consent of Congress before they will be allowed to maintain a dam in a navigable river. That is all this bill does. It gives to these parties, who have maintained a dam for nearly a century at the precise location in this same river, the consent of Congress to relocate the existing dam in the immediate vicinity, but at a point slightly farther along the river, where there is a little more water power. It is nothing but a license on the part of the Government to maintain what would otherwise be an obstruction to navigation, accompanied with conditions which do away with the obstructive character of the work. That is all there is to it.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from California?

Mr. POINDEXTER. I yield to the Senator from California.

Mr. WORKS. I should like to ask the Senator from Connecticut [Mr. BRANDEGEE], if his view be the correct one, what there is for the Government to buy back? The provisions of this bill provide that the Government shall purchase these works from the company.

Mr. BRANDEGEE. The dam and the business.

Mr. WORKS. The Senator thinks the Government then may go into the business of distributing and selling water to the consumer?

Mr. BRANDEGEE. I hope it will not, and I do not think it ought to do so; but that is not what we are talking about now. If the Government is going some day to condemn these properties in accordance with the views of the distinguished Senator from Colorado [Mr. THOMAS] and itself own and operate all public utilities, then it ought to pay the people who have practically contracted with the State and spent their money in permanent structures and not confiscate their property.

Mr. WORKS. The Government pays nothing; it only gives a permit; and I am wondering what the Government can buy from the person to whom the permit is granted.

Mr. BRANDEGEE. I am answering the Senator as to what the Government can buy. If they have the constitutional authority to do so, they can buy everything. It has cost this company about $6,000,000 to construct the dam, the dynamos, the buildings where the electricity is generated, its lines, poles, rights of way, and the land it has acquired. All the property in which it has invested its money can be bought—and when I say "bought," I mean it can be condemned.

Mr. WORKS. As I understand, the bill provides for buying it, and that was the reason I asked the Senator the question.

Mr. BRANDEGEE. It provides for condemnation by a court of competent jurisdiction, as the Senator will see if he will look at the terms of the bill.

Mr. WORKS. That is one portion of the bill. But there is also a provision, or an express agreement, to purchase the property, as I understand the bill.

Mr. BRANDEGEE. Of course, if they agree, there is no use in condemning it; but if they disagree as to what it is worth, then they go to the court for the court to decide it.

Mr. POINDEXTER. Mr. President, I expect to vote for this bill, not because I consider the bill what it ought to be but because I consider it an advance over any other similar franchise or permit or grant—whatever term may be applied to it—that has been passed heretofore by Congress. I think it makes very little difference whether it is called a grant or is called a license or whether it is called a permit, the entire question of the power of the Federal Government is disposed of by the consideration of the fact that without this thing, whatever it may be, it is generally conceded, although there seem to be some exceptions to that opinion, that the dam can not be built. It is a permit, a license, a grant by the Federal Government to the licensees or grantees of a power, an authority, and of property, because it is a power and authority which is fixed in its nature and is attached to real estate—a power which the Federal Government now possesses which it can withhold or can convey as it sees fit.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Connecticut?

Mr. POINDEXTER. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. Of course, if that is the Senator's view, I can not change it; but I do not want to sit silent and agree to it, or seem to agree to it. I do not think it is a grant, unless it conveys some property, and I do not think it does or ought to. I do not think the Government has any property to convey, grant, or bargain to anybody in this navigable stream.

Mr. POINDEXTER. If the Senator will allow me to make a suggestion, it is property, either tangible or intangible; is it not?

Mr. BRANDEGEE. No; I do not think it is the Government's property at all. I think that view of it is what creates most of the opposition to the bill. I think the Government has no right there whatever, except as a trustee for the people to improve the navigation of that navigable river. All this bill provides on that subject, in the third line of the bill, is:

> That the assent of Congress is hereby given to the Connecticut River Co. * * * to maintain * * * such * * * * dam.

It does not convey anything except the right to maintain. It does not sell any water power, nor does it sell any water; and, in my judgment, it has not any business to sell the water.

Mr. POINDEXTER. I think what name is given to it is entirely academic. I suppose the Senator will agree that the development of this property can not proceed by the company making application for this permit unless the bill is passed; so it is undoubtedly a thing of value, because it has in fact a commercial and a pecuniary value.

This bill contains a provision, which has been sharply criticized, granting to the Secretary of War a discretion to fix tax rates. I should prefer that Congress should fix such rates. When the famous Coosa River Dam bill was pending, at the last session of Congress, I offered an amendment to the bill providing that the power company to which the grant was made should pay to the Government 1 per cent of the net profits derived from light and power.

It seems to me that is a far preferable arrangement for returning to the Federal Government a portion of the profits of this enterprise rather than to leave it in the discretion of the Secretary of War. But because I believe in the principle that there should be paid to the Federal Government some return for the exercise of this privilege and for the authority to operate and conduct this great enterprise, I shall support the bill as it now is, although it is not as I should prefer it. I expect to offer the amendment which I offered to the other bill. I do not expect that it will get much support, because one section of the Senate is opposed to any tax or return and the other is divided as to the method of fixing the rates.

Mr. JOHNSTON of Alabama. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Alabama?

Mr. POINDEXTER. I yield to the Senator from Alabama.

Mr. JOHNSTON of Alabama. I should like to ask the Senator why, in supporting the bill for the extension of the time for the construction of a dam across the Pend d'Oreille River in Washington under the general dam act, he did not attach a provision that the Pend d'Oreille Development Co. should make compensation to the Government if it is a rule that should have universal application?

Mr. POINDEXTER. I am not aware that I supported that measure.

Mr. JOHNSTON of Alabama. The bill was approved on the 20th day of May, 1912, and relates to the building of a dam under the general dam act without any compensation.

Mr. POINDEXTER. It is a matter of which I have no knowledge, Mr. President. I do not think the RECORD will disclose that I supported that bill in any way at all.

Mr. JOHNSTON of Alabama. I supposed, as it relates to a matter in the Senator's own State, that he had given attention to the bill.

Mr. POINDEXTER. There are a great many bills introduced relating to my own State about which it would be difficult for me to have any knowledge.

I should prefer, Mr. President, in explaining the position which I take upon the bill, that the amendment of the Senator from Idaho [Mr. BORAH] should be adopted. I think the bill would be a better one with a provision that the Interstate Commerce Commission—I think that is the proper agency of the Government, although some other agency might be selected for exercising that power—should have the right, in case of need to exercise it, to regulate the charges for power conveyed from Connecticut into other States. I think there should be also attached to the measure the amendment, or the substance of the amendment, offered by my colleague from the State of Washington [Mr. JONES], reserving to the State of Connecticut the right to regulate charges for power generated and used entirely within that State, and removing also any question, because of the grant being made by the Federal Government, as to the power of the State to levy taxes upon the property.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Connecticut?

Mr. POINDEXTER. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. I will say, for the information of the Senator from Washington and other Senators, that the State of Connecticut has a board of public-service commissioners, or what I believe is called a public-utilities board. The General Assembly of the State of Connecticut, which chartered this old navigation company and has amended its charter several times, has reserved the right to alter, amend, or repeal the act of incorporation and the amendments thereto. The legislature itself undoubtedly has the right to regulate the charges, but that is one of the principal functions of our board of public utilities.

If that were not already amply provided for by the statutes of the State which incorporated this company, I should have no objection to the amendment proposed by the Senator from Washington. But it is amply covered by our own State laws, and I am one of those who believe in allowing each State to regulate its own affairs as much as possible, free from the interference of Washington. We have to come here, in this case, to get the permit to cross a navigable river with this dam; that is all.

Mr. CLARK of Wyoming. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Wyoming?

Mr. CLARK of Wyoming. Will the Senator yield for a question for information?

Mr. POINDEXTER. I yield.

Mr. CLARK of Wyoming. I wish to ask the Senator from Connecticut whether or not the public-service commission or the statutes of Connecticut fix the rate of profit beyond which an investment shall not pay?

Mr. BRANDEGEE. No; I think not, Mr. President. I will not be sure, but I am quite firmly of the opinion that there is no limit, except, I believe, no steam railroad company in the State is allowed to pay more than 10 per cent or 8 per cent, whatever it may be. Very few of them are able to earn anything like that.

Mr. CLARK of Wyoming. The query in my mind was whether there might be a conflict between the law or the rule of that commission and the terms of the contract proposed to be entered into here.

Mr. BRANDEGEE. My colleague [Mr. McLEAN] tells me that the charter of this very company limits them to 8 per cent, anyway. The act creating the Public Service Commission of Connecticut, which I have here at my desk, is a long, comprehensive, up-to-date act. It provides in section 23, under the title "Rates and service affecting many persons," for a process by which any 10 persons may bring to the public-service commission a petition alleging too high rates or poor service or any grievance that they may have, and the whole matter is absolutely in the hands of the public-service commission to fix rates and to alter or change them from time to time.

Mr. SMITH of Arizona. If the Senator will pardon me, it occurs to me that if, under this grant, permission or right or whatever you may please to call it, the Government gives anything, if it has anything to give, to the Connecticut River Co., it is provided in this contract or in their charter—I do not remember which, from hearing them read—that they shall not collect more than 8 per cent except under the conditions stated; that is, that they shall divide the surplus.

Mr. BRANDEGEE. No; that is in the act——

Mr. SMITH of Arizona. If the Senator will allow me to finish, he will catch my point. It is immaterial where it is. The question arises, if this be a grant or anything that the Government has a right to give, certainly permission is given by the contract or the charter that they shall have 8 per cent, if they can get that much, and under certain conditions more. In the face of that, if the Government has any right here at all, what effect will that have on the right of the Senator's State to limit the amount or to say what they shall charge for power?

Mr. BRANDEGEE. Mr. President, I think I catch the drift of the Senator's question, though it is a little long. When the Senator talks about 8 per cent or 9 per cent, I think he has in mind something that was published in a newspaper as to the proposed division of profits between the Government and the power company.

Mr. CLARK of Wyoming. No, no; it is published in the return of the Secretary of War.

Mr. SMITH of Arizona. I read it from some report that I saw here the other day.

Mr. BRANDEGEE. Very well. What I was talking about was the original charter of this company, which limited it to 8 per cent.

Mr. SMITH of Arizona. I was speaking of their contract with the Secretary of War, or the proposed contract into which they are to enter. That speaks of 8 per cent.

Mr. BRANDEGEE. I know it does.

Mr. SMITH of Arizona. The Senator already has the balance of my question.

Mr. BRANDEGEE. If the company itself is limited by its own charter to a maximum return of 8 per cent upon the stock, and the Government of the United States passes an act saying that all above 9 per cent shall be divided by the Government and the corporation, I would not give much for what the Government would get out of it.

Mr. SMITH of Arizona. On what ground?

Mr. BRANDEGEE. Because it can not pay more than 8 per cent anyway under its own charter.

Mr. SMITH of Arizona. Then that raises the very question I had in mind, if the Senator will bear with me, as between the Government and the State. If the United States has the power to interfere with this contract to fix limitations, to fix the rate, and to change it when it pleases, the State can not limit it; and if it has not the power, the State has the absolute power to do it.

Mr. BRANDEGEE. I do not think the two things have anything to do with each other. All that was provided by the proposed contract between the Secretary of War and the company was a method of division and compensation, as they called it, between themselves. It had nothing whatever to do with a legal limitation placed by the State of Connecticut upon the dividends that its own companies shall have.

Mr. POINDEXTER. Mr. President, I think I shall have to ask leave to proceed with the very brief remarks I have to make.

Mr. BRANDEGEE. I am very grateful to the Senator for being released, I am sure.

Mr. POINDEXTER. I understand the Senator's question has been answered. The very colloquy between the Senator from Arizona and the Senator from Connecticut, showing a difference of opinion as to whether or not under this grant the State of Connecticut would have power to levy taxes, is a very strong argument for inserting in the bill an express provision reserving that power to the State of Connecticut.

Mr. BRANDEGEE. There is not a word said about taxes. It is as to the amount of dividends they shall pay.

Mr. POINDEXTER. Apply it to the right to limit dividends, then. The same principle applies to that and the same principle would extend to the right to levy taxes upon property. Every lawyer who has observed the tremendous amount of litigation in the courts on the part of corporations engaged in any form of interstate business or corporations which derive their powers or any part of them from the Federal Government, resisting the collection of taxes by municipalities and by States, will realize that it would be a wise thing for Congress to remove doubt upon that question, in making a grant of this kind, by an express provision that the State shall have the power, and that this grant shall not interfere in any way with the power of the State, to collect taxes or to control other features of this property so far as intrastate business is concerned. So I say that I think the amendment of my colleague from Washington [Mr. JONES], in substance, with some changes, would be an improvement to this bill and an important and valuable amendment to it.

Mr. BRANDEGEE. I could not for a minute agree to that. I could not for a minute agree that if the State of Connecticut has not power to regulate its own creatures and corporations, Congress, no matter how many acts it passed, could give the State of Connecticut any power whatever. Whatever power Congress has was delegated to it in the Constitution made by the States. The States have the power about these matters, and not Congress at all.

Mr. POINDEXTER. I did not expect the Senator from Connecticut to agree to that; but the fact that there is a difference of opinion is the reason I make the suggestion.

Mr. BRANDEGEE. I do not think there is any difference.

Mr. WILLIAMS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Mississippi?

Mr. POINDEXTER. I yield.

Mr. WILLIAMS. I want to suggest this idea, which I think, if followed out with this bill and with other bills, might settle a great many of these differences and might result in a better method of administration.

I take it that what we are all seeking to accomplish—that is, men of my school of thought, at any rate—is this: We are tired of giving to public-utility corporations gratis valuable privileges. We want them to pay something to the public for what they obtain. It seems to me it is a secondary consideration whether that something which is paid shall go to the Federal Government or shall go to the State government.

If it be true that Congress has the power, as an incident to its power to license, to affix conditions to the license granted, then it can affix a condition of payment to the State as well as a condition of payment to itself. It seems to me, therefore, that it would be wiser and in better keeping with the principles of the Government if this bill were to recite that this corporation should pay to the State of Connecticut, instead of to the Federal Government, such taxes as might be fixed by the public-utilities commission of the State of Connecticut. The State of Connecticut has such a public-utilities commission, has it not?

Mr. BRANDEGEE. Yes.

Mr. WILLIAMS. Every State has something by that name, or some body or other, that exercises substantially the same power.

It seems to me that whenever any authority of any description has an unlimited power, whether it be a right or not, to grant or to refuse a license, as an incident to that power it has the right to attach conditions to the license if it grants it. I should like to see the license in connection with public utilities conditioned in a manner that would maintain the right of local self-government and the right of the State; and if any revenue at all is to be derived from it, I should like to see the State derive the revenue.

Mr. BRANDEGEE. Will the Senator from Washington allow me to answer the Senator from Mississippi for a moment?

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Connecticut?

Mr. POINDEXTER. Certainly.

Mr. WILLIAMS. One moment. I should like to have the provision in the bill changed so that Congress would grant the license upon condition that the corporation should pay to the State of Connecticut such tax as might be prescribed by the Legislature of Connecticut or the public utilities commission, whichever you choose as the proper authority of the State.

Mr. BRANDEGEE. Let me answer the Senator, Mr. President. I agree with him that Congress has power to attach to

the license any condition which relates to the subject matter of the power under which Congress is acting.

Mr. WILLIAMS. One moment. As a Federal question, the Senator's limitation is correct; but if you are going to make a limitation which shall accrue to the State, then the subject-matter, in so far as the State is charged with it, is the corporation itself.

Mr. BRANDEGEE. The Senator does not give me time to make my point.

Mr. WILLIAMS. All right.

Mr. BRANDEGEE. It is this: The only kind of condition that we can attach to the issuance of this license is a condition in aid of navigation. Under the commerce clause of the Constitution Congress has the sole authority over navigation. If we should say, "We will grant this license provided this company shall pay so much a year to the treasury of the State of Connecticut, to be expended by the legislature of that State in its discretion," it would be utterly null and void, in my opinion, because it would be ultra vires. We have no authority to affix any condition except such a condition as will promote navigation. Does the Senator catch my point so far?

Mr. WILLIAMS. I catch it; yes.

Mr. BRANDEGEE. There is another reason why it would not be wise, even if we had authority, to put that money into the treasury of the State of Connecticut. Congress is supreme in the control of navigable streams. The State of Connecticut can not use money in improving the navigable streams of Connecticut without coming to Washington from time to time to get the approval of the War Department as to where it should be spent, in what rivers, in what proportions, and so forth; and we would lose the services of the Board of Army Engineers and all the machinery through which we make our improvements in navigation.

Mr. WILLIAMS. I think I have caught the Senator's point, but I do not think the Senator has caught mine. As long as the revenue derived from the operation of the provision goes to the Federal Government, the limitation suggested by the Senator is correct. But if the Federal Government should provide, in a general act of any sort, that "nothing herein contained shall contravene any law of the State of Connecticut," that would be perfectly proper.

Mr. BRANDEGEE. I do not think the Senator does catch my point, which is that Congress has no authority to impose any condition or restriction in the issuing of this license except one which relates to navigation.

Mr. SMITH of Arizona. It could not divert it to any other purpose.

Mr. BRANDEGEE. It could say, "You shall pay so much money to be used to improve the navigation of the Connecticut River"; but I do not think it could say that money should be paid into the treasury of the State of Connecticut to be used for anything else except the improvement of navigation.

Mr. WILLIAMS. Mr. President, mine was a mere inquiry, and I do not think I am fully prepared to argue the matter; but I am inclined to think the distinction is about this: Where the Federal Government charges something for a license, it is like a tax which is levied; it must be pertinent or relevant to some delegated power. But wherever it affixes a condition to accrue to a State, that power is not a delegated one at all, and is not limited by any delegation in the Constitution. I am not ready to argue that question now, however, and I should not want to take up the time of the Senate by doing it even if I were. I just threw it out as a suggestion.

Mr. BRANDEGEE. I do not think the Federal Government would have any authority whatever to affix such a condition.

The PRESIDING OFFICER. The Senator from Washington will proceed.

Mr. POINDEXTER. Mr. President, I can not agree with the suggestion of the Senator from Mississippi that the Federal Government shall entirely waive its right to collect revenue from this water power.

Mr. WILLIAMS. I did not want it to waive it. I wanted it in the act to devote it to the State of Connecticut. Even that is doubtful.

Mr. POINDEXTER. As far as a conveyance of power from the Federal Government to the State is concerned, I would much prefer that both jurisdictions should retain the taxing power. Of course that is double taxation, but that is a common feature of taxation. In a great many instances we have triple taxation. We have double taxation, by the State and by the Federal Government, in a great many different lines and a great many different species of property. The fact that it is double taxation ought to be taken into account by both jurisdictions in fixing the rate. But it is so true, as the Senator from Mississippi has said, that we have been granting away valuable privileges without return, that I for one shall insist that wherever there is a power in the Government, whether State or National, to collect revenue, it shall be retained, and the power to exercise it actively shall be preserved.

Let me now answer very briefly the opposition to this bill, which comes from those who come here rather arrogantly, it seems to me—I do not say Senators come in that attitude, but others come in that attitude—rather demanding these privileges and these grants, and speaking with a tone of resentment and annoyance if it is proposed to attach any conditions to the grant by way of reservation of a right to regulate rates or to collect a revenue from it. The advocates here last year of the so-called Coosa River dam bill are now actively opposing this bill, not because of any lack of power or asserted lack of power in the Federal Government to grant a permit or license to construct this dam, acknowledging the power and the right of the Government to grant or withhold the privilege, but demanding that it shall be unconditional, although it is a water power outside of their State, because they say they do not want to see a precedent established which may affect the Coosa River dam.

There seems to be a sort of obsession on the part of some of the advocates of the Coosa River dam bill. They had introduced in the Senate here the other day and had read, with the signatures attached to it, a resolution which was adopted by some private citizens expressing their opinion upon this measure. One Senator asserted that these individuals were putting their noses into business with which they had nothing to do, he being obsessed, apparently, with the idea that nobody has anything to do with this Coosa River proposition except the power company which is seeking to acquire the right.

These citizens of the United States, who are interested in the Government and in the revenues and property of the Government, according to the advocates of the Coosa River dam bill, ought to keep their mouths shut about water power in general, on the theory that nobody has anything to say about it but those who come here superciliously demanding an unconditional free grant of valuable property. It is an obsession. In addition to all the services of the distinguished Senators in other matters, in war and in peace, they will go down in history as the men who made the Coosa River famous. I think Mr. William Draper Lewis, a distinguished gentleman, a citizen who has rendered good return of his citizenship, is entitled to express an opinion.

Mr. WILLIAMS. Who is he?

Mr. POINDEXTER. Mr. William Draper Lewis.

Mr. WILLIAMS. In addition to the Senators from Alabama making the Coosa River famous, the Senator from Washington is making this gentleman famous.

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Mississippi?

Mr. POINDEXTER. I yield.

Mr. WILLIAMS. The Senator has already yielded, and the remark has been made.

Mr. POINDEXTER. His name was attached to a paper which was introduced by the Senator from Alabama [Mr. BANKHEAD], and he has a right to express his views and his judgment on the general questions of water power, notwithstanding the resentment of the Senator.

Mr. WILLIAMS. I should like to ask a Senator a question there, Mr. President. I know that he knows, or at least I think he knows. If I did not think he knew I would not ask him. Of course any citizen of the United States has a right to petition Congress upon any question or to write to any Senator or to any Representative upon any public question. What I wanted to ask the Senator from Washington was whether he knows that this gentleman and others who write and call themselves the legislative committee of the Progressive Party——

Mr. POINDEXTER. Yes; they have a right to call themselves the legislative committee of the Progressive Party. Why should they not have that right?

Mr. WILLIAMS. I did not want to ask whether they had the right; I did not want to ask whether they had the power or whether they had the liberty under the law to do it or not. I wanted to ask whether they had been constituted by the Progressive Party as a legislative committee, sitting, as the French say, in constant session at Washington.

Mr. POINDEXTER. No; they are not sitting in constant session at Washington; and that does not affect the question in any way at all. The organization of the Progressive Party is rather irrelevant to the question here.

Mr. WILLIAMS. I admit that.

Mr. POINDEXTER. The Senator has admitted that it is immaterial whether they are the legislative committee of the Progressive Party or not. But they are the legislative committee of that party, and are duly constituted as such.

Mr. WILLIAMS. They are duly constituted by this political organization, then, as a legislative committee?

Mr. POINDEXTER. Yes; at a national convention.

Mr. WILLIAMS. I made the inquiry because whenever I get orders from them I wanted to know that they were duly authorized and constituted.

Mr. POINDEXTER. Mr. President, the control of water power by the Federal Government depends upon very different authority, under different conditions. It is asserted generally by many of the opponents to the pending bill that the Federal Government under no condition has the power to control water power or to attach such conditions to the grant of water power. It has been very generally discussed in its application to navigable streams. In a large portion of the country, in many States, a very different phase of the question is involved—where the power site is on public lands belonging to the Nation and where the application for an act of Congress is for a grant of that land.

The Federal Government owns the absolute, unconditional title in those cases; but the same objection is made to any regulation or to any condition in cases where the applicants are seeking a grant of land as is made to this bill, where the land itself is private but where the stream is a navigable stream.

It is perfectly obvious that where the Government owns the abutting property or where the stream is not a meandered stream and the bed of the stream goes to the owners of the land with the patent which is conveyed, the Federal Government in granting the real estate upon which the dam is to be constructed may attach such conditions, may fix such compensation for the grant as it sees fit, the same as any private owner could.

Mr. SMITH of Arizona. Will the Senator permit me to interrupt him right there? There is the very point of the question in which I am personally interested.

Mr. POINDEXTER. I am speaking of it because it is of interest to the entire western country.

Mr. SMITH of Arizona. You make the concession, though, that the Government owns all the right—under what right I do not know—to the nonnavigable waters of the State, when the old doctrine of the riparian right was expressly repealed, if that ever existed. In fact it never did exist. That is the common law of that part of the country.

Now, you say by virtue of the ownership of the land—and the cases are hundreds where the Supreme Court has so decided—the mere fact of proprietary ownership in the land gives the Government the right to withhold the water in a water site from its diversion from the use regulated by the statute of the State. The Government has no more right to the waters nonnavigable—yes, and I will say navigable—in any State than the title they could give by virtue of the owning of public lands; I should say than it could convey to the citizen in issuing a patent to that land. The Government gives to the citizen, in other words, all the title it has. The citizen can immediately be subjected to the eminent-domain power of the State and a right of way across his land for the use of the water for the purposes mentioned in the statute.

You profess to withhold these water rights by the mere fact of the proprietary ownership by the Government of the land, when the Supreme Court has decided in more than one case that over the rights of way even of the Federal Government the State can carry the water of its streams that are nonnavigable. That is equally true of navigable streams, for the only distinction between them is the mere easement that the Government has in the navigable water, and I have never known a case where an easement carried any power with it further than the exercise of the pure right of the easement itself.

Therefore the Government itself has no more power by the mere ownership of the public land in the nonnavigable waters of our rivers than you or I individually have, for the Supreme Court from the case in Third Howard down to now has decided that it is a proprietary ownership that the Government has.

So there is the whole point of our contention, that the Government, having no power, can not reserve these water rights. Our objection to the bill of the Senator from Connecticut is that you are giving a license or an apparent precedent for the Senate of the United States to carry out a doctrine which means nothing more nor less than the absolute desolation of the western country. You dedicate to deserts and to everlasting silence a country that we have been struggling for 30 years to make habitable. And this is what you call conservation.

Mr. POINDEXTER. Mr. President, the Senator from Arizona misapprehends anything that I said if he conceives that I asserted the Federal Government had the right to the water in the streams. I said that it had the right to the land, and that in granting the land they could retain such compensation or fix such conditions as any other owner of land in conveying it had the power to do.

Mr. SMITH of Arizona. I will grant that, as a matter of course.

Mr. POINDEXTER. The retention of compensation or of the right to regulate the use of that land and of the water which flows over it is simply a retention of the power which the Government already has as a riparian owner in this case to use that water.

Mr. SMITH of Arizona. If the Senator will pardon me, there is no riparian right, and never has been.

Mr. POINDEXTER. The Senator is entirely mistaken.

Mr. SMITH of Arizona. If the Senator will show me where it is—the constitution of Arizona and its statutes dedicated the waters, and the Government has recognized that ever since 1863.

Mr. POINDEXTER. I am not familiar with the laws of Arizona, but the common law of riparian rights still exists in Washington, and I suppose in Arizona also, modified by the right to appropriate water, where needed and under certain conditions, for irrigation.

The dedication and the declaration of the control of the State over the waters of the State do not interfere in any way whatever with the riparian right. The right to divert the water for irrigation, the right to use it for manufactures, the right of the riparian owner under the common law where they are not in conflict with each other, are all in force in the State of Washington. If a man under some superior right takes water out of a stream for the purpose of irrigation and interferes with the riparian right of an owner lower down the stream, it is not actionable.

Mr. SMITH of Arizona. It is under the English doctrine, absolutely.

Mr. POINDEXTER. It is not under the western doctrine. But he has no right to divert the water of the stream otherwise than for the special purposes provided by the laws of the State, to the injury of the riparian owner lower down.

Mr. SMITH of Arizona. The riparian right of the English and the American common law, if we had it, is the same now that it was in the beginning, that in all riparian rights the river must flow undiluted in substance and undiminished in quantity. That is the riparian doctrine. And now you are appealing to a riparian doctrine to divert water from a stream. You had as well talk of a square circle.

Mr. POINDEXTER. There are many rights still preserved in the West as incident and appurtenant to riparian ownership. But the question at issue is not that of diverting water from a stream. It is that of granting power to erect a dam in the stream.

Mr. SMITH of Arizona. There is no difference.

Mr. POINDEXTER. Ordinarily the people who secure the right to erect these dams from the Federal Government at the same time secure a right to the use of the water under the State statute. The Federal Government does not grant the right to use the water. It grants a different interest in the project which is to be developed which is just as essential a part of the completed plant as the use of the water. It may be for manufactures; it may be for, and usually is for, the development of electrical energy. The flow of the water is not diminished. It proceeds in its course undiminished and in accordance with every requirement of the laws of the State, of the law of riparian ownership where that is applicable, or of the right to use the water for irrigation where that is applicable.

There can not be any question, Mr. President, as to the power of the Federal Government, if it has control over the erection of dams in streams where it owns the sites, where it owns the land, or in streams which are navigable where it does not own the land, to attach conditions upon which the grant shall be made; and that is all that is asked in this case.

Mr. SMITH of Arizona. If I am correct in my contention that the Federal Government is merely a proprietary owner, does the Senator from Washington conceive that the Federal Government can do anything more than any other proprietary owner of lands could do, in the face of a statute and of a Constitution that say all these waters belong to the State and the people of the State?

Mr. POINDEXTER. Any other owner could do the same thing.

Mr. SMITH of Arizona. He can not.

Mr. POINDEXTER. I differ with the Senator from Arizona.

Mr. SMITH of Arizona. I do not mean to differ so emphatically with the Senator, for he is apt to know as well as I. I want at least to concede that to him.

Mr. POINDEXTER. If the Senator from Arizona owns land which is needed for the development of a water-power project he can attach his own conditions, unless the State should condemn it and it should be acquired under some public law which fixes the conditions.

Mr. SMITH of Arizona. No.

Mr. POINDEXTER. But if it were to be acquired by the voluntary grant of a private owner the private owner could attach every condition to the grant which is sought here or has ever been suggested here to be attached to these bills on the part of the Government.

Mr. SMITH of Arizona. The Senator and I are not so far apart as I thought. Here is my contention. It is that neither I nor the Federal Government can by the erection of a dam on a power site in any one of the irrigating or desert States interfere with anybody. I can erect a dam if I do not interfere with anybody, and that dam can stay there, and the Government can erect it if it does not interfere with anybody. The Government, under the decision and under the Constitution, may erect a dam to-morrow, and if the Government is doing nothing with that water I can take it out, by the right of eminent domain, across Government land and submit it to irrigation, and the Government can not complain, for there is no title to that water except use, and the Government can not withhold it from use.

Mr. POINDEXTER. I do not care, Mr. President, to pursue further the question of title, because it is not involved in the case. I admit that the title to the water may depend and does depend upon a different ownership. The right to the use of the water may be invested in the private individual. Some private individual lower down the stream may long ago in our western country have acquired by prior appropriation, which is a fundamental law of irrigation, the right to divert water from the stream for the purpose of irrigating his land. Neither the Federal Government, of course, nor the State government has any right to grant an authority to that water in the stream above him so as to deprive him of that use.

That question of State or Federal control of waters is not involved, whether it is proposed by a private company to take the water to the detriment and injury of the lower proprietor who has appropriated it for irrigation, or whether it is simply a grant by the Government of the right to erect a dam across the stream without any condition as to the use of the water on the part of the Government.

Mr. SMITH of Arizona. If the Senator will bear with me once more——

Mr. POINDEXTER. The right to divert the water would depend upon the laws of the State or upon the private corporation, which may have acquired the use of the water under the laws of the State. It is not involved in the bills pending here and which are under discu[illegible] nor is it here proposed, so far as I have seen by any am[illegible]t which has been offered to them, to affect in any way whate[illegible]——

Mr. SMITH of Arizona. If the Senator will pardon me——

Mr. POINDEXTER. Just let me complete the sentence. To affect in any way whatever the right to use the water owned by any private individual or owned by the State.

Mr. SMITH of Arizona. Now, if the Senator will pardon me one more interruption, I shall not interrupt his further statement of the matter.

Mr. POINDEXTER. I will yield the floor in a very few minutes.

Mr. SMITH of Arizona. I will be done with one question. We think in this bill a precedent has already been set, and we see in it a governmental purpose to carry the doctrine of the bill into the conditions which I have just been speaking of.

Mr. POINDEXTER. Some people see spooks and things at night. I do not see anything in the bill interfering with the free operation of the constitution and laws of the State upon the waters of the State.

Mr. SMITH of Arizona. I judge that largely from the arguments I have been listening to lately.

But aside from that, the navigable water in the Connecticut River was owned by that country long before the Government had any right to it whatever. In its original state they granted an easement over it for navigation. Now, that has existed for a hundred years. To-day they start out on the new doctrine that the United States Government, instead of the State of Connecticut, will take the Connecticut River, and the State of Connecticut ought to have it. The water belongs to the State, and the Government has no more title to it than I have, if not used for navigation, for if the Government can develop power and use that, it can run a cotton mill and sell the cotton at a profit; it goes into commercial business. If this goes to Connecticut, that State, under the regulation of a State law, will protect the people of Connecticut from this governmental tax, save the consumers of this power in Connecticut, and conserve their interest by keeping the heavy hand of the Government's taxation off their own development.

I claim that these waters do not belong to the Government any more than the nonnavigable waters of the West belong to the Government. Then the Government has no business to put its hand on it in any way further than to improve its navigation. When it gives a party the privilege to improve the navigation, it can say what sort of a dam it shall build, what sort of locks it shall build, and also the power, probably, to open the locks and close them as boats pass. I think the Senator from Connecticut concedes that the Government can not go outside of the delegated power to open and protect the navigation of the stream. Outside of that the water is as free to the State of Connecticut as the nonnavigable waters of the West are free to the people of that part of the country.

If you permit the Government to do these things, Senators, as sure as I stand here, under a pretense of helping the people, under a cry against monopoly, you are going to monopolize the waters as you have already monopolized the land, and, as I said before, and say finally, you will put an absolute quietus on the development and let trees grow where men ought to flourish.

Mr. POINDEXTER. It is rather a curious argument advanced by the Senator from Arizona and other Senators, that because in times past the Government has been too liberal in granting away the land we ought to continue to be excessively liberal in the grant of nature's resources——.

Mr. SMITH of Arizona. Oh, no; on the contrary——

Mr. POINDEXTER. And pass bills involving the development of water power in navigable or nonnavigable streams without any conditions attached, without any right reserved to regulate rates or to collect revenues.

Mr. SMITH of Arizona. The States reserved that. I wish to say to the Senator that he and I are aiming at exactly the same purpose.

Mr. POINDEXTER. If the Senator from Arizona will allow me, I will conclude the very brief remarks which I desire to deliver.

Mr. SMITH of Arizona. I wish to say to the Senator that he and I are aiming at exactly the same purpose. I am as much a conservationist in this matter as the Senator from Washington can possibly be. So, far from opposing the Senator's position, I am trying to show him that I am attempting to obtain the very same thing that he is attempting to secure. I believe in the Senator's wholesome doctrine that these things must be preserved for the use of the people; that they must be kept out of monopoly; but I think the Senator is following the course that will turn them into the hands of monopoly. I extend my hand to the Senator to help accomplish the purpose at which we are both aiming. The only difference is in the manner of accomplishment. There is where our roads divide, the Senator thinking one procedure would best accomplish the desired result, and my idea being that, under certain conditions with which I am acquainted, the Senator's method would ruin, while in my judgment the other method would accomplish what he and I are both striving to do. I think the difficulty in this whole matter is because of the diversity of interests, the separate surroundings, and the different atmosphere and purposes of the people.

Mr. POINDEXTER. Mr. President, there is no provision in the pending bill which undertakes on the part of the Federal Government to grant to the Connecticut River Co. any part of the waters of the Connecticut River. There are some provisions in the bill regulating the flow of the water in the river and providing that at certain periods it shall be at certain stages, which are obviously in the interest of navigation. I think it will not be contended by anybody that that is not within the power of the Federal Government.

Mr. SMITH of Arizona. Clearly so.

Mr. POINDEXTER. So far as it does not interfere with navigation, the State of Connecticut, or any private individual in the State of Connecticut, lawfully or unlawfully could deprive this Connecticut River Co. of every drop of water which it sought to use for the purpose of developing electrical power, and the Federal Government would have no right to complain, nor could the Connecticut River Co. assert any authority under this grant from the Federal Government, because the grant does not undertake to confer upon it the right to use any water.

Mr. SMITH of Arizona. But the State gives the right to this company. There is where we agree again. The Federal Government grants the State nothing.

Mr. POINDEXTER. Is the Senator from Arizona complaining about the State giving the right?

Mr. SMITH of Arizona. I am not complaining about the State giving the right to the Connecticut River Co. I am complaining about the Government interfering with the right which the State and the individual alone has to do with, and the State can best conserve that right.

Mr. POINDEXTER. In what respect does the Government interfere with the right of the State?

Mr. SMITH of Arizona. By pretending to say, "We can change this contract given to these people by the State."

Mr. POINDEXTER. There is nothing in this contract as to the use of the water in the stream, nor is there in any one of these bills conveying water-power sites in nonnavigable streams in the West. The right to use the water depends upon different laws, a different authority. I agree with the Senator from Idaho [Mr. BORAH] that it would be perfectly futile and beyond the power of the Federal Government to undertake in an act of Congress to fix the right to use the water or to grant authority to use the water. This bill does not undertake to do so.

Mr. President, I have stated under some difficulties, on account of frequent interruptions, my views about these matters. It is urged by some Senators that the bill ought not to be passed in any form. Those Senators at the same time are opposing what is called "conservation," on the ground that the natural resources ought to be developed; that water power ought to be used. How can water power be developed in the Connecticut River at this point unless the Federal Government, under the authority which it has and which is necessary in order to enable the Connecticut River Co. to proceed with this work, grants that authority? To refuse this grant altogether is not in the interest of the development and use of natural resources, of which we hear so much. On the other hand, I will say, in just one word, the development of the natural resources of the country is not necessarily promoted by unconditional grants to private individuals or corporations. In some of the counties of the State of Washington three-fourths of their area has for years been owned by private companies.

They are not being developed; they are not open for settlement; they are not open for homes; they pay but an inadequate portion of the taxes which go to support the county and State governments. Many of the great water powers of the West have for many years been in private hands, but that does not result in their development. They are held for speculative purposes, and will perhaps be held for many years for speculation, in private hands.

It is admitted by the Senator from Colorado [Mr. THOMAS] that there is an incipient water power trust; that it has power, or will have power, to extort unreasonable prices from the people for the use of the electrical energy which has become a necessity of their communities. The question that is involved in this bill, in view of that water-power monopoly, is whether when the Federal Government has an opportunity to reserve a power which may be used to restrain an arrogant and merciless monopoly, it shall be surrendered. I am opposed to that surrender. This bill is not in conflict with any right or authority of the States; and, if necessary, the rights of the State should be expressly excepted from any privilege granted in this bill. Both the power of the Federal Government and the power of the State, wherever it exists, should be preserved, so that if one jurisdiction fails to exercise it, the people may find relief through the activity of the other.

Mr. BRANDEGEE. Mr. President, I am not at all worried about the State of Connecticut losing any rights that it may have in the rivers within its limits by any bill that Congress may pass. Any bill that Congress undertook to pass assuming any rights that it did not have in the navigable rivers in the State of Connecticut would be absolutely null and void. I do not think any amendment is necessary to the bill in that respect. I am generally opposed to the use of unnecessary language, either written or spoken, and I hope that the amendment will not prevail.

There is absolutely nothing in this bill or sought to be obtained by the passage of the bill except the permission from the United States Government to maintain a dam, which, as I have said, has been substantially in position for 80 years or more in the Connecticut River, and to attach to the issuing of that permit the provision that the company which obtains the permit shall annually pay to the United States Treasury a certain sum of money to be devoted to the improvement of navigation on the very river which is crossed by the dam. It is a perfectly simple proposition. Those who believe that the Government can attach to the issuing of the permit a condition that the licensee should pay a sum of money should vote for the bill; those who believe that the Government has no such constitutional authority under the commerce clause of the Constitution should vote against the bill.

For two or three days here we have roamed over the country, from the tops of the Sierra Nevada Mountains, through the Rockies, down to the Rio Grande, through all the arid States, and the Delta of the Mississippi, talking about forest reserves and intricate questions of ownership of the water. We have discussed who owns it when it is in the Atlantic Ocean and who owns it when it is in the process of evaporation, and when it is being blown ashore and precipitated upon the tops of mountains and flowing back to the sea again—interesting, speculative, and somewhat obscure questions, but absolutely irrelevant to the question which ought to be debated on this bill.

I think the Government has a clear and unquestioned right in issuing these licenses to impose a money payment upon the licensee, to be devoted to the purposes of navigation, and to nothing else; and I think it has a right to say it shall be paid into the United States Treasury and appropriated in the discretion of Congress to improve the navigability of the Connecticut River. I may be entirely wrong about that. Some good lawyers think the other way. The Senator from New York [Mr. ROOT] this morning made an elaborate argument upon that question, with which I am in entire accord. Those who differ with us probably will remain in their opinion until the Supreme Court has decided this question. I do not know of a better case through which to get the opinion of the Supreme Court than this; and I should like very much to have the bill passed and the matter presented to the Supreme Court. If they decide that Congress has no right to attach such a requirement to the issuing of the license, we will know what policy to adopt in the future, while if they decide we have the right, we will know what policy to adopt; but I will venture to say, so long as the President vetoes bills because they do not contain a clause for a money payment and so long as one branch or the other of Congress declines to pass them if they do contain such a provision, we will simply be in a hopeless maze of words, to which there is no end in this body.

A good deal has been said about this bill in some way being something that it does not purport to be; that under the guise of improving navigation the Government is entering into the manufacturing business or the power business, or some such thought as that. It has been said that the dominating motive for the passage of this bill is to generate power, not to improve navigation. Well, there is not any dominating motive about it. The entire motive of the petitioners is to engage in the manufacturing and the selling of electrical power, and the entire motive of the Government is to improve navigation in that river. The Government can not escape its duty under the Constitution. It is obliged to say "yes" or "no" to the issuing of this permit and attach the necessary conditions. It is a straight-out navigation project on the part of the United States Government and a straight-out business proposition on the part of the petitioners for the license. Owing to the situation, naturally there has to be joint action; and in that joint action for the preservation of navigation and its improvement and the development of water power on the river it seems to me to be a perfectly proper and legitimate constitutional action on the part of the Government and a perfectly commendable and praiseworthy undertaking on the part of the petitioners for the license.

It has been said that this money, if it be paid, comes out of the consumers of the electrical power. Of course it does. No company which is required to make any payment gets its money anywhere except from the goods it has to sell. If the Government leases a coal mine to anybody, the consumers have to pay more for the coal than they would if the Government gave it to them free; and it seems to me no legitimate argument against the bill that the company has got to earn the money which it pays into the United States Treasury and which, in turn, the United States Treasury will pay out to improve navigation; but, of course, Senators who are afraid that in some way or other the clause authorizing the payment in the interest of navigation will constitute a precedent for some action of the Government in a different part of the country, under different conditions, attack the bill upon all sorts of grounds and theories. I am inclined to believe that a good many of them are fictitious and not sound objections to the bill.

As I have said, Mr. President, to-morrow I shall ask the Senate to give unanimous consent to the fixing of a particular day and hour to vote upon the bill.

FOREST RESERVES IN WASHINGTON (S. DOC. NO. 1075).

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of Agriculture, transmitting, in response to a resolution of the 17th ultimo, certain information with reference to the names of the forest reserves in the State of Washington, their areas, the number of homestead entries allowed in each, the number of ranger stations, etc., which, with the accompanying papers, was referred to the Committee on Agriculture and Forestry and ordered to be printed.

ASSESSOR'S OFFICE OF THE DISTRICT OF COLUMBIA (S. DOC. NO. 1074).

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the president of the Board of Commissioners of the District of Columbia, submitting a supplemental estimate of appropriation for the service of the fiscal year ending June 30, 1914, assessor's office, $15,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

THE CAPITOL GROUNDS (H. DOC. NO. 1392).

The PRESIDENT pro tempore laid before the Senate the report of the Commission for Enlarging the Capitol Grounds, which was referred to the Committee on Public Buildings and Grounds.

FINDINGS OF THE COURT OF CLAIMS.

The PRESIDENT pro tempore laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusions filed by the court in the following causes:

Anna Coakley, widow of Timothy Coakley, and Thomas W. Woodward *v.* United States (Mare Island Navy Yard) (S. Doc. No. 1085);

William W. Pidgeon and Julius B. Price, administrator of George W. Conway, deceased, *v.* United States (League Island Navy Yard) (S. Doc. No. 1086);

John Coward, subnumber 94; Thomas R. Harbridge, subnumber 95; William H. Kiner, jr., subnumber 96; and Robert Mulready, subnumber 97, *v.* United States (League Island Navy Yard) (S. Doc. No. 1084);

William F. O'Hearn and John W. Simonson *v.* United States (Boston Navy Yard) (S. Doc. No. 1083);

George E. McIntosh *v.* United States (Portsmouth (N. H.) Navy Yard) (S. Doc. No. 1082);

William S. Bande, and sundry subnumbered cases, *v.* United States (League Island Navy Yard) (S. Doc. No. 1081);

Ellen Bonner, widow of George Bonner, deceased, and sundry subnumbered cases, *v.* United States (Brooklyn Navy Yard) (S. Doc. No. 1080);

Richard Barrington, and sundry subnumbered cases, *v.* United States (Brooklyn Navy Yard) (S. Doc. No. 1079);

Lawrence M. Herbert and George C. Stanley *v.* United States (Washington Navy Yard) (S. Doc. No. 1078);

John E. Amazeen, and sundry subnumbered cases, *v.* United States (Portsmouth (N. H.) Navy Yard) (S. Doc. No. 1077); and

Henry B. Colson, and sundry subnumbered cases, *v.* United States (Portsmouth Navy Yard, Portsmouth, N. H.) (S. Doc. No. 1076).

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 4043) divesting intoxicating liquors of their interstate character in certain cases.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes; further insists upon its disagreement to the amendments upon which the first committee of conference have been unable to agree; agrees to the further conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. JOHNSON of South Carolina, Mr. BURLESON, and Mr. GILLETT managers at the conference on the part of the House.

The message further informed the Senate that Mr. TAYLOR of Colorado had been appointed a member of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23293) for the protection of the water supply of the city of Colorado Springs and the town of Manitou, Colo., vice Mr. FERRIS.

The message also transmitted to the Senate resolutions of the House on the life and public services of Hon. WILLIAM P. FRYE, late a Senator from the State of Maine.

The message further transmitted to the Senate resolutions of the House on the life and public services of Hon. GEORGE HERBERT UTTER, late a Representative from the State of Rhode Island.

The message also transmitted to the Senate resolutions of the House on the life and public services of Hon. ALBERT HAMILTON HUBBARD, late a Representative from the State of Iowa.

REPORT OF COMMITTEE ON INDIAN AFFAIRS.

Mr. OWEN, from the Committee on Indian Affairs, reported an amendment authorizing the Secretary of the Treasury to extend each of the deferred payments on the town lots of the north addition to the city of Lawton, Okla., one year from the date on which they become due under the existing law, etc., intended to be proposed to the Indian appropriation bill, submitted a report (No. 1208) thereon, and asked that it lie on the table and be printed, which was agreed to.

AMENDMENT TO THE AGRICULTURE APPROPRIATION BILL.

Mr. GUGGENHEIM submitted an amendment proposing to appropriate $15,000 to enable the Secretary of Agriculture to investigate the cultivation and acclimating of potatoes, and the development of improved and disease-resistant types, and for the investigation of leaf roll, dry rot, and other new diseases, etc., intended to be proposed by him to the Agriculture appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE FOSTER.

Mr. PAGE. Mr. President, I wish to give notice that on March 1, 1913, I will ask the Senate to consider resolutions commemorative of the life and public character of DAVID J. FOSTER, late a Representative in Congress from the State of Vermont.

The PRESIDENT pro tempore. The notice will be entered.

Mr. BRANDEGEE. Mr. President, if there is no other Senator who desires to make remarks on the pending bill to-night, I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and (at 5 o'clock and 37 minutes p. m., Thursday, February 13) the Senate took a recess until Friday, February 14, 1913, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *February 13, 1913.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Father in heaven, we thank Thee that the time has come in the onward march of progress when we do not in the last analysis measure a man's life by his political or religious creed, by the position he may chance to hold, by his earthly possessions, nor by the circle in which he moves, but by what he has contributed to the common weal, the motives which prompted action, the character he has woven into the tissues of his soul. Touch us by the majesty of Thy wisdom, power, and goodness that we may measure up to the ideals as we know them in Christ Jesus our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

Mr. JOHNSON of South Carolina. Mr. Speaker, I call up the conference report on the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, and I ask that the statement be read in lieu of the report.

The SPEAKER. The gentleman from South Carolina [Mr. JOHNSON] calls up the conference report on the legislative, executive, and judicial appropriation bill (H. R. 26680), and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

CONFERENCE REPORT (NO. 1498).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 31, 32, 33, 34, 35, 36, 40, 48, 51, 52, 70, 99, 100, 104, 105, 117, 118, 119, 125, 126, 127, 128, 132, 133, 141, 157, 158, 159, 175, 197, 198, 199, 202, 206, 207, 218, 219, 220, 221, 236, 241, and 242.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, 5, 6, 9, 10, 12, 13, 14, 15, 16, 17, 18, 19, 21, 22, 28, 29, 30, 41, 42, 43, 46, 47, 49, 50, 54, 55, 56, 57, 58, 62, 63, 64, 65, 66, 67, 69, 71, 72, 73, 74, 75, 91, 92, 96, 97, 101, 102, 103, 107, 108, 109, 110, 111, 112, 120, 121, 122, 123, 124, 129, 130, 131, 134, 135, 136, 143, 144, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 176, 203, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 222, 227, 228, 229, 230, 231, 232, 233, 234, 237, and 238, and agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment as follows: In line 8 of the matter inserted by said amendment strike out "$3,500" and insert in lieu thereof the following: "$2,000, or so much thereof as may be necessary"; and the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$74,525"; and the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment as follows: At the end of the matter inserted by said amendment insert the following: ": *Provided*, That no person shall be employed hereunder at a compensation in excess of $4,000 per annum"; and the Senate agree to the same.

Amendment numbered 53: That the House recede from its disagreement to the amendment of the Senate numbered 53, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$87,990"; and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$4,000"; and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$16,120"; and the Senate agree to the same.

Amendment numbered 98: That the House recede from its disagreement to the amendment of the Senate numbered 98, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For legislative expenses, namely: Salaries of Members, $216,000; mileage of Members, $6,500; salaries of employees, $5,160; printing of laws, $3,500; rent of legislative halls and committee rooms, $2,000; stationery, supplies, printing of bills, reports, and so forth, $3,500; in all, $42,260, to be immediately available"; and the Senate agree to the same.

Amendment numbered 106: That the House recede from its disagreement to the amendment of the Senate numbered 106, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$166,358"; and the Senate agree to the same.

Amendment numbered 113: That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$840"; and the Senate agree to the same.

Amendment numbered 114: That the House recede from its disagreement to the amendment of the Senate numbered 114, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$17,640"; and the Senate agree to the same.

Amendment numbered 115: That the House recede from its disagreement to the amendment of the Senate numbered 115, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$840"; and the Senate agree to the same.

Amendment numbered 116: That the House recede from its disagreement to the amendment of the Senate numbered 116, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$15,960"; and the Senate agree to the same.

Amendment numbered 137: That the House recede from its disagreement to the amendment of the Senate numbered 137, and agree to the same with an amendment as follows: In lines 3 and 8 of said amendment strike out "$31,200" and insert in lieu thereof "$30,000"; and the Senate agree to the same.

Amendment numbered 138: That the House recede from its disagreement to the amendment of the Senate numbered 138, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,375"; and the Senate agree to the same.

Amendment numbered 140: That the House recede from its disagreement to the amendment of the Senate numbered 140, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$2,500"; and the Senate agree to the same.

Amendment numbered 142: That the House recede from its disagreement to the amendment of the Senate numbered 142, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$275,820"; and the Senate agree to the same.

Amendment numbered 145: That the House recede from its disagreement to the amendment of the Senate numbered 145, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "one at $2,400"; and the Senate agree to the same.

Amendment numbered 146: That the House recede from its disagreement to the amendment of the Senate numbered 146, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$631,250"; and the Senate agree to the same.

Amendment numbered 174: That the House recede from its disagreement to the amendment of the Senate numbered 174, and agree to the same with an amendment as follows: In line 8 of the matter inserted by said amendment, before the word "to," insert the following: "or so much thereof as may be necessary"; and the Senate agree to the same.

Amendment numbered 200: That the House recede from its disagreement to the amendment of the Senate numbered 200, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$30,000"; and the Senate agree to the same.

Amendment numbered 201: That the House recede from its disagreement to the amendment of the Senate numbered 201, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$36,000"; and the Senate agree to the same.

Amendment numbered 204: That the House recede from its disagreement to the amendment of the Senate numbered 204, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$25,000"; and the Senate agree to the same.

Amendment numbered 205: That the House recede from its disagreement to the amendment of the Senate numbered 205, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$7,000"; and the Senate agree to the same.

Amendment numbered 223: That the House recede from its disagreement to the amendment of the Senate numbered 223, and agree to the same with an amendment as follows: In lieu of the number proposed insert "eleven"; and the Senate agree to the same.

Amendment numbered 224: That the House recede from its disagreement to the amendment of the Senate numbered 224, and agree to the same with an amendment as follows: In lieu of the number proposed insert "twelve"; and the Senate agree to the same.

Amendment numbered 225: That the House recede from its disagreement to the amendment of the Senate numbered 225, and agree to the same with an amendment as follows: In lieu of the number proposed insert "nine"; and the Senate agree to the same.

Amendment numbered 226: That the House recede from its disagreement to the amendment of the Senate numbered 226, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$73,260"; and the Senate agree to the same.

Amendment numbered 239: That the House recede from its disagreement to the amendment of the Senate numbered 239, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$56,680"; and the Senate agree to the same.

Amendment numbered 240: That the House recede from its disagreement to the amendment of the Senate numbered 240, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$7,000"; and the Senate agree to the same.

On amendments numbered 2, 7, 8, 11, 23, 24, 25, 26, 27, 37, 38, 39, 61, 68, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 93, 94, 95, 139, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 160, 161, 162, 163, 177, 178, 179, 180, 181, 182, 183, 184,

185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, and 235 the committee of conference have been unable to agree.

J. T. JOHNSON,
A. S. BURLESON,
FREDK. H. GILLETT,
Managers on the part of the House.

F. E. WARREN,
GEO. PEABODY WETMORE,
LEE S. OVERMAN,
Managers on the part of the Senate.

The Clerk read the statement as follows:

STATEMENT.

The managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year 1914, submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report as to each of the amendments of the Senate, namely:

On amendments Nos. 1, 3, 4, 5, 6, 9, 10, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, and 22, all relating to the Senate: Provides for compensation and for employees of the Senate, as proposed in the said Senate amendments; appropriates $2,000, instead of $3,500 as proposed by the Senate, for removal of documents of the Senate in rented warehouses; and appropriates $50,000, as proposed by the Senate, instead of $25,000, as proposed by the House, for expenses of inquiries and investigations ordered by the Senate.

On amendments Nos. 28, 29, and 30: Appropriates for an assistant engineer at $1,200, instead of a laborer at $800, under the Superintendent of the Capitol Building.

On amendments Nos. 31, 32, 33, and 34: Strikes out the increases proposed in the salaries of the clerk, assistant clerk, and janitor to the Committee on the Judiciary of the House.

On amendments Nos. 35 and 36: Strikes out the proposed increase of one assistant, at $540, in the Mail and Delivery Division of the Library of Congress.

On amendments Nos. 40, 41, 42, 43, and 44, under the superintendent of the Library building and grounds: Strikes out provision for 1 additional watchman, at $720; increases the pay of 14 laborers, from $480 to $540 each; provides for 5 additional charwomen, at $240 each; and increases the pay of an electrician from $1,200 to $1,500.

On amendment No. 45: Appropriates $15,000, as proposed by the Senate, for establishment and maintenance of the system of efficiency ratings by the Civil Service Commission, with the provision that no greater sum than $4,000 per annum shall be paid as compensation for any one person.

On amendments Nos. 46, 47, and 48, relating to the contingent fund of the State Department: Authorizes exchange of horses and vehicles, and strikes out the provision, proposed by the Senate, for equipment of drivers.

On amendments Nos. 49, 50, 51, 52, and 53: Increases the salary of the Chief of the Bookkeeping and Warrant Division of the Treasury from $3,500 to $4,000, and the assistant chief from $2,700 to $3,000, and strikes out the provision for an executive clerk, at $2,500, instead of a bookkeeper, at $2,000.

On amendments Nos. 54, 55, and 56: Provides for seven skilled laborers, at $900 each, instead of seven clerks, at $1,000 each, for postal-savings work in the office of the Auditor for the Post Office Department.

On amendment No. 57: Appropriates $6,000, as proposed by the Senate, for furniture and labor-saving machines in the office of the Treasurer of the United States.

On amendment No. 58: Authorizes the detail of employees in the offices of the Assistant Treasurers for duty in the office of the Treasurer at Washington.

On amendments No. 59 and 60: Increases the salary of the Chief of the Secret Service Division from $3,600 to $4,000, instead of $4,500, as proposed by the Senate.

On amendment No 62: Appropriates $4,800, as proposed by the Senate, instead of $3,000, as proposed by the House, for examination of mints.

On amendments Nos. 63, 64, 65, and 66, relating to the office of the Surgeon General of the Public Health Service: Provides for one additonal clerk at $1,600, one at $1,400, and three at $1,000 each.

On amendment No. 67: Authorizes the purchase of supplies for labor-saving machines in the Treasury Department.

On amendment No. 69: Appropriates $2,620,000, as proposed by the Senate, instead of $2,565,000, as proposed by the House, for salaries and expenses of revenue agents, storekeepers, storekeepers' gaugers, and fees and expenses of gaugers, in the Internal-Revenue Service.

On amendment No. 70: Appropriates $90,000, as proposed by the House, instead of $100,000, as proposed by the Senate, for miscellaneous expenses of the Internal-Revenue Service.

On amendments Nos. 71, 72, and 73, relating to the office of the assistant treasurer at Chicago: Provides for an assistant cashier at $2,000 instead of a clerk at $1,600.

On amendments Nos. 74 and 75: Increases the pay of a messenger from $500 to $600 in the office of the assistant treasurer at New Orleans.

On amendments Nos. 91 and 92: Provides for an additional clerk, at $1,600, in the assay office at New York, and makes a verbal correction in the language of the appropriation for contingent expenses of that office.

On amendments Nos. 96 and 97: Corrects the language of the appropriations for Alaska so as to make the same for the "Territory" instead of the "District" of Alaska; strikes out the provision for rent of offices and quarters; and provides for repairs and preservation of executive mansion.

On amendment No. 98: Appropriates $42,260 for legislative expenses for Alaska, instead of $45,260, as proposed by the Senate.

On amendments Nos. 99 and 100: Strikes out the appropriation of $500 for traveling expenses for the governor of Hawaii.

On amendments Nos. 101 and 102: Appropriates for the assistant and chief clerk of the War Department, at $4,000.

On amendments Nos. 103, 104, 105, and 106: Increases the salary of the chief clerk in the office of the Surgeon General of the War Department from $2,000 to $2,250 and strikes out the provision for two clerks at $1,000 each instead of at $1,400 each in that office.

On amendments Nos. 107 and 108: Increases the salary of the chief clerk in the office of the Chief of Engineers from $2,000 to $2,250.

On amendments Nos. 109, 110, 111, and 112: Provides for four additional clerks at $1,600 and one additional clerk at $1,400 instead of five clerks at $1,200 in the office of the Bureau of Insular Affairs.

On amendments Nos. 113, 114, 115, and 116: Increases the pay of 40 watchmen in the parks in Washington from $720 to $840 each.

On amendments Nos. 117, 118, and 119: Strikes out the provision proposed by the Senate for a clerk at $1,400 instead of one at $1,200 in the office of the Secretary of the Navy.

On amendments Nos. 120 and 121: Provides for one clerk at $1,600 instead of one at $1,400 in the Office of Naval Intelligence.

On amendments Nos. 122, 123, 124, 125, 126, 127, and 128, relating to the Hydrographic Office: Appropriates for a chief clerk at $1,800 instead of a nautical expert at $1,600; strikes out the provision for books of reference; appropriates $11,000 as proposed by the House, instead of $14,000 as proposed by the Senate, for contingent expenses of branch offices; appropriates $17,960 as proposed by the House, instead of $22,000 as proposed by the Senate, for necessary employees at branch offices; and strikes out the provision, proposed by the Senate, prohibiting the removal of the Hydrographic Office to the buildings and grounds of the Naval Observatory.

On amendments Nos. 129, 130, 131, and 132, relating to the Naval Observatory: Increases the salary of an assistant astronomer from $1,800 to $2,000 and one assistant from $1,000 to $1,200; and strikes out the authority for purchase of books of reference.

On amendment No. 133: Strikes out the provision, proposed by the Senate, authorizing the appointment of an assistant in the Nautical Almanac Office to act as director thereof.

On amendments Nos. 134 and 135: Provides for an additional clerk at $1,400 in the Bureau of Medicine and Surgery.

On amendments Nos. 136, 137, and 138: Strikes out the appropriation of $24,500 for the rent of the Mills Building for the Navy Department; appropriates $30,000 for rent of quarters for the Navy Department for the fiscal year 1914, and $1,375 for the remainder of the fiscal year 1913.

On amendments Nos. 140, 141, and 142: Increases the salary of the chief disbursing clerk of the Interior Department from $2,250 to $2,500 instead of $2,750, as proposed by the Senate; and strikes out the provision for an additional clerk at $1,600 in the office of the Secretary of the Interior.

On amendments Nos. 143, 144, 145, and 146: Increases the salary of the chief clerk of the General Land Office from $2,750 to $3,000; and provides for a chief of division of surveys at $2,750 instead of a chief of division at $2,400.

On amendments Nos. 157, 158, and 159: Strikes out the provision for a chief of finance division at $2,250 instead of a chief

of division at $2,000, proposed by the Senate, in the Pension Office.

On amendments Nos. 164 and 165: Appropriates $1,500, as proposed by the Senate, for traveling expenses of the Commissioner and employees of the Bureau of Education, and $2,500, as proposed by the Senate, instead of $2,400 proposed by the House, for purchase, distribution, and exchange of educational documents.

On amendments Nos. 166, 167, 168, and 169, relating to the office of the Superintendent of the Capitol: Provides for two clerks at $1,200 each instead of one clerk at $1,600 and one at $1,000, and for a bookkeeper and accountant at $2,200 instead of $1,800, and strikes out a stenographer at $720.

On amendments Nos. 170, 171, 172, 173, 174, and 175: Appropriates $37,400, as proposed by the Senate, instead of $32,900, as proposed by the House, for rent for the Geological Survey, and $12,000, as proposed by the Senate, instead of $10,000, as proposed by the House, for rent for the Bureau of Mines; appropriates $2,000 for the removal of the Bureau of Mines to other quarters; and strikes out the appropriation of $3,333.34 additional for rent for the Bureau of Mines during the balance of the fiscal year 1913.

On amendment No. 176: Makes the appropriation for surveyor general of the "Territory" of Alaska instead of the "District" of Alaska.

On amendments Nos. 197, 198, and 199: Strikes out the proposed increase in the salary of the disbursing clerk of the Post Office Department from $2,250 to $2,500 and of the assistant to the chief clerk of that department from $2,000 to $2,250.

On amendments Nos. 200, 201, 202, 203, 204, 205, 206, and 207, relating to the contingent expenses of the Post Office Department: Appropriates $30,000, instead of $20,000 as proposed by the House and $40,000 as proposed by the Senate, for stationery; appropriates $36,000, instead of $35,000 as proposed by the House and $40,000 as proposed by the Senate, for fuel and repairs to heating plant; appropriates $4,000 as proposed by the House, instead of $5,000 as proposed by the Senate, for telegraphing; appropriates $25,000, instead of $20,000 as proposed by the House and $35,000 as proposed by the Senate, for miscellaneous items; appropriates $7,000, instead of $5,000 as proposed by the House and $8,000 as proposed by the Senate, for furniture; appropriates $3,000 as proposed by the House, instead of $4,000 as proposed by the Senate, for rent; appropriates $24,000 as proposed by the House, instead of $25,000 as proposed by the Senate, for the Official Postal Guide; and inserts the provision, proposed by the Senate, authorizing reimbursement of the Treasury Department for expenses of preparation, issue, and registration of bonds for the Postal Savings System.

On amendments Nos. 208, 209, 210, 211, 212, 213, 214, 215, and 216: Rearranges and makes certain transfers in the clerical force of the Department of Justice without increasing the number or compensation thereof.

On amendment No. 217: Inserts the provision proposed by the Senate removing the limitation placed upon the number of temporary clerks to be employed in the Census Office during the fiscal year 1913 without increasing the amount appropriated for such clerks.

On amendment No. 218: Appropriates $10,000 as proposed by the House, instead of $20,000 as proposed by the Senate, for experimental work in developing tabulating machines in the Census Office.

On amendments Nos. 219, 220, and 221: Strikes out the provision for shipping commissioners at Honolulu and Mobile at $1,200 each, proposed by the Senate, and appropriates $3,000 as proposed by the House, instead of $3,500 as proposed by the Senate, for admeasurement of vessels.

On amendments Nos. 222, 223, 224, 225, and 226, relating to the Bureau of Immigration and Naturalization: Provides for the following additional clerks—one at $1,600, one at $1,400, one at $1,200, and one at $1,000.

On amendments Nos. 227, 228, and 229, relating to the Bureau of Standards: Increases the salary of the Librarian from $1,400 to $1,600, and provides for a glassworker at $1,400 instead of a glass blower at that salary.

On amendment No. 230: Makes the appropriation of $25,000 for equipment of the new laboratory building of the Bureau of Standards immediately available.

On amendments Nos. 231, 232, and 233: Transfers $2,000 from the appropriation "Enforcement of wireless communication laws" to be expended under the "Contingent expenses," Department of Commerce and Labor.

On amendment No. 234: Inserts the provision, proposed by the Senate, to credit the accounts of a former disbursing clerk of the Department of Commerce and Labor with the sum of $99.63.

On amendments Nos. 236, 237, 238, 239, and 240, relating to the Court of Claims: Strikes out the increase in the salary of the bailiff from $1,500 to $1,800; provides for a clerk at $1,400 instead of at $1,200; and appropriates $7,000 instead of $6,000, as proposed by the House and $8,000 as proposed by the Senate, for auditors and additional stenographers.

On amendments Nos. 241 and 242: Strikes out the section, proposed by the Senate, waiving the operation of section 8 of the District of Columbia appropriation act for the fiscal year 1913, with relation to expenses of officers and employees of the Government at meetings of conventions and associations during the fiscal year 1914, and corrects the numbering of a section of the bill.

The committee of conference have been unable to agree on amendments of the Senate as follows:

On amendment No. 2: Inserting the name of Woodbury Pulsifer as an employee of the Senate.

On amendments Nos. 7, 8, and 11: Increasing the salaries of two assistant doorkeepers of the Senate from $2,592 to $3,000 each.

On amendments Nos. 23, 24, 25, and 26: Relating to the Capitol police.

On amendment No. 27: Inserting the name of George H. Carter as clerk to the Joint Committee on Printing.

On amendment No. 37: Authorizing payment to Etta J. Giffin, assistant in charge of the division for the blind in the Library of Congress.

On amendments Nos. 38 and 39: Providing for an additional clerk at $1,800 in the Copyright Office.

On amendment No. 61: Appropriating $25,000 instead of $10,000 for freight on bullion and coin.

On amendment No. 68: Increasing the number of internal-revenue collectors from 63 to 67.

On amendments Nos. 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 93, 94, 95, relating to mints and assay offices.

On amendment No. 139: Appropriating $5,000 for a national aerodynamical laboratory commission.

On amendments Nos. 147, 148, 149, 150, 151, 152, 153, 154, 155, and 156: Increasing the clerical force of the Indian Office.

On amendments Nos. 160, 161, 162, and 163: Relating to the Patent Office.

On amendments Nos. 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, and 196: Relating to the offices of surveyors general and their clerks.

On amendment No. 235: Appropriating for the Commerce Court for the remainder of the fiscal year 1913.

J. T. JOHNSON,
A. S. BURLESON,
Managers on the part of the House.

Mr. JOHNSON of South Carolina. Mr. Speaker, I move the adoption of the conference report.

Mr. GARNER. Will the gentleman permit an interruption at this point?

Mr. JOHNSON of South Carolina. Certainly.

Mr. GARNER. I notice from the statement that the House recedes from its disagreement to certain amendments of the Senate. Does that mean that the House has agreed to increase the number of clerks in the Senate and to increase their salaries without reference to an investigation as to their necessity? In other words, does the House leave it entirely to the Senate to control their own force?

Mr. JOHNSON of South Carolina. I do not think the items that the gentleman refers to have all been agreed to. Possibly one or two have. I will say that we made some inquiry of the Senators as to why these increases should be made, and we were not entirely without information on that subject.

Mr. GARNER. The point I want to inquire about is whether or not the House Committee on Appropriations have come to the conclusion that it is in the interest of public policy and harmony between the two Houses to permit each House to control its own clerical force and to fix the salaries of the same? I think we are entitled to know whether or not the committee has come to the conclusion that they will permit each branch of Congress to control the number of its employees and the money to be paid to each of those employees.

Mr. JOHNSON of South Carolina. The Senate have always insisted that they have the right to fix the number of their own employees and their compensation. This Committee on Appropriations have never yielded to that proposition in theory, although, as a matter of fact, we have been compelled to yield to their amendments carrying it into effect.

Mr. GARNER. As a matter of fact, in this bill there is but one exception, if I get it correctly, and that is to the amend-

ment numbered 78, increasing the salaries of two assistant doorkeepers of the Senate from $2,592 to $3,000 each.

Mr. JOHNSON of South Carolina. I call the gentleman's attention to the fact that there were very few increases in the Senate.

Mr. Speaker, I move the adoption of the conference report.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. JOHNSON of South Carolina. Mr. Speaker, I move that the House further insist on its disagreement to the amendment of the Senate and agree to the further conference asked for by the Senate.

The SPEAKER. The gentleman from South Carolina moves that the House further insist on its disagreement to the amendment and agree to the further conference asked for by the Senate.

Mr. BROUSSARD. Mr. Speaker, I move that the House recede and concur in Senate amendment 235.

The SPEAKER. The gentleman from Louisiana moves that the House recede from its disagreement to Senate amendment 235 in reference to the Commerce Court and concur in the same. The Clerk will report the Senate amendment.

The Clerk read as follows:

(235) Commerce Court: For the Commerce Court, from March 5 to June 30, 1913, both dates inclusive, namely: Clerk, at the rate of $4,000 per annum; deputy clerk, at the rate of $2,500 per annum; marshal, at the rate of $3,000 per annum; deputy marshal, at the rate of $2,500 per annum; for rent of necessary quarters in Washington, D. C., and elsewhere, and furnishing same for the Commerce Court; for books, periodicals, stationery, printing, and binding; for pay of bailiffs and all other necessary employees at the seat of government and elsewhere, not otherwise specifically provided for, and for such other miscellaneous expenses as may be approved by the presiding judge, $16,111.11; in all, $19,977.78, to be immediately available.

Mr. JOHNSON of South Carolina. How much time does the gentleman from Louisiana want?

Mr. BROUSSARD. Ten minutes.

Mr. JOHNSON of South Carolina. I will yield 10 minutes to the gentleman from Louisiana.

Mr. BROUSSARD. Mr. Speaker, in the controversy in the last session of Congress regarding the abolition of the Commerce Court provision was made for that court to continue its operations until the 4th of next March. After the 4th of March no provision was made for the balance of the fiscal year. As we know, the attempt to abolish the court failed. In the meanwhile a great number of cases have gone to the Commerce Court and are now being argued, and by the 4th of March there will be no funds with which the court can continue and determine these cases. There is no other court to which these litigants may go. I had in mind quite a number of cases from my own State, known as the Tap Line cases, decided by the Interstate Commerce Commission, where suit was brought in the Commerce Court by virtue of a decision of the Supreme Court in the Proctor-Gamble case, which were dismissed by the court.

The commission felt that the people interested in the Tap Line cases and the people shipping upon these lines were entitled to have the question of law involved decided by the court and the case reopened.

They have issued an affirmative order, according to the interpretation placed upon it by the commission, and only day before yesterday the attorney of the State railroad commission of Louisiana was arguing the question before the Commerce Court. Unless provision is made whereby the rent of the building where the court is being held and the salaries of the court officials are provided at this session, on the 4th of March the litigants in these cases will find themselves suspended in the air, because there is no provision to have the court determine them.

The jurisdiction is now in that court, and Congress has not placed the jurisdiction elsewhere, as it intended to do, in the appropriation bill in the last Congress. So these litigants—40 or 50 from my own State—have cases before that court involving at least, I am told by the attorney for the State railroad commission, $2,500,000 a year. If no provision is made for the court—and it is a matter of indifference whether gentlemen are for the continuance of the court or not—it is simply a question of securing some court wherein the litigants and the large interests, such as are involved in the Tap Line cases and other orders issued by the Interstate Commerce Commission, may be determined until Congress decides whether to abolish the court and transfer jurisdiction to some other court. I believe this provision ought to be agreed to. I merely wanted to make that statement, because I do not believe that this House is prepared to say that litigants of such vast rights as are involved in the decisions of the Interstate Commerce Commission shall lose their rights simply because Congress will not provide the money to enable them to have a decision of the court that has jurisdiction of the subject matter.

Mr. MANN. Will the gentleman from South Carolina yield me some time?

Mr. JOHNSON of South Carolina. How much time does the gentleman want?

Mr. MANN. Five or ten minutes.

Mr. JOHNSON of South Carolina. I yield to the gentleman from Illinois 10 minutes.

Mr. MANN. Mr. Speaker, I do not know whether the House conferees refused to agree to this amendment because they thought the item did not belong to this bill, but more properly belonged to the deficiency bill, or whether they declined to agree to the item on its merits. But this situation will arise if no provision is made for the Commerce Court. The judges, of course, are provided for otherwise, but the court can not continue to exist and do business without the aid of the officials under the court. Under the so-called Mann-Elkins law we abolished the jurisdiction of all the other United States courts in this class of cases and conferred jurisdiction upon the Commerce Court. If no appropriation is made by which that court can do business after the 4th of March, we will be put in the situation where we do not even permit the court to decide the cases which are now pending before it, in many of which injunction orders have been issued restraining the decision of the Commerce Commission; and, in addition, as the Interstate Commerce Commission makes additional orders, there will be no court authorized to issue restraining orders, and there will be presented to us the following situation: Can Congress decline or refuse to give any court jurisdiction where the complainant insists that orders issued by the Interstate Commerce Commission are confiscatory? In my judgment, if Congress attempts to say that by a legislative commission it fixes a railroad rate which may be confiscatory and then says that no court shall have jurisdiction to determine whether the order is confiscatory, the courts under their judicial authority under the Constitution will take jurisdiction, and all the legislation that we have been attempting to build up for years to confine this jurisdiction to certain classes of cases, the courts will be compelled to wipe out. It is not desirable to do that. If it is the intention of the majority—and I take it that is their intention—to abolish the Commerce Court after the 4th of March, in doing so they will confer the jurisdiction now held by the Commerce Court upon the other courts. A method is then provided for deciding these cases; but if we say that the district courts shall not have jurisdiction, as we now say, and then declare that the Commerce Court shall not exist, we enter upon a practice of endeavoring to confiscate property, and under the judicial authority of the courts under the Constitution, in my judgment, they will hold that they have general jurisdiction.

Mr. BARTLETT. Mr. Speaker, will the gentleman yield?

Mr. MANN. Yes.

Mr. BARTLETT. We do not say that the court shall not exist, but we do not provide the means with which the court may go on with its business.

Mr. MANN. That is the same thing. We do not say the court shall not exist.

Mr. BARTLETT. If we said the court should not exist, it would then become our duty to transfer the business to some court that could dispose of it.

Mr. MANN. We practically say the court can not do business because the court can not operate without a clerk and without the employees of the court, in my judgment. I do not see how they can transact business. I do not wish to see put up to the district courts the question of the necessity of deciding whether Congress can direct the jurisdiction in these cases or whether it can abolish the jurisdiction. As long as we do not seek to abolish the authority of the courts to review these decisions, as confiscatory, I think the courts will follow the directions we give as to what courts may exercise that jurisdiction, but when we seek to practically abolish all authority of the courts, it is my judgment that they will be compelled to take jurisdiction.

Mr. JOHNSON of South Carolina. Mr. Speaker, I yield five minutes to the gentleman from Missouri [Mr. BORLAND].

Mr. BORLAND. Mr. Speaker, I have been in favor and am now in favor of abolishing the Commerce Court, but in doing so it was the evident intention of this branch of Congress, at least, to vest that jurisdiction in another proper tribunal. Having taken it away from the district courts and vested it in the Commerce Court, it was clearly the intention of Congress to revest the jurisdiction in the district courts as a condition of abolishing the Commerce Court. That plan of abolishing the Commerce Court met with a presidential veto, and one appropriation bill carries the salaries of the judges of that court up to the close of the present fiscal year. But, as I understand it, there is no provision made, unless it be made in the bill under consideration, for the machinery of the court, the

rent of the building in which the court sits and the salary of the clerk and the incidental expenses of the court. I have no desire to continue the Commerce Court beyond the time that Congress desires to have it continued—the 30th of June, 1913—but it is clearly necessary that we provide properly for the vesting of the jurisdiction in pending cases in the proper tribunal as a continuous right and remedy for the shipper, the litigant. The only class of cases in which I feel any personal interest is the class of cases that have recently gone there at the instance of shippers who are operating tap lines or other facility railroads, and who are contesting against the trunk-line railroads that very question. There has been some question before the Interstate Commerce Commission as to whether the form of the order permitted the shipper to have any court review at all. The commission changed its view about that very radically, and changed the character of its order so that the shippers could have a review equal with the railroads on the questions of whether these tap lines were plant facilities or whether they were common carriers. That question is now pending before the Commerce Court.

Mr. BROUSSARD. And some of these cases are now being argued.

Mr. BORLAND. Some of the cases are being argued. It is highly desirable that the question should be decided, because the Commerce Commission itself conceded the widespread importance of that question. It affects the entire business public of the Southwest.

Mr. GARNER. Will the gentleman yield for a question?

Mr. BORLAND. Yes; if I have the time.

Mr. GARNER. If it is desirable to abolish the Commerce Court, when will you ever find a time to abolish it when it will not have some cases before it and the same argument can be made?

Mr. BORLAND. I realize that it would be an incidental hardship in abolishing the court, but the gentleman from Texas must also realize that endeavoring to take away the machinery of the court without revesting the jurisdiction of it in pending cases in any proper tribunal is about as harsh a way as can possibly be adopted.

Mr. GARNER. And the gentleman from Texas also knows that as long as the present occupant of the White House remains there it is impossible to abolish this court, but after the 4th of March legislation possibly can be had abolishing this court and revesting its jurisdiction in the district courts. Then, why carry this item over until the 1st of July?

Mr. BORLAND. That is the very argument in favor of carrying it over during the balance of this current year in order that the jurisdiction itself will not fail while this change is being made, which is clearly the intent of Congress.

Mr. SIMS. Will the gentleman permit a question?

Mr. BORLAND. Yes.

Mr. SIMS. The gentleman speaks of shippers bringing suits in the Commerce Court. I think the gentleman is not exactly accurate in his statement in this: The tap-line railroads that have brought suits base them upon the theory that they are common carriers and entitled to share in the through rates of trunk-line roads, and therefore subject to the orders of the commission. The commission has never yet made an order against any shipper requiring him to do anything or to cease doing something that he was doing. The commission's orders can only be made against common carriers, and the contention that these shippers, as the gentleman calls them, these tap-line railroads, maintain in the court is based upon the theory that they are common carriers and not shippers.

Mr. BROUSSARD. They hold these tap lines to be common carriers, which tap lines are shippers to trunk-line railroads——

Mr. SIMS. I want to say to the gentleman that the shipper can not go into this court or any other and complain of the unconstitutionality or lack of power of the commission to make an order, as no affirmative order can be made against a shipper.

Mr. BORLAND. I would like to answer the question of the gentleman from Tennessee in full, but I do not regard this as the proper time to attempt a debate on that subject.

Mr. SIMS. The gentleman continues speaking of shippers going into the Commerce Court to complain of orders of the Interstate Commerce Commission, when the court has no jurisdiction of such suits by shippers.

Mr. BORLAND. The fact is these people are in court.

Mr. SIMS. Who is in court?

Mr. BORLAND. These lumber companies who own tap lines.

Mr. SIMS. Are they not there as railroads claiming to be common carriers?

Mr. BORLAND. But they are not trunk lines.

Mr. SIMS. They claim to be common carriers.

Mr. BORLAND. This is a legal question which has disturbed the commission, disturbed the gentleman's committee, and has disturbed everybody who has undertaken to solve it. It is a very important legal question. Now, I hope that the Commerce Court will be continued with its machinery until we can properly vest its jurisdiction in another proper tribunal, so that this question now before the court, which affects the interests of large sections of the southwestern country, may be decided.

Mr. JOHNSON of South Carolina. Mr. Speaker, I think I can make this whole matter very clear in a few words. We have appropriated a sufficient amount of money to provide for the Commerce Court until March 4, 1913. The bill now before the House provides for the fiscal year beginning July 1, 1913. The Senate has placed upon this bill what is evidently a deficiency appropriation. The proper place for the item now under discussion is in the deficiency bill. I do not hesitate to say to the Members of this House that we intend to provide the necessary money to operate the Commerce Court until it can be legally abolished and the cases pending in that court transferred to some other jurisdiction, but we do not want the House to vote in this amendment. We may want to put some limitation upon it as to how long they can make contracts for quarters, or we may want to put the language in there that they have so much money as is necessary to carry on the Commerce Court until otherwise provided by law. This is not the bill on which and this is not the language in which to provide for the Commerce Court. I hope that the motion of the gentleman will be voted down.

Mr. BARTLETT. Will the gentleman yield me a minute or two?

Mr. JOHNSON of South Carolina. Certainly.

Mr. MARTIN of South Dakota. I desire to question the gentleman——

Mr. BARTLETT. I have the floor just now, Mr. Speaker.

The SPEAKER. How much time does the gentleman from South Carolina yield to the gentleman from Georgia?

Mr. JOHNSON of South Carolina. Five minutes.

Mr. BARTLETT. Mr. Speaker, I am in favor of the abolition of the Commerce Court. I voted against its establishment. By a very narrow margin in this House it was established. I voted in the committee and I voted in the House for its abolishment. I said if I got an opportunity to effectively abolish this court I would vote to abolish it. I am one of those who believe, Mr. Speaker, that we can constitutionally not only abolish the court, but provide that the judges who hold their office by reason of the act establishing the Commerce Court can, by the same power that created the office, be retired and the office be abolished.

That is not the question to be discussed here, however. By reason of an Executive veto we have not been able to carry out this reform that we ought to be able to accomplish. We are therefore compelled, in my judgment, to at sometime provide for the necessary funds to carry on this court until the time at which it shall be abolished. I agree thoroughly with the gentleman from South Carolina [Mr. JOHNSON] that this is not the bill nor the place in which to make the provision for the necessary expenses of this court. Therefore, while I shall upon the proper occasion, feeling it my duty to do so, vote for the necessary funds to carry on the business of this court until it can be legally and properly abolished, I shall not vote for the motion of my friend from Louisiana [Mr. BROUSSARD] on this bill to concur in this amendment, because in my opinion it has no place on this bill, but ought to be provided for in the deficiency bill. And I have no question, Mr. Speaker, but that the Committee on Appropriations, when they report the deficiency bill, will make the necessary provision for carrying on the business of this court until it shall be legally abolished.

Mr. BROUSSARD. Does the gentleman from Georgia know whether there will be a deficiency bill at this session of Congress?

Mr. BARTLETT. Oh, yes; I know there will be one, and I am afraid it will be a pretty considerable one in amount. I know that it will be. For instance, we have an item of $15,000,000 to provide for the deficiency created by the pension bill that was approved on the 11th day of May, 1912. I know that is one item that we are compelled to provide for—a deficiency growing out of the administration of the pension law under that act—and something else, too.

The SPEAKER. The question is on agreeing to the motion of the gentleman from Louisiana [Mr. BROUSSARD] to recede from the disagreement to the Senate amendment on the Commerce Court and concur in the same.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. BROUSSARD. Division, Mr. Speaker.

The House divided; and there were—ayes 14, noes 63.

So the motion was rejected.

The SPEAKER. The question is——

Mr. BURKE of South Dakota. Mr. Speaker, before the question is put will the gentleman from South Carolina [Mr. JOHNSON] yield to me just for a moment to call his attention to an item in this report?

Mr. JOHNSON of South Carolina. How much time will the gentleman require?

Mr. BURKE of South Dakota. Just a moment or two.

Mr. JOHNSON of South Carolina. I yield to the gentleman a minute.

Mr. BURKE of South Dakota. I want to call the gentleman's attention to what was said when this conference was up in the Senate with reference to an amendment by the chairman of the Appropriations Committee of the Senate, who said:

> There is a disagreement of about $18,000 in regard to clerks for the Indian Office, which the Senate seeks to provide for the examination of titles and distribution of amounts due to the heirs of deceased Indians. It is part of the Indian service which the department says is necessary.

I want to call the gentleman's attention and the attention of the House to how appropriations are sought here before different committees of Congress. This item, or a similar one, was estimated for and presented to the Committee on Indian Affairs when the Indian appropriation bill was being considered, and it was not allowed on the theory that the Committee on Indian Affairs had no jurisdiction to make appropriations for clerical help in the Indian Bureau here in the city of Washington.

The Indian appropriation bill was reported to the Senate yesterday, and contains an item of $10,000 for clerk hire in the Indian Bureau for this particular purpose, and for which they have also provided an appropriation so far as they could upon the legislative bill. My purpose in mentioning it is to bring it to the attention of the gentleman in charge of the legislative bill that an effort is being made to obtain this appropriation through another appropriation bill, and for the purpose of demonstrating how the departments resort to different committees of Congress when they are unable to get an appropriation through the committee having jurisdiction of a particular item.

Mr. JOHNSON of South Carolina. I yield to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, the gentleman from South Dakota [Mr. BURKE] has called attention to an incident that is not uncommon, and that will necessitate in the very near future the adoption of what I believe to be an imperative reform in order to eliminate existing abuses. It is the common practice of the different departments of the Government, and it is not at all unusual for Members of Congress, to seek from various committees appropriations for different matters, and in the event of failure in the different places to which they apply in the House, to urge the Senate to place the items upon the bill in the conference on which the House will be represented by conferees, who, because of peculiar local conditions, are likely to be favorable to the item.

The result is that the House does not have the representation in these matters to which it is entitled. I might refer to what happened last year. It is one of many such incidents. For many years a request had been pending to appropriate money as a part of the cost of a sewer through an alleged national park in the State of Oklahoma. After it had been refused at least five years in the Committee on Appropriations on the sundry civil bill, where it properly belonged, it came back to the House from the Senate on the Indian appropriation bill, and the item was agreed to by the House conferees.

I have given considerable attention to the situation relative to the appropriations and to the remedies that must be applied, and I am convinced, Mr. Speaker, that, whether it comes in the near future or some time in the distant future, eventually this House will be compelled to concentrate all of its supply bills in one committee of the House. [Applause.]

The result will be that there will be an atmosphere about these appropriations not friendly to some particular department of the Government, but an atmosphere in which there will appear a determination to serve and to distribute the public funds to those departments of the Government most imperatively requiring public money. It will require the complete elimination of general legislation from the annual supply bills and their retention as such and nothing else. I have heard several schemes suggested and several different methods outlined. I have attempted to seek some means to stop what is becoming not only one of the great worries of Members of Congress, but what will shortly be one of the great burdens of the country, and that is the rapid rate at which the public expenditures increase. While some other scheme may be tried, I am of the opinion, as the result of my investigations of the situation in the past and of a study and careful consideration of the different remedies proposed, that the logic of the situation requires one thing to be done, and that is to put the supply bills in the control of one committee. They will then become, as they should be, the vehicles of supplies for the Government and not the refuge of those who seek Government aid for purposes not properly within the functions of the Federal Government.

The SPEAKER. The time of the gentleman has expired.

Mr. BURKE of South Dakota. Mr. Speaker, I ask that the gentleman's time be extended one minute. I want to ask him a question.

The SPEAKER. Does the gentleman from South Carolina yield one minute to the gentleman?

Mr. JOHNSON of South Carolina. Yes; I yield one minute to the gentleman.

Mr. BURKE of South Dakota. The gentleman from New York [Mr. FITZGERALD] called attention to an item in the Indian appropriation bill that was put on the Indian appropriation bill last year at the other end of the Capitol which did not belong properly on that bill, and he referred also to the fact the item was agreed to in conference. I want to say to the House that I was a member of that conference committee, and that I refused to agree to the conference report, and did not sign it because of that item and one or two other similar items as to which there was no conference, for the reason that the majority of the House conferees yielded without even discussing them.

Mr. FITZGERALD. I was not criticizing the gentleman from South Dakota.

Mr. BURKE of South Dakota. I agree with the gentleman from New York that we ought to find some means of disposing of amendments appropriating money that come back here on bills to which they do not belong, where the committee in charge of the bill does not have jurisdiction to report on such amendments.

Mr. FITZGERALD. What I was referring to was the fact that it was the common and usual thing for people demanding appropriations to seek out the particular organization of one House or the other friendly to a particular project in order that it may overcome or escape the opposition that may exist to it, and to have it placed where there is no opportunity to have a fair test upon it. Some time in the future I shall discuss the question more elaborately, but this seemed an opportune time to emphasize the matter.

The SPEAKER. The time of the gentleman has again expired.

Mr. CANNON rose.

Mr. JOHNSON of South Carolina. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Speaker, I have listened to the remarks of the gentleman from New York [Mr. FITZGERALD] with very great interest, and I indorse all that he says. I want to go a little further and say that away back in 1885, as I recollect it, for purposes arising out of factional trouble on the Democratic side, a great mistake was made. Some gentlemen may recollect the factional trouble to which I refer. It was a trouble between individuals and their followings, and the effort was made to divide the appropriation bills for the purpose—and for that purpose alone—of making one Member of Congress less powerful. We have had the result when you divide the responsibility touching kindred matters amongst six or seven committees in the House and in the Senate, all of them having jurisdiction of supply bills, you beget improvidence.

I recollect that while I had the honor at that time to serve upon the Committee on Appropriations an incident occurred that well illustrates the point, an incident in relation to a distinguished Senator, a very estimable man, who was a live wire. I will not mention his name. He is now in the beyond.

The matter came on one of the appropriation bills, and after full discussion was rejected. The Senator was a live wire and put the matter on another general appropriation bill by a Senate amendment, which was again rejected in the House; but it popped up on a third bill, and in the closing days of the session it passed. I want to say that what we need is not only full responsibility to that side or this side, but whichever side is responsible, we want full responsibility for the majority, and you can not get it under the present rules of this House, dating away back to 1888. And I want to say now, and I measure my words when I say it, that I have no doubt when the grand aggregate of the appropriation bills is made up for the coming fiscal year they will carry, not for the benefit of the public service, $100,000,000 more than is necessary for the public service, which amount has gradually grown up

under the legislative policy concerning these supply bills. [Applause.]

Mr. SHERLEY. Mr. Speaker, I do not desire to anticipate what I propose to say at some length very shortly, touching a budget system for Congress, but I do not want to let go without a word what has been said on the floor touching the matter.

I believe that it is physically impossible for one Appropriations Committee to do the work of this House relative to expenditures, and the fact that the Senate may very nearly do it through one committee proves nothing, because the Senate never has done the initial work in regard to the consideration of estimates that this House does.

I want to suggest one other thought to you, and that is that part of your evil comes not so much from the divided responsibility—though that is a great evil and ought to be remedied—as from the fact that you never consider totals until you start to add up what you have already appropriated. And no man can run his business and no Government can run the country's business without having a program laid out in advance, and not simply to find out the route they have traveled after they have traveled it. Whether it comes from one committee or whether it comes from half a dozen committees, the trouble now is that there is no consideration by the House or the country of the whole scheme of appropriations and of totals. What we need in America is a debate which will focus public attention upon the total of expenditures. [Applause.] You are never going to interest the American people in the details of appropriations; but if, through the party charged with responsibility, you can bring in on this floor a program whereby it is proposed to expend in the aggregate certain sums to be distributed in certain proportions, the majority party defending and the minority attacking, you invite the attention of the people of America to a great, broad program touching expenditures of public money; but whenever your discussion consists simply of sharpshooting at particular items in a particular bill, you are not going to get that attention which brings about a reform.

As I have stated, if the House will give me the opportunity, I propose before the session is over to submit somewhat in detail a program that I think will bring about a reform. [Applause.]

Mr. MANN. Will the gentleman from South Carolina [Mr. JOHNSON] yield two or three minutes to me?

Mr. JOHNSON of South Carolina. I yield to the gentleman from Illinois three minutes, and then I hope we may have a vote.

Mr. MANN. Mr. Chairman, I am not at all certain that the country is more interested in the total of appropriations than it is in special items. My observation is that the country can easily get worked up over an appropriation that may amount to $10,000 or $100,000 and club Members of Congress with requests and petitions and protests concerning it when they have no special interest in the question whether the total appropriations are $1,000,000,000 or $1,100,000,000; and I question very much whether any system will work to keep the appropriations down as long as Members of Congress in the main consider it their business to secure appropriations for special purposes instead of preventing appropriations which they often know ought not to be granted.

Of course, the suggestion that the matter ought to be turned over to one committee has been before the House for many years, and yet we all know that even in the Committee on Appropriations the different appropriation bills which come from that committee are made up by subcommittees, and sometimes even members of the Committee on Appropriations, seeking to secure appropriations, endeavor to put items on one bill instead of on another bill, because they have greater influence in the framing of one bill than another. In the main the Committee on Appropriations act pro forma, so far as the entire committee are concerned, in reporting the appropriation bills, and they are divided into subcommittees which do the work. The Members of this House ought not to think that they can avoid their own individual responsibility in regard to appropriations by assuming that some other system or somebody else will keep down the totals.

Mr. JOHNSON of South Carolina. Mr. Speaker, the suggestion of the gentleman from South Dakota which brought about this very interesting discussion makes it necessary for me to make a statement to the House. When we made up the legislative bill for 1913, upon examining the authorities from the Indian Bureau we found that they had a lump-sum appropriation of $80,000 for clerical services in the District of Columbia.

This legislative bill is intended to provide for all the clerical services needed within the District of Columbia. We inserted in that bill a provision that for the year 1914 and thereafter they should estimate for the number of people needed in order to carry on the work. We were endeavoring to break up the practice of lump-sum appropriations by committees whose duties did not require them to investigate the wants of the departments in Washington for clerical help.

In accordance with the provision inserted in that bill they came before Congress this year with their estimates for the clerks who had hitherto been paid out of the lump-sum appropriations. In spite of the fact that they had been served with notice in the legislative bill for the current year that we were opposed to their going to the Committee on Indian Affairs for a lump sum, they went before that committee and asked for a lump sum of $10,000 for clerical service in the Indian Office in this city. They failed to get it. The gentleman from South Dakota informed the House this morning that the Indian bill has been reported to the Senate containing that amendment. The Committee on Appropriations can not keep up with all the bills, but the Members of the House should examine with care any bill, whether reported by the Rivers and Harbors Committee, the Post Office Committee, the Committee on Indian Affairs, or any other committee which provides for clerical services in the District of Columbia, because the probability is that the committee having jurisdiction of that question has investigated it and refused the request, and then a committee not having jurisdiction and not having sufficient information granted it. Mr. Speaker, I call for a vote.

The SPEAKER. The question is on the motion of the gentleman from South Carolina that the House further insist on its disagreement to the Senate amendments and agree to the conference.

The motion was agreed to.

The SPEAKER appointed as conferees on the part of the House Mr. JOHNSON of South Carolina, Mr. BURLESON, and Mr. GILLETT.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD of Virginia. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914. And pending that, Mr. Speaker, I ask unanimous consent that general debate be limited to two hours, one hour to be controlled by the gentleman from Illinois [Mr. MCKINLEY] and one hour by myself.

The SPEAKER. The gentleman from Virginia moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the diplomatic and consular appropriation bill, and pending that he asks unanimous consent that general debate be limited to two hours, one hour to be controlled by the gentleman from Illinois [Mr. MCKINLEY] and the other hour by himself. Is there objection?

Mr. EDWARDS. Mr. Speaker, reserving the right to object, is it not possible to reduce the time for general debate to one hour, 30 minutes on a side.

Mr. FLOOD of Virginia. Not by unanimous consent. I have conferred with the gentleman from Illinois [Mr. MCKINLEY], and he wants an hour on that side. I do not know whether we will want an hour on this side or not; I doubt it.

Mr. EDWARDS. I shall not object, Mr. Speaker, but I would like to see the time allotted for general debate reduced.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The motion of Mr. FLOOD of Virginia was then agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. RUCKER of Missouri in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 28607, the diplomatic and consular appropriation bill, and the Clerk will report it.

Mr. FLOOD of Virginia. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to dispense with the first reading of the bill. Is there objection?

There was no objection.

Mr. FLOOD of Virginia. Mr. Chairman, I know it is the purpose of the gentleman from Illinois to yield to the gentleman from Pennsylvania.

Mr. Chairman, this bill needs but little explanation. It was framed along fair and economical lines.

Our people take a deep interest in the Diplomatic and Consular Service. There is no other branch of the Government that is doing so much effective work on so small an appropriation.

The value of the foreign service to the Government, to American commerce, and to the individual citizen is recognized all over the country, and there is a desire everywhere that this service should be properly maintained. With that end in view

and mindful of the necessity of an economical administration of every branch of the Government the pending bill was framed by the Committee on Foreign Affairs.

In the preparation of the bill which contains the appropriations for the current year cuts were made wherever it was possible, and some items were left out with the understanding that they would be taken up this year; but nothwithstanding these facts this bill carries only about $180,000 more than the appropriations for the current year, an increase of about 5 per cent.

The estimates for the next current year amounted to $3,965,392.61; the pending bill carries appropriations for $3,764,642.66, or less by $200,945.20 than the estimates, and in addition to that we provide $50,000 in this bill for the expenses of the Pan American Congress, that was not estimated for, which leaves over $250,000 of the estimates that were disallowed.

The pruning of the estimates was carefully done and the appropriations provided for are believed to be sufficient to meet all the needs of our foreign service for the next fiscal year and is nowhere extravagant.

The Committee on Foreign Affairs indulges the hope that it will pass the House without material change.

Mr. MANN. I have authority from the gentleman from Illinois to yield his hour to the gentleman from Pennsylvania [Mr. OLMSTED], and I now yield to him that time.

Mr. OLMSTED. Mr. Chairman, before commencing I ask unanimous consent to extend my remarks in the RECORD and to insert therein certain documents which I do not wish to consume the time of the House in reading.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. OLMSTED. Mr. Chairman, there is pending in this House a bill introduced by my friend from Virginia [Mr. JONES], chairman of the Committee on Insular Affairs, which is so remarkable and so dangerous in its provisions that I feel justified in devoting a brief period to its discussion. It is H. R. 22143, and is entitled:

A bill to establish a qualified independent government for the Philippines and to fix the date when such qualified independence shall become absolute and complete, and for other purposes.

It creates what is to be known as "The Republic of the Philippines." It provides that at 12 o'clock noon, on the 4th day of July, 1913, the officers of the republic shall take their official places and that "on and from that day and hour, and forever thereafter, the present government shall cease to exist." It not only abolishes the government heretofore provided by the Congress of the United States, but it prohibits Congress from hereafter legislating in any way for the Philippine Islands or exercising any control over them, except by the exercise of the veto power upon public acts passed by the Philippine Congress. It does provide that for eight years, or until July 4, 1921, the President of the United States shall have the right to veto all "public acts" of the Philippine Congress, and that if he shall fail to do so, the Congress of the United States may, during the said eight years, annul any bill passed by the Congress of the Philippines. It specifically confers upon the Congress of this proposed Philippine Republic the power to borrow money, to regulate commerce with foreign nations, to constitute judicial tribunals, and to "exercise all other rights of sovereignty," with the proviso that for eight years after July 4, 1913, it shall not have the power to declare war or grant letters of marque or reprisal or make treaties with foreign powers without the concurrence and consent of the United States Government, and that "all treaties and commercial conventions sought to be entered into by the Philippine Government with foreign powers from and after the 4th day of July, 1913, for a period of eight years, shall be submitted to the President of the United States, and by him to the Senate of the United States for its action." The president of the Republic of the Philippines is indeed, for the period of eight years, to be appointed by the President of the United States, by and with the advice and consent of the Senate; and in the same manner members of the Supreme Court of the Philippines may be appointed. Except as I have mentioned, the United States may have no control whatever. Both branches and all the members of the Congress of the Philippines—that body which is not only to legislate upon certain subjects, but is also expressly authorized "to exercise all other rights of sovereignty"—are made elective. The Congress of the United States is deprived of all power to legislate for or concerning the Philippine Islands or the inhabitants thereof; and yet, in the same act, it is distinctly and expressly and emphatically provided and declared that "the United States guarantee to the Philippines their independence, and shall protect them against invasion and, on application of the congress thereof, against domestic violence for the period of eight years from and after the 4th day of July, 1913," and at the expiration of the said eight years the Philippine Republic is "to become an absolute sovereignty in foreign as well as domestic affairs."

From this brief résumé of the bill it will readily appear that, from the very start, the authority of the United States in the Philippine Islands will be taken away. No affirmative action by our Government is permitted, and yet all our responsibilities are to remain.

The bill itself, upon its very face and in its preamble, acknowledges and admits that the Filipinos are not qualified for self-government; that they are not even qualified to adopt their own constitution, for it provides in its preamble that "to secure the blessings of liberty to them and their posterity the people of the United States do ordain and establish this act of Congress as a constitution for the Philippine Islands"; and again, we read in section 28, "that this act is hereby declared to be the constitution of the Republic of the Philippines." What people, qualified for self-government, would ever submit to have their constitution prepared, ordained, and established by another nation? If they are qualified for independence, why shall we force upon them a constitution of our own adoption? If we do insist upon adopting a constitution for them, it must be because we consider them incapable of framing one for themselves; and yet this remarkable bill provides "that the Government of the Philippines, established in accordance with this act, shall assume and carry into effect the treaty obligations of the United States with the Kingdom of Spain." Not merely the obligations of the treaty of Paris, but all treaty obligations with the Kingdom of Spain. Without asking the permission of Spain, which is one of the parties to the treaty contracts, we are to try to slip out from under our obligations and ordain that they shall be assumed and carried into effect by a people who are not qualified even to frame a constitution for their own government.

THE PHILIPPINES NOT A BAD BARGAIN.

The Philippine Islands and the island of Porto Rico were acquired by the United States at the same time, in the same manner, and under the provisions of the same treaty. Why this mad rush to "secure the blessings of liberty" to the Filipinos before they are ready to enjoy them, while we say nothing about securing the same blessings to the people of Porto Rico? The reason is that the people of this country have been studiously taught to believe that, while the United States secured a very good bargain in Porto Rico, it made a very bad one in the Philippines; that the latter are worthless possessions, and are constantly costing our Government enormous sums of money. The facts are exactly to the contrary. The Philippines are very rich possessions. If Germany or Japan or any other foreign nation possessed them, they would never let them go. So much of the territory of Japan is mountainous, barren, and difficult that, industrious and enterprising as they are, the Japanese have been able to bring under cultivation only a very small proportion of its total area. There are more than three times as many acres of rich, fat soil lying uncultivated and untouched in the Philippine Islands as are now cultivated in Japan. Japan supports a population of 40,000,000. The Philippines could as easily support 100,000,000 people. Japanese imports and exports increased from $13,000,000 in 1868 to more than $407,000,000 in 1908. The imports and exports of the Philippine Islands increased from $25,479,922 in 1899 to $104,864,816 in 1912. The imports of the Philippines from the United States increased from $1,150,613 in 1899 to $20,604,155 in 1912; and the exports to the United States from $3,540,894 in 1899 to $16,716,956 in 1911, and still larger figures for 1912.

The soil of the Philippine Islands is so fertile that, although tickled in the crude manner and with the most primitive instruments, it laughs with harvests of great abundance.

Prof. Charles V. Piper, who has spent much time in the Orient, and particularly in Java and in India, recently returned after a visit of six months in the Philippines. In speaking of their agricultural possibilities he says:

The Philippines are probably the most fertile tropical islands in the world. They are certainly far richer in this respect than Java, which has long been heralded as the richest tropical island.

And adds—

I doubt if there is an equal area anywhere in the United States capable of yielding as much agricultural produce as these islands.

He finds, however, that the processes of agriculture are there very crude, and that less than 5 per cent of these rich lands is in actual cultivation. He complains, also, that under the delusion that we are endeavoring to show to the world the pure altruism of our motives, "we are virtually forbidding American enterprise to develop the richest islands in the world."

Of the Filipinos themselves he says:

There can be no question that the great mass of the Filipino people is at present incapable of self-government, and it is misdirected friendship to encourage them in the belief that they can acquire this develop-

ment in less than two or three generations under American tutelage. I do not question the sincerity of Americans who argue that the Filipinos should be given immediate independence, but this would be worse than an error—it would be a crime.

Think of the possibilities, if these people were taught modern methods and the use of modern implements so as to make the most of their lands; and think of the possibilities of trade and the vast market for our products when those islands shall become more densely populated, as they are destined to be when intelligent methods of agriculture shall prevail over their now untouched millions of acres. Already they have become our very largest purchaser of cotton goods, and during the nine months ending September 30, 1912, purchased from the United States 59,654,872 yards of the manufactures of cotton.

Their most extensive and valuable crop is hemp, but in 1912 they exported copra, or dried coconut meat, of the value of more than $16,500,000. This country pays annually many many millions of dollars for rubber. Much of the soil of the Philippines is adapted to its culture, and they could readily supply enough for all our uses. They have splendid sugar lands, but their methods are so antiquated and crude that they can not compete in many markets. They obtain and utilize only about one-half of the juice of the cane, while by modern methods nearly all of it is saved and made into sugar. They make mostly what we used to know as "muscovado," a sugar which is brown in color and cheap in price. There are some 60,000,000 of acres of public lands lying untouched. They are not taken up, partly because an act of Congress restricts to 40 acres the amount which may be purchased by any one man, whereas at least 5,000 acres are necessary to justify the erection of the costly modern centrale in which alone sugar can be advantageously and profitably produced.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. OLMSTED. Certainly.

Mr. JONES. Will the gentleman please state what is the principal food product of the Philippine Islands?

Mr. OLMSTED. The principal food product of the Philippine Islands is rice, or, rather, that is their principal article of food.

Mr. JONES. Is the gentleman not aware that within the past 10 years there has been imported into the islands to keep the people from starving 2,485,000 tons of rice, of the value of $165,000,000?

Mr. OLMSTED. I can not vouch for the accuracy of those figures, but I am entirely familiar with the fact that they do not produce as much rice as they consume. I am also familiar with the further fact that legislation enacted by Congress, and the changing of which is opposed by the gentleman from Virginia himself, has made it impossible to purchase in that island by one man enough land to make the cultivation of rice profitable. The cultivation of rice can not be carried on profitably upon 40 acres of land, and that is the utmost limit of public lands which can be purchased there now.

Mr. CRUMPACKER. Mr. Chairman, will the gentleman permit a suggestion or a question in that direction?

Mr. OLMSTED. Certainly.

Mr. CRUMPACKER. Is it not true that the rice famine in the Philippine Islands was brought about chiefly by the rinderpest that destroyed the water buffalo, the beast of burden and of agriculture in the islands?

Mr. OLMSTED. That is very largely true as to one or two years. It is also true that, on the average, they do not raise as much rice there as they ought to, or as they consume, or as they would if they were permitted to purchase more land for that purpose.

What the islands need is development—not exploitation, but development. The people should be taught by precept and example how to till their lands to make the most of them. When that has been done the result is sure to be something astonishing. They are very rich possessions.

THE PHILIPPINES ARE COSTING THE UNITED STATES PRACTICALLY NOTHING AT THE PRESENT TIME.

Great efforts are being made to convince the people that the Philippines are a vast annual expense to the United States. President Taft, in recent addresses—and I think, also, in one or more messages—has declared that their present cost to the United States is practically nothing. The gentleman from Virginia a few days ago endeavored to show that the annual expense is $40,000,000.

In arriving at those figures he puts down as an annual expense all the money which has been expended in the last 10 years in permanent fortifications, which will always be necessary to protect the naval stations, the necessity of which even his bill admits and provides for. He charges that our soldiers in foreign service get 20 per cent more pay for enlisted men and 10 per cent more for officers. He alleges that all this extra pay for foreign service amounts to $995,000 and that "practically every dollar of which is paid to our troops serving in the Philippines," and then carries it out into his computation at $12,000,000. The other items which go to make up his $40,000,000 are not very clearly stated, except that the cost of maintaining the Bureau of Insular Affairs at Washington "exceeds $1,000,000." In answer to that I will insert in the RECORD at this point, without stopping to read, a letter from Gen. McIntyre, chief of that bureau, showing that the annual expense at all chargeable to the Philippines is $85,000.

WAR DEPARTMENT,
BUREAU OF INSULAR AFFAIRS,
Washington, February 5, 1913.

Hon. MARLIN E. OLMSTED,
Representative in Congress, Washington, D. C.

MY DEAR MR. OLMSTED: Pursuant to your request for a statement as to the annual expenses to the United States Government of the Insular Bureau, I beg to state that the appropriations for the fiscal year ending June 30, 1913, are as follows:

Officers	$15,000
Personnel	91,840
Rent	2,220
Total	109,060

The appropriation for salaries of the clerical force of the bureau for the fiscal year ending June 30, 1905, when practically all of its work related to the Philippines, was $79,800, and the average annual appropriation for the clerical force during the last nine years has been about $85,000. It would be extremely difficult to determine what proportion of the appropriations for the bureau are properly chargeable to the Philippines, but certainly it would not be fair to charge any greater amount than the appropriation for 1905. At the present time the bureau has charge of the affairs of the civil government in the Philippines and in Porto Rico and the work pertaining to the Dominican customs receivership. The receivership was inaugurated in 1905, and from September, 1906, to January, 1909, the bureau had under its charge the affairs relating to the provisional government of Cuba, so that since the organization of the bureau it has on several occasions been called upon to take over work which at times required the greater part of its attention.

Very sincerely, FRANK MCINTYRE.

So the $1,000,000 of my friend from Virginia drops down to $85,000. An analysis of his other vague charges would result in a much larger proportion of shrinkage. It is not fair to charge against the Philippine Islands the expense of fortifications there, and surely it is improper to charge their entire cost as an annual expense. The pending bill itself acknowledges that whether we do or do not control the Philippines the United States must have "coaling and naval stations" there, for it provides on page 3 that we are to retain them.

Such coaling and naval stations are absolutely necessary, and, of course, if they are to be of any use they must be fortified, so that they may be protected. If the Republic of the Philippines is to be created as a separate and distinct Government, which may or may not always be friendly to us, such fortification must be all the more complete. Nor is it fair to charge as an annual expense of the Philippines any portion of the expense of the Spanish War.

It is safe to assume that the passage of the pending bill would increase rather than diminish the annual expense of the United States in the Philippines. We should have to retain the same troops there for eight years at least, and probably a great many more.

Mr. MARTIN of South Dakota. Mr. Chairman, will the gentleman yield?

Mr. OLMSTED. Certainly.

Mr. MARTIN of South Dakota. I understand the gentleman to say that at the present time practically our administration or our relations with the administration of the Philippines is without expense, or at least without great expense.

Mr. OLMSTED. I do.

Mr. MARTIN of South Dakota. Could the gentleman tell the committee, by way of approximation, how much, if anything, it has cost the United States because of our relations with the Philippine people and to their problems, since the treaty of Paris, having no relation to the war itself, but what, if anything, approximately has our policy of an effort at civilization in the Philippines cost from the time, say, of the signing of the treaty of Paris to the present time?

Mr. OLMSTED. Of course, after the treaty of Paris we had some expense in subduing the insurrection and in pacifying the islands. I suppose the gentleman does not mean to include that?

Mr. MARTIN of South Dakota. No; I would not. I have reference merely to the policy that we adopted in reference to the education and the civilization of the Philippines.

Mr. OLMSTED. That policy has cost us nothing under American control. The government there has made vast permanent improvements and yet has been self-supporting. It has a surplus at the present time.

I am not making an argument in favor of the permanent retention of the Philippines. I am merely endeavoring to show that neither as a bad bargain nor as a source of expense to us

are the Philippine Islands deserving of the evil days which the passage of this bill at this time would surely bring upon them and upon us.

IGNORANCE AND LACK OF HOMOGENEITY UNFIT THEM FOR SELF-GOVERNMENT.

The inhabitants of the Philippine Islands do not constitute a homogenous people; some are styled civilized and some are admittedly wholly wild. There are spoken in the islands not less than 15 or 20 different languages or dialects. Very many of those who speak one dialect can not speak or understand another. Only a small percentage of all the people of the islands can read and write in any language or dialect, and less than 3 per cent possess what we would call a fair high-school education.

Mr. QUEZON. Mr. Chairman, will the gentleman yield?

Mr. OLMSTED. Certainly.

Mr. QUEZON. Would the gentleman care to inform the House how much personal information he has about the Filipino people and their qualifications for self-government?

Mr. OLMSTED. I will show the gentleman what evidence I have.

Mr. QUEZON. Would the gentleman answer another question?

Mr. OLMSTED. Certainly.

Mr. QUEZON. Has the gentleman ever been in the Philippine Islands?

Mr. OLMSTED. I have not, but I know and the gentleman from the Philippines knows that the inhabitants of those islands do not constitute a homogenous people. He knows there are 15 or 20 different dialects or languages spoken in the islands and he knows that there are no less than 24 different tribes in the islands, 8 civilized and 16 uncivilized.

Mr. QUEZON. Is the gentleman informed that the census of the Philippines Islands, published under the guidance and responsibility of the United States Government, says that the people of the Philippine Islands are more homogenous than are the people of the United States?

Mr. OLMSTED. No; it does not say anything of the kind.

Mr. QUEZON. I will send for it.

Mr. JONES. If the gentleman will permit me I will read it. I have it here.

Mr. OLMSTED. No; I will read it myself.

The CHAIRMAN. Does the gentleman from Pennsylvania yield to the gentleman from Virginia?

Mr. OLMSTED. Not at present; in a moment I will. The gentleman refers to a single paragraph of less than two lines quoted in the report of the Committee on Insular Affairs, from which he draws the inference that the people there are more homogenous than the people of the United States, and there is something in that extract which would perhaps, standing by itself, justify the assertion, but I propose to read further from the Philippine census report in a moment.

Under the present law the requirements of voters in the Philippines are very simple. Anybody may vote who was an officeholder under the Spanish régime or who is able to speak or write either English or Spanish or who is possessed of property to the value of $250 or who pays taxes to the amount of $15 per annum. Any one of these qualifications enables a Filipino to vote. The first Philippine Assembly was elected in 1907. Out of a population of 8,000,000 there were but 98,257 voters.

Mr. QUEZON. Will the gentleman yield for a question?

Mr. OLMSTED. Yes.

Mr. QUEZON. Does the gentleman believe if the people of the United States were required to read and write German before they could vote there would be many voters in the United States?

Mr. OLMSTED. If the people of the United States were required to read the official language of this country, I think a good many of them—millions of them—would be entitled to vote. Spanish is the official language of the Philippines, and has been for 300 years.

Mr. QUEZON. It is not the native language.

Mr. OLMSTED. There are 15 or 20 native languages.

At the election of 1909 there were 192,975 voters, being less than 3 per cent of the population. At the election in 1912 there were registered 248,154, but only 235,786 persons voted. Of those who were registered only 81,916 possessed the requisite educational qualification. The others were registered because they possessed the requisite amount of property or had held office under the Spanish régime. From page 46 of the report of the Philippine Commission for 1912 I read the following:

> The registration, the largest yet recorded, shows a large increase over that of 1909, and included about 3.5 per cent of the census population of the territory holding elections. There were actually cast about 96 per cent of the registered votes, or 3.3 per cent of the population.
>
> Although the educational qualification for voting is not high, consisting only of ability to speak or write either English or Spanish, the proportion of electors shown to possess this degree of education, including the city of Manila, where 86 per cent were literate, was very nearly but not quite one-third of those registered. In the Provinces alone but 30 per cent were educated. This lack of education required a large number of ballots to be prepared by the inspectors, a proceeding which opens the door to fraud and which is known to be one of the chief reasons for the large number of protested elections, which was 210. *The proportion of literate electors to the population in the territory affected was 1.47 per cent.*

In Manila, which is a city of over 400,000 population, 10,508 persons were registered. Of this number 8,963 possessed the requisite educational qualifications. The others were registered upon other qualifications. Of those entitled to vote, 8,963, or about 86 per cent, possessed the requisite education qualifications—not 86 per cent of the entire population, but 86 per cent of those who were entitled to vote. "In the Provinces alone but 30 per cent were educated." This does not mean 30 per cent of the entire population, but 30 per cent of those who were entitled to vote. The other 70 per cent voted on property, tax, or previous office-holding qualifications. The significant fact is that "the proportion of literate electors to the population in the territory affected was 1.47 per cent" including Manila, where the literate are most numerous, but not including Moro and other wild Provinces, where illiteracy is almost universal and where no elections were held. It has been said that the learning of the many is liberty, but the learning of a few is despotism. What liberty would there be in turning over 8,000,000 people to pretended self-government when less than 1½ per cent of them possess sufficient education to vote under the present liberal suffrage laws? What intelligent man can honestly believe that such people are qualified to maintain what the American people understand when we speak of a Republic?

President Taft was the first Governor General of the Philippines. He administered their government with eminent success and was exceedingly popular with the inhabitants. When he became Secretary of War under President Roosevelt he had supervision over their affairs. He visited and was familiar with nearly every Province. His familiarity with the Spanish language enabled him to acquire an unusual amount of information as to their intelligence, their habits of thought, and their desires. His long residence there, his subsequent visits, his association with the people of all classes and of all parts of the islands combine to make him better qualified than any other American to testify concerning them. As Secretary of War he sent a special report to President Roosevelt in 1908, in which he said:

WHAT SECRETARY OF WAR TAFT SAID.

> *Any attempt to fix the time in which complete self-government may be conferred upon the Filipinos is their own interest is, I think, most unwise.* The key to the whole policy outlined by President McKinley and adopted by Congress was that of the education of the masses of the people and the leading them out of the dense ignorance in which they are now, with a view to enabling them intelligently to exercise the force of public opinion, without which a popular self-government is impossible.
>
> It seems to me reasonable to say that a condition can not be reached until at least one generation shall have been subjected to the process of primary and industrial education, and that when it is considered that *the people are divided into groups speaking from 10 to 15 different dialects, and that they must acquire a common medium of communication and that one of the civilized languages, it is not unreasonable to extend the necessary period beyond a generation.* By that time English will be the language of the islands and we can be reasonably certain that a majority of those living there will not only speak and read and write English, but will be affected by the knowledge of free institutions and will be able to understand their rights as members of the community and to seek to enforce them against the pernicious system of caciquism and local bossism which I have attempted in this report to describe.
>
> But it is said that a great majority of the people desire immediate independence. I am not prepared to say that if the real wish of a majority of all the people—men, women, and children—educated and uneducated, were to be obtained there would not be a very large majority in favor of immediate independence. It would not, however, be an intelligent judgment based on a knowledge of what independence means, of what its responsibilities are, or of what popular government in its essence is. But the mere fact that a majority of all the people are in favor of immediate independence is not a reason why that should be granted, if we assume at all the correctness of the statement, which impartial observers can not but fail to acquiesce in, to wit, that the Filipinos are not now fit for self-government.
>
> The policy of the United States is not to establish an oligarchy, but a popular self-government in the Philippines. * * * The presence of the Americans in the Islands is essential to the due development of the lower classes and the preservation of their rights.

And again, in the same report, Secretary Taft said:

> The educated Filipino has an attractive personality. His mind is quick; his sense of humor is fine; his artistic sense acute and active; he has a poetic imagination; he is courteous in the highest degree; he is brave; he is generous; his mind has been given by his education a touch of the scholastic logicism; he is a musician; he is oratorical by nature.
>
> The educated Filipino is an aristocrat by Spanish association. He prefers that his children should not be educated at the public schools, and this accounts for the large private schools which the religious orders and at least one Filipino association are able to maintain. In arguing that the Philippines are entirely fit for self-government now a committee of educated Filipinos once filed with the civil governor a written brief, in which it was set forth that the number of "ilustrados" in the islands was double that of the offices—central, provincial, and municipal—and therefore the country afforded two "shifts" of persons com-

petent to run the government. This, it was said, made clear the possibility of a good government if independence was granted. The ignorance of the remainder of the people, admitted to be dense, made no difference. I cite this to show how little importance an intelligent public opinion or an educated constituency is regarded in the community and government, which many of the educated Filipinos look forward to as a result of independence.

WHAT PRESIDENT ROOSEVELT SAID.

In his special message to Congress presenting that report, President Roosevelt said:

I transmit herewith the report of Secretary Taft upon his recent trip to the Philippines. I heartily concur in the recommendations he makes. * * * No great civilized power has ever managed with such wisdom and disinterestedness the affairs of a people committed by the accident of war to its hands. *If we had followed the advice of the misguided persons who wished us to turn the islands loose and let them suffer whatever fate might befall them, they would already have passed through a period of complete and bloody chaos,* and would now undoubtedly be the possession of some other power, which there is every reason to believe would not have done as we have done. * * * Save only our attitude toward Cuba, I question whether there is a brighter page in the annals of international dealing between the strong and the weak than the page which tells us of our doings in the Philippines. I call especial attention to the admirably clear showing made by Secretary Taft of the fact that it would have been equally ruinous if we had yielded to the desires of those who wished us to go faster in the direction of giving the Filipinos self-government, and if we had followed the policy advocated by others who desired us simply to rule the islands without any thought at all of fitting them for self-government. * * * It may probably be a generation—it may even be longer—before this point is reached, but it is most gratifying that such substantial progress toward this as a goal has already been accomplished. We desire that it be reached at as early a date as possible for the sake of the Filipinos and for our own sake. But *improperly to endeavor to hurry the time will probably mean that the goal will not be attained at all.*

In his last annual message to Congress President Roosevelt said:

The Filipino people, through their officials, are therefore making real steps in the direction of self-government. I hope and believe that these steps mark the beginning of a course which will continue till the Filipinos become fit to decide for themselves whether they desire to be an independent nation. But it is well for them (and well also for those Americans who, during the past decade have done so much damage to the Filipinos by agitation for an immediate independence for which they were totally unfit) to remember that self-government depends, and must depend, upon the Filipinos themselves. All we can do is to give them the opportunity to develop the capacity for self-government. If we had followed the advice of the foolish doctrinaires who wished us at any time during the last 10 years to turn the Filipino people adrift, we should have shirked the plainest possible duty and have inflicted a lasting wrong upon the Filipino people. We have acted in exactly the opposite spirit. We have given the Filipinos constitutional government; a government based upon justice; and we have shown them that we have governed them for their good and not for our aggrandizement. At the present time, as during the past 10 years, the inexorable logic of fact shows that this Government must be supplied by us and not by them. We must be wise and generous; we must help the Filipinos to master the difficult art of self-control, which is simply another name for self-government. But we can not give them self-government save in the sense of governing them so that gradually they may, if they are able, learn to govern themselves. Under the present system of just laws and sympathetic administration, we have every reason to believe that they are gradually acquiring the character which lies at the basis of self-government, and for which, if it be lacking, no system of laws, no paper constitution, will in anywise serve as a substitute. Our people in the Philippines have achieved what may legitimately be called a marvelous success in giving to them a government which marks on the part of those in authority both the necessary understanding of the people and the necessary purpose to serve them disinterestedly and in good faith. I trust that within a generation the time will arrive when the Filipinos can decide for themselves whether it is well for them to become independent or to continue under the protection of a strong and disinterested power able to guarantee to the islands order at home and protection from foreign invasion. But *no one can prophesy the exact date when it will be wise to consider independence as a fixed and definite policy. It would be worse than folly to try to set down such a date in advance, for it must depend upon the way in which the Filipino people themselves develop the power of self-mastery.*

In 1910 Hon. J. M. Dickinson, then Secretary of War and a Democrat, after an extended visit to the Philippines, made a special report to the President, in which, speaking of the attempt of politicians, through the press and in other ways, to stimulate a general demand for immediate Philippine independence, he said:

While, as stated, these are the only views publicly expressed, I became convinced from reliable evidence that many of the most substantial men, while not openly opposing the demands publicly voiced, would regard such a consummation with consternation. They realize that the Government would fall into the hands of a few who would dominate the masses; that the administration, even without outside interference, could not be successfully carried on; *that there would be internal dissensions and probably civil war;* and that if the United States did not interfere they would fall an easy prey to some foreign power.

Mr. JONES. Will the gentleman yield to me for one question?

Mr. OLMSTED. With pleasure.

Mr. JONES. Is it not a fact that the official reports show that out of 12,500 municipal and township officers only three are Americans, and do not those reports also show that of the 29 judges of the courts of first instance 14 are Filipinos; do not the reports show of the judges of supreme court 3 are Filipinos, 1 of whom is the chief justice?

Mr. OLMSTED. Yes; appointed by the President of the United States.

Mr. JONES. And the attorney general of the Philippines is a Filipino. And is it not a fact that the Philippine lawyers are regarded as better lawyers than the American lawyers who are located in the islands?

Mr. OLMSTED. Well, I have no doubt, Mr. Chairman, that there are some Filipino lawyers who are better lawyers than some American lawyers, but that does not prove anything. I assume that there are in Manila a few quite able lawyers. I will assume that there are some able and learned gentlemen there and some very eloquent gentlemen, but they are not the whole Philippine Islands. My contention is that a handful of intelligent aristocrats in the city of Manila can not be trusted to rule 8,000,000 of people, the most of whom are densely ignorant, who do not speak the language common in Manila, and who have not the intelligence to choose their own rulers.

Mr. JONES. Will the gentleman permit just one question more? Is it not a fact that their fiscals—that is, the prosecuting attorneys in the islands—are practically all Filipinos?

Mr. OLMSTED. Very many of them are. It has been the purpose of our people to give as far as possible the municipal offices into the hands of Filipinos, but I notice that actions were brought for the removal of some hundreds of them within the last year or two because of unfitness or of improper conduct.

Mr. LONGWORTH. Will the gentleman yield to me at that point?

Mr. OLMSTED. Yes.

Mr. LONGWORTH. In line with what the gentleman was saying as to the small aristocratic class which desired to assume the reins of government I will quote to him a sentence from a memorial presented to Members of Congress who visited the Philippine Islands in 1906, offered as a particular ground for giving Filipinos immediate independence. It is as follows:

It is undeniable that there exists in the Philippines in sufficient numbers the so-called "directing class," a small portion of which is employed by the present Government in all the branches of administration, cooperating actively and effectively with the Government in its gubernatorial labor. If the Filipino Archipelago has a governable popular mass, called upon to obey, and a directing class in charge of leading, it then has conditions to govern itself by itself. These are the only two factors, without counting the casuals, who determine the popular capacity of a country. The directing class is the entity that knows how to lead, and the popular mass is the entity that knows how to obey.

Does the gentleman think that presents reasons for giving the Filipinos immediate independence?

Mr. OLMSTED. I think it shows that the Filipinos who presented that memorial little understood the qualifications for self-government, republican in form. The memorial itself affords abundant proof of the incapacity of the masses. What we know as republican self-government could not be maintained under such a division of classes as that. We proceed upon the theory that all the people, and not merely a "directing class," are entitled to participate in the Government.

I think that the gentleman from Virginia [Mr. JONES] was a member of that celebrated Taft party, and that he was present when that memorial was presented. The gentleman from Ohio [Mr. LONGWORTH] was there, too, and he will always remember that trip. Both gentlemen doubtless recall that, immediately after the reading of that memorial, Dr. Dominador Gomez, the Filipino labor leader, addressed the Americans present, and, among other things, said:

I must call to the attention of the honorable Members of Congress who hearken to my words the fact of the injustice, if such a word can be used, of the Government of the United States in listening too much and in laying too much stress to the words and representations of that class of people known in this country as the "gente ilustrada," or the learned class.

I trust that the gentleman from the Philippines [Mr. QUEZON] approves my pronunciation.

Mr. QUEZON. It is splendid.

Mr. OLMSTED. He says it is splendid.

One of our representatives present asked whether by the use of the term "gente ilustrada" he referred to the directing class or to the obeying class. In reply, Gomez said:

I was referring to the class of people who live in ease and comfort and who generally represent the intelligence and education of the country.

The census report shows that the directing class constitute no more than 1.6 per cent of the population of the islands. Those who are clamoring most for Philippine independence and those in whose interest this Republic of the Philippines is to be created are the "gente ilustrada." The common people, who represent more than 98 per cent of the Philippine population, would have very little part in it.

THE PHILIPPINE CENSUS REPORT SHOWS THE IGNORANCE AND HETEROGENEOUSNESS OF THE PEOPLE.

The report of the Committee on Insular Affairs in support of the pending bill quotes a paragraph from the report of a former Philippine census, from which the committee draws its own con-

clusion that "the truth is that they are more homogeneous than the people of the United States." Taken as a whole the census report proves just the opposite. Thus, it declares that—

The selection of a sufficient number of intelligent Filipinos able to read, write, and speak the Spanish language, as well as the various dialects of the people, to serve as enumerators and special agents, was by no means a trivial undertaking.

It was estimated that of the 7,000,000 of civilized population 700,000, approximately, could read and write Spanish; but, according to the archbishop of Manila, not more than 7,000 belonged to the educated class.

And again:

In short, a census on the American plan would not have been feasible unless the governors of the organized provinces, the presidentes of the municipalities, the members of the municipal council, and, as far as possible, all of the gente ilustrada (the principalia) were connected with it, so that it might have behind it the support of those classes of the population so influenced then and now with the masses, or common people.

Therefore it was decided to constitute each organized province a supervisor's district and to appoint the governor of the province the supervisor; that the presidentes, or mayors, of the municipalities should be appointed special agents; and "that as many of the councilors and of the principalia as were qualified should be appointed as enumerators." Even at that they had great difficulty in finding a sufficient number of enumerators who could speak, read, and write Spanish, which has for centuries been the official language of the islands.

The report continues:

Many of the presidentes did not understand Spanish at all, and for the same reason, in a number of instances, enumerators had to be taken from one municipality to serve in another. This was, of course, a disadvantage, but was fully expected, as it was well known that in many of the barrios none of the inhabitants could read and write Spanish.

And, of course, they could not speak English.

The report points out that although the Spanish Government made provision for public schools and made the teaching of Spanish mandatory, nevertheless it was generally neglected, and those charged with the taking of the census found and reported that—

The tribes speaking the different dialects had practically no literature and no educational facilities. In short, literacy in any of the dialects is not incompatible with total ignorance on all subjects derived from books. Hence, as shown by the census, withholding instruction in Spanish from the Filipinos kept the great mass of them in ignorance, as the number who had received secondary instruction was but 1.6 per cent of the civilized population, and of the female population but seven-tenths of 1 per cent had received a secondary education. These were able to read, write, and speak Spanish, and comprised what may be called the educated class. In addition there were Filipinos who could speak Spanish without being able to read or write it; although very well known before, this fact was brought out more conspicuously by the census, especially in the selection of enumerators.

Thus the abuse of the Filipinos throughout the first 200 years of their experience with the early colonists, the assiduous and ceaseless efforts of their teachers to humble their pride, stifle their ambition, and impress upon them the superiority of the dominant race, and the utter hopelessness of any kind of equality with them have no doubt had their effect in causing indifference, shiftlessness, and recklessness.

As I have already stated, the provincial governors were made supervisors of the census. They were, of course, all native Filipinos. Some of their reports, published in the census volumes, are interesting and important in this connection. The governor of Abra, speaking of the inhabitants of his own Province, says:

These people differ among themselves in language, in religious belief, the manner of constituting the family, and disposal of the dead, the last being due to the different views they hold relative to the future life. They are also distinguished by radical differences in their manner of dress.

The governor of Zambales says of his Province:

The inhabitants are Christians of different origins, and have also different dialects, the principal being the Zambal, Ilocano, Tagalog, and Pangasinan. Notwithstanding the heterogeneous character of the inhabitants, there does not exist any animosity between them, but, on the contrary, they live in utmost harmony.

And now the governor of Tarlac:

The population of this Province is quite heterogeneous, and it is difficult to make a report regarding their customs, manner of living, etc., being one of the newest of Luzon, the creation thereof dating back only to the second third of the past century. * * *

To the difference of origin of its inhabitants is due also the difference of the dialects they speak—Pamango by those of Pampanga, Pangasinan by those of said Province, Tagalog by those of Nueva Ecija, and Zambales by the Aetas and Negritos, and also Ilocano, by reason of the large contingent of families from the Ilocos Provinces. Hence their customs and manners are also different.

The governor of Pampanga testifies to these words:

The nationality represented by this Province is very notable, with its special dialect, character, and even its physiognomy, notwithstanding its vicinity to Manila. * * * Their customs are peaceable, they are generous, hospitable, and much addicted to order and labor.

They are not free from the various and many superstitions which afflict people who unfortunately leave much to be desired in culture and education, especially if there be added thereto the religious fanaticisms which are so general among the masses.

And now we have the governor of Bataan, who says:

The language spoken is Tagalog, only a few in each town being able to speak and write the Spanish language. Of the total number of municipal councilmen in the Province only one-half are able to speak and write Spanish.

Reading further from the official census report, here is what the governor of Ambos Camarines has to say:

The overwhelming majority of the inhabitants of the Province are of the Bicol Tribe, the only important exception being in Camarines Norte, formerly a separate Province, where the Tagalog predominates. In that district the towns of Capalonga, Labo, Indan, Paracale, Mambalite, and San Vicente are almost entirely Tagalog; Basod, the nearest town to the Camarines Sur border is Bicol. Daet and Talisay are mixed, the Tagalog Tribe showing a majority. * * *

Throughout the remainder of the Province the language in general use is the Bicol, but it is subject to such wide variations in different localities as to practically divide it into distinct dialects, each with manifold diversities, accent, and localisms. As the vast majority of the people have no knowledge of Spanish, and therefore have the local dialect as their sole medium of communication, they are far from a united people, residents of towns separated by but a few miles being considered practically as foreigners to each other. * * *

The masses of the people have in former times had no educational opportunities and are extremely ignorant and superstitious. They are easily led and controlled by strong leaders, are credulous as children when dealing with persons in whom they have confidence, but shy and suspicious as to strangers.

This is the class of people which this pending bill proposes shall be factors in this proposed Philippine Republic.

The Committee on Insular Affairs was unfortunate in citing the census reports in support of its declaration that the people of the Philippines constitute a more homogeneous population than those of the United States. These unprejudiced reports of native governors, contained in the census reports, indicate not only the heterogeneous character of the natives in general, but each governor shows that the people of his own particular Province do not even approximate homogeneity. The census report itself separates the inhabitants of the islands into 8 separate and distinct civilized tribes and 16 distinct wild tribes, all of which, civilized and uncivilized, differ in customs, character, and language.

The gentleman from Virginia himself testifies upon this point. There has been some trouble recently among the Moros at Jolo. Aguinaldo has been accused of inciting it. In the course of his speech the gentleman from Virginia, chairman of the Committee on Insular Affairs, said:

I wish to say that Aguinaldo, who is charged by these Manila correspondents with inciting the trouble down in Jolo, was never in Jolo in his life. He does not speak the language which is spoken down there, and he would not, if he was there, understand a word that was said.

Mr. MOORE of Pennsylvana. How well would the limited number of the educated classes of Manila be able to control the 8,000,000 of the uneducated if American control were withdrawn?

Mr. OLMSTED. They would not be able to control them at all. In the first place those in and about Manila belong to the Tagalog Tribe, the most intelligent and best educated in the islands. The next tribe in importance and intelligence, the Visayans, outnumbers them three to one, and would be jealous of a Tagalog government.

Mr. JONES. The gentleman does me the honor to refer to my remarks in which I said that Aguinaldo had never been in the Moro Province and did not speak the language. His comment is that Aguinaldo was president of the Mololos government. I want to say to the gentleman that Mololos is located in Luzon, and is some 1,000 or 1,200 miles away from the Island of Jolo. President Taft has probably traveled more than any President we have ever had, and yet there are probably States in our Union in which he has never been. The fact that he has been the President of the United States is no proof that he has been into every State in the Union.

Mr. OLMSTED. I mentioned it to show from your testimony that Aguinaldo did not understand and could not speak the language of that Province.

Mr. LONGWORTH. Is there any State where President Taft could go where he could not speak and understand the language?

Mr. OLMSTED. I think he could make himself pretty well understood in any State of the Union.

Mr. JONES. He probably could not speak the language of the Creoles.

Mr. LONGWORTH. He could speak Spanish.

Mr. OLMSTED. It has been charged here that Gov. Gen. Forbes took charge with a surplus of three millions and reduced it to a deficit of four millions.

Mr. QUEZON. I would like to ask the gentleman, in connection with the taking of the Philippine census, if he is informed of the fact that the census was taken in the Philippines

with the aid of the Filipinos, and that it would have been absolutely impossible to take the census without the Filipinos?

Mr. OLMSTED. They had to make the governors of Provinces supervisors and mayors of the towns enumerators to take the census at all, so great was the ignorance there, and many of these high officials were poorly qualified.

Mr. QUEZON. Is the gentleman from Pennsylvania aware of the fact that the Director of the Census acknowledged in his report that it would have been absolutely impossible for the United States to take the census in the Philippine Islands if it had not been for the fact that Gov. Gen. Taft issued a proclamation inviting the Filipinos to cooperate in the taking of the census so that they may show that they were capable for self-government?

Mr. OLMSTED. Of course Americans could not have taken the census where there were 15 or 20 languages that they did not understand, and there were no Filipinos who could have taken it entirely, because there was no one who could speak all the languages or dialects. They had to take the Provinces and towns separately by persons who could speak the particular dialect in each place. Even then they had great difficulty in finding enough persons of sufficient education and intelligence to perform the very simple duties of enumerator. There is nothing in the manner of taking the census nor in the census itself showing capacity for self-government.

Mr. MURRAY. I did not get clearly the first part of the gentleman's remarks. I rise to inquire whether the gentleman believes in a permanent colonial policy by the United States in respect to the Philippines or some ultimate form of self-government?

Mr. OLMSTED. As I said at the outset, I am not arguing in favor of permanent retention. But I do say that at the present time they are not qualified. It is our duty to help them to become qualified.

Mr. MURRAY. Has the gentleman, who is familiar with this situation, any definite plan as to when they shall work out?

Mr. OLMSTED. The evidence all tends to show that it will be at least a generation, or perhaps two, before that time will arrive. Before that time comes there must be general education in some one language, so that people of different Provinces may communicate with and understand each other, and that language ought to be English.

None of the many languages spoken in the Philippines has any literature of its own, save only the Tagalog and the Visayan, and neither of them has a literature of any very great importance. The Visayans outnumber the Tagalogs three to one, but the Tagalogs have a higher average of intelligence. They are the people who live in and around Manila. Aguinaldo's government was practically a Tagalog government, and so would be the Philippine Republic which this bill strives to create, a government not by the people, but by the aristocratic, educated few.

While Spanish was the official language and was the one used by the office-holding class and by the priests, the people generally were not encouraged to learn it, and a large percentage of them can not speak it any more than they can speak English. It is needless to enumerate the difficulties of uniting under a republican form of government so many different peoples, who can not read or write or even speak each other's language. It is only fair to the Filipinos, as indicating their native intelligence and adaptability, to say that they have made greater strides in acquiring the English language during the last dozen years than they did in acquiring the Spanish in three centuries. Mabini himself suggested that English should be the official language of the Philippines. It is the commercial language of the East. There ought to be a general knowledge of English in the Philippines in order to prepare them for self-government, and the spread of the English language is a part of our unfinished work there.

Quoting again from the Philippine Census Reports for 1903, we find it definitely stated that—

> The fact must be impressed that literacy among the people of the Philippines meant the ability to read and write in any language—English, Spanish, or a Malay tongue. Since, in all probability, less than 10 per cent of the people of the islands could speak Spanish or English, the fact is unquestionable that the majority of the people reported as literate could read and write only the native tongues. This is a result of the policy of the friars, who, from motives of their own, discouraged the learning of Spanish by the natives, in order that they might act as intermediaries between the people and the civil authorities, and thus retain their influences over their charges.

The incapacity of the Filipinos for prominent participation even in important private affairs is apparent from the fact that nearly all the commercial houses there are in the hands of Spaniards, Englishmen, Germans, or Americans, and much of the smaller business is in the hands of the Chinese. If they are incapable of managing important private affairs, it is not difficult to reason that they are not qualified to participate desirably in the important affairs of government.

PHILIPPINES SELF-SUPPORTING AND THEIR FINANCES IN GOOD CONDITION UNDER AMERICAN CONTROL.

It has been charged upon the floor that the administration of Gov. Gen. Forbes began with a surplus of three and a half millions and has run it into a deficit of four millions. That is absolutely untrue. Some portion of the surplus has been invested in needed permanent improvements, such as schoolhouses, roads, bridges, and so forth, but there is and has been no deficit. The gentleman from Virginia, angered by President Taft's opposition to his bill, has made a fierce attack upon his administration, and particularly upon Governor General Forbes, who is charged with illegal conduct, extravagance, and nearly everything else. But the charges are not sustained and fall harmless.

Mr. JONES. The gentleman does not mean to say I have made that statement?

Mr. OLMSTED. No; I do not say that the gentleman made it—not directly. He did, however, extend his remarks in the RECORD so as to include the statements of a person who did make it. I do not think the gentleman himself made such a charge, except by inserting in the RECORD somebody else's statement to that effect.

The principal witness produced by the gentleman from Virginia [Mr. JONES] in defense of his charges is Charles B. Elliott, of Minneapolis, who until recently was a member of the Philippine Commission and secretary of commerce and police. According to the native papers and Washington gossip he was endeavoring to undermine and succeed W. Cameron Forbes as Governor General. In any event, the recent conduct of his office was such as to compel President Taft to request his resignation, which was promptly tendered. In the newspaper interview with him included by the gentleman from Virginia as part of his speech he admits that he was an obstructionist, but insists that the most important difference between him and Governor General Forbes arose over the disposition of the funds in years for which the Philippine Legislature made no appropriations whatever.

In 1911, and again in 1912, the Philippine Legislature failed to make any appropriations for the support of government. Fortunately, provision for just such cases was made in the organic law, as follows:

> *And provided further,* That if at the termination of any session the appropriations necessary for the support of government shall not have been made, an amount equal to the sums appropriated in the last appropriation bills for such purposes shall be deemed to be appropriated; and until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid.

In 1909 Congress passed a bill, which I had the honor to introduce, providing for Porto Rico a similar provision in almost identical language, as follows:

> *And provided further,* That if at the termination of any fiscal year the appropriations necessary for the support of government for the ensuing fiscal year shall not have been made, an amount equal to the sums appropriated in the last appropriation bills for such purposes shall be deemed to be appropriated; and until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid.

A controversy having arisen in Porto Rico, the construction of that act got into the United States district court and it was there judicially determined.

Mr. JONES. Does the gentleman refer to the case of Navarro against Post?

Mr. OLMSTED. Yes; I refer to that case.

Mr. JONES. I would like to ask the gentleman if he has read the opinion in that case?

Mr. OLMSTED. Yes; I have read the opinion. I will insert it in the RECORD.

Mr. JONES. I will be glad if the gentleman would do so, because the gentleman must know that the court held that the taxpayers who brought the suit against the officials had no right to maintain the action and that the case for that reason was dismissed. The gentleman knows that, if he has read the case.

Mr. OLMSTED. The court did, at the end of its opinion, hold that the complainants, being mere individual taxpayers, had no standing in court to enjoin the governor; but the court passed squarely upon the merits of the case. It is reported in Fifth Porto Rico Federal Reports, page 61, and that the court did pass upon the merits is apparent from the very first paragraph of the syllabus, understood to have been prepared by the judge himself, and which reads as follows:

> 1. Congress, on July 15, 1909, to avoid the crisis brought about by the failure of the Legislative Assembly of Porto Rico to appropriate any money to carry on the government for the current fiscal year, passed an act known as the Olmsted law, which amended section 31 of the organic act of the island (31 Stat. L., 83, ch. 191), and used

this language: "*And provided further,* That if at the termination of any fiscal year the appropriations necessary for the support of government for the ensuing fiscal year shall not have been made, an amount equal to the sums appropriated in the last appropriation bills for such purpose shall be deemed to be appropriated; and until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid." Held, that this does not mean that every specific appropriation of the previous appropriation bills is specifically reenacted to be specifically devoted to the purposes specifically set forth in such previous appropriation bills, but that it means that an amount equal to the total of the sums appropriated in such previous appropriation bills is deemed to be appropriated for the support of the government for the current fiscal year, with power in the governor to allot the same to the support of the government as its necessities may require according to the existing law.

I will insert the entire opinion, omitting the syllabus, in the RECORD at the conclusion of my remarks.

Mr. JONES. I would like to ask the gentleman another question right here. Does the gentleman think that the decision of a nisi prius court of Porto Rico would or should bind the action of officials in the Philippine Islands?

Mr. OLMSTED. Well, I think that, whether binding or not, the decision of a Federal court is pretty good authority and ought to be followed. I think also that the court properly construed the act.

Mr. JONES. Then let me, in this connection, ask the gentleman another question: Is the gentleman aware of the fact that the Philippine Commission, when this question came up before it, appointed a subcommittee of three, one of whom was the secretary of finance and justice, who also had been attorney general of the islands?

Mr. OLMSTED. I can not afford to let the gentleman take so much of my time. My time is limited.

Mr. JONES. And is the gentleman aware of the fact that this subcommittee, after an examination of the law, unanimously reported to the commission that the governor general had no right to do what the gentleman now seems to contend he had the right to do?

Mr. OLMSTED. They probably did not have the decision of the court before them.

After consulting with the Secretary of War, Governor General Forbes followed the ruling of the United States court instead of accepting the opinion of Mr. Elliott, and that was the sum of his offending.

The amount apportioned by Governor General Forbes under the full authority of law was, in the first place, not $12,000,000, as stated by the gentleman from Virginia, but was exactly $8,713,894. For the next year the allotment was not made by Governor General Forbes, but by Acting Governor Gilbert, and the amount was not $14,000,000, but $8,625,496.50. But, of course, a mere discrepancy of five or six millions is a small matter for a gentleman who is endeavoring to be precise in his statements of fact.

Baguio and the Benguet road, instead of being "liberally provided for," as charged, were not provided for at all, as not a single dollar was allotted to either of them. Nor is it true that appropriations were withheld because the lower house objected to the expenditure by the Philippine Commission of large sums in the construction of Benguet road. The Benguet road was constructed and completed two years before the First Philippine Assembly was elected. Nothing has been expended upon it since, except by way of repairs. Furthermore, that road is over 30 miles long, instead of 20 miles, as repeatedly stated.

Mr. Elliott was not always in his present state of disgruntlement at Philippine conditions. I hold in my hands a very useful and instructive little pamphlet entitled "Reciprocity and the Philippine Islands." As explanatory thereof, there appears upon the flyleaf the following statement:

DEPARTMENT OF COMMERCE AND POLICE, MANILA.

The Philippine Islands have now reached a point in their economic development when the attention of the public should be called to the business opportunities which are here presented. Questions of a political nature, in so far as they relate to the form and organization of local government, may be regarded as substantially settled. The business and working people are, as a whole, contented, and willing to do their part toward bringing about a condition of economic prosperity.

Believing that the dissemination of accurate information as to present conditions will be of advantage to the people of the United States and of the Philippine Islands, the Government, in connection with the Manila Merchants' Associations, publishes this pamphlet.

CHARLES B. ELLIOTT,
Secretary of Commerce and Police.

MANILA, *August 11, 1911.*

That pamphlet contains more valuable information touching business and conditions in the Philippines than has elsewhere ever been crowded into the same space. I shall quote only what Mr. Elliott thus indorses as "accurate information as to present conditions." On page 11 of this accurate statement of conditions he says:

For an entire decade Congress through its civil representatives has exercised absolute control over the affairs of the archipelago, and it is not indulging in hyperbole to say that the achievements marking these 10 years of rule have been little short of marvelous.

On page 12 he says that—

The Filipino to-day enjoys a measure of practical self-government far beyond anything he even aspired to under the dominion of Spain.

He then goes on to state the various things which have been accomplished, and on page 13 says:

Expenditures have been kept within receipts; the credit of the Islands is first class and I ask the gentleman from Virginia to note these words: They cost the Washington Government not one penny beyond the increased expense of maintaining United States troops stationed here above what their maintenance would cost at home and the cost of fortifications that are to serve as means of permanent defense.

And after a further summary of what we have done for these people he says, at the bottom of that page:

This is, in part, what has been accomplished under American government in the Philippines, and it constitutes a record of achievement that challenges the admiration of the world. The people of the United States may justly be proud of it all.

[Applause.]

According to Mr. Elliott, this is an accurate record of what has been accomplished by what the gentleman from Virginia styles "this American-made, law-defying, self-interested oligarchy" acting in pursuance and under authority of laws enacted by the American Congress.

The indebtedness of the Philippines is $1.50 per capita, as compared with $11.42 in the United States, $23.57 in Cuba, $26.15 in Japan, $31.29 in Brazil, $51.34 in Chile, and $89.46 in Argentina. The amount of interest paid thereon per capita is 6 cents in the Philippine Islands, as compared with 24 cents in the United States, 87 cents in Mexico, $1.97 in Santo Domingo, 74 cents in Cuba, $1.54 in Brazil, $1.55 in Japan, $2.04 in Chile, and $4.85 in Argentina.

The simple fact is that the affairs of the Philippine Government under American control have been more economically and successfully administered than those of most of the States of this Union. The indebtedness per capita and the taxation per capita are both lower than in the State of Virginia or in many others of our States. Under Governors Taft, Ide, Wright, and Forbes, and under the supervision of Secretaries of War Root, Taft, Dickinson, and Stimson, the government of the Philippines has been and is admirable. It is a poor cause which depends for success upon the villification of officers who are performing the duties of their respective positions faithfully, intelligently, patriotically, and well.

LACK OF EXPERIENCE OF FILIPINOS IN GOVERNMENT.

The only experience of the Filipinos in government which the Insular Committee can cite in support of this bill is thus stated in its report:

There were Filipino deputies in the Spanish Cortes during portions of the first half of the nineteenth century, and in the year 1820 17 Filipinos sat in the Spanish Parliament. The Philippine constitution, written by Apolinario Mabini, and proclaimed by the Malolos government in 1899, is justly regarded as a notable intellectual achievement. Among those who represented the Philippine Republic, established by Gen. Aguinaldo in 1898, in the Malolos congress, were many Filipinos of learning, great ability, and unquestioned patriotism.

The experience of Filipino deputies in the Spanish Parliament was manifestly not satisfactory, for they were from time to time permitted, and again forbidden; and finally, in 1856, Philippine representation was permanently discontinued.

Mr. QUEZON. Will the gentleman yield?

Mr. OLMSTED. I yield for a question.

Mr. QUEZON. This is a matter of historical importance——

Mr. OLMSTED. I can not yield for a speech. I have not the time. I will yield briefly for a question.

Mr. QUEZON. I simply wish to remind the gentleman of the fact that the reason why those delegates were taken away from the Philippines was because the Republic of Spain fell.

Mr. OLMSTED. I do not care why they were taken away. They were taken away. They have had no experience in the Spanish Parliament for more than half a century.

Nobody doubts the intellectuality and ability of Apolinario Mabini, but he neither wrote nor approved of the Philippine constitution under which the Malolos or Aguinaldo government pretended to operate for a short period. Those who did write it admitted over their own signatures that in the main they had borrowed it from the constitutions of other countries which they considered most resembling the Filipino people. They said:

The work whose results the commission has the honor to present for the consideration of Congress has been largely a matter of selection. In executing it, not only has the French constitution been used, but also those of Belgium, Brazil, Nicaragua, Costa Rica, and Guatemala, as we have considered those nations as most resembling the Filipino people.

It will be observed that our Constitution was not one of those considered by the commission.

It does not seem to have been very much of a republic, for on June 18, 1899, Aguinaldo promulgated a *decree* for the administration of municipalities and Provinces. The heads of towns, who were to be selected by electors limited to those "marked by their good conduct, their wealth, and their social

position," were in turn to elect a head of the Province and three councilors. Under that decree, before any person elected to office could discharge its functions his election had to be approved by Aguinaldo. Capt. J. R. M. Taylor, of the United States Army, who gave much study to the history of that period, says that the proclamation issued by Aguinaldo "provided a strong and highly centralized military dictatorship, in which, under the form of elections, provision was made for filling all offices by men devoted to the group which had seized the functions of government." Aguinaldo, in effect, ruled in accordance with his own wishes, without much regard for the Malolos constitution. Most of the commissioners empowered to establish government in the Provinces were officers in his army, and either they or delegates appointed by them conducted the elections, restricting the right of voting, under his instructions, to men "marked by their good conduct, their wealth, and their social positions." There were so few qualified under those conditions that in the town of Lipa, with a population of 40,000, a presidente, or mayor, was chosen for whom just 25 votes were cast. In the town of San Carlos, having a population of 23,000, in Pangasinan Province, there was in this way chosen a presidente, or mayor. One candidate, who was a prominent member of the Katipunan, announced his intention of killing anyone who should defeat him. It is needless to state that, although he received very few votes, he was elected. [Laughter.] Some of the townspeople protested, but Aguinaldo approved his election.

The governor of a province in Luzon who had been elected in the manner above indicated throws some light upon the methods of conducting this so-called republican Aguinaldo government. He reported that—

Without losing sight of the fact that morality is the foundation of good government, I had to overlook some faults and irregularities due to the Spanish training and to the spirit of faction, since I considered that if I had employed coercion in these abnormal times I should produce results to be regretted, as my principal purpose was to avoid conflicts between ourselves which would lead to our disunion and would make other nations believe that we were unworthy of having our own independent government. But I was not surprised that *the crassly ignorant, vulgar herd* believed that I acted in this manner to conceal those matters, when, in fact, I was only endeavoring to avoid hidden reefs dangerous to our cause, whose success should be placed far above all private interests.

He having received a telegram from Aguinaldo's secretary covering orders for the making of new tax lists from time to time, he said, in reference to them:

These successive changes in the taxes *excited the ignorant, vulgar people* who, on account of their very ignorance, attributed these changes to an attempt on my part and on the part of the heads of the towns to enrich themselves.

On account of this *the vulgar people* doubted the legality of our actions in the collection of taxes, and accordingly it became difficult. * * * Not only did I make no report of this to the government of the Republic, on account of the abnormality of the present conditions, but I also succeeded in concealing them from the foreigners here, so they should not succeed in discovering the truth, which would be to the prejudice of our cause.

He also had complaint to make of some of Aguinaldo's military officers, charging that—

Maj. Canoy is such a remarkable character that he saw fit to give my cook a beating for not taking off his hat when he met him. He insulted the delegate of rents of Cabagan Viejo for the same reason. He struck the headman of the town of Bagarag in the face. He put some of the members of the town council of Echague in the stocks and he had others whipped.

These people, styled by their own governor a "crassly ignorant, vulgar herd," were the people of a portion of the Province of Luzon, the most advanced of all the islands in the Philippines, and should be a fair sample of the people we are now told are capable of self-government.

I have already pointed out that a member elected to Aguinaldo's congress could not serve unless his election was approved by him. It also appears that in many instances they were not permitted to have any election at all. Thus, in the very first congress which assembled there were 68 members elected and 68 appointed, some having been appointed by Aguinaldo in parts of the Philippines which had not yet been brought under his control. It was a very easy matter for the Government to control such a "representative" body. The congress which finally ratified the constitution consisted of 93 members. Upon a manuscript list found among the papers of the insurgents 81 of these members were divided into three classes: First, those who had been chosen by election; second, those chosen by selection; and, third, provisional members. Of the 81 members found upon this list, only 19 had been elected. And this was under the constitution held up to us by the majority of the Insular Committee as a model. It is merely the expression of a small group of educated natives. It never went into actual operation in any practical or effective way. Aguinaldo and a few men about him constituted the whole government and ran it as they pleased.

January 13, 1899, at 11.40 a. m., Gen. Noriel and Col. Callies, officers of Aguinaldo's army, sent a telegram "To the President of the Republican Government, Malolos," saying among other things:

We also wish to know what reward our government is arranging for the forces that will be able first to enter Manila.

Aguinaldo replied:

Those who will be the heroes will have as their rewards a large quantity of money, extraordinary rewards, promotions, crosses of Biak-na-bato, Marquis of Malate, Ermita, Count of Manila, etc., besides the congratulations of our idolizing country.

Curious rewards to be bestowed by the president of a republic.

Even this Malolos government, so far from being successful financially, authorized a national loan of ₱20,000,000 at 6 per cent and the establishment of a bank in Manila to receive the funds. The bank was never established, and the proceeds of the loan were chiefly forced contributions. People known to have means were ordered to assemble and subscribe in proportion to their means. If they did not appear and subscribe, their lack of patriotism was reported to the president. Parish priests were called upon to invest church funds in the national loan. The governor of a Luzon Province telegraphed to Malolos requesting authority to put the rich men of his Province in jail until they subscribed. Documents captured from Aguinaldo's government in the Philippines contain memoranda sufficient to show that much more money was collected than ever reached the treasury; that unequal systems of taxation were enforced in different Provinces; and that the Tagalog Province, from which the officers of the central government came, received special favors in that respect. Cavite, the home of Aguinaldo, was taxed most lightly of all.

There is certainly nothing in Philippine experience prior to their participation in government under American control that affords any evidence of their qualification for self-government under republican forms. Everything indicates that they were not so qualified, for the leaders of that period were unwilling or unable to put republican principles into practice.

Mr. MURRAY. May I ask the gentleman from Pennsylvania what plan the gentleman believes in to give them experience and self-government?

Mr. OLMSTED. A large number of the municipal officers are Filipinos, and we have given them one branch of the legislature entirely. Let me show you how that works: The upper branch is appointed by the President of the United States; that is, the senate, or Philippine Commission, composed of nine members, five Americans and four Filipinos. The assembly is the lower branch and is composed of natives. The upper branch has frequently to check the action of the lower by refusing to adopt their bills. That causes some friction. As an instance of one of these bills, here is assembly bill 395, which passed the lower house December 27, 1910, but was laid on the table in the upper branch January 31, 1911, after the presentation of the report of the proper committee, showing the object and effect of the bill. I will print that report, together with a translation of the legal terms used.

Mr. QUEZON. Will the gentleman yield?

Mr. OLMSTED. I am sorry, but I have only 10 minutes left.

The effect of the bill, as explained by the committee, would have been to allow many persons guilty of rape and certain other specified offenses to go unpunished. Such crimes were to be considered and dealt with as offenses against the victim who might or might not institute proceedings, but not as public offenses or offenses against society. Is the gentleman from Virginia willing—would any gentleman be willing—to have that most horrible of offenses no longer subject to public prosecution? Should Filipino women be placed in that position? Was the passage of such an act through the lower branch a very high tribute to their capacity for self-government?

Mr. LAFFERTY. Did that bill pass?

Mr. OLMSTED. No; the upper branch, appointed by the President, refused to pass it.

Mr. MURRAY. Will the gentleman print the circumstances surrounding that bill?

Mr. OLMSTED. I do not know about the circumstances or what they were.

Mr. MURRAY. Whether it was debated?

Mr. OLMSTED. I do not know whether it was debated or not. I do know that it was passed by the lower branch, and that is enough.

Here is another bill, which passed the lower house, taking away from the judiciary all right of intervention in the selection of jurors for the trial of criminal causes and vesting that power in the political bodies known as provincial boards and with each person charged with crime himself to select one juror. The bill also proposed to increase the compensation of jurors above what is paid in any State of which I have knowledge. It would establish a set of professional jurors, elected by political influence, and render the administration of the criminal law a

farce. Such experiences as that in self-government do not show that they are as yet entirely qualified to select both branches themselves.

COMPARISON WITH SIAM.

The report of the majority of the Committee on Insular Affairs, in favor of the pending bill, sets up the Kingdom of Siam as the chief example "among the small countries whose independence, although preserved inviolate for ages, has never been guaranteed by international treaty or otherwise" of a country which "with no standing army has never fallen a victim to any land-grabbing nation," and as one "which maintains a stable, as well as an independent, government." Take notice that Siam is a monarchy, a kingdom. Nobody has ever dreamed that it was capable of self-government as a republic, in which the people themselves were to have some voice. But let us see how it succeeds as a kingdom. Siam is a sort of buffer State between British and French possessions. By an agreement made in April, 1904, between Great Britain and France each of those powers disclaimed any intention of annexing Siamese territory, and yet only three years later France claimed and now occupies some 7,000 square miles of Siamese territory. Two years after that Great Britain in some manner gained possession of and now occupies 15,000 square miles of what had been Siamese territory. Upon this point the committee might well consult the Statesman's Yearbook (1911). From that authority it appears that both France and Great Britain possess extraterritorial rights not only in their respective "spheres," but throughout the Kingdom of Siam. The International Encyclopedia, after bringing its account of Siam down to 1893, adds:

> Since that time the French sphere of influence has been extended still farther west, and, were it not for Great Britain, doubtless France would absorb the kingdom. It remains a "buffer" State, whose future depends upon its powerful and mutually jealous neighbors.

Moreover, the statement of the Insular Committee that Siam has no standing army is not true, if we may trust the Statesman's Yearbook, which says:

> Universal liability to military service upon the European model is now in force in all the Provinces [of Siam].

In December, 1911, a representative of the United States was present at the coronation ceremonies of the present King of Siam, and in his report, written by him without thought of use in this connection, he says:

> I had the opportunity of seeing 26,000 Siamese troops in review and of inspecting the housekeeping of a battalion of the Royal Guard and of a visit to the national military academy.

The Siamese military academy has about the same number of cadets as we have at West Point. The Siamese army is larger than the United States Army was prior to the Spanish War, and we have never had 26,000 standing troops of the Army of the United States passing in review at any one time. But even this army is not whatever protection there may be in the jealousy of two great nations, has not prevented the Kingdom of Siam from losing 22,000 square miles of its territory. If this kingdom can not maintain itself and protect its possessions, its example does not furnish much encouragement for the setting up of a republic in the Philippines.

GREATER AVERAGE INTELLIGENCE AND EDUCATION REQUIRED IN A REPUBLIC THAN IN A MONARCHY.

No one will dispute the proposition that a successful republic, using that term in its modern sense, requires that there shall be not merely a handful of men of sufficient intelligence to govern, but higher averages of intelligence and education in the people at large and greater unity in thought and action than might be essential in some different form of government. Even if it could be found that the existence of the Philippines as an independent nation would be possible under a dictatorship or a monarchy it must be admitted by anybody who has studied their conditions that their existence as an independent republic like our own is impossible at the present time. When the thirteen American Colonies were organized into one Nation they had been practically self-governing colonies for a long time. The 3,000,000 of people which then constituted our population were people of the highest order of intelligence, far above that of the average of people of other countries. In forming this Union, under a republican form of government, they practically continued forms to which they had long been accustomed. But it would not and could not be so with the Philippines. This, the greatest of all republics, must desire that any republic which it helps to establish shall be worthy of the name and shall prove successful. Our Constitution, which has largely been copied into this proposed independence bill to be the constitution of the Philippines, was understood by and was applicable to our people at the time of its adoption, but it is not at all adapted to the people of the Philippine Islands or, rather, they are not adapted to it. Comparatively few of them could read it even if it were translated into Spanish, and still fewer of them would understand it or be capable of participating intelligently in such a form of government.

The withdrawal of the United States from the Philippines would bring about conditions there worse than those existing to-day in Mexico. As I have already pointed out, the Tagalogs in and about Manila possess the most of the intelligence and education in the islands. The Visayans, however, outnumber them three to one and would naturally resent a Tagalog government, as this would surely be. The Moro Province has a few intelligent people, but is non-Christian and uncivilized. The Moros are satisfied to be governed by the United States, but would resent government from Manila.

When Secretary of War Dickinson visited the islands in 1910, he went to Zamboango, and those Moros came in to greet him. He has very kindly presented me with a typewritten copy of a volume which is, in a certain sense, a diary, but which contains full reports of all speeches made by him or to him at public meetings of any kind. From that volume I extract the following speeches of some Moro leaders, as interpreted into both English and Spanish and stenographically reported:

Datu Mandi spoke as follows, his remarks being interpreted in English by Mr. Edward Schuck:

"I am here, El Raja Mura Mundi, representing the Moros. Here they are, the whole crowd of them, come to honor the Secretary of War. As I look about I see far more Moros than the Filipino contingent, and if that is so, that is the reason it is called the Moro Province." [Tremendous applause from the Moros.]

"When first the Americans came here, from the very beginning, whatever they asked me to do I did. I was loyal to them ever. Now I have heard a rumor that we Moros are in the hands of the Filipinos.

"In the Spanish times I was a datu (when the Spanish left this became a republic). Then I saw and found out that things did not go well. When a man had two measures of rice one was taken from him; when a man had two head of cattle one was taken away from him." [Applause by the Moros.]

"If the American Government does not want the Moro Province any more they should give it back to us. It is a Moro Province. It belongs to us." [Tremendous applause by the Moros.]

Datu Sacaluran spoke as follows:

"I am an old man. I do not want any Moro trouble. But if it should come to that, that we shall be given over to the Filipinos, I still would fight." [Applause.]

Ulankaya Ujaton said:

"I am not a civilized man, but I have learned the slavery, killing, and stealing is a bad thing. We do it no more. But, if that it should be that we shall be given over to another race, we had better all be hanged." [Applause.]

Nadji Nungnui spoke as follows:

"I want to tell the Secretary of War that I am a Samal. I come from the Samal race. The Samal race—in former days there was not a worse race than the Samal race, and that was in the olden days. Ever since the Spanish times up to now we have learned different.

"The Secretary of War must look the matter in the face. We are a different race; we have a different religion; we are Mohammedans. And if we should be given over to the Filipinos, how much more would they treat us badly, when they treated even the Spanish badly, who were their own mothers and their own fathers in generation? How did they treat them? Think about it! Think twice! We far prefer to be in the hands of the Americans, who are father and mother to us now, than to be turned over to another people." [Applause.]

A set of resolutions was at the same time presented to the Secretary of War, setting forth that "Moro Province is inhabited by many races and different tribes, with differences in religion, customs, and habits, with a varying degree of civilization," and, further, that "We have the best form of government possible under existing conditions, and we want no changes at the present time."

What would be the condition of the United States to-day if we were under guaranty to protect Mexico from domestic violence, as well as from foreign invasion, just as this bill provides that we should be under guaranty to protect the proposed Philippine Republic? And can anybody doubt that in less than six months after the passage of that bill conditions in the Philippines would be pretty much on a par with those now existing in Mexico? The United States could not under any circumstances sit idly by and see those tribes and peoples fighting among each other; nor could it, either before or after the expiration of the eight-year period, permit any other power to war upon and seize them. By withdrawing all our authority over them, as this bill proposes—save only in the matter of vetoing their public legislation—we should destroy our own power to maintain peace and good government, while our responsibilities and our expenses would be even greater than they are now.

SUMMARY.

The people of the United States will never consent to the establishment of an oligarchy, a monarchy, or any form of independent government other than a republic in any possessions over which the American flag now floats.

A republican form of government, to be successful, requires a greater degree of intelligence in the people than does a monarchy.

In a country where the well-educated, or "directing class," constitute less than 2 per cent of the entire population and wholesale illiteracy prevails among the others, it would be impossible to conduct a government "of the people, by the people, for the people." It would be an utter failure and would soon "perish from the earth." [Applause.]

Under American control the Filipinos are prospering and have greater participation in government than they ever enjoyed before and all that they are at the present time capable of exercising.

The present government of the Philippines is wise, economical, and self-supporting.

The Filipinos are making good progress under American control and, given sufficient time, may become, but are not now, fitted for self-government.

The passage of the pending bill would destroy American authority in the islands, and at the same time increase the responsibilities and expenses of the United States.

Whether we like it or not, the responsibility for the Philippines rests upon us.

The passage of this bill would be an attempt to shirk responsibility; it would not succeed, but it would be an act of abject cowardice and of the extremest folly. [Applause.]

The following are the documents referred to in the foregoing remarks:

IN THE DISTRICT COURT OF THE UNITED STATES FOR PORTO RICO.

Herminio Diaz Navarro and Cayetano Coll y Cuchi, complainants, *v.* Regis H. Post, governor of Porto Rico; Samuel D. Gromer, treasurer; and George C. Ward, auditor of Porto Rico, respondents. No. 655, equity.

Rodey, judge, delivered the following opinion:

This is a bill in equity filed by complainants, alleging themselves to be members of the House of Delegates of the Fifth Legislative Assembly of Porto Rico and citizens and taxpayers of the island, against the above-named respondents as such officials of the local government. The cause was originally filed in an insular court, but was removed by respondents to this court, and held here against a motion by complainants to remand after a full hearing in that behalf. Complainants pray that the governor, treasurer, and auditor of the island be enjoined from paying out of the treasury of Porto Rico, as it is alleged they are doing, money to sustain the Government of Porto Rico during the present (1909–10) fiscal year in a pretended compliance with the act of Congress of July 15, 1909, known as the Olmsted bill. They contend that this act of Congress simply reenacted and extended the appropriation bills of the island of March 12, 1908, for another fiscal year, to end June 30, 1910, and allege that instead of complying with its terms the executive council held a meeting, and by itself, without the concurrence of the house of delegates, fixed the salaries not fixed in the organic act of all officials, employees, etc., of Porto Rico, and that thereafter the governor by himself alone allotted moneys to different funds as he desired, and that such money is now being paid out without authority of law, etc.

The respondent officials contend that the Olmsted law simply appropriated "an amount equal to the sums appropriated in the last appropriation bills for the purpose of supporting the government until the legislative assembly shall act in the premises," and that in the meantime it is simply the duty of the executive council and respondents to do what they have done.

The issue between us is raised by a demurrer interposed by the respondents to the complaint, in which it is alleged (1) that complainants have not in law stated a cause of action; (2) that they have failed to show that they suffer any injury or damage because of the doing of the acts complained of; (3) that they have not shown any special interest in the result of the action they complain of different from the interest of other taxpayers; (4) that they have failed to show that the result to them would be any different if respondents should act in accordance with complainants' theory of the interpretation of the law in question; (5) that a reading of the bill and a reading of the laws referred to will demonstrate that respondents' actions are in all respects proper and legal; (6) that complainants have failed to show that their individual condition as taxpayers would be worse or more burdensome because of the acts complained of; and (7) that they have failed to show that they have any personal interest in the matter in controversy, or any such interest as would entitle them to relief in a court of equity, and that for each and all of these reasons the cause should be dismissed, etc.

The bill, of course, fully sets forth, and it is now so commonly known in Porto Rico and throughout the Nation as that the court would in any event take judicial notice of it, that the Fifth Legislative Assembly of Porto Rico at its recent session beginning January 11, 1909, adjourned on the 11th of March following without having made any appropriations to sustain the government of the island for the ensuing fiscal year (1909–10), and again failed to do so after being immediately called in special session on March 12 by the governor for that purpose, and finally adjourned on March 16, 1909, without having done so. This failure naturally brought on a crisis in the island's affairs and caused the President to send a special message to Congress on the subject under date of May 10, 1909, and also induced Congress, under date of July 15, 1909, to amend section 31 of the organic act of the island, commonly known as the Foraker law (31 Stats., 77), by adding the "Olmsted bill" as a proviso thereto, the material portion of which amendment is as follows:

"*And provided further*, That if at the termination of any fiscal year the appropriations necessary for the support of government for the ensuing fiscal year shall not have been made, an amount equal to the sums appropriated in the last appropriation bills for such purpose shall be deemed to be appropriated; and until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid."

The bill then goes on to state that on the 20th of July, 1909, immediately after the approval of said amendment to the organic act by the President of the United States, the Executive Council of Porto Rico held a meeting, and by itself alone—the house of delegates not then being in session—passed the following resolution:

"Whereas section 36 of the act of Congress entitled 'An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes,' approved April 12, 1900, provides that the salaries of all officials of Porto Rico not appointed by the President, including deputies, assistants, and other help, shall be such and be so paid out of the revenues of Porto Rico as the executive council shall from time to time determine; and

"Whereas the salaries of all officials of Porto Rico not appointed by the President, including deputies, assistants, and other help, have not been fixed by the executive council, nor the manner of their appointment out of the revenues of Porto Rico been determined for the fiscal year ending June 30, 1910; and

"Whereas it is necessary that such salaries and the method of their payment be determined: Now therefore be it

"*Resolved by the Executive Council of Porto Rico:*

"(1) That until otherwise provided all officials of Porto Rico not appointed by the President, including deputies, assistants, and other help, for the fiscal year ending June 30, 1910, and their salaries, shall be such as were in effect on June 30, 1909, and said salaries shall be paid monthly by the treasurer of Porto Rico upon the warrant of the auditor, countersigned by the governor.

"(2) This resolution shall be deemed to be in force and effect from and after July 1, 1909."

It then proceeds to complain that this action of the executive council in thus fixing the salaries of all the officials of the island not appointed by the President, and providing for the mode of payment thereof, was in open disregard and in plain violation of the Olmsted law aforesaid, which law, as complainants contend, simply provided that the appropriations for such purposes made by the second session of the Fourth Legislative Assembly of Porto Rico should remain in force for the succeeding fiscal year to end June 30, 1910, and providing for the payment thereof by the treasurer with the advice of the governor alone.

The bill also alleges that in accordance with said resolution the auditor has drawn warrants for and the treasurer has paid all such salaries, expenses, etc., not by authority of said Olmsted law or in compliance therewith, but against the expressed terms thereof, and that said officials intend to and will continue to so so, etc. It is next further set out that respondent, Regis H. Post, governor as aforesaid, after the enactment by Congress of said Olmsted law, and after such fixing of the salaries of the officials by the executive council did, as before stated, alone and by himself, without the concurrence of the legislative assembly, make a number of appropriations or allotments of money to different funds to carry on the government of Porto Rico, all of which allotments it is alleged are wholly illegal and without authority of law; and that respondents, Gromer and Ward, treasurer and auditor aforesaid, are allowing, permitting, and taking part in such illegal appropriations, allotments, and payments, all contrary to law, etc.

Complainants then set forth that they have a right to oppose this illegal expenditure of their taxes and of the moneys of the people of Porto Rico, and that if the same is permitted to continue complainants will be deprived of their rights and great damage will be caused to them as well as to the rest of the taxpaying community, and that they have no adequate remedy at law, and are therefore obliged to appeal to this court of equity, in which they pray for proper relief, and that respondents be enjoined, etc., and that no payments from the treasury of Porto Rico be permitted save under the appropriation bills of the fourth legislative assembly of the island that was made for the fiscal year ending June 30, 1909, etc.

As we understand the contention between the parties it is this: Complainants claim that this "Olmsted law" should be construed as if instead of saying "an amount equal to the sums appropriated in the last appropriation bills for such purpose shall be deemed to be appropriated," it read, "the several appropriation bills for the previous fiscal year shall each be considered as specifically reenacted and severally continued in force."

On the other hand, the respondents, as we understand it, contend that the language used simply means that an amount equal to the sum of the total appropriations for the support of the Government for the previous fiscal year shall be deemed to be appropriated, and that then the treasurer, with the advice of the governor, may make all payments necessary to support the Government until the legislature shall act.

To be frank about it, we can not see that there can be much difference in the result, because on examining the appropriation bills referred to—Session Laws, 1908, pages 44 et seq.—we find that the very largest portion of the appropriations for that year consist of money for salaries and expenses and for the carrying out of the regular, indispensable functions of the Government, but that still there is quite a fraction of the appropriations that might be said to be for the carrying on of the Government during that fiscal year which would be unnecessary the succeeding year, such, for instance, as a $30,000 appropriation for election purposes, when there is no election to be held this year, but if complainants' contention is right and the revenues should prove to be insufficient the present fiscal year to do all the things for which appropriations were made last year some of the ordinary functions of the Government might have to fail of being carried out, while as to others most or the whole of the particular appropriation would remain unused in the treasury, without power in anyone to apply the money to those necessary governmental purposes. It is hardly to be presumed that Congress, while trying to relieve a crisis, should so phrase a statute as to accomplish only a portion of what was intended.

We have been urged to resort to the debates in both Houses of Congress, pending the passage of this "Olmsted law," with a view to determine what the intention of Congress really was, and complainants contend that these debates establish their view of the intention of Congress beyond any question. We have done so, and confess the labor was unprofitable. It is, of course, well known that while courts may resort to the history of the times and to an examination of the conditions that necessitated the passage of a law, and may consider the mischief that was to be remedied, so as to be able to understand the object and meaning of the legislature if the act in and of itself is ambiguous, still it is not proper for a court to resort to or to be bound by the individual views of legislators as expressed in debates during the passage of the law. Such action is universally held to be improper. (See Lewis, Sutherland Statutory Construction, 2d ed., vol. 2, sec. 471; also our opinion in the Vallecillo y Mandry *v.* Bertram case, 2 P. R. Fed., 53; United States *v.* Oregon & C. R. Co., 57 Fed., 426; Carter *v.* Hobbs, 92 Fed., 595; Fay *v.* City of Springfield, 94 Fed., 421; United States *v.* Union Pacific R. R. Co., 91 U. S., 79; District of Columbia *v.* Washing-

ton Market Co., 108 U. S., 243; United States *v.* Freight Association, 166 U. S., 291; and Dewey *v.* United States, 178 U. S., 521.)

In looking into the history of this sort of legislation we find that a somewhat similar provision appeared—so far as we can ascertain for the first time in our national legislation—in the organic act for the Territory of Hawaii in the year 1900 (31 Stats., 150). Section 54 of that act contains a provision that is not difficult to understand. It reads as follows:

"That in case of failure of the legislature to pass appropriation bills providing for the payments of the necessary current expenses of carrying on the government and meeting its obligations as the same are provided for by the then existing laws, the governor shall, upon the adjournment of the legislature, call it in extra session for the consideration of appropriation bills, and until the legislature shall have acted the treasurer may, with the advice of the governor, make such payments, for which purpose the sums appropriated in the last appropriation bills shall be deemed to have been reappropriated."

The next place where this sort of a provision of law appears is in section 7 of the organic act of the Philippine Islands, passed in 1902 (32 Stats., 694). This particular section of the Philippine law was amended and reenacted on February 27, 1909, but it appears that no change is made in the portion of the section that we are here discussing. The provision we refer to regarding the continuance of appropriations for the support of government where the legislature adjourns without making the same is word for word as the Olmsted law, supra, when first introduced in the House at the recent session of Congress, although in the Olmsted Porto Rican law before it was finally passed the word "session" in the first line was stricken out and the words "fiscal year" substituted, and the words "for the ensuing fiscal year" were inserted after the word "government" in the second and third line, so that the Olmsted law now reads as first above set out: "That if at the termination of any fiscal year the appropriations necessary for the support of government for the ensuing fiscal year shall not have been made, etc."

It will be noticed that Congress, in the Hawaiian act, said, "for which purpose the sums appropriated in the last appropriation bills shall be deemed to be reappropriated"; and two years later, when legislating for the Philippines—although this provision of the Hawaiian act was before it—the language used was entirely different, and instead Congress said: "An amount equal to the sums appropriated in the last appropriation bills for such purposes shall be deemed as appropriated."

It will be noted (supra) that there is another slight difference between the Philippine provision and the Olmsted law, in that in the former the word "purposes" is used in the plural twice, while in the latter it is singular when first used and plural when last used. Now, it is manifest that Congress deliberately worded the Philippine provision different from that of the Hawaiian for reasons that no doubt seemed sufficient, and probably omitted putting in such provision in the Porto Rican original organic act (Foraker law), although it was passed the same year as the Hawaiian Act, because no doubt it was thought there would be no need for it in the case of a people so advanced as the Porto Ricans were believed to be.

We would have no difficulty in sustaining the view complainants take of the Olmsted law in the case at bar if the language used was the same as that used in the Hawaiian Act, but not so when we consider the language that actually is used, that "an amount equal to the sums appropriated in the last appropriation bills for such purpose shall be deemed to be appropriated," which is quite different from saying "for which purpose the sums appropriated in the last appropriation bills shall be deemed to have been reappropriated."

When we attempt to ascertain the object of the passage of such a provision at all, even if we did not possess or could not take judicial notice of the knowledge before referred to of the recent action of the local house of delegates, the very language of the Porto Rican provision would indicate that its object is to prevent the hampering or stopping of the government in any manner.

Gov. Taft, of the Philippine Commission, now President of the United States, in a letter to Representative COOPER, of the House of Representatives, written from Cincinnati, Ohio, on May 13, 1902, on the eve of his departure for Rome, used this language, as same can be seen on page 471, part 8, volume 35, CONGRESSIONAL RECORD, Fifty-seventh Congress, first session, Appendix:

"A provision that appropriations shall not fail because of any obstruction in the popular assembly will prevent its being made an instrument for choking the government."

And in the same RECORD, on page 628, Representative CRUMPACKER states that Gov. Taft, in an article in the Outlook of date the 31st of May, 1902, previous, when referring to the Philippine Islands, stated that "danger from obstruction of the government by withholding supplies is avoided in a section of the House bill by a provision that should the appropriation bills not be passed, appropriation equal to those of the year before shall become available without legislation." President Taft, in his message to Congress of May 10, transmits therewith Secretary Ballinger's report recommending that the organic act of Porto Rico be amended to automatically provide in such cases an appropriation equal to the sums appropriated in the last appropriation bills for such purposes until the legislature shall have acted.

After the examination we have given the subject, we are of opinion that the clear intention of Congress in wording the Olmsted bill as it did was because it well knew that at best one year's appropriations can not be made to exactly fit the requirements of another year, and therefore it is thought best to appropriate a lump sum equal to the total of the previous year for the support of the Government, leaving it to the discretion of the governor to reallot or subdivide this money from time to time to support the Government until the legislature shall act.

The attorney general of the island has submitted to us as part of his argument in this case his letter to the governor of Porto Rico of July 19, 1909, in response to a request for his opinion as to the manner in which the act in question ought to be construed. After the examination we have made of the subject before us, we are constrained to conclude that the attorney general, in the painstaking effort which he made to properly advise the governor in the letter referred to, is right in his conclusions, and we can not better express the views he presented to the governor than by quoting his own language, which is as follows:

JULY 19, 1909.

The GOVERNOR OF PORTO RICO, *San Juan.*

SIR: Pursuant to general conversations heretofore had between us and in participation with the auditor, the treasurer, and the secretary of Porto Rico, referring to the construction to be put upon the act of Congress approved July 15, 1909, hereinafter quoted in part, and having to do with the provision made by Congress for the support of the Porto Rican Government when the legislature shall have failed to pass the regular appropriation bills for that purpose, and, at your suggestion that I render an official opinion in answer to the various inquiries which arose during our conversation, I beg to say:

I have before me the act in question as it passed the House of Representatives June 7, 1909, printed and attested by the Clerk and Chief Clerk of the House of Representatives. I also have a copy of the telegram to you from the Chief of the Bureau of Insular Affairs of the War Department, purporting to quote the act as approved. I note certain small differences between the text of the act as printed and the act as transmitted by wire to you, and though these differences are of slight importance, I shall assume, for the purposes of this opinion, that the printed copy is more apt to be exactly correct than the copy transmitted by telegram, particularly in view of the fact that the telegraphic dispatches from Washington on July 8, and printed in our local press, have stated that the act in question passed the Senate without amendment. The part of the bill to which this opinion relates amends section 31 of the Foraker Act by adding the following proviso:

"*And provided further*, That if at the termination of any fiscal year the appropriations necessary for the support or government for the ensuing fiscal year shall not have been made, an amount equal to the sums appropriated in the last appropriation bills for such purpose shall be deemed to be appropriated, and until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid."

I have tried to reach a correct conclusion as to exactly what was meant by the language employed. It is open to two possible constructions—one being to the effect that Congress intended to reenact last year's appropriations; another to the effect that Congress intended to make one appropriation only, in amount equal to all of the appropriations of last year, constituting one lump sum, to be expended by the treasurer, with the advice of the governor, for the support of the Government. I adopted, after painstaking consideration, the latter construction, and I am led to that conclusion by many considerations which I shall in part state.

In the first place, sums of money are not appropriated, but, in the language of the act, "an amount equal to the sums appropriated in the last appropriation bills." It is a well-known canon of statutory construction that language is to be construed in its ordinary significance, and applying that canon to the language of this act, I am constrained to believe that Congress appropriated "an amount" and not "sums." Furthermore, if it had been the intention of Congress to reenact for each of the activities of goverment the sums appropriated last year for those purposes, the obvious, easy, and natural thing for Congress to have done would have been to use appropriate language to that effect; for instance, "amounts equal to the sums last appropriated shall be deemed to be reappropriated," or "the appropriation bills of the preceding fiscal year shall be deemed to be reenacted." But, on the contrary, Congress, in using the language first herein quoted, has made it clear, as it seems to me, that the "purpose" is the support of government and that the appropriation is of an amount sufficient to accomplish that purpose, which amount is to be subdivided into appropriate allotments, corresponding to the necessities of each department and activity of the government as provided by law. In further support of this view, it may not be improper to call attention to the fact that the language of this proviso was first enacted into law by the Congress of the United States in legislating for the Philippine Islands and in anticipation of a possibility that the Legislature of the Philippines might fail to agree upon the appropriation bills necessary for the support of government, and it seems reasonable that the Congress appreciated that the necessities of government vary for different branches from year to year and that it would be inexpedient to limit the sums to be spent in one fiscal year for each department or branch of the public service to the amounts which had been deemed by the legislature appropriate to the necessities of a different year. The Congress, therefore, in order to give to the provision sufficient flexibility to adapt it to the new and different necessities of the government, preferred to appropriate one total amount, rather than specific sums, for each of such services. Likewise the Congress of the United States, in disposing of the situation which had actually arisen in Porto Rico, seems to have concluded that it would be best to employ the same language as had been employed in the case of the Philippines to meet a possible contingency and for like reasons. I therefore conclude that the intention of Congress was to make one appropriation only, applicable to the necessities of government, to be allotted in a manner best adapted to the requirements of the fiscal year to each one of the services of the government as should prove requisite.

Passing now to the machinery which has been provided by Congress to ascertain what sums are to be thus allotted to the different departments of the Government, I quote from the latter part of the proviso: "And until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid." In the first place, it is plain that the legislature may, at any time when it can lawfully assemble, take this whole matter out of the administrative powers of the Government by passing regular appropriation bills. Until such time, however, as the legislature shall do so, I am of the opinion that it was the intention of Congress to substitute the discretion of the governor for the discretion of the legislature in all cases where legislative enactment would otherwise have been necessary by the Legislative Assembly of Porto Rico. I call your attention to the fact that the word "advice" is the same word employed in the Constitution of the United States in many places; for instance, in Article II, section 2, of the Constitution of the United States it is provided that the President shall have power, by and with the advice and consent of the Senate, to make treaties. Under such provisions of the Constitution it has been regularly held that the advice and consent of the Senate is absolutely necessary to effectuate a treaty. The same provision is found in the Constitution in regard to presidential appointments to office, and the same rule has been applied.

I conclude, therefore, that with respect to all expenditures requiring legislative enactment under the Foraker Act the governor's advice takes the place of a legislative enactment, and that it is incumbent upon the governor to authorize the expenditures for all such purposes.

In order to ascertain where the governor's powers in this regard begin and end I have to call to your attention the language of section 36 of the Foraker Act, which says: "That the salaries of all officials of Porto Rico not appointed by the President, including deputies, assistants, and other help, shall be such and be so paid out of the revenues of Porto Rico as the Executive Council shall from time to time determine." In the same section are fixed the salaries of the officials appointed by the President, and the section further provides that all these salaries, together with the expenses of the offices of the various officials of Porto Rico appointed by the President, shall be paid on the warrant of the auditor countersigned by the governor.

In the matter of salaries, therefore, it is plain that the Executive Council had been constituted with full legislative power to fix all salaries not fixed by the Foraker Act itself, and it is incumbent upon that

body to so fix said salaries and the manner of their payment in order to legalize salary payments for the fiscal year 1909–10. The Foraker Act, however, does not clearly make provision for the ascertainment of and payment for the various expenditures outside of salaries, which matters must be deemed to have been included in the general legislative authority of the Legislative Assembly of Porto Rico granted in section 32 of the Foraker Act. These amounts, therefore, will require approval or advice for payment by the governor of Porto Rico. It is not stated in the Olmsted Act that the governor shall give his approval or advice at any particular time. In order, however, to have this opinion constitute an answer, so far as possible, to the various inquiries which arose during the conversations before referred to, I beg to suggest that it would seem expedient that, in a tentative form, subject to modification from time to time, the governor ought in a general way to indicate to the various heads of departments and governmental services the amounts of money which he deems expedient to allow to be spent for such services, having in view, of course, not only the necessities of the various services themselves, but also the condition of the public treasury and the incomes from all sources available for such purposes. In addition to such general and tentative indication by the governor, it seems to me that the governor ought, in countersigning the warrants provided by the Foraker Act and by the political code, to add suitable words over his signature to the effect that he advises payment thereof, which advice would be necessary to finally legalize such payment.

The most difficult question which occurs to me and which arose in our discussion of these matters is this: How far is the governor under existing laws required to approved expenditures for matters which have been authorized by law? It may be that my answer to this question will not be as comprehensive as it ought to be, because it may be that these questions will, in large part, have to be settled as they arise from time to time. In a general way, however, I beg to say that the Foraker Act, being the fundamental organic law of Porto Rico, must in all cases be complied with. Matters, however, which have been authorized by the laws of Porto Rico are subject to the will of the legislative assembly, for whose will for the time being the opinion of the governor seems to have been substituted. I believe that the sanction of the legislature for certain activities of the government must be regarded as of persuasive rather than mandatory force, and that if the governor finds that available funds are insufficient to provide for the continuance of all of the lawful activities of the government for the whole fiscal year, responsibility will rest upon the governor to choose therefrom for elimination such matters as in his judgment are not absolutely necessary for the support of government.

I do not believe that Congress intended in any way to amend provisions of the organic law or the political code for the payments of money, and that they still require the warrant of the auditor countersigned by the governor, and I recommend that every expenditure receive not only the countersignature of the governor but his advice for payment.

I hope that this opinion will be sufficient guide both to you and to the fiscal departments of the government to meet all present requirements and unforeseen questions can be dealt with from time to time as they arise.

Respectfully, H. M. HOYT,
Attorney General.

We are therefore unhesitatingly of the opinion that on the merits of the case complainants have no cause of action, even on their own showing, no injuries being done; no money is being misappropriated, but the Olmsted law, in our opinion, is being carried out honestly according to its terms. We are utterly unable to bring ourselves to the belief that the amendment in question can be either construed or administered as contended for by complainants without bringing about a situation nearly as complicated as the one which forced Congress to take action. But apart from all this we desire to say that we have only gone into the subject thus far with a view in so far as may be to end this useless and annoying interference with the conduct of the government of the island of Porto Rico, which Congress has established and which it intends shall be carried on.

We believe that it is the law that no private citizen or taxpayer—and that is all that these complainants are, because their allegation that they are members of the house of delegates adds nothing to their right to sue in this court—has any right to sue or enjoin the State (insular) officials, or to in any manner impede or hamper them in the exercise of their official functions. (See Mechem on Public Officers, secs. 954, 987, 988.) There may be cases where one or more taxpayers—and that is all these complainants are—could mandamus State (insular) officials to perform mere ministerial duties, such as the delivery of a commission of a justice of the peace to the person entitled to it, as was there held in Marbury *v.* Madison (1 Cranch, 137), but we have not found a single case that authorizes a mere taxpayer as such to enjoin the governor of a State. One of the common provisions of all State constitutions and of the organic acts of Territories regarding the governor is that he shall see that the laws are faithfully executed, and section 17 of the Foraker law regarding Porto Rico is no exception to the rule. In addition it appears that the President may in his discretion delegate and assign other executive duties and functions to him. So it may not be amiss to call attention to the fact, as appears from the record, that the President, through the Secretary of War, on the very day of the enactment of the Olmsted law cabled the governor directing him to make the appropriations under the provisions of the law. This would indicate that the President (Secretary of War) was of opinion that the governor had to make the allotments referred to.

When it was attempted in Mississippi *v.* Johnson (4 Wall., 475) to enjoin the President of the United States from carrying into effect an act of Congress on the ground that it was unconstitutional, the Supreme Court of the United States would not even permit the bill to be filed.

The arguments of Attorney General Stanbery in that case showed the fallacy of such an effort in such a way as that the court found no difficulty in agreeing with him and settling the proposition for all time under our system of government. See also State of Georgia *v.* Stanton (6 Wall., 50), where the same doctrine is extended to include the Secretary of State.

We have been unable to find authority for the proposition that the State (insular) officials can be enjoined from enforcing any law, even if the same is unconstitutional, but, on the contrary, find the law to be that such high officials can not be enjoined for what is in the mere opinion of the same complainant a misappropriation of public funds. The language of Judge Dunbar in the well-considered case of Jones *v.* Reed, in the Supreme Court of the State of Washington (27 Pac., 1069), where the effort was to enjoin the State auditor, is very apt in this regard, and it is as follows.

"As the fallacy of a proposition can best be shown by distorting it, we may presume that if one of the departments of the State government can be suspended at the instance of a private citizen who has nothing more than a community interest in a matter which concerns the general public, that every department of the State can be suspended at the same time, and the whole machinery of the Government stopped, and the very existence of the State, so far as the existence of its functions are concerned, destroyed. Surely such a theory of practice is not in harmony with the genius of our Government, nor will authority sanction or public policy permit the adoption of a rule which will authorize any number of volunteers who may rightfully or wrongfully interpret the laws different from the interpretation put upon them by the officers of the State, to paralyze for the time every or any branch of the State government."

See also volume 6, American and English Encyclopedia of Law, page 1006, heading "Frame of government," and idem, volume 14, page 1106, heading "Governor," and notes.

In the Jones *v.* Reed case it was also held that under the laws of that State it was the duty of the attorney general and not the duty of private citizens or taxpayers to see that no misappropriation of the public moneys was made, and the court in that regard said:

"The law, then, having provided an officer for an especial duty, it is the better policy to submit such litigation to his guidance."

And is it not manifest from the letter of the attorney general of the island to the governor, as above set out, that the former is proceeding to the best of his ability to do his duty and to guide all concerned, so that the law will be properly administered?

In our opinion these officers deserve the support and commendation of all the people of Porto Rico for their faithful devotion to duty under trying circumstances, instead of being charged with dereliction of duty, as they are under the allegations of the bill in this case.

In our opinion it was a wise, proper, and legal act for the Executive Council to meet as it did and pass the resolution it did fixing the salaries of the officials, because that removes all doubt about the matter of the amount of such salaries for the present fiscal year. The salaries fixed by Congress require no appropriation. See Rotwitt *v.* Hickman, State treasurer (23 Pac., 740). The allotments of money the governor is making are, in our opinion, legal and proper, for we agree with the Attorney General that the Olmsted law, by its terms, for the purpose of the present and similar occasions, has substituted his discretion for that of the legislative assembly. We think there are inherent powers in the Executive Council even under our system of government that can be exercised to preserve the government itself, as there is no courts to preserve their own existence. See our opinion in Scoville et al. *v.* Hadley, auditor (P. R. Fed., 457).

Were it not for the space it would occupy we could with profit quote extensively from the lucid opinion of Judge Dunbar, from which we have only made short extracts, for its reasoning leaves complainants here without right to be here with their bill.

It must not be forgotten that we are speaking of the State (insular) government, and whatever the rule may be as to the right of a taxpayer, especially when he can show an interest in himself different and more burdensome than that of the rest of the community, to enjoin municipal officers of cities, towns, villages, or of corporations, the rule does not go, nor could it in justice, in our opinion, under our system of government go to the extent of permitting mere taxpayers to enjoin State officers or the governor in the performance of their functions. The only instance in which any language of the Supreme Court of the United States could be said to lean toward complainants' contention as to the right of a taxpayer to enjoin State officers is found in the case of Crampton *v.* Zabriskie (101 U. S., 601), but Judge Dunbar, in the opinion we are here quoting from, considers that contention and plainly shows that the language used by Mr. Justice Field will bear no such construction. What interest have these complainants shown that they have in the matter in controversy here other than that of any other taxpayer? The action of the officials sought to be enjoined, even if it was wrong, would not result in any heavier burden to them as taxpayers. No more money than the sum total of the last appropriation bills can or will be spent for any purpose; hence where are complainants injured—or anybody else for that matter? Where have complainants any personal interest in that sense in this controversy? Where have they any interest other than that of mere intermeddlers? A complainant in such a case as this must show that he is personally interested in some manner other and different than are the others in the community and that he is being deprived of his property without due process of law. (See Tyler *v.* Judges Court of Registration, 179 U. S., 405; Caffrey *v.* Oklahoma Territory, 177 U. S., 346; Turpin *v.* Lemon, 187 U. S., 51.)

The jurisdiction of a court can only be invoked by a party having a personal interest in the litigation. (Sherman *v.* Bellows (Oreg.), 34 Pac., 549; State ex rel. Taylor *v.* Lord (Oreg.), 43 id., 471; Smith *v.* Indiana, 191 U. S., 138; Braxton County Court *v.* West Virginia, 208 U. S., 192; McCandles *v.* Pratt, 211 U. S., 437.) And only where the complainant has a real legal right to the relief sought can he maintain such a suit or will the relief be granted. (National Life Ins. Co. of U. S. *v.* National Life Ins. Co., 209 U. S., 317.)

In cases where even a question of law, as well as a question of fact, is committed by Congress to the judgment and discretion of the head of a department his decision therein is conclusive. (Bates & Guild *v.* Payne, 194 U. S., 106.)

It seems to us that the present is a case wherein we can without impropriety refer to the holding of the Supreme Court of the United States regarding the action of the governor of the State of Colorado with reference to Mr. Moyer (212 U. S., 79), "that public danger warrants the substitution of the executive for the judicial process, and the ordinary rights of individuals must yield to what the executive honestly deems the necessities of a critical moment." Surely a time in Porto Rico's history when, for failure of the local assembly to act, Congress was forced to pass the Olmsted law can be said to be critical.

It would hardly become this court, cognizant as it is of the revolutionary action of the recent local house of delegates (see our opinion in contempt cases in 4 P. R. Fed., p. 476), of which these very complainants were active members, to resolve any doubts in favor of their views in an effort to further hamper the executive departments of this island in what appears to be the latter's honest efforts to carry on the government under the act which complainants themselves by their own willful delinquency help to make it necessary for Congress to enact.

We therefore hold that complainants have no cause of action at all; that they have no right to file this suit; that they have shown no special interest in the matter; that in any event they could not thus

stop or hamper the government, and especially is this so as to the governor of the island. We further hold that on the merits of the case the governor and the officials are, as matter of law, construing the Olmsted law properly, and so far as the allegations show are acting rightfully under it.

The demurrer will therefore be sustained, and the case dismissed at cost of complainants.

B. F. RODEY, *Judge.*

[Extract from report of committee on assembly bill 395.]

REPEAL OF THE LAW PROVIDING FOR PUBLIC PROSECUTION OF CRIMES OF ADULTERY, RAPE, SEDUCTION, ETC.

A. B. 395. An act amending act No. 1773, entitled "An act to provide for the public prosecution of the crimes of adulterio, estupro, rapto, violacion, calumnia, and injuria, to abolish the right of pardon by the aggrieved party in such cases, to provide for a special civil action for damages therein, and for other purposes," restoring, with amendments, certain provisions of the Penal Code of the Philippine Islands on this subject.

Passed by the assembly December 27, 1910; laid on the table by the commission January 31, 1911.

The following extract is taken from the report of the committee of the Philippine commission (senate) on matters pertaining to the department of finance and justice:

"By the passage of the assembly bill, act 1773 would be entirely repealed, with the exception of section 3 thereof, which refers to the right of the aggrieved person in the offenses mentioned in said act to bring a civil action. Act 1773 provides that the crimes of adulterio, estupro, rapto, violacion, calumnia, and injuria shall be deemed public crimes, it being provided, however, that no prosecution for the crimes of adulterio, estupro, and injuria against persons other than public officials or employees shall be brought except upon complaint of the aggrieved person or of the parents, grandparents, or guardian of such person.

"With the provisions of the penal code reestablished, as they would be by the passage of the assembly bill, no prosecution for the crime of estupro could be brought except upon complaint of the aggrieved person, or of the parents, grandparents, or guardian of the aggrieved person; none could be brought for the crime of adulterio except upon complaint of the aggrieved spouse; and none for the crime of injuria except upon complaint of the aggrieved party, save when the offense is committed against a public official or employee.

"A necessity was felt for the enactment of act 1773. Many persons aggrieved by the commission of these offenses appealed to the prosecuting officer, asking for the prosecution of the offenders, but under the provisions of the penal code no action could be taken. To reestablish now the provisions of the penal code with reference to these crimes would mean that many offenders would go entirely unpunished, since in many instances the aggrieved persons would not be able to pay the expense of a private prosecution, and in many other instances would not care to take the trouble or stand such expense.

"The assembly bill would also reestablish the provisions of the penal code providing that pardon by the offended person extinguishes the criminal liability in the above-mentioned offenses of aduiterio, estupro, rapto, violacion, calumnia, and injuria. Section 2 of act 1773 contains a provision to the contrary which tends to remedy the abuses and evils which pardon by the aggrieved person in the above-mentioned offenses encourages."

Translation of terms used in report of committee. These offenses all come under what is known as crimes against honor.

The definition given first is the preferred, in the meaning of the penal code. The others are proper definitions in the generally accepted understanding of the words:

Estupro:
1. Seduction.
2. Rape.
3. Ravishment.
4. Constupration.

Rapto:
1. Abduction.
2. Rape.

Adulterio:
1. Rape.
2. Violation.

Calumnia:
1. Calumny.
2. Slander.

Injuria:
1. Insult.
2. Injury.
3. Wrong.
4. Offense.
5. Outrage.
6. Damage.

Adulterio:
Adultery.

Mr. FLOOD of Virginia. Mr. Chairman, I yield 30 minutes to the gentleman from New York [Mr. REDFIELD].

The CHAIRMAN. The gentleman from New York is recognized for 33 minutes, 30 minutes yielded by the gentleman from Virginia [Mr. FLOOD] and 3 minutes, the time remaining within the control of the gentleman from Pennsylvania [Mr. OLMSTED].

Mr. REDFIELD. Mr. Chairman, a prominent resident and local official of Ormoc, island of Leyte, writes, in September, 1912, as follows:

I have no patience with that element of my people who, in public speeches as government officials, or in our newspapers as writers and agitators, demand immediate independence. My town has a population of 38,000, less than 200 of whom, under the liberal system of qualifying, are entitled to vote. This may be considered a fair example of conditions in most parts of the islands where I have been, and speaks for itself. Would these advocates of independence place their business affairs in the untrained and unguided hands of their children? I am of the number who believe that the abandonment of the Philippines by the United States will be disastrous to us, and that if any change in our government is made it should be toward a smaller degree of autonomy.

Offering that, Mr. Chairman, without indorsing the last words, as an introduction to what I shall have to say, I ask unanimous consent to insert as a part of my remarks certain documents bearing upon the subject of the Philippines.

The CHAIRMAN. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. JONES. Mr. Chairman, I would like the gentleman to indicate what the documents are which he wishes to put in the RECORD before consent is given.

Mr. REDFIELD. The documents are, one, a letter published in the New York Evening Post of January 29, 1913.

Mr. TOWNSEND. Signed by whom?

Mr. REDFIELD. Signed by Frank H. Clark, giving his experience in the islands. Another is the statement of the actual facts of the alleged illegal action on the part of Gov. Forbes in allotting appropriations. It is a comparative statement showing by bureaus the amounts allotted, and I offer it as an offset, Mr. Chairman——

The CHAIRMAN. Is there objection?

Mr. TOWNSEND. Mr. Chairman, I object.

Mr. JONES. By whom was the statement made?

Mr. REDFIELD. It is an official statement made in the Philippine Islands, and I offer it as an offset to what I shall endeavor to show was an entirely misleading and inaccurate statement made before the House by the chairman of the Committee on Insular Affairs, the gentleman from Virginia [Mr. JONES].

Mr. JONES. The gentleman states that the statement was prepared in the Philippine Islands. Has it been prepared there since the 28th of January and sent here?

Mr. REDFIELD. No; it bears the date of March 9, 1912. It was available to the gentleman, and I wish he had used it.

The CHAIRMAN. The gentleman from New Jersey [Mr. TOWNSEND] objects.

Mr. MURRAY. Mr. Chairman, I hope the gentleman will withdraw his objection.

Mr. MANN. Does the gentleman object to permission being granted to a Member to insert material matter in his speech?

Mr. TOWNSEND. But the materiality of the matter has not been proved or stated.

Mr. MANN. Nobody objected when the gentleman from Virginia [Mr. JONES] desired leave to extend his remarks in the RECORD.

Mr. MURRAY. Mr. Chairman, I hope we may get all the information on the subject we can.

Mr. TOWNSEND. Mr. Chairman, I never have asked permission in my life, but I withdraw my objection at the request of my friend from Massachusetts [Mr. MURRAY].

The CHAIRMAN. The Chair will put the request again. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD by printing the papers referred to. Is there objection?

Mr. JONES. Mr. Chairman, I ask the gentleman to state what other documents he proposes to insert. When I made my request, to which the gentleman from Illinois referred, I expressly stated what I wanted to publish, and I hope the gentleman will do the same.

Mr. REDFIELD. I will gladly do so if I have any other. At the moment these are all I contemplate publishing.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. REDFIELD. Mr. Chairman, I happened to pass through the House on the way to an important committee meeting on the 28th day of January last, when the distinguished chairman of the Committee on Insular Affairs held the floor. It was impossible for me then, because of a committee which was authorized, if not instructed, to sit during the sessions of the House, to remain; but I heard certain statements made respecting a gentleman I know and respecting a place I know which I think ought not to go unchallenged.

I propose here and now to challenge them both. But first of all I want my own attitude on this Philippine question to be clear beyond all doubt. I do not think that the American flag should continuously or long, as the lives of nations go, float over a dependent people. I believe, and have said it to the distinguished gentleman from the Philippines, that he and his people should be as free as I. I seek for my own son no freedom I do not want for his son. Is that plain enough? If not, then write your desire for freedom for the Filipino people as liberally as you will and I will subscribe to it. And I am in accord with not only the last but the last three Democratic platforms upon this subject. I believe that the platform of 1904 spoke the truth more plainly than the others when it said that the Philippine people should "work out their own destiny"; but I call the attention, however, of my friends on this side to those respective platforms to say that the emphasis in them rests upon one fundamental word, "stable."

In both the platforms of 1908 and 1912 this statement is repeated, "a stable Government," and in it lies the key to our duty. We do not want over there that which renders things unstable and impermanent. Our party has charged us twice

with doing that which shall create "a stable Government," and has charged us with nothing else. To that and to that alone we have the right to address ourselves. Furthermore, the second fact that ought to be called formally to the Democrats of this House is this, and I do it on the authority of Senator O'GORMAN, of New York, who authorizes me to say, as a member of the platform committee at the last Democratic national convention, that a resolution favoring the so-called Jones bill was submitted to that committee and was argued before that committee; that the arguments were heard and considered, and after consideration that resolution was rejected and the platform as it stands was substituted in its place.

Mr. JONES. Will the gentleman permit an interruption, because this is a very important statement he has made? I will say to the gentleman that a plank relating to the Philippines was prepared and presented to the committee on resolutions of the Baltimore convention. It was prepared by the Hon. JOHN SHARP WILLIAMS, Senator from Mississippi, and myself. There were fifty-odd copies of this plank made, and a copy was placed in the hands of Senator O'GORMAN and a number of other members of the committee, and it was read and discussed by the committee. But I absolutely deny that it indorsed or specifically referred to the Jones bill, Senator O'GORMAN's alleged statement to the contrary notwithstanding, and I have got a dozen copies of it.

Mr. REDFIELD. I have no reason to change the statement I have made.

Mr. JONES. Nor have I to change mine.

Mr. REDFIELD. And another Member of this House, whom I will not mention, though he sits near, has had in his hands, or at least has seen, a similar resolution, which was offered at the Baltimore convention, or which its supporters attempted to offer, and which was turned down by the convention. Now I will proceed, Mr. Chairman, if I may.

Mr. TOWNSEND. The gentleman said, "turned down by the convention." I presume the gentleman meant it was turned down by the committee.

Mr. REDFIELD. The gentleman is right; turned down by the committee. Now, gentlemen, I think it will be agreed by all men on both sides of this great legislative House that where the fortunes of 8,000,000 souls are at stake care, deliberation, accuracy, and truthfulness should characterize procedure. It seems to me essential, fellow Democrats, that you who bear the burden of power now and are to have it in larger measure hereafter are entitled to know the truth and not merely a part of it. You have a right to truth which is not colored, either by passion or by prejudice, but candid, open, complete truth, and you have not had it. [Applause.] There is need here where the birth of a nation is proposed for accurate knowledge and for accurate knowledge which shall be complete. Then there is need for thorough assimilation of that knowledge, and then there is need for the greatest moderation in action. Will there be any man who will impugn the plea for thorough knowledge, uncolored and candid, then for deliberation, for a mature digestion of that knowledge, and finally for moderation in action based thereon?

Can that be objected to by any man? For, as the President elect has well said, we are trustees for the Philippine people. We are trustees for the Moro as well as for the Tagalog. We are trustees for the Visayans and equally for the Igorot. We are trustees for the Ilocano and trustees for the Kalingan also. And we must honestly legislate not alone for a tribal oligarchy but for all the other peoples of the islands who are less able to care for themselves, and for whom therefore we are in honor bound to act just as truly, or more truly, as trustees. [Applause.]

Nor is this essentially a political question. I do not think the American Republic in considering the birth of a child-nation, if I may call it so, should be borne by the winds of passion or of prejudice. This is a human problem, where the lives, happiness, peace, and prosperity of millions now living and other millions yet to be, are in our hands. We have no right before the people whom we are sworn to serve to come here with political passion; least of all, with pride of opinion. The country is entitled to the truth. And the Democratic Party is obligated to deal with the truth thoughtfully, calmly, fearlessly, and in the fear of God. Evil must not escape. If the Governor General of the Philippines or any of his servants do wrong, God forbid they should escape the just penalty for their acts. Let them be punished, but let us be careful that we do not at the distance of 15,000 miles, and when they are not here to speak for themselves and can not be represented on this floor by innuendo or exaggeration submit them to any charge which, if we were subject to cross-questioning, we could not sustain. [Applause.]

There are various kinds of public wrong. There is the open treason to the State. There is the man who enters the shores of the Philippines with arms and attempts to overthrow the government there established. How less guilty is he who enters, not by open force and in the light of day, but by skilled twisting of facts, by innuendo, by the omission of pertinent things, by the falsehood which a half truth always creates—how less guilty is he who throws a false light upon the screen, and would enable us to see things other than as they are?

Now, for the people of the Philippines I want all that I want for myself and my children, neither more nor less, but I do not forget that the freest people of the world are not always those people that have political independence. Over many great public documents in my own State runs the phrase, "The people of the State of New York, by the grace of God, free and independent." But they are not so. The gave up their independence largely into your hands for good reasons. The people of Scotland are free; they are not independent. The people of Prussia are free; they are not independent. The people of New Zealand and Australia are free; they are not independent. And there are peoples who are independent but who are not free, for who will say that in Haiti there is freedom? Mexico is independent, but save us from such freedom.

Now, having said this much by way of introduction of this great subject, I am not going to discuss further the principles of the legislation now pending. When it shall come I shall be ready and thankful to discuss it, but I am going to refer to certain things that ought not to have been said in the way they have been said. I acquit absolutely the gentlemen whose language I shall criticize of any improper intent. I believe they have meant and intended to speak the truth, but I think they have none the less failed to put the truth rightly before the people of this country.

Now, to be specific, I am going to take up, first, the language used by the gentleman from Virginia [Mr. JONES] on the 28th day of January and appearing on pages 2169 and 2170 of the RECORD, as follows:

> The Benguet road is a highway less than 20 miles in length, built at a cost of several millions of dollars in gold through a mountain gorge to a health resort or residential park, called Baguio, to which place, at great expense, the seat of government is transferred from Manila for several months each year, and where American officials have handsome homes, clubhouses, polo grounds, and other sources of recreation and amusement. The Filipinos have from the beginning been violently opposed to these vast and absolutely inexcusable expenditures.

And other reference is made to the so-called automobile road, which is stated to be solely for the purposes of recreation and pleasure. And then, on the other page:

> An enormously expensive automobile road, leading to a mountain summer resort maintained exclusively for the benefit of themselves and other rich residents of Manila.

It is not true. I was there in the middle of the winter, and Baguio was in full blast, except for the government buildings; but the government property is not all of Baguio. Let us have the plain truth on this subject, and I shall be delighted to be challenged. There is hardly a correct statement in the words I have quoted. In the first place, the Benguet Road is not correctly described as 20 miles long when stating its cost. There is one of your half truths. It was 30 miles long; but in order to reach Baguio from Manila 10 miles of it have been replaced by a railroad and but 20 miles remain as the Benguet Road. The other 10 miles is in local use between Pozzorubio and Camp No. 1. The other 10 miles is now unnecessary in going from Manila because of the railroad from San Fabian to Camp No. 1. The cost stated was for the full 30 miles, but the impression was given that it was the 20 miles that cost so much.

Mr. GREEN of Iowa. Is the railroad included?

Mr. REDFIELD. No. It is not fair to come to this House and say that a road cost several millions and is less than 20 miles long, when in fact that cost covered 30 miles of roadway. I would not have in my employ a department head who made such a misleading statement.

Mr. MURRAY. Would the gentleman have, as chairman of the Insular Affairs Committee, a man who would make that statement?

Mr. REDFIELD. I went to Baguio and spent some days there. I entered these houses.

Mr. JONES. The gentleman said that he would give me an opportunity to reply. I want to know when he will yield.

Mr. REDFIELD. My time is very limited, and I will ask you to come on after I am through.

Mr. JONES. I may not be able to get any time.

Mr. REDFIELD. I entered these houses in Baguio. They are not magnificent houses.

Mr. FLOOD of Virginia. How much time does my colleague from Virginia [Mr. JONES] need?

Mr. JONES. As much time as the gentleman will give me. I will be glad to have 10 minutes.

Mr. FLOOD of Virginia. Does the gentleman want 10 minutes?

Mr. JONES. Yes.

Mr. REDFIELD. They are comfortable homes. There is nothing in Baguio that can be called magnificent. There is nothing that fairly corresponds to the description of an exclusive summer resort. I repeat, I was there in winter. There are gold mines near. My son went to them. This road is their only outlet to the plain. There are two missions there with schools, one Catholic and one Episcopalian. My wife went to one of them. There is a prison there, with about 300 convicts at that time. Camp John Hay is there, with a military hospital. This road is their only outlet to the railway and to Manila.

There is a village there, and I will tell you in a moment about the village, because what I shall tell you will show how fit for self-government some portions of these people are whose claims for independence are pressed upon us. This road was not built for pleasure automobiles, merely. They are not ordinary automobiles in the sense that we commonly understand the term. The automobiles there are Government stages, using steam, and seating 10 persons or so each. It is the only way of getting up the rise of nearly 5,000 feet.

I saw no private automobiles, save two. One of them I used myself at the hotel. The town of Baguio is also a native town. It is an Igorot town. I went up there on Saturday afternoon. The road was sprinkled, as we went up the mountain side, with the Igorots going to their market, to be held the next morning. They were guiltless of all clothing. The only thing they wore was a gee string around the waist and through the loins. That was all. Each of them had at one end of a bamboo stick one or more of their "skin-tight" dogs, as my boy called them—dogs with short hair and very thin. These gathered in groups and groups, until there were many men leading many dogs to Baguio that afternoon. [Laughter.]

The next morning, leaving the hotel, passing the prison, down into the market place presided over by Ilocano policemen, we went to the Sunday fair at Baguio. Of course, you must remember that there is nothing at Baguio but "a summer resort." But still, for some strange reason, perhaps 500 Igorots gathered at their fair. They were selling these dogs and other things. I would like to entertain you by putting myself in one of the costumes bought there. [Laughter.]

A MEMBER. No! [Laughter.]

Mr. REDFIELD. They were selling the dogs—for what purpose, think you? These lean dogs were sold to be stuffed with rice. Being hungry, not being fed for days, they were stuffed with rice until the dogs gorged themselves, and then were led over the hills in quantities to be slain and eaten as soon as they got home.

Directly in front of the hotel, working on the road, was a man who bore the mark of the headhunter on his head. He had taken 10 heads, but he had been converted to peaceful labor.

I shall have time to say of Baguio and the Benguet road only this one thing further that was omitted from the statement of the gentleman from Virginia, that the trunk road criticized here is also the outlet for 400 miles of mountain trails which gather at Baguio.

There is a polo ground there. Gov. Forbes built it at his own cost. Why should he not? But Baguio is also a place near which there are mines, where there are missions, where there is a prison, where there is a little native market town, large for the mountains, and it is the center and outlet for the trails of the mountain province. The Benguet road stands to those trails in the same relation as the Pennsylvania line between Philadelphia and New York does to the country west of Philadelphia and to New York City. A railroad is now building to Baguio to replace the Benguet road. How clearly this simple fact exposes the error of calling it "a mountain summer resort maintained exclusively for the benefit of themselves—American officials—and other rich residents of Manila." So much for Baguio, except to say that health resorts of this kind are common in the Tropics. A famous one is Simla, in India.

The gentleman from Virginia, however, made a point, on January 28, that a considerable part of the money appropriated by Congress to save the Philippine people from starvation—

Was expended on the Benguet automobile road—

And said—

In the estimation of the commission these starving Filipinos stood more in need of an automobile road than of the rice, to purchase which the American people in their generosity gave this money.

It is hard to refrain from unparliamentary language when this amazing statement is compared with the facts.

The nature of the so-called automobile road I have already described. What shall be said, however, of the statesman who seems not to know that the accepted method of distributing public funds for famine relief is by employing the people sought to be relieved on public works? It is hard to believe that the gentleman from Virginia did not know this ordinary fact. Would he have substituted open gifts of money for wages fairly earned? Does he not know that in India long experience with famine has brought the method he now criticizes into standard use, whose wisdom no one questions? But why, also, does the gentleman omit to mention that there were other roads—17 of them—upon which money from this same fund was expended for the same purpose at the same time? These other roads were in various parts of Luzon and in Cebu. The total amount spent on these other roads was larger than that expended on the Benguet road. If he would not have the House believe that this Benguet road was the sole beneficiary, why did he not say that it was but one, though the largest, of many roads in many parts of the islands treated in this way?

My time is getting so brief that I want to take up that beautiful work of fiction known as the report on the Philippine independence bill. Gentlemen of the committee, it may be that there are accurate statements in that report, but I must confess before you with great frankness that I have not yet been able to find any. [Laughter.]

Now, I am going to take one of them and illustrate it to you—because it is not a Philippine matter at all—to show you the utter impossibility of getting the full facts from this report.

On page 12 are these words:

Notable among the small countries whose independence, although preserved inviolate for ages, has never been guaranteed by international treaty or otherwise, may be instanced the independent monarchy of Siam. This small kingdom of southeast Asia resembles in many respects the Philippine Islands. The population of Siam is only a little less than that of the Philippines, and it is divided among a number of tribes who inhabit different portions of the country. The Siamese number 3,000,000, or less than half of the population, whilst the remainder is made up of Laos, Chinese, Malays, Cambodians, Bermese, and many others. There are, too, many small, uncivilized tribes which inhabit the mountainous sections, several of which possess the characteristics of the Negritos of the Philippine Islands. There are many different dialects spoken in Siam, and yet this non-Christian country, with no standing army, has never fallen a victim to any land-grabbing nation.

There are some very incorrect statements there. In the first place, the comparison in reporting a bill intended to create a republic, with a country which is an absolute monarchy, is a little bit peculiar. On page 1228 of the Statesman's Yearbook for 1912 I find that in 1904 about 7,800 square miles of territory passed from Siamese possession into the hands of the French, and in 1909 about 15,000 square miles of Siamese territory passed into the hands of the English. Yet this report says it "has never fallen a victim to any land-grabbing nation."

Now, if I turn to the Encyclopædia Britannica of the last issue, from the article on Siam I read that most departments have the benefit of a foreign adviser. And referring again to the Statesman's Yearbook, I find the statement that—

Much excellent work has been done by a general adviser of American nationality, with the assistance of a British judicial adviser, a French legislative adviser, and legal advisers of various other nationalities.

The police is—

a force which includes a Danish inspector general and a body of Danish instructors. A British officer occupies the position of financial adviser, and there are numerous other British officers holding high positions under the Government, more especially in finance, revenue, forests, survey, police, justice, customs, mining, mint, and education.

We are told in the report that this is that happy native country which has no standing army. Yet universal liability to military service is now in force, and I have before me here the statement of a gentleman who recently witnessed the review of the standing army, or a portion of it, of 26,000 men.

By a law passed in 1903—

Says the Encyclopædia Britannica—

the ancient system of recruiting the army and navy * * * was abolished in favor of compulsory service by all able-bodied men.

Let me take up one or two trifling things further. I venture to point out to the gentleman from Virginia that his line of attack by exaggeration and by omission is alienating the people who have been supporting him, and I send to the desk to be read an editorial on his remarks from the Springfield Republican, a well-known anti-imperialist paper.

The Clerk read as follows:

MR. JONES ON THE PHILIPPINE GOVERNMENT.

If there is graft or maladministration among the officials of the Philippine Islands, it should be exposed as relentlessly as the same sort of thing in this country. But Mr. JONES, of Virginia, should be very sure of his evidence before making charges of this character. Gov. Gen. Forbes is not a man who would stand for corruption. The Republican has complete confidence in his rectitude and also in that of some other members of the commission of which Mr. Forbes is the head.

In his speech in Congress Mr. JONES, who occupies an important position by virtue of his chairmanship of the Insular Affairs Committee, made prominent as a subject of criticism the building of the Benguet Road and the establishment of a summer capital at Baguio, which is located in the highlands of the interior of Luzon. The wisdom of spending much money on that project may be open to question, but it is to be very much doubted that there has been any graft in connection with it.

The question was ventilated a few years ago in a congressional investigation of Philippine administration, and we could find no evidence in the hearings that stamped the summer capital project as a grafting scheme. There may have been extravagance, but no corruption, according to our understanding of the situation.

Of course, Mr. JONES knows that when the Philippine House fails to pass supply bills the Executive, under the organic act of the United States Congress creating the Philippine Government, may end the deadlock between the House and the commission which constitutes the upper chamber, by decreeing the enactment for the ensuing year of the appropriations passed by the assembly the previous year. That was what was done, evidently, in the instances mentioned by Mr. JONES. Such an act is arbitrary, but lawful, and in no necessary sense an evidence of maladministration.

An unbiased person would say, probably, that the executive officers of the Philippine Government deserved to have a place in the mountains of the interior where they could carry on the work of the Government in the hot months under as healthful conditions as possible. Manila is in the Tropics or subtropics, and a "summer capital" in such a country should not be condemned in principle.

Muckraking is occasionally necessary; but if the Democrats proceed on the assumption that a muckraking campaign directed against the present Philippine administration is politically essential as a preliminary to the effort to establish Philippine independence, they will find out their mistake in due season. One can generously credit the American Government in the islands during the past decade with much fine achievement and still find strong arguments to justify the sound American policy stated in the last national platform of the Democratic Party.

Mr. REDFIELD. Mr. Chairman, time will lack; indeed, I should need the afternoon to discuss the numerous errors in this report. On page 5 is this statement:

In Zamboanga, in the Moro Province, one of the most delightful of the cities of the Philippine Archipelago and the fourth in commercial importance, there were 44,322 inhabitants in the year 1903, almost equally divided between Christians and non-Christians.

The CHAIRMAN. The time of the gentleman from New York [Mr. REDFIELD] has expired.

Mr. FLOOD of Virginia. I yield to the gentleman 10 minutes, which I have promised him.

The CHAIRMAN. The gentleman from New York is recognized for 10 minutes additional.

Mr. REDFIELD. To resume: The city of Zamboanga is declared to contain 44,332 inhabitants in the year 1903, which is decidedly in error. This number, 44,332, is taken from the census, but is misquoted, for it is the population of the whole district of Zamboanga, having a coast line of more than 800 miles and embracing the largest towns in the great island of Mindanao. The census tables (p. 209) give the civilized population of the city of Zamboanga as 3,281.

The mistake is one of a trifle over 13 times, you will observe. If we add the nearest outlying barrios of Tetnan, Santa Maria, and San Jose, we only get a total of 7,907. If we add 12 other barrios, to a distance from Zamboanga of 15 to 20 miles, we only embrace a population of 20,692. If we add the wild people in and about Zamboanga, we only get a total of 21,230.

To illustrate another one of these easy statements of fact which people accept unless they look, I find, on page 8, this statement:

The Philippine constitution, written by Apolinario Mabini, and proclaimed by the Malolos Government in 1899, is justly regarded as a notable intellectual achievement.

Perhaps it was, for the commission which drafted it said that—

In executing it not only has the French constitution been used but also those of Belgium, Mexico, Brazil, Nicaragua, Costa Rica, and Guatemala.

The present point is, however, that it was not written by Mabini. Its chief authors were Pedro A. Paterno and Emilio Aguinaldo. When it was published to the insurgents at Malolos, January 21, 1899, it was after Mabini had protested against it.

Lest some say that the mistakes pointed out are trivial rather than, as I think them, typical, let us take this statement from page 8 of this report:

Among other arguments advanced against granting the Filipinos independence is their alleged lack of homogeneity. The truth is they are more homogeneous than the people of the United States. The director of the Philippine census, Gen. J. P. Sanger, United States Army, says, in his chapter on Population:

"As compared with the schedules of the Twelfth Census of the United States, those of the Philippine census are somewhat simpler, the difference being due mainly to the more homogeneous character of the population of the Philippine Islands."

Here we have the half truth in full bloom. The census report from which this abstract is taken is in four volumes. Were it searched throughout, it is doubtful if another quotation can be found to support the position of the committee based on the apparent meaning of this single extract. One can imagine the joy with which these words were seized from out of a census whose bearing else is strongly the other way. Let us look, however, at this extract and see if it, torn from its context, naked and alone, can, when measured by other facts in the same census and by the truth as it is now known, be made to warrant the use made of it by the committee.

Doubtless the schedules for the Philippine census were simpler than those in the United States. This country is one of the most advanced, with widely diversified occupations and interests, perhaps the most so of any land. The Philippines at their best are one of the most backward of the civilized lands, with relatively few occupations and interests. The difference in the state of civilization by itself alone explains the simpler schedules in the Philippines. There was less to record, hence simpler means of recording. Very simple census schedules there would be, indeed, for the deserts of Arabia, where the Bedouins wander. A pastoral country, in which all men were shepherds, would be homogeneous as to its occupation, but not advanced in arts and crafts. The very simplicity of the schedules is the evidence of the backwardness of the people whose condition they recorded. Relatively homogeneous, indeed, because few of them had advanced far.

But this is not the core of the matter. Racially the Filipinos come from one or two common stocks, and since the islands have neither suffered nor profited by immigration on any large scale, their peoples, in strict ethnological sense, are undoubtedly more homogeneous than those of the United States. The Philippines, however, present this curious anomaly: Starting practically from one or two common stocks, their inhabitants have separated into different groups, marked by different customs, languages, religions, and cultures, which in some cases and for many years have been, and to some extent now are, separated by feelings of enmity. The United States, on the other hand, drawing its inhabitants from many quarters, has to an amazing degree thus far been able to assimilate them all into a body politic, having the same habit of national thought. In other words, two opposite processes have been working in the two cases. The people of the Philippines, starting ethnologically and geographically as a homogeneous people, have become diversified and heterogeneous in language, customs, religion, and thought, while in the United States the heterogeneous elements entering into the population have steadily approached homogeneity in these same particulars. What does the census itself say?

Other features of the census plan were as follows: Commissioning all census officials and requiring them to take the oath of allegiance to the United States and to the faithful discharge of their duties; guarding against any attempt on the part of supervisors to use the census for the benefit of relatives within the fourth degree. * * * A similar plan was employed in taking the census of Cuba and Porto Rico, and resulted successfully in those islands; but it was, of course, far more difficult to apply it to the Philippines, owing to the larger population, diversity of tribes, and the difficulties of communication between islands and provinces, and even between adjacent municipalities and barrios.

Some difficulty was experienced in finding a sufficient number of enumerators who could read and write Spanish who were not related to the governor supervisor within the fourth degree of consanguinity, and for the Province of Bohol special legislation on this point was necessary. Many of the presidentes did not understand Spanish at all, and for the same reason, in a number of instances, enumerators had to be taken from one municipality to serve in another. This was, of course, a disadvantage, but was fully expected, as it was well known that in many of the barrios none of the inhabitants could read and write Spanish.

While, on the face of it, the plan of the census was quite simple and the schedules and instructions easily understood, their practical application proved to be beyond the ability of many of the enumerators and special agents, and even of some of the supervisors. This was not due so much to a want of intelligence as to a lack of experience. In fact, a number of the native census officials were apparently incapable of reasoning from analogy or of applying the instructions to any case not covered by them directly or of taking the initiative in meeting emergencies or in providing remedies. This is not meant as a reflection on the natural capacity of the Filipinos, because there is plenty of that, but as illustrating a Filipino trait, more or less general, resulting from inexperience and superficial study, in consequence of which they often mistake ability to theorize freely for practical knowledge.

It may be said that the Filipinos are generally subordinate to lawful authority; that under competent officers they make excellent soldiers; and will in course of time, it is believed, make good citizens. In fact, it is not too much to expect that under the guidance of a free, just, and generous Government, the establishment of more rapid and frequent means of communication whereby they can be brought into more frequent contact with each other, and with the general spread of education, the tribal distinctions which now exist will gradually disappear, and the Filipinos will become a numerous and homogeneous English-speaking race, exceeding in intelligence and capacity all other people of the Tropics.

Note the words "will become * * * homogeneous" above.

Thus much for the census itself.

Now, for some individual testimony. The governor of Zambales writes:

The inhabitants are Christians of different origins, and have also different dialects, the principal being the Zambal, Ilocano, Tagalog, and Pangasinan. Notwithstanding the heterogeneous character of the inhabitants, there does not exist any animosity between them, but, on the contrary, they live in utmost harmony.

The governor of Tarlac says:

The population of this Province is quite heterogeneous and it is difficult to make a report regarding their customs, manners of living, etc., being one of the newest of Luzon, the creation thereof dating back only to the second third of the past century. * * *

To the difference of origin of its inhabitants is due also the difference of the dialects they speak—Pampangan by those of Pampanga, Pangasinan by those of said Province—Tagalog, by those of Nueva Ecija, and Zambal by the Aetas and Negritos, and also Ilocano, by reason of the large contingent of families from the Ilocos Provinces. Hence their customs and manners are all so different.

The governor of Ambos Camarines writes:

The overwhelming majority of the inhabitants of the Province are of the Bicol Tribe, the only important exception being in Camarines Norte, formerly a separate Province, where the Tagalog predominates. In that district the towns of Capalonga, Labo, Indan, Paracale, Mambulao, and San Vicente are almost entirely Tagalog; Basod, the nearest town to the Camarines Sur border, is Bicol. Daet and Talisay are mixed, the Tagalog Tribe showing a majority. * * *

Throughout the remainder of the Province the language in general use is the Bicol, but it is subject to such wide variations in different localities as to practically divide it into distinct dialects, each with manifold diversities as to pronunciation, accent, and localisms. As the vast majority of the people have no knowledge of Spanish, and therefore have the local dialect as their sole medium of communication, they are far from a united people, residents of towns separated by but a few miles being considered practically as foreigners to each other. * * *

The masses of the people have in former times had no educational opportunities and are extremely ignorant and superstitious. They are easily led and controlled by strong leaders, are credulous as children when dealing with persons in whom they have confidence, but shy and suspicious as to strangers.

This should be sufficient, but as a final word on this subject the Schurman Commission reported the following classification:

THE NEGRITO RACE.

Twenty-one branches or tribes, according to customs and habitat.

THE INDONESIAN RACE.

Sixteen branches or tribes, according to customs and habitat.

THE MALAYAN RACE.

Forty-seven branches or tribes, according to customs and habitat.

Total number of tribes	84
Total number of dialects	74
Total number of languages	6

Pursuing further, briefly, the matter of language, the following is from page 8 of the report:

The Hon. Newton W. Gilbert, secretary of public instruction in the Philippine Islands, at one time a Member of the House of Representatives and of this committee, makes the striking statement in his annual report for the year 1910 that "more persons in the Philippine Islands speak and write the English language than speak and write any other language or dialect." If this were true in 1910, how much larger will be the proportion of those who speak and write English in 1921? But there is more recent and much stronger testimony than this in refutation of the oft-repeated assertion that the Filipinos possess no common language and therefore are lacking in the means of communication among themselves. In a carefully prepared article in the American Year Book for 1911 it is stated that more Filipinos speak the English language than speak any other one language or dialect. This is to say, that more than one-half of the Christian inhabitants, who constitute more than nine-tenths of the total population of the Philippine Islands, have acquired the ability to speak the English language in the short space of 10 years. If this great progress has been made by the Filipinos within the last decade in the acquisition of the English language, what may not be expected of this wonderful people within the next 10 years?

This statement shows what the school children are doing in the way of acquiring the English language, but does not touch the question of the acquisition of a common language by the adults. It is a bit unfortunate for the committee that the commission's report for 1910 should also contain these words:

A common language is a thing so far entirely unknown in the Archipelago. It may not so much matter what the language is, but it is of primal consequence to any attempt at unification that the people be able to communicate with one another in a tongue which all understand. Until they are able so to exchange their thoughts and ideas there can be no real national life.

The report says further, page 6:

A large majority of the whole people, however, speak either Tagalog, Visayan, or Ilocano, which are the three principal languages of the Islands.

This, so far as it goes, is true, but it does not express the whole truth. It takes no account of the Bicols, now numbering over half a million, with a language of their own; it takes no note of the Pampangan and the Pangasinan Tribes, each with about 300,000 members speaking different languages.

In particular, it omits to note that the Visayans, who form over 40 per cent of all the people in the islands, are scattered through about six principal islands and numerous lesser ones. Though of the same tribe, speaking the same language, the inhabitants of these separate islands can not understand each other when they meet through their own tongue. Their dialects are almost different languages. The Visayans of Cebu, for instance, speak Cebu-Visayan; those of Leyte, Leyte-Visayan; and so on throughout the group. Yet Cebu and Leyte are but 50 miles apart. We may go still further. The island of Leyte, in parts, is barely 40 miles across. The inhabitants of one coast can understand the inhabitants of the other, if at all, only with difficulty; yet they speak in common this tongue of over 40 per cent of the Filipinos. In varying degrees this is the same within every tribe of the Philippines.

In speaking, page 5, of the Moros the report says:

That they are actually outnumbered by the civilized Filipinos of Mindanao, notwithstanding that 226,158 of the 277,547 Moros (2,323 of whom are themselves civilized) dwell in that island. It is a fact not generally appreciated, if known, that 296,845 Christian Filipinos also inhabit the island of Mindanao.

Secretary Dickinson, however, stated in his report to the President thus:

There are about 500,000 Moros and Pagans residing in the Province. The Christian Filipinos number about 50,000, many of whom have come into the Province since American occupation. The Moros are Mohammedans and are firmly fixed in their religious belief. They are warlike, manly, independent, and have a strong hostility to the Filipino. They have no conception of a republican form of government. The only government which they know is autocratic. They are peaceful now because they have been subjected to military power and are controlled with firmness and justice, which they appreciate. The Moros would have to be essentially re-created to make them an integral governing part of a republican government uniting them with the Filipinos.

I have personally conferred with the governor of Zamboango, who informs me, from an experience of nine years, that the total number of Moro and other non-Christian inhabitants is not known, but a conservative estimate places them at 500,000. The Filipino population is limited to small areas along the coast, aggregating a population of about 50,000. In other words, the Moro and other non-Christian population of the Province number about ten to one of the Filipino population, and the Moros and other non-Christians inhabit and control about 99 per cent of the total area of the Province.

The difficulty with the committee's statement, which is quoted above, is that it is taken from a census of 1903, which was concededly inaccurate as regards the population of Mindanao and upon which no reliance can be placed as to the number of Moros and pagans. The statements just made have been shown to the governor of Zamboanga and are approved by him.

Time does not permit my traversing further the remarks of the gentleman from Virginia or the report of the committee of which he is chairman. I affirm, however, that there are errors of fact other than those mentioned above in both, which seriously injure their value as public documents. In particular, the statements made in the report as to education and political experience are incomplete and from this incompleteness convey erroneous impressions, and the same is true respecting important details in the address that has been criticized.

Now, I want to say a few things regarding a phase of the magnificent work that should all every American, whether Republican, Democrat, or Socialist, with pride, the magnificent work that, on the whole, the Americans have done in the Philippine Islands. [Applause.] Those of us who stand here and make faces at their backs do ourselves wrong; we can not injure them. The verdict of history is in their favor.

This which follows is the statement of the medical director. I have met him; he is a truthful man; he is describing things as we found them, and I say to you, my fellows of the Democratic Party here, that it should give us pause to think that there are at least 360,000 Filipino people living in those islands to-day who would be dead now if we had not gone there. Such has been the efficiency of our medical service there.

Dr. Heiser says:

Forty thousand persons were dying annually from smallpox, while the number of deaths from beriberi in jails and other public institutions was frightful. With the exception of the water system in the city of Manila, there was not a reservoir, pipe line, or artesian well for the 7,200,000 people of the entire archipelago, and even the water for the city of Manila was known to be grossly polluted. The dead were buried in a most haphazard manner, it being a not infrequent experience to find as many as four or five interred in a grave. The bones of those who had died but a few months before were often ruthlessly cast out to bleach in the sun in order to make room for a more recent death. The city of Manila, which had a population of over 200,000, had no sewer system, and foul human discharges found their way directly into the esteros or canal, of which there are some 23 miles. The water in these was frequently stirred up by the lighters and other craft which are used so extensively in Manila for transporting cargo, with the result that nauseous gases were constantly being liberated.

There was no food law, and the vilest class of food products was shipped into the country without let or hindrance. Amoebic and other forms of dysentery soon affected the troops and others who had come to the Philippines to aid in governmental work. Subsequent experience has shown that these same diseases were responsible literally for thousands of deaths annually among the Filipinos. There was no hospital in the entire islands which had modern surgical equipment, and persons died on every hand of disease which could have been easily relieved. It was not uncommon to find many persons horribly deformed by the scars which resulted from injuries or ulcers that could have been easily cured if skilled attention and facilities had been available at the time when they had their beginning. The prisons throughout the islands were indescribably filthy and neglected.

The maritime quarantine was conducted upon a basis of graft rather than upon merit, with the inevitable result that an outbreak of plague, cholera, or smallpox in the near-by foreign countries meant the early introduction of the disease into the Philippines. There was no proper inspection of animals before slaughter, and suitable slaughterhouses

where this work could have been done were conspicuous by their absence. More than 5,000 lepers were at large throughout the Philippine Islands. A few hundred were taken care of as objects of charity, but there was no attempt to segregate lepers.

Malaria prevailed in hundreds of towns in the Philippines, without quinine being available to combat it. It was no infrequent experience to find imitation quinine pills being sold at fabulous prices in the stricken districts, and the poor populace had no one to whom to apply with the hope of receiving any relief from this most intolerable condition. Sections of Manila, having a population of 5,000 to 25,000, were built up with houses so closely crowded together that there was no room for streets or alleys, and egress from these sections had, in many instances, to be made by the residents crawling under one another's houses. Manila is located on a tidal flat, and formerly, at high tide, about half of the city was inundated. As this flat land consisted of soft, oozy mud, the conditions can be better imagined than described.

There was no governmental provision for the insane, and it was no uncommon sight to see these unfortunates tied to a stake, under a house or in a yard, with a dog chain, and it often happened that during fires, which are so frequent in towns built of nipa, these unfortunates were burned because no one thought to release them. Foods and perishable provisions were sold under most filthy conditions, the common practice being to sell them from the ground, so that the dust and dirt of everyone who came to see was soon intimately mixed with the food that was on sale. It was a frequent occurrence to find small rooms, often no larger than 8 by 10 by 8 feet, in which from six to eight persons were sleeping. Tuberculosis was responsible each year for perhaps another 50,000 deaths throughout the archipelago. No effort whatsoever was made to teach the people how to deal with this scourge.

To-day in the six Provinces which immediately surround Manila, where formerly there had been probably for centuries 6,000 deaths annually from smallpox, there was not a single death from that disease in the year following the completion of the vaccination, nor have there been any deaths since that time among persons who were vaccinated in those Provinces. This work is still going on, and the net result is that there are now at least 30,000 less deaths annually than was the case before this work was begun.

In Manila a modern water system has been constructed at a cost of approximately $2,000,000, for which the water is now obtained from an uninhabited watershed. This improvement has already resulted in a reduction of approximately 800 deaths annually in Manila, from the gastro-intestinal diseases. At the cost of another $2,000,000 a modern sewer system was provided. This is one of the most modern of its kind, and has been in very satisfactory operation for four years. The filthy latrine and cesspool are now rapidly giving way to the modern flush closet. Twenty-three miles of esteros have been cleaned of their accumulation of centuries. Hundreds of artesian wells have been bored throughout the islands, and work is under way for the installation of many hundreds of others. Wherever the water from an approved well has been exclusively used by a community, the death rate has often dropped 50 per 1,000. In other words, in a town of, for instance, 3,000 inhabitants, there are now 150 less deaths annually than occurred before pure drinking water was furnished.

The jails throughout the islands have been cleansed and sanitary equipment installed. The loathsome skin diseases from which the prisoners suffered were cured, and the conditions have been made such that their contraction in the future is extremely unlikely.

Beriberi, which in former days caused frightful mortality in jails and other public institutions, and was responsible for 5,000 deaths annually in the archipelago, is now being rapidly reduced owing to discoveries which were largely worked out in the Philippine Islands.

Lepers have been segregated in comfortable decency, and, Dr. Heiser says, "probably 600 persons are being saved annually" from the leper's fate. Plague has been extirpated. Cholera has been destroyed.

A modern insane hospital has been constructed in Manila, where there is room for at least all of the cases that are urgently in need of care. A large general hospital, with a capacity of 350 beds, has likewise been constructed in Manila. This is unquestionably the most modern and best-equipped hospital in the Eastern Hemisphere and will compare favorably with the most modern hospitals in Europe and America. Already patients are being treated at the rate of 80,000 a year in the out-patient clinic, which means that thousands upon thousands are receiving relief and are freed from pain, among whom only agony and distress existed heretofore.

A campaign against tuberculosis has been organized; camps for the treatment of incipient cases have been constructed at various places; many dispensaries have been opened; a hospital for incipient cases provided at Baguio and a hospital for chronic cases at Manila. A campaign of education has been waged on every hand; the aid of moving-picture films has been utilized; in short, everything is being done that is customary in enlightened communities of Europe and America.

The influence which this work has had upon other colonizing powers in the Orient it is almost impossible to estimate at this time. During the past four years representative sanitarians and others from Japan, China, Hongkong, Indo China, the Straits Settlements, Java, India, the Federated Malay States, Australia, Ceylon, Siam, and other countries have come to the Philippine Islands for the purpose of studying the methods by which the results in the Philippines were brought about.

Fifty per cent—you who carp at or ignore our magnificent life-saving work yonder—50 per cent of all the children born in the Philippine Islands died in infancy. Would you turn down the men who have saved the lives of the children? [Applause.]

Now, I sympathize with all my heart with their desire for freedom. God knows I want them to have it; but independence is not a thing to be treated as in an alleged recent case, where one of the caciques going to Manila said, at the request of his people, that he would bring them some packages of it when he came back.

Freedom is a serious thing. We have taken many years to learn how to appreciate it. We were trained for centuries in self-government, and yet when the Revolutionary War was over we made a mistake in endeavoring to get on with a confederacy which we had to give up. You can not take a people and bring many of them out of savagery to self-government in 15 years. It can not be done. It is absurd; and you know it is absurd when you think about it, to attempt to impose an occidental government upon an oriental people in 15 years. The whole report shows the oriental mind. The omissions and the coloring are all oriental in cast. It has not been wholly written by Americans; there is an influence back of it called the Nationalista Party, which casts 90,000 votes in the islands out of a population of 8,000,000.

Now, I have spoken from my heart and frankly. If I have offended by word or by manner I am sorry, for I did not mean to do so. But I have the burden on my heart of the people for whom we are trustees, whom it is our duty, please God, to make a great, strong, free people—a people who shall live to thank us for what we have done for them, a people who are not to be kicked out because we found them troublesome. [Applause.]

[From the New York Evening Post, Jan. 29, 1913.]

AGAINST PHILIPPINE INDEPENDENCE.

To the EDITOR OF THE EVENING POST.

SIR: I am an anti-imperialist. By this I mean that I have always believed that the most mistaken act ever committed by our Government was the taking over of the Philippines. I also believe that, for our own good, we should get rid of them at the earliest opportunity; but can we righteously do so? I believe that any man who will visit the islands and see, not Manila only, but something of the interior and of the other islands, will say with me that we can not.

I visited the islands for the first time last winter, but I had previously lived a number of years in the Far East, and was in Japan at the time of the war and after. There I met many men who had been often to the Philippines. What have we done in 13 years? The wild tribes are at peace. Head-hunting is a relic of the past. Men go about scantily clad, to the distress of the missionary, but long experience in the Tropics has taught me that this is the best dress.

In Mindanao, where Spain had scarcely a foothold, under the wise guidance of Gen. Pershing, the Moros have almost totally disarmed themselves. The general asked them to bring in their firearms. The chiefs demurred on the ground that if one gave up his weapon his neighbor would steal his cattle in a night. So he called a council of the datos, and all agreed to surrender at the same time, so that now there is hardly a weapon in the island. At Jolo I saw wagonloads of firearms, from flintlocks to Remingtons, being taken to be sunk in the sea or otherwise destroyed. This great island, for centuries the scene of constant bloodshed, is at peace.

Perhaps the greatest blessing we have brought the islands has been a stable currency on a gold basis, much to the disgust of the Chinese money changer. He can no longer charge 15 per cent and 25 per cent for exchanging Greek drachmas or Russian rubles for Mexican dollars. Neither can the British banking firms, with their well-known liberality, discount at their own notes at 8 per cent, as heretofore, and as they still do in China.

Manila has a magnificent system of sewerage installed, the foul mud flats have been filled in, and the water supply is the equal of any in the world.

These are details, however. What we have really done is to establish that hitherto unknown thing, justice. Up in the hill country, where might has been right since life began, the young American Army officer is stationed. These stations were raided at first, but punishment quickly followed, and now these boys, many of them but a few years out of West Point, are governors, police, and judges. The native has learned that by going to these men he can get his rights, no matter how powerful his opponent may be, and a new era has opened for him.

Besides justice we are giving them education. A band of devoted men and women have spread themselves throughout the islands to teach in the schools that the Government has established. The schools are well attended.

I could go on indefinitely with the beneficial results following upon our occupation of the islands, and please remember that I went there with my eyes wide open to see just the opposite.

Let me mention but one other thing that we have brought to the islands—the hospitals; unfortunately, still far too few. The native was at first suspicious. The few that knew of hospitals at all remembered only the old filthy holes that were called such by the Spaniards.

I went one afternoon with a young Army surgeon to the University Hospital in Manila. He went through a clinic of perhaps 40 patients in less than half an hour, for time pressed, but in that time he saved the sight of many a child. He then performed that miracle of miracles, the restoration of sight to four patients by the removal of cataracts. This being done we were about to leave, when a big native boy felt his way through the gate. He was evidently blind and in great pain. The doctor lifted the bandage, called to the tired nurses, and inside of five minutes had the frightened boy anæsthetised. He had a deep ulcer of the cornea with pus in the anterior chamber, and it was a question of hours only before the eye would have been totally destroyed. The other eye, too, was already infected. Had it not been for that hospital and that doctor that boy would have lost one eye certainly and the other probably.

And yet at the call of many honest people who do not know, as I did not, we would put an end to all this, destroy the first dawning of justice, safety, and happiness that these poor people have ever known. Are they crying out for freedom from an alien rule that has brought them what it has? Not one in ten thousand of them.

If Mr. Wilson or any unprejudiced person could but see those islands as the unnoticed traveler sees them, I am certain that he would change his opinion as I changed mine.

I warn all those who urge evacuation of the islands that such a step would mean nothing more nor less than turning them over to the Spanish mestizo, for 99 per cent and more of the native population are as incapable of even understanding self-government as children. To the men who spend their lives in plotting, stealing, and grafting in Manila, and who have been a stumbling block in the way of all advance from the time we took the islands, the governing power would go.

There may be exploitation; I know of cases. There may be graft; I know of worse cases. But at its very worst it is a heaven as compared to the least of our own municipalities, and to leave these islands now, and their mixed and ignorant people, with our work half done, I believe would be a crime. We have put our hand to the plough. Let us keep it there till the end of the furrow.

FRANK H. CLARK.

COLORADO SPRINGS, *January 24*.

Comparative statement showing by bureaus amounts allotted under proposed allotment, previous allotment, and act No. 1989.

[Differences indicated by asterisk.]

[1] Medical school allotment made by advice of the Governor General, dated Jan. 2, 1912.

BAGUIO, *March 9, 1912.*

Mr. MURRAY. Mr. Chairman, I ask unanimous consent that the gentleman from New York be given leave to print on the general subject of Filipino independence.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts that the gentleman from New York be given leave to print generally on the subject of Filipino independence?

Mr. JONES. Mr. Chairman, I shall have to object unless the gentleman states what he wishes to print.

The CHAIRMAN. Objection is heard.

[Mr. QUEZON addressed the committee. See Appendix.]

Mr. FLOOD of Virginia. Mr. Chairman, I yield 10 minutes to the gentleman from Virginia [Mr. JONES].

Mr. JONES. Mr. Chairman, I regret exceedingly that the gentleman from the Philippine Islands [Mr. QUEZON] can not be permitted to proceed for 5 or 10 minutes longer, and I would gladly yield him the few minutes that have been given me but for the fact that I desire to make immediate reply to some statements that have just been made, particularly to those made by the distinguished gentleman from New York [Mr. REDFIELD]. But before I do so, I wish to ask unanimous consent to print in the RECORD the plank which the platform committee of the Baltimore convention were asked to incorporate in the Democratic platform by myself and others, who were desirous of seeing the Democratic Party reaffirm its oft-repeated position in relation to the Philippine Islands.

Mr. MURRAY. Mr. Chairman——

The CHAIRMAN. The gentleman from Virginia asks unanimous consent to insert in the RECORD——

Mr. MURRAY. Mr. Chairman, reserving the right to object, I offer a substitute request that all gentlemen who have spoken on this matter—the gentleman from New York [Mr. REDFIELD], the gentleman from the Philippine Islands [Mr. QUEZON], and the gentleman from Virginia——

Mr. JONES. Mr. Chairman, I hope this interruption will not be taken out of my time.

Mr. MURRAY (continuing). Be given general leave to print on this subject matter. Unless that request shall be granted to all, I shall object.

Mr. GARRETT. Mr. Chairman, I object.

Mr. MANN. Reserving the right to object, I understood the gentleman from Virginia objected to the request of the gentleman from New York to extend his remarks, and I am surprised he now asks leave for himself.

Mr. JONES. The gentleman from Illinois is very much mistaken. I expressly stated that I would not object if the gentleman would state what he wished to insert in the RECORD. That is a very different proposition.

Mr. MURRAY. Mr. Chairman, I object.

Mr. JONES. Well, the gentleman can do so if he so desires. In my own time, Mr. Chairman, I shall now proceed to read the proposed Philippine plank which the gentleman from New York [Mr. REDFIELD] has just erroneously stated specifically indorsed the Jones bill. Fifty copies of this resolution were typewritten at the instance of the gentleman from the Philippine Islands [Mr. QUEZON] and placed in the hands of various members of the committee on resolutions, and it will be observed that its wording completely refutes the statement made by the gentleman from New York. It bears, too, upon its face inherent and incontestable evidence that it was the identical resolution presented to and discussed by the committee on resolutions of the Baltimore convention, for the first few lines of the Philippine plank, as adopted by that convention, were copied verbatim from this proposed resolution. So I need not summon witnesses to confirm my statement, for, if confirmation be necessary, it is to be found in the resolution itself. I will now read the resolution which it has been charged specifically indorsed the Jones bill:

> We reaffirm the position thrice announced by the Democracy in national convention assembled against a policy of imperialism and colonial exploitation in the Philippines or elsewhere, and favor an immediate declaration of the purpose of the people of the United States to recognize the independence of the Philippine Islands at a definite date to be fixed by Congress, retaining for ourselves such lands as are necessary for naval bases and coaling stations, and we urge upon our Government earnest effort to secure by treaty with the chief maritime powers the neutralization of the islands under a government to be established under American auspices by their people.

Now, Mr. Chairman, that completely annihilates the statement which the gentleman from New York has said he got from Senator O'GORMAN. It does more; it absolutely destroys the argument which he attempted to found on a premise shown to be false.

Mr. Chairman, if I had half an hour at my disposal, it would not suffice to answer all the misstatements made by the gentleman from New York. He stated in almost the first sentence which he uttered that the distance from here to the Philippine Islands was 15,000 miles, whilst the truth is that it is not more than 10,000 miles from Washington to the Philippines. I had supposed before the gentleman made this remarkable statement that everybody knew it was about 3,000 miles from here to San Francisco and 7,000 miles from there to Manila. The gentleman, who boasts of his accuracy of statement, is 5,000 miles out of the way on almost the first statement he makes. [Applause.]

The gentleman started out by stating that the purpose of his speech was to challenge a number of statements contained in some remarks made by me on January 28 last, one of them being that the Benguet Road was less than 20 miles long, whereas he declared it was 30 miles long. If this were true, it would be a matter of small consequence, and would in no degree lessen the force of my statement that the Philippine Commission had not only squandered millions of the public moneys of the Filipino people upon this road but that they had actually expended upon it a considerable part of the money which the Congress of the United States voted in 1903 to relieve the dire distress which then existed in the islands as a result of the ravages of the rinderpest. The gentleman broadly intimated that because I had, as he alleged, stated that the Benguet Road was 10 miles shorter than it really was no importance should be attached to any other statement made by me. This, he seemed to think, was the best method of disposing of charges which he could not meet. But his statement, inconsequential as it is, that I did not correctly state the facts as to the length of this road is not true, as I shall undertake to demonstrate. He says that the road as originally built was 30 miles in length, but that 10 of those miles have since been covered by a railroad, and that the millions which I charged to have been spent upon the 20-mile automobile road were actually expended upon the whole 30 miles.

It is true that 10 miles of the road as originally built is now covered by a railroad, and it is also, of course, true that all the money expended upon those 10 miles by the commission has been thrown away. But it is not true that any part of the money which I charged as having been spent on what is now the automobile road was expended on the 10-mile reach over which the railroad now runs. When I made that statement I meant just what I said, and I said what I meant, and I was absolutely justified in saying it. I do not know what

amount the commission threw away on the 10 miles of the Benguet road now traversed by the railroad, nor from whence it came, but I still assert that millions were expended on that portion of the road now and always used as an automobile road, the road from Camp No. 1 to Baguio, which I stated was less than 20 miles long, and which the gentleman says is exactly 20 miles long. I described the road to which I referred in my speech over and over again as the Benguet automobile road. I asserted that millions had been expended in its construction and upkeep, and this statement can not be successfully challenged by the gentleman from New York or by those from whom he obtained his information. When the bill to authorize the Philippine Government to increase the public indebtedness of the Philippine Islands, now on the calendar of this House, was being considered by the Committee on Insular Affairs, Gen. Edwards, Chief of the Bureau of Insular Affairs; Col. McIntyre, then assistant chief; and the Hon. MANUEL QUEZON, the Philippine Resident Commissioner, appeared before the committee and made statements which are to be found in the printed hearings upon that bill. These witnesses gave information as to the cost of the Benguet road. Mr. QUEZON was asked by Mr. HELM, a member of the committee, both as to the length and the cost of this road, and I asked specifically what was the distance from Camp No. 1 to Baguio. This is what the hearings disclose:

Mr. HELM. How long is the road?
Mr. QUEZON. The Benguet Road is about 10 or 12 miles—the colonel will be able to tell you.
The CHAIRMAN. How far is it from Camp I to Baguio?
Mr. QUEZON. I think that is about 10 or 12 miles.
Mr. HELM. Is that where the $2,000,000 was spent?
Mr. QUEZON. Pretty nearly.

Both Gen. Edwards and Col. McIntyre were present and heard Mr. QUEZON make these statements and neither of them questioned them. They were the only statements made by anybody as to the length of the road from Camp No. 1 to Baguio and the cost of the same, and therefore the favorable report made upon the bill stated that this road was 10 or 12 miles long. This statement was based upon the uncontroverted testimony of Mr. QUEZON. It is true, and it is but fair to Gen. Edwards, to say that some time afterwards he informed me that the length of the road from Camp No. 1 to Baguio was 43 kilometers, or 20½ miles long.

This simple recital of the facts will serve to show how successfully the gentleman from New York has challenged my statement as to the length of the Benguet automobile road.

Let us see, now, if there was any error in my statement that millions have been expended upon this road, and that a large part of the money was taken from the congressional relief fund.

When Col. McIntyre, now Gen. McIntyre, testified before the Insular Affairs Committee at the hearings of which I have spoken, he filed with the committee a statement showing the "expenditures on account Benguet wagon road" up to June 30, 1911. This statement shows that they amounted to ₱4,158,20.19 up to that time. It also shows that of this $2,079,135 the sum of $649,420.52, or nearly one-third, was taken from the congressional relief fund, to which I called attention in the speech which seems to have so greatly stirred gentlemen in and out of Congress. It shows, too, all statements to the contrary notwithstanding, that more than $55,000 of the relief money contributed by the United States to save the Filipinos from actual starvation was expended in construction work on this road in the year 1906, and after, as is now claimed, it had been completed. Indeed, it even shows that a small part of this sacred fund was expended in 1907 in repairing this pet project of the commission. This, it must be borne in mind, was all spent prior to June 30, 1911. For in July of that year a typhoon of unprecedented severity swept over this Province, which completely destroyed some of the most costly sections of this road, they having since been rebuilt at enormous cost.

If this testimony is not sufficient to refute and confound the gentleman from New York, I will quote from the report of the Philippine Commission for 1909 to this effect:

The Government has spent ₱5,000,000 constructing a road to Baguio. Upon the completion of this road the criticism which had been showered upon it for the expenditure of so much money in its construction seemed to have the effect of discouraging any further expenditure toward the development of Baguio, with the result that the Government was in the embarrassing position of having expended all this money for a road and of having spent considerable sums each year for its maintenance, but of not having provided facilities for the use by the people of the summer resort thus opened.

No wonder "criticisms" were "showered" upon the commission for expending $2,500,000 upon the construction, and other hundreds of thousands in the maintenance of what I have described as an "automobile" and what the Chief of the Insular Affairs Bureau calls a "wagon" road to a summer resort, to enjoy which no provision had been made. Congress voted $3,000,000 to save the poor Filipinos from starvation, and yet the Philippine Commission expended nearly a third of it—of course with disinterested purpose and benevolent intent—to enable them, although many of them did not possess a single centavo with which to purchase an ounce of rice, to enjoy a three months' outing at aristocratic Baguio, an expensive summer resort, built at great cost, in one of the most inaccessible parts of the mountains of northern Luzon and in what is known as non-Christian and uncivilized territory.

The gentleman from New York has attempted to give us some idea of this marvelous conception of the Philippine Commission. Let me quote a few sentences from an article which the Chief of the Bureau of Insular Affairs has had inserted in a public document. They put to shame even the brilliant descriptive powers of the very accomplished gentleman himself. Baguio, this enthusiastic writer says, "is a veritable garden of the gods."

When—

Says he—

the great automobile began its late afternoon climb to the mountain top the marvelous engineering of the highway, the constant charm of the hurrying stream below, the soft colorings of the canyon, and the wonderful vistas that broke upon the vision, combined with the astonishing skill of the chauffeur to make our ride one of the enjoyable events of a lifetime.

I realize, Mr. Chairman, that I should apologize for devoting so much time to such an inconsequential subject as the length of this automobile road, but so much importance has been attached to my statement that it was less than 20 miles in length that I have felt justified in setting forth the truth in regard to it. No man can deny and few, I think, will attempt to defend the action of the commission in persisting in the construction of the Benguet road in the face of the universal opposition of the Filipino people, and certainly the expenditure of the congressional relief fund upon this work can not be justified. It is no justification to say that this money was expended in giving employment to poor Filipino laborers. The crop failures which resulted from the ravages of the rinderpest among the work cattle occurred in 1903, and not a dollar of the congressional relief fund was expended in that year for labor on the Benguet road. It was expended in the years 1904, 1905, 1906, and 1907. Moreover, there were comparatively few carabaos in Benguet, which, as I have said, is mostly inhabited by uncivilized people.

When this road was first projected it was estimated that it would cost $75,000. It was not necessary, as has been stated, to build it in order to give the mountain tribes an outlet, for there existed what is known as the Naguilian trail, which has been used by the Benguet Igorots for ages. This trail has been converted, as we are told by the commission, at some small cost into a good cart road, and is even used by automobiles. More than this, a railroad is being built to Baguio at a cost estimated by the engineers at less than the amount expended on the shorter Benguet automobile road. This road is nearing completion, and when completed will, of course, accommodate all the travel that there will ever be between Baguio and the civilized provinces. But the automobile road, it seems, is still to be maintained in order, of course, that the poor Filipinos may not be subjected to the hardships of railroad travel.

The gentleman from New York has not only vainly attempted to show that statements made by me on the floor of this House were inaccurate, but he has even inveighed against what he describes as "that beautiful work of fiction known as the report on the Philippine independence bill," and in which he says he has failed to find an accurate statement. This is a gratuitous and wholly unwarranted attack upon the entire majority membership of the Committee on Insular Affairs. To sustain this sweeping and, as I shall conclusively show, baseless statement, the gentleman read these lines from that report:

The Philippine Constitution, written by Apolinario Mabini, and proclaimed by the Malolos Government in 1899, is justly regarded as a notable intellectual achievement.

Having given the House this illustration of what he alleged to be misstatements contained in this report, the gentleman proceeded to impeach the accuracy of the entire document by asserting that "it was not written by Mabini," and that "its chief authors were Pedro A. Paterno and Emilio Aguinaldo."

This is, indeed, a most astounding statement. It is contrary to all accepted history, and it rests wholly upon the unsupported statement of the gentleman who does not claim to possess any personal information on the subject.

I have read most, if not all, the modern histories of the Philippine Islands, and if there can be found a word in any one of them to justify the gentleman's denial that Mabini was the author of the Malolos Constitution, I have failed to find it. In Foreman's great history, entitled "The Philippine Islands," he says, on page 546 (edition of 1906), speaking of Apolinario

Mabini, "it was he who drafted the Constitution of the Philippine Republic."

It is my good fortune to have personally met most of the Filipinos who were conspicuously connected with the Malolos Government, including Gen. Aguinaldo, its president, and to have discussed with them the work of the Malolos Congress, and I have yet to meet the Filipino who does not give to Mabini the credit for having written the Malolos Constitution. It is universally acknowledged to have been a notable achievement, and even Aguinaldo would have been proud of its authorship. Is the ipse dixit of the gentleman from New York to be accepted against such testimony as this? But the fact that Mabini had written the Malolos Constitution was set forth in the report for the sole purpose of showing that this great document was the work of a Filipino. Both Paterno and Aguinaldo are Filipinos, and if it could be shown, as it has not been, and can not be, that they are entitled to the credit of producing this great State paper, it would in nowise detract from the force of the argument advanced in the report.

The gentleman from New York, having gratuitously and wholly without justification charged me with gross inaccuracy of statement, I now wish to call attention to one or two statements made by him—a man who discharges his employees for less serious inaccuracies than those which he so recklessly charged me with. He tells us he has visited the Philippine Islands. He was accompanied, he says, by his son, who visited the gold mines near Baguio. He does not tell us whether it was business or pleasure which took him to the Philippines.

Some time last year there was published in the National Monthly an article entitled "A suggested Democratic policy for the Philippines, by Hon. WILLIAM C. REDFIELD, a Member of Congress," adorned with a handsome picture of the writer. Among other remarkable statements in that article I find this:

> There are more adult male Moros than there are voters in the island, are more adult Igorots than there are voters in the island.

Elsewhere in this article this accurate gentleman states that at the second election in 1909 there were but 192,975 votes cast. There were many more cast at the last election, but I will take the gentleman's own figures. There are, according to the Philippine census, only 277,547 Moros in the Philippines, and does any sane man believe that of that number more than 192,975 are adult males? There are, according to the same authority, 211,520 Igorots, and does any man with a grain of sense believe that more than 192,975 of them are male adults? If one in five of all the Moro and Igorot inhabitants combined are male adults, which is the accepted proportion in this country, there would be only 97,513 male Moro and Igorot adults all told in the Philippines. I am aware that the gentleman now states that the number of Moros is not known, but he stated in this article that the non-Christian tribes number in excess of 600,000, which, according to the census, is true. This fairly illustrates the accuracy of statement, I will not say the gross misstatements, of the gentleman who can be so scornful when he thinks he has discovered a slight inaccuracy in the statement of another, although, as I have demonstrated, he, and not the one he would criticize, is in error.

I now come to what the gentleman from New York declares to be, at the present moment, his "own attitude on this Philippine question." These are his identical words:

> I do not think that the American flag should continuously or long, as the lives of nations go, float over a dependent people. I believe, and have said it to the distinguished gentleman from the Philippines, that he and his people should be as free as I. I seek for my own son no freedom I do not want for his son. Is that plain enough? If not, then write your desire for freedom for the Filipino people as liberally as you will and I will subscribe to it. And I am in accord with not only the last but the last three Democratic platforms upon this subject. I believe that the platform of 1904 spoke the truth more plainly than the others when it said that the Philippine people should "work out their own destiny"; but I call the attention, however, of my friends on this side to those respective platforms to say that the emphasis in them rests upon one fundamental word, "stable."

The latest declaration of the Democratic Party on the subject of the Philippines is in the following words, and not even so ingenious a gentleman as the gentleman from New York can find in them any justification for the position he actually assumes, whatever his latest words may mean, in respect to Philippine independence:

> We reaffirm the position thrice announced by the Democracy in national convention assembled against a policy of imperialism and colonial exploitation in the Philippines or elsewhere. We condemn the experiment in imperialism as an inexcusable blunder which has involved us in enormous expenses, brought us weakness instead of strength, and laid our Nation open to the charge of abandonment of the fundamental doctrine of self-government. We favor an immediate declaration of the Nation's purpose to recognize the independence of the Philippine Islands as soon as a stable government can be established, such independence to be guaranteed by us until the neutralization of the islands can be secured by treaty with other powers.
>
> In recognizing the independence of the Philippines our Government should retain such land as may be necessary for coaling stations and naval bases.

Mark these words in the platform, "We favor an immediate declaration of the Nation's purpose to recognize the independence of the Philippine Islands as soon as a stable government can be established." They are far more radical than the provisions of the pending independence bill, for the bill not only provides for the establishment of a stable government but insures its maintenance for eight years. The Democratic Party has promised Philippine independence as soon as a stable government has been established and not when one has been maintained for a given length of time. The bill provides ample machinery for the establishment of a stable government, and whether or not the Filipinos can successfully maintain such a government once it has been established is another and quite a different proposition. For one, I entertain no misgivings as to their ability to maintain as well as to establish a stable government, but the Democratic promise of independence is not predicated upon the maintenance for any period of time of such a stable government as may be established. It has no such sting as this attached to it.

I would not, of course, be understood as saying that the Filipinos will be able, if given their independence, to defend that independence against some strong naval power. If they are not to be free until that day arrives they will never realize the independence which has been so solemnly promised them. Few of the free and independent countries of the world could long maintain their independence against foreign aggression.

But the present position of the gentleman from New York is even more at variance with that expressed by him in the article from which I have quoted than with the declarations of the Democratic Party to which he professes to belong. In that article he states his position in these words:

> When a majority of them (the Filipinos) shall be able to cast a ballot which they can read in any language, it will then be for them to decide what they wish their future relation to the United States to be.

What the gentleman doubtless meant to say was "which they can read in some," not "in any," language; for I can not believe he would be understood as desiring to withhold from the Filipinos their independence until a majority of all the adult males could read a ballot printed in any language which might be prescribed. It would be bad enough to withhold it until a majority of all Filipinos, including the uncivilized Moros and Igorots as well as the civilized Tagalogs, could read a ballot printed in either English or Spanish as the law now requires of all persons who do not possess property or certain other prescribed qualifications. The postponement of their independence until a majority of all of them could read some one language would be a more drastic provision than can be found upon the statute books of any State of the American Union, and one which would forever disfranchise many a voter who contributed toward sending to Congress the gentleman from New York. Can any Democrat truthfully say that he is in accord with his party's position as to the Philippines who holds that the Filipinos should not be granted their independence until a majority of every male adult in the archipelago, including all the savages and wild men of the mountains, are able to read their ballots? This is going a bowshot farther than anything that has ever been written in a Republican platform. It is fixing a date more distant than that proposed by President Taft. It is equivalent to saying that the Filipinos shall remain in bondage to the United States until the end of time. There may be other professing Democrats who agree with the gentleman from New York, but, if so, none has been bold enough so far to publish that fact to the world.

This, Mr. Chairman, is all I care to say in reply to the carefully prepared speeches of the gentleman from New York [Mr. REDFIELD] and the gentleman from Pennsylvania [Mr. OLMSTED]. The striking similarity of these two speeches suggests a common source of inspiration—they both bear the indubitable hall marks of the War Department, which, as all of us know, is the real governing power of the Philippines. Neither of these astute gentleman has answered a single one of the serious charges made by me against the Philippine Government, and no attempt has been made by either to answer most of them. If, as has been recklessly and falsely asserted by others, I have made charges of maladministration against certain Government officials in the Philippines which I could not sustain, the able gentlemen who have just addressed the House ought certainly to have been able to have shown wherein I have sinned. They have taken ample time in which to prepare their speeches, and they have obviously had the benefit of such information as the War Department could supply, and yet they have not so much as attempted to answer the serious charges for making which I have been most severely criticized by persons who have only succeeded in demonstrating their own ignorance of all things touching the Philippines.

I asserted in the speech which I delivered on the 28th of January last that three prominent American officials had been charged with graft, had been found guilty by a board appointed to investigate the charges, and yet had been shielded from punishment. Has any denial of this serious charge been made by anybody, here or elsewhere?

I charged that a considerable part of the congressional relief fund of $3,000,000 had been expended in the construction of an automobile road to a mountain summer resort, the exact sum being $649,420.52, as I have shown. Has the correctness of this statement been challenged?

I charged that in order to avert a deficit in 1912 the sum of $1,698,513.82 was transferred from the gold-standard fund, a fund created to maintain the parity between the silver currency of the Philippines and the gold dollar, to the general funds of the insular treasury, and this serious charge has neither been denied nor explained by anybody.

I charged that Governor General Forbes had, without warrant of law, created 123 new offices; but this, it seems, was so trivial a matter as compared with the exact length of the Benguet Road and the authorship of the Malolos constitution that no one has even noticed the charge.

I charged that our military occupation of the Philippines was costing the United States approximately $40,000,000 a year, and I specified many of the items which go to make up that grand total, not one of which has been disputed. The American people will not always be fooled by or be satisfied with the reply that civil government in the Philippines is costing the United States nothing. Some day they will come to realize that our military and naval expenditures on account of the Philippines, which are a charge upon the Treasury of the United States, are one thing and the cost of the civil government of the Philippines, which is paid out of the revenues of the islands, is quite another thing.

I charged that the administration of civil government in the Philippines was most extravagant and wasteful, and I called particular attention to the damaging fact that the expenditures on account of bureaus and offices for the fiscal year 1912 exceeded those of the previous year by $1,320,318.24, and that this increase was without any warrant in law; but this was too trifling a matter to call for any explanation or denial.

I think, Mr. Chairman, I have now made it quite plain that nothing I have said in regard to the civil government which we have imposed upon the Filipino people was either inaccurate or without justification. I have neither misrepresented nor slandered anybody. I have presented a few unvarnished facts, and if they constitute a "vicious attack" upon any member or members of the Philippine Commission I am not to be blamed therefor.

I now ask to be permitted to publish in connection with my remarks a portion of an interview given out by Dr. John R. McDill, of Milwaukee, which appeared in the Milwaukee Journal some time since. Dr. McDill enjoys the highest reputation as a man, and he has attained great renown as a surgeon. He is one of the leading physicians of Milwaukee, and the Journal describes him as one of the world's greatest authorities on tropical diseases. He returned to Milwaukee in July last, after a residence of 12 years in the Philippines. He is a disinterested as well as a qualified witness, and therefore anything which he has to say with regard to the Philippines must carry with it great weight.

I shall also publish a letter written by the Hon. Charles B. Elliott, of the Philippine Commission, to Auditor Phipps, of the Philippine insular government. As I have before had occasion to say, Judge Elliott was formerly a member of the Supreme Court of Minnesota, was appointed to the Supreme Bench of the Philippines by President Taft, and afterwards promoted to the commission. In this letter it is clearly shown that the action of Governor General Forbes in the disbursement of the public revenues of the islands, which I have been criticized for questioning the legality of, was absolutely unwarranted in law.

The CHAIRMAN. The time of the gentleman has expired.

Mr. REDFIELD. Mr. Chairman, I ask unanimous consent that the gentleman from Virginia [Mr. JONES] may extend his remarks in the RECORD.

The CHAIRMAN. The gentleman from New York [Mr. REDFIELD] asks unanimous consent that the gentleman from Virginia [Mr. JONES] may extend his remarks in the RECORD.

Mr. MANN. Reserving the right to object, I ask unanimous consent that the gentleman from Virginia [Mr. JONES] and the gentleman from New York [Mr. REDFIELD] and the gentleman from the Philippines [Mr. QUEZON] be allowed to extend their remarks in the RECORD on this subject.

Mr. JONES. Does that carry with it, Mr. Chairman, the right to publish anything we wish to publish?

Mr. MANN. I assume the gentleman would not abuse the privilege by publishing books or long documents.

Mr. JONES. I do not know. If gentlemen will indicate what they wish to publish, I shall not object. This is what I propose to do.

DR. M'DILL'S INTERVIEW.

From February 15 to June 15 the entire Government personnel moves to Baguio, the summer capital in the mountains, where the time is pleasantly spent, enough official duties being done in the mornings only to comply with civil-service regulations. Transportation is given all employees, together with allowance to cover living expenses. Baguio is 5,000 feet high and cool and beautiful, but the Filipinos objected to these vacations as an unnecessary extravagance.

* * * * * * *

Politically the Filipinos are justifying the confidence placed in them in extending to them the higher legislative functions in their elective lower house or assembly. Their work in provincial municipal government has not been so successful. The commission or upper house, the majority of which is composed of Americans, and the lower house do not pull together so well. There is a lack of confidence and trust between them, the causes of which are not entirely racial. They could be avoided by a different attitude and a change in personnel on the side of the Americans. Until a definite policy is proclaimed by the United States there will continue to be dissatisfaction and distrust of us. The present relations between the two races are as bad or worse than ever before. One reason is because the Filipinos are a sensitive and courteous people and we are not.

The only real trouble, however, we shall ever have with the Philippines will be to let go of them. Two reasons they have not been the subject of more controversy or more interest politically in this country are the skillfully written reports of the administration there and the undoubted enthusiasm and patriotism with which the army of well-paid Philippine Government officials advocate our holding on to that country. They all say we can not back out with honor.

UNITED STATES SHOULD DECLARE POLICY.

If the coming national administration takes up the Philippine problem from another standpoint than that which has obtained to date, namely, whatever you do over there, do not do anything to disturb us here in Washington, the long past due declaration of our future policy will be announced.

—

JUDGE ELLIOTT'S LETTER.

DEPARTMENT OF COMMERCE AND POLICE,
Manila, May 25, 1912.

The SECRETARY.

MY DEAR MR. PHIPPS: At the recent meeting in the office of the Acting Governor General you asked for a copy of the memorandum, a portion of which I then read, in which I state my view as to the proper construction of section 7 of the act of Congress of July 1, 1902, reenacted February 27, 1909.

There has been considerable discussion with reference to this matter, and, as you well know, I have not been able to accept as proper the course which has been construed. When the question first arose I sent to the Governor General a memorandum which was hastily prepared, and did not assume to argue the question with any degree of fullness. Just before the Governor General left I wrote him a letter designed merely to put on record the fact of my disagreement.

In what I write I do not wish to be considered as criticizing anyone, nor as suggesting that there has been other than the most earnest effort on the part of all concerned to reach a just and proper conclusion. I have no desire to convey the impression that there is a serious disagreement among the members of the government. It is true that we have disagreed as to certain legal propositions and procedure, but that is inevitable where men are able to form opinions and willing to express them. I have not asked to have my memorandum from which I read at the meeting sent to Washington, because I fear it would give the impression that I was trying to embarrass the Governor General's administration. I do wish, however, to state to you fully the reasons for my position, more particularly because I know you do not agree with some of them.

In the act creating the Philippine Legislature, Congress provided a method by which the government could be supported in the event of the two houses of the legislature for any reason failing to agree upon a current expense appropriation bill. It was understood, of course, that the proposed assembly would be an experiment in government. The conditions were still unsettled, and it was very possible that at some time an attempt might be made by the assembly to seriously embarrass the government by withholding the supplies necessary for its maintenance.

Now, the failure to pass an appropriation bill might result either from an honest difference of opinion between the two houses or from a willful refusal by either house to agree to any appropriation bill, whether good or bad. Whatever the motives the result would be the same.

The United States was trying to establish an orderly and systematic government for the Philippines, which should be conducted on established principles. The Philippine Legislature which was to be created in the future would succeed in certain territory only to the legislative powers of the Philippine Commission. At the time of the creation of the legislature the Government would, of course, be running under the provisions of a regularly enacted appropriation bill. That bill if continued in force would provide for all the reasonable requirements of the Government and keep the machinery in operation until the legislature acted, or Congress saw fit to take more drastic action. Therefore it was provided in the act of Congress of July 4, 1902, that:

"If at the termination of any session the appropriations necessary for the support of the Government shall not have been made, an amount equal to the sums appropriated in the last appropriation bills for such purposes shall be deemed to be appropriated; and until the legislature shall act in such behalf the treasurer may, with the advice of the governor, make the payments necessary for the purposes aforesaid."

This provision on its face contemplates nothing revolutionary; nothing radical. It is a remedial, not a punitive, measure. It provides for the contingency of an honest difference of opinion between the two houses, as well as for unreasonable or factious attempts on the part of either house to embarrass the Government by withholding the supplies necessary for its existence.

The Philippine Legislature failed to pass a current appropriation bill for the fiscal year of 1912, and at once the question of the proper construction of the above provision of the act of Congress arose. It was contended on one hand—

(a) That upon the failure of the legislature to pass an appropriation bill providing for the support of the Government, the existing appropriation bills for that purpose continued in force with all their conditions, limitations, and restrictions until the legislature acted; that the purpose of the provision was not to change the character of the Government, but with as little inconvenience as possible to provide for an interregnum, which in the ordinary course of things would be of limited duration. On the other hand it was contended:

(b) That upon the failure of the legislature to so act an amount equal to the total of the sums appropriated in the previous existing appropriation bills was deemed to be appropriated by the act of Congress out of the Philippine treasury for the support of the Government until the legislature acted, with the power in the Governor General to distribute the same for the support of the Government as its necessities required, according to existing law. A precedent for this was thought to exist in the case of Navarro v. Post, decided by the district court for Porto Rico in 1909 under a statute similar to that in force in the Philippines. In a letter to the Governor General under date of October 25, 1911, you as auditor of the Philippine Islands adopted the principle of this precedent with some modifications designed, as I understand it, to restrict the executive power of action.

Soon after the adjournment of the legislature the learned assistant executive secretary rendered a legal opinion to the Governor General which I find referred to in the files, but have not had the pleasure of reading. The Bureau of Insular Affairs advised that the situation was controlled by the case of Navarro v. Post, and your opinion above referred to was to the same general effect. It does not appear that the legal and constitutional questions involved were considered by the law officer of the Bureau of Insular Affairs, or by the Secretary of War. As the conditions were somewhat similar, it was easy and natural to assume that the Porto Rico case should be followed. I earnestly urged upon the Governor General the importance of obtaining the formal opinion of the Attorney General, who is his constitutional adviser. This was not done, nor was my suggestion that the opinion of the Attorney General of the United States be obtained given much consideration. To my mind the question involved was of the greatest legal and constitutional importance involving principles of far-reaching effect. For some time the question drifted, the Governor General, as I am informed, having advised the treasurer to continue making payments under the old appropriation bill. This was done until December 18, 1911; that is, during almost half of the fiscal year. At that time a "letter of advice" was issued which made very material changes. This letter was dated back to the beginning of the fiscal year. Subsequently on March 29, 1912, a new "letter of advice" was issued which modified that of December 16, 1911, for which it became a substitute. All of these "advices" on their face date from July 1, 1911, and as they all differ, and yet cover the same period, I can imagine some resulting confusion.

Before stating my view of the proper construction of the act of Congress I wish to comment upon the Porto Rico case. That decision is worth in the Philippines exactly what it will assay in principle and reasoning. It was the decision of a single nisi prius judge, sitting in another jurisdiction. The reasoning is far from conclusive, and the language conveys the impression that the judge was much "peeved" that anyone should assume to question the propriety of the efforts of a good governor to handle the situation all by himself. The opinion itself is devoted to the question of the right of the plaintiffs to maintain the action; that is, the right of taxpayers "to enjoin high State officials for the alleged diversion of public funds simply because in the opinion of such taxpayers a particular law ought to be differently construed than such officers are construing it." The judge is firmly of the opinion that "these officials deserve the support and commendation of all the people of Porto Rico for their faithful devotion to duty under trying circumstances." The decision upon the only question decided was undoubtedly correct, and possibly the bouquets thrown to the officials were deserved. As to the main question, however, the only one in which we are interested, the court said: "We have only gone into the question thus far with a view, in so far as may be, to end this useless and annoying interference with the conduct of the Government of the island of Porto Rico." The *court* held that plaintiffs *had no right to maintain the action and dismissed the case.* Then, there being no longer any question before the court for judicial determination, the *judge* decided to settle matters by doing some talking from the bench, a practice which you as a lawyer know is a dangeroue one and one which generally leads to trouble. In support of the conclusion "on the main question" it is said that the Hawaiian organic act, which was passed before the Porto Rico provision, provided that if the legislature failed to pass an appropriation bill the sums appropriated in the last appropriation bill should be deemed to have been reappropriated; that the provision in the Philippine organic act differed from that in the Porto Rico act; that the Porto Rico act was copied substantially from the Philippine act; that Mr. Taft in a letter to Mr. COOPER, dated May 13, 1902, in an article in the Outlook of May 31, 1902, and again in a message to Congress of July 10, 1909, expressed the view that the provision of the Porto Rico act was intended to prevent the lower house from starving the Government; and finally that Congress "must have intended" to put the sum total in the hands of the governor for expenditure, because "it is well known that at best one year's appropriations can not be made to exactly fit the requirements of another year, and therefore it thought best to appropriate a lump sum equal to the total of the previous year for the support of the Government, leaving it to the discretion of the governor to reallot or subdivide this money from time to time for the support of the Government until the legislature acts."

I find nothing in the history of the legislation or in the statements of Mr. Taft to suggest the conclusions reached by the Porto Rico court in its conversation with the community. It appears merely that the intention was to provide a method which would prevent the Government from being deprived of the money necessary for its continuance. That the Hawaiian act contained a different provision proves nothing to my mind other than the fact that it does contain a different provision. There is nothing, so far as I know, to show that the Hawaiian act was before the draftsman of the legislation under consideration, nor does it appear that the Hawaiian act had proven insufficient or inadequate under any emergency which arose. Mr. Taft, in his letter to Mr. Cooper, merely says that the provisions of the proposed law will prevent the popular chamber from choking the Government. In the Outlook article he says that should the appropriation bill not be passed by the legislature, "appropriations equal to those of the year before will become available without legislation." In the message to Congress transmitting the report on the Porto Rico situation he merely states in substance the language of the proposed law. I find nothing in this to aid materially in determining the proper construction of the statute. Mr. Taft was thinking of the object of the law, and merely stated the fact that it would prevent the choking of the Government by withholding the necessary supplies.

The only argument which, to my mind, has any force arises out of the statement that the requirements of the Government for one year may differ from those of another year. It may be noted in passing that in almost all the States of the Union the legislatures meet but once in two years, and no particular difficulties result from the fact that the exact requirements of one year may differ from those of another year. It may be conceded that from the viewpoint of the Executive it is very satisfactory to be able to distribute the money according to the requirements of present conditions. It is equally true that from that point of view it would be much simpler and perhaps more desirable in the interests of efficiency to adjourn the legislature permanently and permit the Executive to handle the entire subject of appropriations. But it is safe to assume that Congress had other views, and that it realized the fact that any method which might be devised to escape from the difficulty would result in some inconvenience. Congress was providing for a condition which it fairly assumed would be temporary only.

But it is said that if Congress had intended to reenact the previous appropriation bill it would have said so clearly and distinctly. This begs the question. It may be replied with even greater force that if Congress had intended that the chief executive should have the power to allot and distribute the funds in his discretion it would have said so clearly and distinctly. It is probable that the draftsman of the Porto Rico provision was familiar with the provision of the Philippine law, which had been in force for a number of years, and that when the difficulty arose in Porto Rico the language was copied substantially and reenacted without any particular consideration being given to the matter of its construction. * * *

Let us see what it means—this placing of the power of distributing this money in the hands of the chief executive. In the first place, it takes the legislative power away from the local legislature, contrary to the general purpose and theory of all other applicable congressional legislation. Under the Porto Rico case Congress itself makes the appropriation out of the local treasury. The executive may then re-create and reorganize the Government by creating new offices and readjusting salaries as may suit his judgment, desire, or convenience, so long as he does not repeal or violate any law which existed outside of the old appropriation bills. In considering a matter of this kind individuals must be ignored. Statutes, we all know, are generally prohibitive, and governments are largely devised and designed to protect the public against abuses of power by the occasional untrustworthy official. Now, the failure to pass an appropriation bill by the Philippine Legislature may not always be due to the desire of the assembly to choke the Government. There is another important factor which in any large view of the situation must not be overlooked. The commission, in which it may be assumed that the influence of the chief executive is probably great, has only to refuse to agree to any appropriation bill passed by the assembly, and the power of allotment for the future passes to the governor general. He and the heads of the various executive departments who spend the money and are primarily interested in the allotment of the fund can then arrange the distribution as they desire. The assembly can be eliminated from the situation and must take what the governor general chooses to give it for its own support. This is the inevitable and logical conclusion from the decision in the Porto Rico case, which we have been informed governs the present situation. The executive may spend during the succeeding period—a period which is indefinite and not measured by fiscal years—approximately ₱20,000,000 for the support of the Government, according to his own discretion, free from any substantial restraints. This turns the country into the governor general's personal domain and renders possible all manner of mistakes and abuses. Every official's salary is subject to his judgment. To me this seems disorganizing and in a way revolutionary, and I can not believe that it is what Congress intended to bring about.

I am aware that in the opinion which you rendered to the Governor General certain limitations are said to be imposed upon the action of the chief executive, but I am considering the situation as it must necessarily be, in my judgment, if the principle stated in the Porto Rico case is to govern, and we have been informed from Washington that it controls. This Porto Rico case sustained the right of the governor to fix the salaries of all officials who had not been appointed by the President. Why this exception, it is difficult to understand unless it was based on policy. In the Philippines the salaries of all the officials are supposed to be fixed by the legislature, regardless of whether they are appointed by the President and confirmed by the Senate or by the Governor General and confirmed by the commission. I learned recently that instructions have come from Washington to the effect that the old schedule of salaries must be followed. If this is true, it amounts to that extent to a repudiation of the doctrine of the Porto Rico case, unless it be meant to apply only to salaries which are fixed by existing acts other than the appropriation bill.

Now, let us see how the theory adopted has worked in actual practice. It seems to me that the result has been very confusing and given rise to a number of difficulties. The results which follow a certain construction of an ambiguous law are always proper to be considered in determining whether the construction is proper and reasonable. Acting under the authority of the Porto Rico case, the Governor General in his "advice" of December 18, 1911, created many new positions and changed many salaries. This he may have had a right to do if the doctrines of that case are controlling. He created, for instance, the new position of secretary to the Governor General, at a salary of ₱8,000 per annum, and the incumbent now holds the position and draws the pay without having been confirmed by the commission. This suggests infinite possibilities. By reducing the salaries of some officials and dropping other positions, ample funds may be found to pay the salary of a lord high chamberlain or a groom of the stole or any other position which the chief executive might believe the public service required. The condition may be continued indefinitely, as long as the Governor General and a majority of the commission are in accord. The assembly can not by its own will end it, because the majority of the commission may, if they choose, refuse to agree to any appropriation bill which the assembly passes, without giving reasons for their refusal. Under act 1698 new positions may be created in the service by the director of a bureau, with the approval of the secretary of the department, *and in no other manner.* During the past year numerous changes were made under this authority, and the Governor General's "advice" properly included the same. But, assuming to act under the authority of the act of Congress, the Governor General, in addition

thereto, created approximately 170 new positions, with salaries aggregating more than ₱218,000 per annum.

The "advice" to the Treasurer, which took the form of an appropriation bill for the fiscal year 1912, bore date December 18, 1911. Certain provisions of the old appropriation bill relating to the assembly having been omitted, particularly that under which many of the members of that body were enabled to draw ₱30 per day each during the recess, the assembly passed a violent resolution of censure on the Governor General, and cabled the same to Washington. It appeared that the omission had been unintentional, and the "advice" was immediately amended, and the assembly promptly subsided.

Thus matters stood until March 12, 1912, when the Governor General thought it advisable to recast his "advice." The rearranged document was antedated, and on March 29, 1912, was filed as a substitute for the previous document. It therefore was made to date in legal effect from the beginning of the fiscal year. In this document certain changes were made, as I understand, in accordance with instructions from Washington, which I have not seen. At present, then, we have an "advice" which after numerous vicissitudes has been licked into a very fair copy of the last current appropriation bill, with some changes in offices and salaries. As it stands there is probably nothing objectionable in the bill. It is certainly such a one as might very properly have been passed by the legislature. But one who attempts to follow the course of its history will be strengthened in his belief that in matters of government it is better to be controlled by a definite law than by the discretionary will of even a wise man.

After the original letter of "advice" was filed the Governor General sent to the commission the name of his private secretary to be secretary to the Governor General, at a salary of ₱8,000 per annum, to date from July 1, 1911; that is, over a period during which he had been filling another position as private secretary to the Governor General. Upon the suggestion that no such office as secretary to the Governor General could be created without the action of the legislature, the nomination or motion was withdrawn. Thereupon a committee was appointed, with instructions to furnish a "memorandum as to who may be classed as Government officials and who as employees in the service." This committee reported that "after exhaustive investigation of the decisions of the supreme courts of the various States and of the Supreme Court of the United States, we conclude that only those persons are public officials who occupy positions in the public service created by statute, the duties of which are defined thereby. All persons in the Government service who do not come within the foregoing definition are held to be employees."

However this may be, the conclusion of the committee opened an inviting way for the Governor General to create any number of positions, with such titles, duties, and salaries as to him seemed best. Should the question whether the occupant was a public officer be raised, and the assertion made that his appointment should be subject to confirmation by the commission, it would be necessary only to reply that *the position was not created by statute, and that therefore the occupant was an employee only.* The situation was thus left wide open in one direction at least.

There is another matter to which I would invite your attention. Under the doctrine of the Porto Rico case, the temptation to enter upon the field of general legislation is almost irresistible. When the former appropriation bill expired it carried with it all its provisions regulating the manner of expending the appropriated funds, and also all provisions of a general nature which had been inserted in previous bills. I do not construe any of those provisions as permanent legislation, and my view is strengthened by the fact that the legislature has thought fit to repeat them in each successive appropriation bill. Under the system which has grown up it was difficult to operate without these provisions, and we find that although by the terms of the act of Congress the money can only be used for the support of the government, it is provided in the Governor General's letter of "advice" that, "subject to the approval of the head of the proper department, chiefs of bureaus or offices *may expend on permanent improvements funds herein allotted for current expenses.*" This seems to require no comment.

I think the whole procedure has been a mistake. After careful consideration of the language of the act of Congress in the light of the history of its enactment, and the general principles which under the American system are supposed to control the action of the executive and legislative bodies, I am forced to the conclusion that the effect of the failure to provide for the support of the government is merely to continue the existing appropriation bills in force until such time as the legislature passes a new one. No other construction is consistent with the nature and form of the government which Congress was creating in the Philippines, or the object which it was seeking to accomplish. I realize and concede that the language of the act is ambiguous, otherwise we would not be engaged in this discussion, and that much can be said in favor of the other view. I realize also that some inconvenience may result from changed conditions, but I think this is easily exaggerated. It is very improbable that during such an interregnum any real necessity will arise for abolishing, changing, or consolidating any of the bureaus of the government, nor is it probable that any great emergency will arise. If such should be the fact, it is always possible and proper for the Governor General to convene an extra session of the legislature to act upon the new conditions.

The mere desire to make changes in the organization of the government will not create the necessity for so doing. Very seldom, in fact, would the extension of the current appropriation bills for even a year produce any particular confusion. In the United States, as already observed, the legislatures meet ordinarily but once in two years, and no difficulties seem to arise in making appropriations applicable during that period. To me the language of the act of Congress seems rather casual. It is such language as might have been used in providing for a brief interregnum, during which existing conditions were as far as possible to be continued. The procedure is not carefully worked out. It is provided that the treasurer may, with the advice of the governor, out of the total sum which shall be deemed to be appropriated—that is, appropriated by the Philippine Legislature—make the payments necessary for the support of the government. The primary responsibility seems to be thrown on the treasurer, as advice is one of the things which need not be and generally is not accepted. It implies discretion in the person advised. The provision with reference to the action of the treasurer follows the language commonly used in the United States, where the auditors and comptrollers are subordinates of the Treasurer. As here used, it undoubtedly implies that before the treasurer makes the payments the accounts shall have passed through the auditor's office in the ordinary routine of business. To strike out the word "advice" and substitute therefor the word "direction" appears to me a mere tour de force. If Congress had intended to place the matter entirely in the hands of the governor, it would have used the word or words naturally appropriate for that purpose.

It is true that Congress did not say in so many words that the existing appropriation bill should remain in force. Neither did it say that it should not remain in force. It is inconceivable that Congress when it used this language intended to confer upon the chief executive the legislative power to apportion and disburse the total fund available for the support of the government. An appropriation "is the formal act of the people through their representatives whereby public funds are set aside to be used for certain specified purposes." In 1902, when the act in question was passed, matters of great importance in the Philippine Government were generally referred to the United States Philippine Commission either for action, advice, or confirmation. Numerous illustrations of this will be found in the statute. As late as 1909 Congress provided that, until action by the Philippine Legislature approved by Congress, the internal revenue paid into the insular treasury should be allotted and paid out by the Philippine Commission. When Congress was thus careful to keep this legislative power in a legislative body, is it conceivable that by ambiguous language it intended to place in the hands of the chief executive, without even the advice of the commission, the great power of taking a large sum of money and operating the government?

The treasurer at the end of a session of the legislature would always be engaged in paying out the money under existing appropriation bills. In my judgment, he was by this act of Congress authorized, in pursuance of the established routine, to continue doing the same during a period which it was naturally inferred would be comparatively brief. As difficulties might be expected to arise under the new conditions, it was provided that the treasurer should have the advice of the chief executive. Inferentially, of course, it may be assumed that he would follow such advice. There is no reference in the act of Congress to another fiscal year, and in my judgment there is not a shadow of authority for the executive to fix up a complete new bill for the entire fiscal year. The Philippine act authorizes the treasurer to make the payments only during the time which may elapse from the termination of any session until the legislature shall act. The Porto Rico act, which we are assuming was modeled on the Philippine act, provided for a new conditon by authorizing the use of the gross amount appropriated for the support of the Government during the next fiscal year. But the Philippine act makes no reference to fiscal years. *It is impossible to make a new allotment or advice "from the termination of any session until the legislature shall act."* This is indefinite and indeterminable in advance of the action of the legislature.

Again, the Governor General's "advice" is dated December 18, 1911, and was made retroactive to the beginning of the fiscal year. If the old appropriation bill was not continued in force by the operation of the law, under what authority were payments being made for the support of the Government between June 30 and December 18, 1911? I have recently been informed that this was done under the authority of a letter from the Governor General, directing payment of money in accordance with the previous appropriation bill. If so, this is another illustration of the casual way in which, under the theory adopted, matters of such immense importance may be handled by the chief executive. If such a letter was sent, we have then the old appropriation bill being, in substance, in force by virtue of the Governor General's letter to the treasurer from July 1, 1911, to December 18, 1911. On that date the first letter of "advice" was issued, and dated back to the beginning of the fiscal year. In March another letter of "advice" was prepared, differing in terms from either of the former, that, too, taking effect from the first of the fiscal year, the period thus being covered by three legal layers, the last in each case covering and presumably obliterating the former.

The point has been made that if the old appropriation bill remains in force the executive is required to expend all the money appropriated for the particular items designated in the bill. If so, it would be a mere continuance of the conditions created by the legislature, but I know of no law which makes it absolutely incumbent upon the executive to actually spend during any particular time money appropriated for a specific purpose. If such is the law, it is generally disregarded, here as well as elsewhere, as evidenced by the innumerable unexpended appropriations and balances of appropriations constantly appearing upon the books of the government.

Again, in closing let me say that it is quite clear to me that Congress intended that the existing appropriation bills for the support of the government should be continued in force from the end of the session until action by the legislature. The inconveniences which this would produce are slight and insignificant compared with those which would result from the application of any other theory. Most of the inconveniences are purely imaginary, and arise only out of the desire to make changes which have not been authorized by the legislature. It is not probable that during the time such a condition would exist there will be any great changes in the relative importance of the different bureaus or that it will be necessary to transfer bodily the work of one bureau to another. Such radical changes would require legislative action, and it may be assumed that if the legislature took such action it would provide the money necessary to make it effective.

Very sincerely, yours,

CHARLES B. ELLIOTT,
Secretary of Commerce and Police.

Mr. W. H. PHIPPS, *Insular Auditor.*

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from New York [Mr. REDFIELD], the gentleman from Virginia [Mr. JONES], and the Commissioner from the Philippines [Mr. QUEZON] be permitted to extend their remarks in the RECORD without limitation. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the following sums be, and they are hereby, severally appropriated, in full compensation for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, out of any money in the Treasury not otherwise appropriated, for the objects hereinafter expressed, namely.

Mr. LONGWORTH. Mr. Chairman, I desire to offer an amendment at this point unless the gentleman from New York

[Mr. LEVY], a member of the committee, who I understand contemplates offering an amendment, prefers to offer it himself, in which case I yield to him. I think this is a proper place to offer the amendment.

Mr. LEVY. Mr. Chairman, I offer the amendment which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from New York [Mr. LEVY] offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 1, after line 8, insert the following:

"That there be, and are hereby, appropriated, out of any money in the Treasury not otherwise appropriated, the following sums for the purposes hereinafter stated, to wit:

"For the purchase of a site and the construction of a building thereon at the City of Mexico, and for the furnishing of the building, or, as to the Secretary of State may seem best, for the purchase at said city of a site and a building already erected, and for the alteration, repair, and furnishing of such building, and the construction of an addition thereto if necessary, for the use of the embassy to Mexico, both as the residence of the diplomatic officials and for the offices of the embassy, $150,000;

"For the construction of a building, on ground now held by the Government of the United Staes at Tokyo, Japan, for the use of the embassy to Japan, both as a residence of the diplomatic officers and for the offices of the embassy, and for furnishing the same, $150,000;

"For the purchase of a site and building at Berne, Switzerland, for the use of the legation to Switzerland, both as the residence of the diplomatic officials and for the offices of the legation, and for the alteration, repair, and furnishing of the building, and the construction of an addition thereto, $140,000;

"For the purchase of a site and the construction of a building thereon at Hankow, China, for the use of the consulate general at Hankow, and for the furnishing of the building, $60,000.

"In all, $500,000."

Mr. GARNER. Mr. Chairman, I make a point of order against that amendment.

Mr. MADDEN. It is not subject to a point of order.

Mr. GARNER. It is not authorized by law.

Mr. MADDEN. It is.

Mr. GARNER. Well, it does not belong in this bill. It may be authorized by law, but the law did not authorize this appropriation committee to carry this item in their bill.

Mr. MADDEN. The gentleman does not contend there is no law to direct the purchasing of sites?

Mr. LEVY. Mr. Chairman, an act of Congress approved February 7, 1911, provides for the purchase or erection within certain limits of cost of embassy, legation, or consular buildings abroad, and authorizes the Secretary of State to acquire in foreign countries such sites and buildings for the use of the diplomatic and consular establishments of the United States. This act appropriated the sum of $2,000,000, of which not more than $500,000 should be expended in any one year. In my opinion, Mr. Chairman, the amendment which I have just offered is therefore germane to the bill and not subject to a point of order.

Mr. BORLAND. Mr. Chairman, even though this may be authorized under a general act passed by Congress for such an appropriation, it does not belong in this bill. This bill is for the purpose of making provision for the diplomatic establishment. This is not for the construction of buildings in this country or any other country.

Mr. LONGWORTH. Mr. Chairman, has the gentleman concluded?

The CHAIRMAN. Has the gentleman from Missouri concluded?

Mr. BORLAND. Yes.

Mr. LONGWORTH. Mr. Chairman, this appropriation is justified by existing law. In fact, the existing law was designed to make in order such appropriations as this on the diplomatic and consular appropriation bill. The bill, as I happen to know, was drawn for that purpose. It was submitted to the then Clerk at the Speaker's table, the most eminent authority on parliamentary law in this country, and by him passed upon. It was designed for the purpose of making in order at any time when the diplomatic and consular bill was before the House an appropriation to acquire sites for consular and diplomatic buildings abroad.

Now, the gentleman from Missouri [Mr. BORLAND] says that this is not the proper bill for it. As a matter of fact, wherever we have heretofore acquired a site or a building abroad it has been in the diplomatic and consular appropriation bill by unanimous consent——

Mr. BORLAND. By unanimous consent; yes——

Mr. LONGWORTH. Because a point of order at that time lay, there being no existing law on the subject. But the so-called Lowden bill, which passed in February, 1911, provided specifically the authorization for appropriations of this kind.

Now, the reason for offering this amendment—the reason which I have no doubt animated the gentleman from New York [Mr. LEVY] and which animated me—is that unless this item can be considered now, and in this bill, it can not be considered at this Congress. A bill, however, from which the gentleman from New York took his amendment was introduced in this House by a recent Member of the House, now the honored governor of New York, Mr. Sulzer. It was adopted unanimously in the Committee on Foreign Affairs. It is on the calendar, and this is simply taking the appropriating sections of that bill and offering them at this time.

Mr. BORLAND. The gentleman admits that that was introduced by the Committee on Foreign Affairs?

Mr. LONGWORTH. Yes; and plainly it is a matter that falls under the appropriation that we are now considering.

Mr. MANN. Mr. Chairman, by the act of Congress approved February 17, 1911, found in Thirty-sixth Statutes at Large, page 917, it was provided—

That the Secretary of State be, and he is hereby, authorized to acquire in foreign countries such sites and buildings as may be appropriated for by Congress for the use of the diplomatic and consular establishments of the United States, and to alter, repair, and furnish the said buildings—

And so forth, with certain limitations. One limitation was that the amount to be appropriated in any one year shall not exceed $500,000, and there was the further provision that the limit of cost at any one place should not exceed $100,000.

Following that law, the Secretary of the Treasury, at the request of the Secretary of State, in strict conformity with the statute in regard to estimates, transmitted to Congress, through the Speaker of the House of Representatives, an estimate under date of January 17, 1912, and that estimate was referred to the Committee on Foreign Affairs. The Committee on Foreign Affairs therefore had jurisdiction over that subject matter, it having been referred to it by Congress. Any committee having general jurisdiction of both legislation and appropriations might bring in a provision by special bill for an appropriation, although if it did, it would not be a privileged bill, and hence could not be called up. But the committee having jurisdiction, the estimate being for the Diplomatic and Consular Service, the appropriation properly belongs in the diplomatic and consular appropriation bill.

I will send to the Chairman a copy of the estimate, if he has not seen it.

The CHAIRMAN. The Chair has the statute before him.

Mr. MANN. The Chair has the statute, but probably not the estimate.

The CHAIRMAN. Does the gentleman from Virginia desire to be heard?

Mr. FLOOD of Virginia. Mr. Chairman, there seems to be no doubt about the fact that the amendment is in order. I did not raise the point of order against it.

The CHAIRMAN. The Chair is ready to rule. The point of order is overruled, and the question is on agreeing to the amendment.

Mr. FLOOD of Virginia. Mr. Chairman, I do not think the committee ought to adopt this amendment, although I am in favor of the policy outlined in it. The bill that was introduced as an amendment here was offered at the last session of Congress by a gentleman who was then here as a Representative from New York, Mr. Sulzer, and the Committee on Foreign Affairs made a careful investigation of it and made a report to this House favoring the appropriation of half a million dollars.

I drew the report and submitted it to the House, and at that time, if we could have reached the bill, the committee would have supported it.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. FLOOD of Virginia. Yes.

Mr. MADDEN. Does the committee recommend any appropriation for embassy buildings anywhere?

Mr. FLOOD of Virginia. No; the committee does not. The committee did recommend these appropriations a year ago, but our appropriations have gone so far beyond what we expected now that I believe I am speaking for the committee when I say that they are opposed to this amendment. Certainly a very considerable majority of the members of the committee are, and I hope the Committee of the Whole will vote down the amendment.

Mr. MANN. I ask for a division of the amendment. There are four propositions in it.

Mr. LONGWORTH. Before that is done——

Mr. SLAYDEN. Will the gentleman restate the provisions of the amendment?

Mr. MANN. There is a provision for an embassy building at the City of Mexico, $150,000; at Tokyo, Japan, $150,000; at Berne, Switzerland, $140,000; and at Hankow, China, for $60,000. I think we might afford to locate one at Mexico City.

Mr. KENDALL. There is no objection to dividing the amendment, is there?

Mr. FLOOD of Virginia. No.

Mr. LONGWORTH. Not at all; but I want to suggest to the gentleman from New York [Mr. LEVY] that he withdraw the fore part of his amendment, which is merely a repetition of the appropriating clause at the beginning of the bill. I ask unanimous consent that the appropriating clause at the beginning of the amendment be stricken out, as it is already contained in the bill.

The CHAIRMAN. If there be no objection, the request of the gentleman will be complied with. The Clerk will report the first substantive proposition in the amendment.

The Clerk read as follows:

Page 1, after line 8, insert the following:

"For the purchase of a site and the construction of a building thereon at the City of Mexico, and for the furnishing of the building, or, as to the Secretary of State may seem best, for the purchase at said city of a site and a building already erected, and for the alteration, repair, and furnishing of such building, and the construction of an addition thereto if necessary, for the use of the embassy to Mexico, both as the residence of the diplomatic officials and for the offices of the embassy, $150,000."

The CHAIRMAN. The question is on agreeing to the amendment reported.

Mr. BORLAND. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BORLAND. Has the Chair ruled that the question is divisible?

The CHAIRMAN. The Chair thinks it is divisible.

Mr. BORLAND. Are we voting separately now?

The CHAIRMAN. We are voting on the first proposition, which has been reported by the Clerk.

The question being taken, on a division (demanded by Mr. BORLAND and Mr. FOSTER) there were—ayes 33, noes 37.

Mr. LONGWORTH. I ask for tellers, Mr. Chairman.

Tellers were ordered, and the Chairman appointed Mr. FLOOD of Virginia and Mr. LONGWORTH.

The committee again divided; and the tellers reported—ayes 42, noes 51.

Accordingly the amendment was rejected.

The CHAIRMAN. The Clerk will report the next substantive proposition.

The Clerk read as follows:

For the construction of a building, on ground now held by the Government of the United States at Tokyo, Japan, for the use of the embassy to Japan, both as a residence of the diplomatic officers and for the offices of the embassy, and for furnishing the same, $150,000.

Mr. FLOOD of Virginia. I suggest to the gentleman from New York that the test vote on this whole proposition has been taken, and it has been lost.

Mr. MANN. The gentleman evidently did not understand why we asked for a division of the question.

Mr. KENDALL. Will not the gentleman consent that the other three amendments be voted on en bloc?

Mr. MANN. Let us have the regular order.

The question being taken, the amendment was rejected.

The CHAIRMAN. The Clerk will report the next substantive proposition.

The Clerk read as follows:

For the purchase of a site and building at Berne, Switzerland, for the use of the legation to Switzerland, both as the residence of the diplomatic officials and for the offices of the legation, and for the alteration, repair, and furnishing of the building, and the construction of an addition thereto, $140,000.

The question being taken, the amendment was rejected.

The CHAIRMAN. The Clerk will report the next substantive proposition.

The Clerk read as follows:

For the purchase of a site and the construction of a building thereon at Hankow, China, for the use of the consulate general at Hankow and for the furnishing of the building, $60,000.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken; and on a division (demanded by Mr. LEVY) there were—ayes 27, noes 47.

So the amendment was lost.

The Clerk read as follows:

Chargés d'affaires ad interim, $50,000.

Mr. HAMLIN. Mr. Chairman, I reserve a point of order. I want to ask the chairman what is the necessity of increasing this amount, line 22, $5,000?

Mr. FLOOD of Virginia. The committee thought that there would probably be more of the secretaries acting as chargés d'affaires during the next 12 months than had been the case heretofore, as there is to be a change of administration, and all the ambassadors and ministers will probably send in their resignations, and during that time when the positions are not filled the secretary will act as chargé d'affaires, and therefore there will be a greater charge on this fund. Generally they have spent somewhere near this amount. I think last year it was $48,000. We thought that would be a small enough amount to provide for them.

Mr. HAMLIN. Did the committee have anything to base the estimate on, or is it guesswork?

Mr. FLOOD of Virginia. Last year the expenditures from this fund were $48,000, and this year there will be a greater change in the diplomatic corps than there has been for the past 16 years.

Mr. HAMLIN. I understand that.

Mr. FLOOD of Virginia. This is only an increase of $5,000 over the amount carried for the current year and only $2,000 over the amount that was spent during the fiscal year of 1912. We thought that was certainly little enough to appropriate for that purpose. This fund is so used that whenever it is used it saves money to our Treasury, because these secretaries while acting as chargés d'affaires only get one-half of the salary of the ambassador or the minister, and the ambassador and the minister frequently are not getting salary during that time.

Mr. HAMLIN. But usually they are, are they not?

Mr. FLOOD of Virginia. No; as a matter of fact, the use of this fund has saved more than the fund itself.

Mr. FOSTER. Mr. Chairman, I desire to call the attention of the gentleman from Virginia, the chairman of the committee, to the fact that this total of $560,000 should be $560,500.

Mr. FLOOD of Virginia. The gentleman is right about that; I was going to correct it by an amendment. I offer an amendment so that the total will read, in line 23, "$560,500."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 23, strike out the figures "$560,000" and insert in lieu thereof "$560,500."

The amendment was agreed to.

The Clerk read as follows:

SALARIES OF DIPLOMATIC AND CONSULAR OFFICERS WHILE RECEIVING INSTRUCTIONS AND MAKING TRANSITS.

To pay the salaries of ambassadors, ministers, consuls, and other officers of the United States for the periods actually and necessarily occupied in receiving instructions and in making transits to and from their posts, and while awaiting recognition and authority to act, in pursuance of the provisions of section 1740 of the Revised Statutes, so much as may be necessary for the fiscal year ending June 30, 1914, is hereby appropriated.

Mr. FOSTER. Mr. Chairman, I reserve a point of order. I would like to ask the reason for the additional language in that paragraph, "for the fiscal year ending June 30, 1914, is hereby appropriated."

Mr. MANN. It does not do any harm and it does not do any good.

Mr. FLOOD of Virginia. I had not noticed it. That is the year it is appropriated for. It is not necessary.

Mr. FOSTER. I suggest that it be stricken out.

Mr. FLOOD of Virginia. Mr. Chairman, I move to strike out, after the word "necessary," in line 21, the remainder of the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 4, line 21, strike out, after the word "necessary," the remainder of the paragraph.

The amendment was agreed to.

The Clerk read as follows:

For the payment of the cost of tuition of student interpreters at the legation to China, at the rate of $180 per annum each, to be immediately available, $1,800.

Mr. FOSTER. Mr. Chairman, I reserve a point of order on the paragraph, page 6, line 3.

Mr. FLOOD of Virginia. Mr. Chairman, we have been paying for the tuition of these students $125 a year, but information was furnished the committee by the State Department that they could not get instructors for $125 a year. It seems that an instructor can only teach one student at a time, and the compensation he gets for teaching that student is all of his compensation for the year. They are unable to get them for $125, and they ask that it be increased to $180, and that makes the increase in the appropriation of $550.

Mr. COX. Are these teachers Chinamen?

Mr. FLOOD of Virginia. They are Chinese instructors, who teach these students the Chinese language. Some of them are natives and others are foreigners who know the Chinese language.

Mr. COX. Is there any law for this appropriation at all?

Mr. FLOOD of Virginia. No; there is not.

Mr. COX. They are already paid a salary of $1,000.

Mr. FLOOD of Virginia. Not the instructors.

Mr. COX. I mean the students.

Mr. TOWNSEND. That is the salary to the student. This is for his tuition.

Mr. COX. What right have we got to charge that amount for the tuition of those students over there? Why impose that burden on the people of this country?

Mr. FLOOD of Virginia. It is necessary because we have to teach some one the Chinese language, so as to get into our legation and consulates people who will know that language. We do not want to turn our business affairs over there to Chinamen. We want to get Americans who are familiar with the language, and unless we provide for the expenses of these students to study the Chinese language we will not be able to get anyone qualified to act as interpreters in our legation and consulates.

Mr. COX. Is there not a large number of students now who are pressing to get into this service and willing to pay their own tuition?

Mr. FLOOD of Virginia. If there are, I have never heard of them. I do not think the gentleman from Indiana could mention anyone.

Mr. COX. I know I did my best to get some one in some of the other Governments, and I failed to do it.

Mr. FLOOD of Virginia. I will say to the gentleman that there are very few Governments at which we provide for these students. China, Turkey, and Japan are the only ones. Of course, if you wanted to pay a young man $1,000 a year to go abroad to learn the French language, it would be very easy to get them in plenty, but it is quite a different situation with these eastern languages.

Mr. SLAYDEN. Would it not be easy to get plenty of young men who already know French to go into that service?

Mr. FLOOD of Virginia. Of course——

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. FLOOD of Virginia. Certainly.

Mr. BORLAND. What is the idea in making the amount immediately available?

Mr. FLOOD of Virginia. Because they have not been able to get instructors for $125 a year. That money has passed into the Treasury, and this is needed so the instruction can go right on.

Mr. BORLAND. Are there no instructors now?

Mr. KENDALL. Mr. Chairman, if the gentleman from Virginia will permit, I would suggest that the answer to the question of the gentleman from Missouri is quite obvious on page 42 of the hearings.

Mr. FLOOD of Virginia. Mr. Chairman, I will ask the gentleman to read it.

Mr. KENDALL. That question was asked Mr. Carr, and he replied:

> The minister says they can not get proper tuition on account of the increase in price, and they want to get the kind of tuition they had formerly, and if the appropriation is made available they would be able to start now instead of waiting until the 1st of July.

It is a perfectly obvious business reason.

Mr. BORLAND. Is not this properly a deficiency appropriation?

Mr. KENDALL. It is inconceivable why it should be any place except in this bill.

Mr. FOSTER. It is undoubtedly a deficiency appropriation.

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentleman yield?

Mr. FLOOD of Virginia. Yes.

Mr. HAMILTON of Michigan. How long does it take these instructors to teach a student to speak the language?

Mr. FLOOD of Virginia. I do not know that I could answer that question.

Mr. HAMILTON of Michigan. It takes at least a year, does it not?

Mr. FLOOD of Virginia. It takes at least two years, and it would depend very much on the intelligence of the student whether he would learn it in that time.

Mr. HAMILTON of Michigan. The salary allowed heretofore has been the munificent salary of $125 a year.

Mr. FLOOD of Virginia. Yes; and now we propose to make it $180 a year.

Mr. HAMILTON of Michigan. I had it in mind to ask my friend from Virginia whether that salary was in keeping with the wages and salaries paid in China, on the whole?

Mr. GARNER. Mr. Chairman, this is a discussion that is proceeding by unanimous consent, I take it.

The CHAIRMAN. Does the gentleman from Michigan yield to the gentleman from Texas?

Mr. HAMILTON of Michigan. Oh, no. I was asking the gentleman from Virginia a question.

Mr. FLOOD of Virginia. One hundred and eighty dollars a year would be. I do not think $125 a year would be.

Mr. GARNER. This discussion is proceeding now by unanimous consent, I presume, as a point of order has been made by the gentleman from Illinois.

Mr. FOSTER. The point of order was reserved.

Mr. FLOOD of Virginia. I think it would be unwise not to allow this $550.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. MANN. Mr. Chairman, I will ask the gentleman to reserve his point of order.

Mr. FOSTER. Very well.

Mr. MANN. Mr. Chairman, is the gentleman able to tell us how many of these persons who have been student interpreters are now employed in the service of the Government?

Mr. FLOOD of Virginia. I can not; but there must be quite a number of them in the service. They are promoted to the Consular and Diplomatic Service.

Mr. TOWNSEND. It appears in the items.

Mr. FLOOD of Virginia. No; I do not think so.

Mr. GARNER. There are about 50 per cent of them who do not remain in the service.

Mr. MANN. This is for the year; how long do they act as students?

Mr. GARNER. You mean how long they are paid a salary of $1,000?

Mr. MANN. Yes.

Mr. GARNER. I do not know that the committee secured that information; if they did I do not recall it. I am advised that it is about two years.

Mr. MANN. The gentleman does not know how many now are at the various consulates acting as interpreters or acting in any other clerical capacity?

Mr. GARNER. Mr. Carr did not state just how many students have gone out of this so-called school into the service and were still in the service, but he did impress upon the committee the idea that it was absolutely important for the service in China, Japan, and Turkey that they should undertake to educate these young men in the language, and then he hoped that sufficient salary would be paid them to continue them in the service.

Mr. MANN. I made the same inquiry last year. It is true the distinguished governor of New York, then chairman of the committee, is not now the chairman of the committee, but we were given to understand last year that this year we would be able to get that information. I do not criticize the committee for not having it, but I hope that some time or other we will ascertain how many of these student interpreters we retain in the service, and whether we are giving them an education in the different languages for our own benefit or for their benefit.

Mr. FLOOD of Virginia. I will state to the gentleman as far as the State Department knows I will get the information and give it to him within a few days. The State Department may not be able to give me the information, and, of course, if it can not do that, I will not be able to give it to the gentleman.

Mr. MANN. I do not ask the gentleman to give it to me individually. I think it ought to be given to the House at some time when the bill is under consideration.

Mr. KENDALL. The gentleman from Illinois will notice these interpreters are obligated by this bill to remain five years.

Mr. MANN. That is it—if they only stayed in a year they would have 50 in consulates, and that is more consulates than we have in China. It is desirable to know whether in fact these men remain in the service or whether, under the title of student interpreters, means are afforded for them to get an education and they then go out of the service.

Mr. FLOOD of Virginia. I expect it is very much like the young gentlemen we have at West Point and Annapolis—a good many of them stay in the service and a good many go out.

Mr. MANN. But we know every year how many stay in the service and how many go out.

Mr. FLOOD of Virginia. And I will say, further, to the gentleman that a good many of these student interpreters are getting in the Consular and Diplomatic Service and are holding responsible consular or diplomatic positions. That is one reason why they are educating them so thoroughly in these languages to enable them to do so.

Mr. FOSTER. Mr. Chairman, I will say that the language in this proviso on pages 5 and 6, in my judgment, is such that these young men after they are educated are not required to go into the service, but only as the Government may need them. Of course if they do not need 50 or do not need more than 10 of them they go out of the service.

Mr. MANN. But my colleague knows we have only 15 consulates in all of China.

Mr. FOSTER. I know, and if my colleague will observe this language, it says, "as long as his services may be required within a period of five years." If they do not want them, they do not take them, and they could accept some other employment.

Mr. MANN. Undoubtedly they need to have 10 student interpreters studying all the time. The purpose is, I conceive, to maintain one, two, or even three at 15 different consulates, and that is all we have in China.

Mr. FOSTER. I think my colleague is correct; we do not need that number, but it is like one of those things that gets on a bill one year and keeps on year after year and is never abandoned.

Mr. TOWNSEND. I will suggest to the gentleman from Illinois that these student interpreters are not only useful in the consulates in China, and, of course, are almost equally useful in Japan, but in many portions of the Far East where the consuls would have business that would frequently require assistants who could speak the language.

Mr. FOSTER. We furnish them in Japan, too.

Mr. GARNER. And in Turkey.

Mr. TOWNSEND. I did not convey my meaning to the gentleman from Illinois [Mr. FOSTER]. They are with the consuls in Japan, who equally have reasons for the assistance of interpreters who speak Chinese. The gentleman can easily see they might be almost as essential as those who speak Japanese.

Mr. FOSTER. It is a very good opportunity, I will say to my friend from New Jersey [Mr. TOWNSEND], under the guise of this appropriation to educate a good many young men over there who might be very useful in a business way.

Mr. TOWNSEND. The gentleman is in favor of education of all kinds?

Mr. FOSTER. I am; but I do not believe the National Government ought to go into that.

Mr. HARRISON of Mississippi. Will the gentleman yield?

Mr. FLOOD of Virginia. I yield.

Mr. HARRISON of Mississippi. In answer to a question in the hearings as to how long it would take to learn the language there it is said that it would take about two years.

Mr. MANN. If my colleague would yield for a moment.

Mr. FOSTER. Yes, sir.

Mr. MANN. I have just gone through the list of the number of interpreters we have at all the Chinese consulates and we are now employing 10; not student interpreters, but 10 interpreters, as the result of having been student interpreters, if we have them—and I do not know whether we have them or not—for a great many years. We only need student interpreters. They get salaries running from $1,200 to $1,500 a year to possibly $2,000.

Mr. FOSTER. I will state, Mr. Chairman, that this appropriation provides for an increase of salary here, which, of course, is subject to a point of order; but I judge one instructor could instruct all of these 10.

Mr. FLOOD of Virginia. The gentleman is mistaken.

Mr. FOSTER. If not, he ought to do so. There is no use of hiring two or three instructors to instruct these men in this particular line of work.

Mr. KAHN. Are there not a good many dialects in China, and do you not require different teachers for the different dialects, and to be an efficient interpreter, should not a man know all the different dialects?

Mr. FLOOD of Virginia. For the reason indicated by the gentleman, and for other reasons, one teacher only has charge of these students. That was the statement made before the committee, and I suppose it is correct.

Mr. FOSTER. Are these students taught by the natives or those who have gone over and learned the language, like the missionaries?

Mr. FLOOD of Virginia. They are partly taught by natives and partly by missionaries.

Mr. FOSTER. Mr. Chairman, I am not going to object to this increase of salary, because possibly it may be necessary, but I admonish the committee to give us a little more information on this matter another year. But I wish to make a point of order on the language "to be immediately available."

The CHAIRMAN. The gentleman from Illinois makes a point of order on the words in the last line, "to be immediately available." Does the gentleman from Virginia, the chairman of the committee [Mr. FLOOD], know any law authorizing it?

Mr. FLOOD of Virginia. No, sir; not at all.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

CONTINGENT EXPENSES, FOREIGN MISSIONS.

To enable the President to provide, at the public expense, all such stationery, blanks, records, and other books, seals, presses, flags, and signs as he shall think necessary for the several embassies and legations in the transaction of their business, and also for rent, repairs, postage, telegrams, furniture, typewriters, including exchange of same, messenger service, compensation of kavasses, guards, dragomans, and porters, including compensation of interpreters, and the compensation of dispatch agents at London, New York, San Francisco, and New Orleans, and for traveling and miscellaneous expenses of embassies and legations, and for printing in the Department of State, and for loss on bills of exchange to and from embassies and legations, $355,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word for the purpose of getting technical information from such a high source as the Committee on Foreign Affairs. I would like to inquire of the gentleman how the word "e-m-b-a-s-s-y" is properly pronounced?

Mr. FLOOD of Virginia. What does the gentleman wish to know?

Mr. MANN. There seems to be some difference of understanding as to the pronunciation of the word "embassy," whether it is *em*bassy or em*bassy*.

Mr. FLOOD of Virginia. I pronounce it *em*bassy.

Mr. MANN. I thought the gentleman was authority on that subject. I notice both of our reading clerks pronounce it em*bassy*, and I did not know. They usually know, and I would like to get the information.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

STEAM LAUNCH FOR LEGATION AT CONSTANTINOPLE.

Hiring of steam launch for use of embassy at Constantinople, $1,800.

Mr. FLOOD of Virginia. Mr. Chairman, I want to offer an amendment, on line 16, page 8, to strike out the word "legation" and insert in lieu thereof the word "embassy."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 8, line 16, by striking out the word "legation" and inserting "embassy."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. SIMS. Mr. Speaker, I want to ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Tennessee [Mr. SIMS] asks unanimous consent to extend his remarks in the RECORD.

Mr. MANN. Mr. Chairman, reserving the right to object, I apprehend the gentleman wants to insert more newspaper articles about the Panama Canal, which I will not object to if he does not want to insert them in the middle of the consideration of this bill.

Mr. SIMS. The gentleman is right in his surmise. I will not put them in the middle of the bill.

Mr. MADDEN. Has this anything to do with the gentleman's controversy with Mr. Glover? [Laughter.]

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee to extend his remarks in the RECORD?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

ANNUAL EXPENSES OF CAPE SPARTEL LIGHT, COAST OF MOROCCO.

Annual proportion of the expenses of Cape Spartel and Tangier Light on the coast of Morocco, including loss by exchange, $325.

Mr. ESCH. Mr. Chairman, I move to strike out the last word, for the purpose of making an inquiry of the chairman of the committee.

What is the reason why our Government should participate in the maintenance of these lights? Is it because of the poverty of Morocco or its want of sea commerce or what?

Mr. FLOOD of Virginia. Our Government entered into a treaty with 13 other nations to maintain this lighthouse. The reason was that our Government used the entrance to the Straits of Gibraltar, as did the other Governments also. The treaty fixed the proportionate cost each Government should pay for keeping up the lighthouse. This treaty was entered into in 1865, and we are still appropriating under the provisions of that treaty.

Mr. ESCH. In view of the fact that the political status of Morocco has changed since this treaty was made, would not that change the situation?

Mr. FLOOD of Virginia. The treaty has not yet been denounced by this Government. It is an existing treaty, and the obligation would still rest upon this Government.

Mr. ESCH. It would for the fiscal year for which this appropriation is made?

Mr. FLOOD of Virginia. It would as long as the treaty lasts.

Mr. GARNER. Mr. Chairman, does the gentleman from Virginia yield?

The CHAIRMAN. Does the gentleman yield?

Mr. FLOOD of Virginia. Yes.

Mr. GARNER. I want to say to the gentleman and other members of the committee, as to some of these numerous appropriations that are made in accordance with the stipulations of treaties, that the appropriations will continue as long as the treaties continue and as long as Congress feels itself bound to appropriate the money to keep up the obligations of those treaties.

There is no way by which the House can protect itself against these obligations made by the Senate through a treaty except to refuse to make an appropriation. Your Committee on Foreign Affairs so far has not come to the conclusion that it should adopt the policy of repudiating or denouncing a treaty by refusing to make an appropriation. It has, however, consolidated a number of these treaties under one head and made as low an appropriation as it thought the circumstances would justify.

The CHAIRMAN. The time of the gentleman has expired. The pro forma amendment will be considered withdrawn. The Clerk will read.

The Clerk read as follows:

Emergencies arising in the Diplomatic and Consular Service.

Mr. HOBSON. Mr. Chairman, I move to strike out the last word of the previous paragraph, for the purpose of asking the chairman of the committee a question, if he has no objection.

Mr. FLOOD of Virginia. Certainly.

Mr. HOBSON. Would the gentleman explain why we had to pay a ground rent for the embassy at Tokyo?

Mr. FLOOD of Virginia. A ground rent?

Mr. HOBSON. Yes.

Mr. FLOOD of Virginia. In 1896 the United States purchased embassy buildings in Tokyo subject to this ground rent, to be paid to the Japanese Government for the ground on which the building stands.

Mr. HOBSON. Does the same proposition hold with respect to other foreign embassies in Tokyo? I mean is the attitude of the Japanese Government the same as to the ownership of land, and whether all embassies are held practically under lease and not under title?

Mr. FLOOD of Virginia. Yes. This is a valuable piece of land. Two hundred and fifty dollars is a mere nominal rent.

Mr. HOBSON. Can the gentleman tell me, for my information, whether property owned by Americans or other foreigners there must be held in the same way, as, for instance, in the British Crown colonies, where it is held on a 99-year lease?

Mr. FLOOD of Virginia. I can not answer that question.

The CHAIRMAN. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

BOUNDARY LINE, ALASKA AND CANADA, AND THE UNITED STATES AND CANADA.

To enable the Secretary of State to mark the boundary and make the surveys incidental thereto between the Territory of Alaska and the Dominion of Canada, in conformity with the award of the Alaskan Boundary Tribunal and existing treaties, including employment at the seat of government of such surveyors, computers, draftsmen, and clerks as are necessary to reduce field notes; and for the more effective demarcation and mapping, pursuant to the treaty of April 11, 1908, between the United States and Great Britain, of the land and water boundary line between the United States and the Dominion of Canada, as established under existing treaties, to be expended under the direction of the Secretary of State, including employment at the seat of government of such surveyors, computers, draftsmen, and clerks as are necessary to reduce field notes, $100,000, together with the unexpended balance of previous appropriations for these objects.

Mr. HAMLIN. I move to strike out the last word.

Mr. FOWLER. I reserve a point of order against that paragraph.

Mr. HAMLIN. I desire some information from the chairman of the Committee on Foreign Affairs. There seems to be an increase of $25,000 in this item.

Mr. FLOOD of Virginia. There is an apparent increase. The appropriation bill of last year carried $75,000 and the unexpended balance, which was $109,000, making a total of $184,000. This bill carries $100,000 and the unexpended balance, which is $32,000; so we really appropriate $132,000, as against $184,000 appropriated in the last bill.

Mr. HAMLIN. How do you know what the unexpended balance will be at the end of this current year?

Mr. FLOOD of Virginia. That was the estimate placed upon it by Dr. Tittmann, who is in charge of this work. He appeared before the committee and stated that the unexpended balance would be $32,000.

Mr. HAMLIN. You say there was a surplus in the last fiscal year of $109,000?

Mr. FLOOD of Virginia. Yes.

Mr. HAMLIN. And it is estimated that there will be a surplus of $32,000 this year. Why keep a surplus on hand all the time?

Mr. FLOOD of Virginia. They do not expect to have a surplus during the next fiscal year. They estimate that they will use up the whole $132,000. In fact, they asked for $137,000. They are pushing the work very rapidly on the boundary line between Canada and Alaska and on the boundary line between Canada and the United States. Dr. Tittmann appeared before the committee and made a very full and complete statement as to the work they expect to do and the amount of money it will take, and the committee were thoroughly satisfied that he needed this amount of money, and that he was pushing this work as rapidly as possible and was doing the work well, and that it was a project that was being well handled and one that in a few years we will probably be rid of.

Mr. HAMLIN. That may all be true, but I do not like the idea of appropriating blindly; in other words, like buying a pig in a poke. Last year the same assurance was given us that it was necessary to appropriate $75,000, together with the unexpended balance of the previous year. Now, it turns out that he admits that he will not use all the money, that there will be an unexpended balance of $32,000 remaining, and yet he estimates that he now needs $100,000 more. We are continually complaining about the appropriations running so high, and I think the complaint is just, and that it is inexcusable. I am not criticizing this committee now. I am speaking generally, that we ought to be more careful in these appropriation bills. Hold them down as low as possible.

Mr. FLOOD of Virginia. I will say to the gentleman that if the money is not used it reverts into the Treasury unless it is reappropriated as an unexpended balance.

Mr. HAMLIN. That is where it ought to go, into the Treasury.

Mr. FLOOD of Virginia. The only thing that could be gained by acting on the gentleman's suggestion would be to keep down the apparent size of the appropriation, and we might run the risk of stopping this very valuable work before the end of the fiscal year or require a deficiency appropriation.

Mr. HAMLIN. No; I think my friend from Virginia over-looks a very important part of it all in the handling of the public money. If these departments understand that they have ample funds and perhaps something to spare, they are going to be more extravagant and liberal in their expenditures than if they understand that they have only a limited and definite sum which they can expend. It is possible they will think that if they can make a proper showing Congress will furnish the money later on in a deficiency bill, but if we give it to them in advance and indefinite in amount there is no limit to the extravagance. I think it is a very bad practice to appropriate in this way, and I protest against it.

Mr. FLOOD of Virginia. I will say to the gentleman that the committee had in mind the very suggestion which he has made here. There is another boundary-line commission, between this country and Mexico, which asked for $50,000, but the committee, after investigation, did not think that commission would expend that amount and provided only $25,000.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. HAMLIN] has expired.

Mr. HAMLIN. I ask for two minutes more.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent for two minutes more. Is there objection?

There was no objection.

Mr. FLOOD of Virginia. We did not think the Mexican Boundary Commission needed that amount of money, and, after going into it carefully, we declined to appropriate any more than $25,000, the amount appropriated last year; but after a very careful examination of Dr. Tittmann we were satisfied that the Alaskan and Canadian Boundary Commissions would need this money and would expend it during the next year.

Mr. HAMLIN. But I notice that in making the appropriation for the Mexican Boundary Line Commission you did not appropriate any balance that might be left unexpended.

Mr. FLOOD of Virginia. No.

Mr. HAMLIN. Why not in that case as well as in the Canadian boundary-line matter?

Mr. FLOOD of Virginia. Because we are appropriating a sufficient amount for that commission in the $25,000.

Mr. HAMLIN. I think that is true. If this money for the Canadian Boundary Commission had not been reappropriated here, it would have reverted to the Treasury.

Mr. FLOOD of Virginia. And we would have had to appropriate $132,000 instead of $100,000.

Mr. GARNER. Mr. Chairman, may I say to the gentleman from Missouri that this covers two commissions? Your committee undertook to consolidate these commissions, and a year ago we put two of these commissions together. Dr. Tittmann, in a statement before the committee, said that $5,000 would finish up the work of the boundary between Canada and this country, but it would take about $135,000 to continue this work for the next fiscal year in Alaska. He is, in my judgment, one of the most efficient men I ever came in contact with in the employ of the Government. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. GARNER. Mr. Chairman, I ask unanimous consent for two minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent for two minutes. Is there objection?

There was no objection.

Mr. GARNER. The committee went into this matter as closely as it was possible to do and, as the chairman has remarked, if we had not reappropriated the amount at the end of the fiscal year we would have carried an item for $135,000 instead of $100,000. It would have made the apparent total a little larger.

Dr. Tittmann advises the committee that he hopes to be able to close up and complete the boundary-line work between Alaska and the United States at an early date. With reference to Mexico, you will be carrying this appropriation for this boundary commission between Mexico and the United States when we have all passed away. It will continue as long as the treaties that we now have are kept in existence.

Mr. FOWLER. Mr. Chairman, I reserved a point of order on the paragraph.

Mr. GARNER. On what ground?

Mr. FOWLER. I reserved a point of order to that part of the paragraph beginning, in line 8, "together with the unexpended balance of previous appropriations for these objects."

Mr. HARRISON of Mississippi. How much does that amount to?

Mr. FLOOD of Virginia. Thirty-two thousand dollars.

Mr. FOWLER. I suppose the Chair, with his long experience, is perfectly familiar with the rules governing this appropriation. Being a new Member, I do not desire to discuss the point of order more than to say that if it is permitted to make appropriations indiscriminately without denominating the amount it certainly will lead to that degree of uncertainty which will give not only to this House but to the people at large a feeling that we at least are indiscreet in making our appropriations.

Mr. Chairman, I do not believe that the Appropriations Committee ought to be permitted to take that which was formerly appropriated for a fiscal year, and then snatch the unused balance before it gets into the Treasury and dump it into the coffers for the purpose of making the sum total, the amount of which is not revealed in the bill to the House. Unused balance automatically reverts to the Treasury. Such practice ought not to be permitted, in my opinion. For this reason I have sought the opinion of the Chair on this question.

The CHAIRMAN. The treaty authorizes the appropriation for the purpose named in the item, and if Congress can appropriate directly it can reappropriate an unexpended balance. The point of order is overruled.

The Clerk read as follows:

INTERNATIONAL BUREAU AT BRUSSELS FOR REPRESSION OF THE AFRICAN SLAVE TRADE.

To meet the share of the United States in the expenses of the special bureau created by article 82 of the general act concluded at Brussels July 2, 1890, for the repression of the African slave trade and the restriction of the importation into and sale in a certain defined zone of the African Continent of firearms, ammunition, and spirituous liquors, for the year 1914, $125.

Mr. GARNER. Mr. Chairman, I move to strike out the last word, to again call to the attention of the House that the number of appropriations made in this bill will continue to be made as long as it is the policy of Congress to continue in existence, by making appropriations, treaties made by the Senate. Here is an appropriation with reference to the African slave trade, and the immense sum of $125 is carried to suppress that heinous crime. I simply avail myself of this opportunity to show how ridiculous the Congress becomes by virtue of some treaty made 40 or 50 years ago in continuing to make appropriations to carry into effect some treaty that has by lapse of time or some other way abrogated itself.

Mr. HAMILTON of Michigan. Mr. Chairman, I was interested in the statement made by the gentleman from Texas a little while ago to the effect that this appropriation for the boundary-line commission between the United States and Mexico would have to go on indefinitely. I was wondering why that would have to be so.

Mr. GARNER. I will say to the gentleman from Michigan that when I first had the honor to come to this House I came with the intention of striking that one item of expense out of the appropriations, but when Secretary of State ROOT came before the committee and stated that in his judgment this expense of adjusting the differences between the citizens of Texas and Mexico could be done at less expense by this commission than by the department, I had to yield in favor of continuing the appropriation.

Mr. HAMILTON of Michigan. I did not know but that it was on account of the shifting habits of the river.

Mr. GARNER. Well, that has nearly all to do with it.

This commission does do a considerable service. They thought this year they needed $50,000, but the committee came to the conclusion they could get along with $25,000. If the United States does not make a treaty with Mexico settling the so-called Chamozel dispute, there will be no question but that $25,000 will be sufficient. If they should make that treaty and they could survey the river from El Paso to Laredo, they doubtless could utilize the $50,000.

Mr. BORLAND. Mr. Chairman, the gentleman from Texas calls attention to the small amount of this appropriation as illustrating practically the point that there is no necessity for continuing the appropriation at all. I will ask the gentleman whether this is not in pursuance of an estimate by the Secretary of State?

Mr. FLOOD of Virginia. No; it is in pursuance of an agreement for a division of the cost of keeping up this bureau for the suppression of the African slave trade and the sale of liquor in certain parts of Africa. Eighteen nations are parties to this treaty. It is not an old treaty. It was made in 1890 and renewed in 1906.

Mr. BORLAND. It is our estimated proportion?

Mr. FLOOD of Virginia. Yes.

Mr. BORLAND. Estimated and reported by the Secretary of State?

Mr. FLOOD of Virginia. Reported by this bureau to the Secretary of State and through him to us. Our payments are made to the Belgian foreign office.

Mr. BORLAND. So that in this particular case we have no way of getting rid of this contribution unless we denounce the treaty.

Mr. FLOOD of Virginia. No.

Mr. GARNER. Mr. Chairman, I had no idea of criticizing this particular appropriation. I do not know that I would strike it out if I had the opportunity. I simply utilized this opportunity to call the attention of the House to the great number of appropriations in this bill in response to provisions of treaties that are from 25 to 100 years old, and which will continue to be appropriated for as long as time exists unless the House asserts itself and determines whether it is advisable to denounce that treaty by refusing to appropriate.

The Clerk read as follows:

The Secretary of the Treasury be, and he is hereby, authorized annually to pay the pro rata share of the United States in the administration expenses of the International Prison Commission and the necessary expenses of a commissioner to represent the United States on said commission at its annual meetings, together with necessary clerical and other expenses, out of any money which shall be appropriated for such purposes from time to time by Congress.

Mr. MANN. Mr. Chairman, I move to strike out the last word. These last two items concerning the International Prison Congress I believe were inserted in the bill last year, and I think are permanent law.

Mr. FLOOD of Virginia. Yes.

Mr. MANN. It is permanent law?

Mr. FLOOD of Virginia. Not the appropriation.

Mr. MANN. Oh, no; but the two items on page 13. If there is any question, I do not wish to strike them out.

Mr. FLOOD of Virginia. They were put there to dispose of the question of whether this appropriation was authorized by law.

Mr. MANN. That was put there for that purpose, and that is in the current law.

Mr. FLOOD of Virginia. Yes.

Mr. MANN. And yet if we carry it every year in an appropriation bill it is either considered surplusage or else to be an admission upon our part that we did not make it permanent law, when we thought we did last year when it was put in.

Mr. FOSTER. Does not the gentleman think that applies only for the year?

Mr. FLOOD of Virginia. Oh, no.

Mr. MANN. The second paragraph is:

The Secretary of the Treasury be, and he is hereby, authorized annually to pay the pro rata share of the United States, etc.

I think the ruling is that where the language shows clearly it does not apply to the fiscal year for which the appropriation is made, it is permanent law. If there is any question about it, why not put in the word "hereafter." There is no use of carrying this provision in the bill every year.

Mr. FOSTER. The Secretary of the Treasury has no right to pay it without an appropriation.

Mr. MANN. Oh, no. This does not authorize him to pay it without an appropriation. This is an authorization to pay this annually out of the money that shall be appropriated for such purpose from time to time by Congress, and it was inserted in the bill last year for the purpose of giving the authorization and making it permanent law.

Mr. GARNER. In other words, the provision from lines 1 to 11, inclusive, on page 13, is mere surplusage, and this appropriation on lines 21, 22, 23, and 24, on page 12, carries the appropriation.

Mr. MANN. I really think these two items do not belong here. I think that is permanent law.

Mr. FLOOD of Virginia. I think the gentleman is correct.

Mr. MANN. The first item is:

The United States shall continue as an adhering member—

And so forth.

I do not know whether the comptroller would rule that applied only to the current fiscal year, but the intention was to make it yearly.

Mr. FLOOD of Virginia. The intention was to make it permanent law.

Mr. MANN. Let us either strike it out or insert the word "hereafter" and hereafter leave it out.

Mr. FOSTER. No; let us wait and see about this thing.

Mr. HAMILTON of Michigan. Why not pass this item for the present?

The Clerk read as follows:

PAN AMERICAN UNION.

Pan American Union, $75,000: *Provided*, That any moneys received from the other American Republics for the support of the union shall be paid into the Treasury as a credit, in addition to the appropriation, and may be drawn therefrom upon requisitions of the Secretary of State for the purpose of meeting the expenses of the union: *And provided further*, That the Public Printer be, and he is hereby, authorized to print an edition of the Monthly Bulletin, not to exceed 5,000 copies per month, for distribution by the union during the fiscal year ending June 30, 1914.

Mr. FOSTER. Mr. Chairman, I move to strike out the last word.

Mr. BORLAND. Mr. Chairman, I reserve a point of order on the last proviso.

Mr. FOSTER. Mr. Chairman, I desire to ask the chairman of the committee if he can give the House any information with reference to what has become of this bulletin that is spoken of here? I know that we used to get this bulletin regularly, and a great many of us who had a little time to look it over enjoyed reading it, but for a long time I have not seen a copy of it—that is, at least it has not come to my office.

Mr. FLOOD of Virginia. I will say to the gentleman I thought it was going regularly to Members of Congress, and that they could get additional copies of it. This item that the gentleman from Missouri reserved the point of order on was put in the bill last year because so many members of the committee and of Congress thought that this was such a valuable bulletin that they desired to have additional copies.

Mr. FOSTER. I want to say, Mr. Chairman, in my judgment, there is no bulletin that is of more information, especially as to Latin America, than the bulletin issued by this bureau.

Mr. MANN. Will my colleague yield? The number provided for in the law is 5,000 copies. My understanding is that there is such a demand for the bulletins from those who make actual use of it in trade, and so forth, that they have been compelled to cut off every copy that they could from those who did not use it, in order to furnish it to those who insisted upon having it within the limit of 5,000 copies. I guess if my colleague will tell the chief of the bureau that he wants it he will get it.

Mr. FLOOD of Virginia. The director general.

Mr. MANN. If they send a copy to every Member of the House and Senate, there are 500 copies gone.

Mr. FOSTER. My colleague may be right, as far as that is concerned, that there are people to whom it is distributed who would make better use of it than many Members of Congress would; but this is a bulletin, it seems to me, that is of a great deal of interest to the people of the United States. If we are to extend our trade into South American countries, it seems to me it is important to secure the information that is to be obtained from a bulletin of this kind, and I should like to see an additional number of copies of this bulletin printed if necessary for the people of this country.

Mr. MANN. There ought to be more copies.

Mr. FLOOD of Virginia. I suggest to the gentleman to offer an amendment making it 6,000 copies, and get the gentleman from Missouri to withdraw his point of order.

Mr. FOSTER. I will wait and see what the gentleman from Missouri does.

Mr. BORLAND. Mr. Chairman, I reserved the point of order to the last proviso in the paragraph to ascertain whether there was any existing law authorizing 5,000 copies of the bulletin to be printed by the Public Printer for use and how that distribution was controlled. I agree with the gentleman from Illinois [Mr. MANN] that it is a very useful bulletin, and while I would like to have them myself for current use, yet it is so greatly desired among the business men of the district I represent that I am perfectly willing to yield my individual copy, but I have never been able, so far as I can remember now, to get a copy for any business man. My impression is that they sell this bulletin at a subscription price.

Mr. FLOOD of Virginia. Oh, I think not.

Mr. BORLAND. And they refer inquirers to the subscription price. That is my impression about it.

Mr. FLOOD of Virginia. I think the gentleman is mistaken about that. This matter was brought up before the Committee on Foreign Affairs a year ago, when these 5,000 copies were authorized, and the understanding was it was to be for free distribution, and we authorized the 5,000 on account of the great demand for it, and I believe if the gentleman would apply to the Director General of the Pan American Union he could get such copies as are necessary in his district. But from what the gentleman says and from what the gentleman from Illinois says I suggest an amendment increasing the number of copies.

Mr. BORLAND. Well, I presume the gentleman realizes that an amendment to increase the number of copies would be subject to a point of order on this appropriation?

Mr. FLOOD of Virginia. Yes; and so is the paragraph itself subject to the point of order.

Mr. HARRISON of Mississippi. Will the gentleman yield one moment in that connection?

Mr. BORLAND. Yes.

Mr. HARRISON of Mississippi. My recollection is that when the matter came up in the committee the gentleman from Massachusetts [Mr. CURLEY] was directed by the committee to draft a bill for a number of these bulletins to be gotten out. I do not know whether it was done or not.

Mr. CLINE. Will the gentleman yield?

Mr. BORLAND. For a question; yes.

Mr. CLINE. I want to make an explanatory statement in reference to the demand for these bulletins. I represent a large manufacturing district, and as some of our people are doing business in South American Republics, I have an increasing demand for them. Of course, the number of 5,000 does not go far in distribution in all of the States of the Union, and I have frequently referred my application to the Director General of the Pan American Union, and we have been supplied. I recognize, as the chairman says, there ought to be a larger publication than we now have.

Mr. CURLEY. The resolution was introduced some time ago and was referred to the Committee on Printing, which committee is considering it now, as to the distribution of 5,000 copies among the Members.

Mr. BORLAND. To be put to their credit as a document?

Mr. CURLEY. In addition to those already printed.

Mr. BORLAND. Are they put to the Members' credit automatically, or do they have to ask for them?

Mr. CURLEY. To the Members' credit automatically.

Mr. BORLAND. The printing of this bulletin for the business men and prospective exporters in the United States is about the most important benefit we get from the maintenance of this Pan American Union. I realize also that it has some diplomatic advantage in cultivating better relations, and so on. But from a practical standpoint—that is, the sum and substance of what we get at this date—I think the committee can form some plan to increase the number of bulletins to be printed. I hope the committee will bring in a report increasing the number to be issued next year.

Mr. GARRETT. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. GARRETT. Do I understand the proposition of the gentleman from Massachusetts [Mr. CURLEY], that is pending before the Committee on Printing, is for the bulletins to be published as a document for distribution among the Members?

Mr. CURLEY. Yes; some 5,000 additional copies each month.

Mr. GARRETT. Of course, the gentleman has given that thought, and he thinks it is desirable.

Mr. CURLEY. I think the resolution was passed because of the number of inquiries that have been received by myself and other members of the committee from manufacturers and others.

Mr. GARRETT. It occurs to me, I will say to the gentleman from Massachusetts, perhaps it might be wiser if the number were increased and distributed as now distributed, rather than distributed through the document room as a public document, because I have no doubt, for instance, that gentlemen representing great business cities in part have more requests, for instance, than I do, who represent an agricultural community.

The CHAIRMAN. The time of the gentleman from Missouri [Mr. BORLAND] has expired.

Mr. BORLAND. We were discussing the point of order, if the Chair please.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman's time be extended for five minutes.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the time of the gentleman from Missouri [Mr. BORLAND] be extended for five minutes. Is there objection?

There was no objection.

Mr. GARRETT. I can dispose to advantage of all I might get, but at the same time it is doubtful whether it would not be better for them to be distributed as they are now rather than so many copies to be distributed as public documents. I suggest that to the gentleman for his consideration.

Mr. BORLAND. That is a matter for the consideration of the commitee and the House. There is a good deal of force in what the gentleman from Tennessee [Mr. GARRETT] suggests. The gentleman from Massachusetts [Mr. CURLEY] and myself come from busy commercial centers, where there is an unusual demand for these documents, and I would suggest the number be doubled in view of the increasing demand that will come in the immediate future for information about these South American countries—but not in this bill.

Mr. GARNER. May I ask the gentleman from Missouri [Mr. BORLAND] if he has any idea of what it costs to publish these documents?

Mr. BORLAND. The committee has full power to conduct hearings on that subject and give us the result. I hope it will do so.

Mr. MADDEN. It is intended to make this a newspaper publication, so that it may have a large issue printed of it, or not?

Mr. BORLAND. It is a monthly bulletin.

Mr. MADDEN. On what does it treat?

Mr. CURLEY. It was suggested by the gentleman from Ohio [Mr. SHARP] that because of the manufacture of agricultural implements in his section, a good field for business might be developed in South America. He conferred with Mr. Barrett, and in one year their sales of agricultural implements amounted to more than $1,000,000. That trade they hold at the present time.

It was stated further that a shoe factory, located in Boston, which manufactures the largest quantity of women's shoes of any factory in the United States, decided to enter into competition with the Swiss factories and the French factories which sell largely in Argentina, and their attention was directed to the possibilities of trade in South America largely through the bulletins, and they have extended their business there. I do not know how many articles of manufacture this would apply to, but certainly it would be many.

Mr. MANN. Mr. Chairman, has the point of order been withdrawn?

Mr. BORLAND. I withdraw the point of order.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] moves to strike out the last word.

Mr. MANN. I understood the gentleman from Massachusetts [Mr. CURLEY] to say that there was under consideration a plan to have these bulletins issued through the document room or through the folding room.

Mr. CURLEY. I say that a resolution was introduced and referred to the Committee on Printing, requesting that they have 5,000 copies of this document printed each month for distribution by the Members of the House of Representatives. That is outside of this measure, however, and is a separate proposition.

Mr. MANN. I think it is safe to say that the Committee on Printing would not favor reporting such a resolution, and if it did, the House would not pass it.

A document of that kind is of no value to Members of Congress when printed monthly. There is not a Member of Congress here that will get his share of 5,000 copies of a monthly bulletin and send one copy to the same individual each month. It becomes a perfect nuisance to undertake it. We used to get five copies of all the geological bulletins. I do not know what other Members of Congress used to do, but for a while I sent mine to a professor of geology in the University of Chicago, and then, as his patience ran out, I sent them to the Geological Survey here, and their patience running out, the bulletins accumulated in the folding room, until finally we stopped the practice. If you want to increase the number of bulletins, the number ought to be increased slightly from one year to another as they are absorbed.

Mr. HARRISON of Mississippi. What number would the gentleman suggest?

Mr. MANN. I would say 6,000, an increase of 1,000. That additional number might be absorbed in a year or two. I do not know whether they would be or not.

Now, the gentleman from Massachusetts [Mr. CURLEY] is somewhat in error in thinking that his shoe manufacturers got their information out of these bulletins. The information they get comes from the Daily Consular Reports.

Mr. GARNER. Would it not be better to increase this, if it is necessary to make up 10,000 copies, by an increase of 1,000 copies a year? In that way they will not be distributed recklessly.

Mr. MANN. An increase of a thousand is enough, I think.

Mr. BORLAND. No increase is proposed at this time.

Mr. MANN. Yes; there is.

Mr. HARRISON of Mississippi. Mr. Chairman, I move to strike out "five thousand" and insert "six thousand" on line 1, page 14. In place of "five" make it "six."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi [Mr. HARRISON].

The Clerk read as follows:

Amend, page 14, line 1, by striking out the word "five" at the end of the line and inserting in lieu thereof the word "six."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. GARRETT. Mr. Chairman, I wish to ask the gentleman from Texas [Mr. GARNER] a question about that matter. Is there anything before the committee indicating that this bureau desires this increase at this time? I do not care to take up time about the matter.

Mr. GARNER. The bureau will do anything along this line; anything that Congress thinks proper. They do not need it, but the contention is made by the gentleman from Illinois [Mr. FOSTER], by the gentleman from Missouri [Mr. BORLAND], by the gentleman from Massachusetts [Mr. CURLEY], and various others that their constituents are interested in these bulletins, and that they can not get them either for their own use or for the use of their constituents, and under those circumstances they thought the number might be increased by a thousand copies.

Mr. HARRISON of Mississippi. Mr. Barrett was accorded a hearing before our committee on that subject, or possibly the best way to put it would be that Mr. Barrett was before the committee, and many questions were asked of him concerning this matter, and the gentleman from Massachusetts [Mr. CURLEY], at the instance of our committee, went to the Committee on Printing and asked to have the number increased.

Mr. GARRETT. It is the judgment of the committee that the number should be increased?

Mr. HARRISON of Mississippi. Yes; I think so.

Mr. MANN. It should be remembered that this printing will not be done for nothing, and they will not order any more than they need.

Mr. GARNER. This printing does not come out of this item.

Mr. MANN. Against whom will it be charged up?

Mr. GARNER. It will be charged up against the fund.

Mr. MANN. What fund will it be charged up to?

Mr. GARNER. I suppose the Public Printer is authorized to publish a certain number of documents.

Mr. MANN. He has not any fund to print it from, unless it is authorized. When we order things printed, the cost is charged up to the congressional printing fund.

Mr. GARNER. I think this would be.

Mr. MANN. Oh, no; it would not be.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Mississippi [Mr. HARRISON].

The amendment was agreed to.

The Clerk read as follows:

For the expenses of the arbitration of outstanding pecuniary claims between the United States and Great Britain, in accordance with the special agreement concluded for that purpose August 18, 1910, and the

schedule of claims thereunder, including office rent in the District of Columbia, and the compensation of arbitrator, umpire, agent, counsel, clerical, and other assistants, to be expended under the direction of the Secretary of State, and to be immediately available, $50,000.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word.

In view of the reported shooting of Americans in the streets of Mexico City, and with the earnest hope that the United States may not be obliged to intervene with armed forces, I desire to show through one case that has been brought to my attention the difficulties which have confronted the State Department in its efforts to adjust differences that recently have arisen in consequence of the interest of citizens of the United States in Mexico. On the night of October 28, 1912, as I am informed, an attack was made upon the home of Richard N. Stadden, United States vice and deputy consul at Manzanillo and a representative at that place of the Pacific Timber Co. Without discussing the propriety of Mr. Stadden's dual position, the facts as to the assault thus far remain substantially undisputed. During his absence Mr. Stadden's residence was attacked by Dr. Aristo Nunez, a Mexican citizen, who broke down the door and with a loaded rifle threatened the family. He was overpowered by servants and removed to the local jail, from which he was promptly liberated by the officials. The governor of the State of Colima was duly advised of the facts, but up to the last report through the American ambassador to the State Department no steps have been taken to apprehend or to punish the offender. There has been much correspondence upon the subject, and under date of December 5 the State Department advises that it had instructed the embassy to request certain reports of the foreign office with regard to the—

conduct of Gov. Allamino as reported by Mr. Stadden, and say that it appears to the department that there is a disposition on the part of the governor to shield Nunez from punishment for the outrage committed upon the vice consul.

The State Department's letter to the ambassador to Mexico clearly indicated its purpose to see that fair treatment was accorded our representatives at Manzanillo. But more than two months have elapsed without further information as to the intent of the Mexican Government, and the belief of the American friends of the vice consul at Manzanillo is that the sympathizers of the assailant have sufficient influence to prevent action by the local authorities. In a letter from the State Department, dated February 5, I am advised that the embassy at Mexico "has now been called upon for a report." In view of the outbreak of hostilities, however, it may not now be possible to speedily obtain the satisfaction which is due the United States in this matter, although it is not wholly creditable that an attack upon one of our own representatives to a country presumed to be friendly should stand unredressed and without satisfactory explanation for more than three months. It would indeed be deplorable if in order to maintain the honor and dignity of the United States we should be obliged to send troops into Mexico, but if even our well-intentioned diplomatic negotiations are to be trifled with, then, of course, the matter assumes a different aspect. Citizens of the United States are entitled to protection while traveling in foreign countries, and it would be making a laughingstock of our Government if we failed to afford the representatives we send abroad the assurance of our national support. [Applause.]

The Clerk read as follows:

INTERNATIONAL BUREAU OF THE PERMANENT COURT OF ARBITRATION.

To meet the share of the United States in the expenses for the year 1912 of the International Bureau of the Permanent Court of Arbitration, created under article 22 of the convention concluded at The Hague, July 29, 1899, for the pacific settlement of international disputes, $1,250.

Mr. FOSTER. I reserve a point of order against that paragraph. I should like to inquire how long this appropriation is going to continue.

Mr. GARNER. As long as they can get Congress to make it.

Mr. FLOOD of Virginia. I do not know that I can give the gentleman any definite information as to how long it is going to continue. This tribunal has been established under a treaty entered into in 1910, and there will be presented before the tribunal when it first assembles 202 American and 92 British claims. They are making up schedules of other claims which will be presented later. The treaty was negotiated by a very distinguished gentleman representing this Government and another distinguished gentleman representing the British Government, and it is necessary to have some tribunal to settle these old outstanding pecuniary claims, many of them quite old, between the citizens of this country and England and the citizens of England and this country. They may go ahead and dispose of them very rapidly, or they make take a long time. Any answer to the question would be a mere guess.

Mr. FOSTER. I see the difficulty under which the gentleman is laboring. It seems to me that in this bill we carry a great many of these small appropriations, as well as some pretty large ones, and I suppose it is necessary to make them; but I do make the point of order against the language—

And to be immediately available.

Mr. MANN. I hope my colleague will not do that.

Mr. FOSTER. If there is some good reason, I will withdraw the point of order.

Mr. MANN. This commission has been authorized by treaty for some years, and it is just getting ready to go to work and dispose of a lot of these claims. We have a number of claim bills on the calendar of the House, and gentlemen have made the terrible threat that if we did not pay the claims in full they would go before this commission. I want to see this commission get to work, and see some of these gentlemen go before the commission, and see whether they can substantiate their claims. There are a lot of these claims pending, and, as I understand it, the commission are now ready to commence operations.

Mr. FOSTER. I am not making a point of order against anything except the words—

And to be immediately available.

They had this same appropriation last year.

Mr. FLOOD of Virginia. They had the same appropriation last year.

Mr. MANN. They had the same appropriation, but they have not had a real meeting yet.

Mr. GARNER. No; they have just been using the money, that is all.

Mr. FOSTER. If that is true, then I think there is more reason for my point of order.

Mr. FLOOD of Virginia. Oh, no; the gentleman is mistaken. This appropriation provides for a tribunal in the nature of a court.

Mr. MANN. Yes.

Mr. FLOOD of Virginia. And then it provides for the organization that prepares every case to be presented to this court, and this organization has been at work getting ready the 202 American cases that are already scheduled and preparing our defense in 92 British cases that have been scheduled. The arbitrators or court have not met, but our agent and his assistants have been at work ever since the appropriation was first made.

Mr. MANN. I am not criticizing the expenditure that has been made. It is intended to assemble during this fiscal year, as I understand it.

Mr. FLOOD of Virginia. Yes.

Mr. MANN. That is the reason for making the appropriation immediately available.

Mr. FLOOD of Virginia. The additional appropriation is to be for the expenses of the court, and that is the reason we want to make it immediately available.

Mr. HARRISON of Mississippi. I will read the statement on this point of Mr. Lansing, who appeared before the committee:

The CHAIRMAN. You ask for an emergency appropriation of $8,000 to supplement the present appropriation of $50,000?
Mr. LANSING. Yes.
The CHAIRMAN. Why do you want the appropriation we make immediately available?
Mr. LANSING. I do not think we do, sir. I did not know that was in the bill. I did not look the bill over, but I do not see why that should be immediately available at all.

That was the statement of Mr. Lansing.

Mr. MANN. Mr. Lansing was not informed. As a matter of fact, this tribunal are to meet this spring for the first time, as I understand, to decide a lot of these cases upon which they have been working, and they need the money when the tribunal meet. You can be sure their side will have sufficient funds to properly have their cases presented.

Mr. FOSTER. The gentleman from Illinois thinks if they do not have this appropriation immediately available they will have to have a deficiency appropriation?

Mr. MANN. They would clearly have a deficiency appropriation.

Mr. FOSTER. If they are going to do that, I think we had better leave the language as it is. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

INTERNATIONAL CONFERENCE ON MARITIME LAW.

For the expenses of participation by the United States by officially appointed delegates in the International Conference on Maritime Law to meet at Brussels in 1913, $5,000, or so much thereof as may be necessary, to be immediately available.

Mr. FOSTER. Mr. Chairman, I reserve a point of order, and want to ask why it is necessary to make this immediately available?

Mr. FLOOD of Virginia. I do not think it is necessary.

Mr. FOSTER. Then I make a point of order against it. Mr. Chairman, I make the point of order against the words, line 16, page 18, "to be immediately available."

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

WATERWAYS TREATY, UNITED STATES AND GREAT BRITAIN: INTERNATIONAL JOINT COMMISSION, UNITED STATES AND GREAT BRITAIN.

For salaries and expenses, including salaries of commissioners and salaries of clerks and other employees appointed by the commissioners on the part of the United States with the approval solely of the Secretary of State, including rental of offices at Washington, D. C., and necessary traveling and other expenses, and for the one-half of all reasonable and necessary joint expenses of the International Joint Commission incurred under the terms of the treaty between the United States and Great Britain concerning the use of boundary waters between the United States and Canada, and other purposes, signed January 11, 1909; as well as for the payment of necessary expenses incurred and compensation for services rendered under the direction of the Secretary of State in the examination and preparation of cases involving the use, distribution, or diversion of waters and other questions or matters of difference covered by the treaty of January 11, 1909, between the United States and Great Britain, and in representing this Government and the American interests involved in the presentation of such cases before the International Joint Commission constituted under that treaty: *Provided*, That any counsel employed shall be at a fixed compensation, not to exceed $4,000 per annum, the unexpended balance of the appropriation made for this object for the fiscal year 1913 is hereby reappropriated and made available for this purpose.

Mr. FITZGERALD. Mr. Chairman, I make a point of order that the Committee on Foreign Affairs has no jurisdiction of this item; that it belongs to the sundry civil appropriation bill.

Mr. FLOOD of Virginia. Mr. Chairman, this commission was created in pursuance of the treaty of January 11, 1909, between the United States and Great Britain, to pass upon the application approved by either Government for the use, obstruction, or diversion of boundary waters or one which might affect the levels on the other side of the boundary, the construction of dams, the obstruction of boundary waters, and a few other questions.

This commission was authorized by treaty. Under the rules of the House all matters growing out of treaties go to the Committee on Foreign Affairs. The rule is clear on this point, and there can be no question about the fact that that is the appropriate committee to consider this matter. That committee appropriates for every other commission that is created by a treaty. There can be no difference in principle between this commission and these other commissions. For example, the expenses of the boundary-line commission between this country and Canada are provided for by the Foreign Affairs Committee in this bill, and so are all the others. How can there be any difference in principle as to the committee that has jurisdiction of that question and this commission?

It is true that there have been three appropriations made by the Committee on Appropriations for this commission. The first was on June 25, 1910, for $75,000, and when only about $10,000 of it had been used the second one, of $75,000, was made on March 4, 1911; and on August 24, 1912, the third appropriation, being the unexpended balance of $103,000, was made. But the fact that the Committee on Appropriations improperly assumed jurisdiction of this matter can not operate to oust the Committee on Foreign Affairs from its proper jurisdiction when the latter committee asserts that jurisdiction.

This year the estimate was sent by the Secretary of State to the Committee on Foreign Affairs, and after that a letter was sent to the Speaker, undertaking to withdraw the estimate from the Committee on Foreign Affairs. But the State Department can not determine the jurisdiction of the committees of this House, and that attempted withdrawal can not deprive us of the rightful jurisdiction. The rules of this House give this committee jurisdiction of questions arising out of the treaties, and this commission owes its existence solely to a treaty. There would not be any authority for this commission except for this treaty. There is no other committee that ought to deal with this commission, because the Committee on Foreign Affairs is the one to determine all other questions arising out of the treaty, including the question of its abrogation.

I believe it is in the interest of good legislation, the orderly conduct of business and economy, for the Committee on Foreign Affairs to handle this matter.

Mr. FITZGERALD. Mr. Chairman, the gentleman from Virginia is mistaken when he says that all matters growing out of treaties are carried in the diplomatic and consular bill. For many years the appropriations for an international waterway have been carried in the sundry civil bill. The appropriations for the International Congress to Promote Letters of Exchange have been carried in the sundry civil bill. Different items have been carried in this bill. This appropriation originated in 1911 and was carried in that year, 1912–13, in the sundry civil appropriation bill.

Mr. KENDALL. If the gentleman from New York will pardon me, did it not originate in the sundry civil bill for the reason that the treaty was ratified after the diplomatic and consular appropriation bill had been passed by the House?

Mr. FITZGERALD. I can not answer that question. It was carried in the sundry civil bill for 1911, the sundry civil bill of 1912, and the sundry civil bill of 1913, and certainly the diplomatic and consular bill had not passed the House prior to the ratification of the treaty under which these appropriations were made.

Mr. GARNER. Will the gentleman yield?

Mr. FITZGERALD. I would like, first, to make a statement. Now, the act of June 22, 1906, provided:

Hereafter the estimates for expenses of the Government, except those for sundry civil expenses, shall be prepared and submitted each year according to the order and arrangement of the appropriation acts for the year preceding. And any changes in such order and arrangement, and transfers of salaries from one office or bureau to another office or bureau, or the consolidation of offices or bureaus desired by the head of any executive department, may be submitted by note in the estimates. The committees of Congress in reporting general appropriation bills shall, as far as may be practicable, follow the general order and arrangement of the respective appropriation acts for the year preceding.

For the year preceding, and the year preceding that, this item has been in the sundry civil appropriation bill.

In the Forty-ninth Congress the so-called Blount decision was rendered. A question arose as to the jurisdiction of the respective committees, and Mr. Blount determined that the only way in which it was possible under certain circumstances to determine the jurisdiction of the various committees was to examine the bills as reported and passed at the various sessions, and where under the practice and custom of the House an item originated and belonged in one appropriation bill, it belonged in that bill and could not be placed in another bill. Mr. Blount's decision was followed by a decision by Mr. Payson in the Fifty-first Congress, and by Mr. Hopkins in the Fifty-fifth Congress, and a long line of decisions have been to the effect that items appearing in one appropriation bill can not be transferred to an appropriation bill under the control and jurisdiction of some other committee.

The gentleman states that all matters affecting treaties or growing out of treaties belonged to the Committee on Foreign Affairs. I call the attention of the Chair to volume 4 of Hinds' Precedents, section 4050, to the effect that—

Awards of money to foreign nations in pursuance of treaties for the adjustment of claims or as acts of grace have been reported by the Committee on Appropriations.

Several instances are given in which that happens, and under the rule referring to the items carried in the sundry civil appropriation bill these items are referred to as characteristically of the sundry civil appropriation bill.

One of the objects of the enactment of the statute of 1906 was to prevent and break up a practice that had long been indulged in by the departments. An item would originate and be carried in one if the general supply bills of the House, and for one reason or another a department desiring to transfer that item out of the jurisdiction of one committee to the jurisdiction of another would shift the estimates from one part of the Book of Estimates to another, in the hope that it would in that way be sent to some different committee. I have two decisions here, in volume 4, Hinds' Precedents, sections 4048 and 4184, to the effect that—

The acts of the executive departments in submitting estimates are not of effect in determining questions of jurisdiction.

Mr. Boutell, in passing upon the question of order raised, when he held to that effect, said:

I do not know of any place where the noninterference of the executive with the legislative departments should be more carefully or more jealously guarded than in this House; and whether the Book of Estimates, calling for certain items from certain committees, is based upon an ignorance of the rules of this House or upon a conscious intention to influence the course of appropriations contrary to the rules of the House, the present occupant of the chair believes that it would be the unanimous opinion of this body that such estimates sent in such way should not be construed as affecting in any way the rules of this body.

Moreover, Mr. Chairman, this paragraph contains an item which is not authorized by the treaty or any law, and that is the provision for a counsel at a fixed compensation of $4,000 a year. The State Department has been endeavoring ever since the appropriation was made to have established in the Department of State, payable out of the appropriation made for this commission, a position to be filled by the appointment of some lawyer, whose services, whatever their character, would not be for the commission, and should in no way be charged to the commission.

The act of 1906, controlling the committees of Congress in reporting the general appropriation bills, is binding in this instance, and as the committee has reported this contrary to

the provision of the statute, it is, for that reason, subject to a point of order.

Mr. GARNER. Mr. Chairman, it will be observed by the Chair that the only reason given by the gentleman from New York [Mr. FITZGERALD] why the Foreign Affairs Committee has no jurisdiction is the fact that his committee previously appropriated for this waterway commission. The Chair will remember also that the gentleman from New York gave as one of his reasons why this rule should be adhered to the fact that the different departments of government might apply to another committee of the House in case one committee refused to give them the amount of money asked for, and therefore it was desirable to continue jurisdiction with the committee that originally had the appropriation. Mr. Chairman, that is just exactly what happened in this instance. The Committee on Foreign Affairs had jurisdiction of this question to the exclusion of any other committee of this House. Those gentlemen interested in this particular appropriation applied to the Committee on Foreign Affairs, and the Committee on Foreign Affairs did not grant their request with reference to the amount of the appropriation they wanted. They went downstairs to the Committee on Appropriations, and the Committee on Appropriations gave them not only all they wanted, but more than they could possibly use. They repeated the same thing the next year, and I call attention to the hearings the committee had this year to illustrate the situation with reference to this identical appropriation——

Mr. FITZGERALD. Will the gentleman permit me—he is in error as to what happened. There has not been, to my recollection, any estimate before the Committee on Foreign Affairs on this matter prior to this year.

Mr. GARNER. Yes; last year there was an estimate of $150,000 first sent in and then an estimate in a special letter to the Committee on Foreign Affairs reducing it to $75,000, and the Committee on Foreign Affairs, after investigating the matter, found out that this commission had more money than they could possibly spend. I call attention to the fact now that this commission did not take its office until the 9th day of March, 1911. Seventy-five thousand dollars was appropriated for the fiscal year ending July 1. This commission did not spend more than one-third of the money during that fiscal year, or less than one-third of it.

Mr. FLOOD of Virginia. Ten thousand dollars.

Mr. GARNER. They spent about $10,000 of the $75,000, and the Appropriations Committee, this committee that wants to oust the jurisdiction of Foreign Affairs in order that they may practice economy, immediately appropriated $75,000 and all of the unexpended balance. [Applause.] I have heard the gentleman from New York [Mr. FITZGERALD] talk economy, and when they come in here and request a committee which is practicing economy, practicing what they preach, and undertake to oust them from the jurisdiction of an item which they did not try to protect the Treasury against, it shows that the committee has been either extravagant or appropriated in gross ignorance of what the conditions or requirements were. [Applause.] Mr. Chairman, not only on this occasion but last year, as I said, there was an estimate of $150,000 for this identical item, and when the Foreign Affairs Committee began to investigate it a letter was sent in saying they wanted to reduce the item from $150,000 to $75,000, and when we investigated it further we found that they did not want a dollar, that this commission had never met, as a matter of fact, but one time. They were not prepared to do any business. And to further illustrate the want of necessity for this appropriation at all, I call attention to the fact that out of this appropriation they not only had $75,000 a year for these commissioners, but the President has allowed them, by Executive order, railroad fare, sleeping-car fare, all expenses paid, and then the small allowance of $10 a day to get something to eat.

Mr. HARRISON of Mississippi. And a suite of offices.

Mr. GARNER. I find no hearings before the Appropriations Committee to warrant any of these facts, and yet the gentleman from New York comes in here and makes the point of order against this item being carried in this bill, claiming that originally jurisdiction belonged to his committee, a committee that, I submit the facts show, has not investigated the necessity of such appropriation, but immediately took charge of it and continued to appropriate blindly or extravagantly for this service.

Mr. COOPER. Mr. Chairman, the gentleman from New York [Mr. FITZGERALD] makes the point of order that, under the rules, the pending paragraph could not be reported by the Committee on Foreign Affairs, because, as he says, that committee had no jurisdiction of the subject matter.

Paragraph 11 of Rule XI provides that the jurisdiction of the Committee on Foreign Affairs shall extend to all measures touching "subjects relating" to the relations of the United States with foreign nations, including appropriations therefor.

To decide the point of order two questions must be answered: First, does this paragraph concern the relations of the United States with a foreign nation? If so, does the appropriation contained in it have reference to such relations?

The paragraph refers plainly, and refers only, to the foreign relations of the United States. It provides for payment of the salaries and expenses of an "international" joint commission—an international joint commission appointed under the terms of a treaty between the United States and Great Britain. To consider what?

The use of the boundary waters between the United States and Canada. How is it possible, Mr. Chairman, to have any subject before the House of Representatives more properly included under the term "foreign relations" than are the proceedings of an international joint commission appointed to determine what shall be done with the boundary waters between this country and Canada, and appointed in pursuance of a treaty?

This is not a domestic affair of the United States; it is not a domestic affair of Great Britain. It is an international affair. The meetings of the commission must be joint meetings, both Canada and the United States being represented. Plainly the subject matter of this paragraph touches the relations of the United States with a foreign nation, and therefore the appropriation to pay the salaries and expenses of our representatives on this international joint commission was properly reported from the Committee on Foreign Affairs.

The gentleman from Texas [Mr. GARNER] was, I think, a little in error, although this perhaps is not germane to the discussion of the point of order, when he said that there had been but one meeting of the commission. I believe that the commission had four meetings and used up about 25 days out of 365.

Mr. MANN. Will the gentleman yield?

Mr. COOPER. Yes.

Mr. MANN. The gentleman from Texas [Mr. GARNER] was in error in stating they had only one meeting, and the gentleman from Wisconsin is in error in stating that they had only four meetings.

Mr. COOPER. It is immaterial. The number of meetings is not important. They did not meet 30 days altogether.

Mr. MADDEN. Does anybody know whether they have been traveling and covered the ground?

Mr. COOPER. They have been traveling. There is a gentleman on the floor who has the items.

Mr. FLOOD of Virginia. I have all the items of the expenditure. They are principally for salaries.

Mr. COOPER. The former chairman of the Committee on Appropriations, now a member of the International Joint Commission, knew that this subject was before the Committee on Foreign Affairs, but he went to the Committee on Appropriations. He ignored the Committee on Foreign Affairs and went to the committee of which he had been chairman. Why? Not because that committee had jurisdiction of this subject.

Mr. CANNON. Will the gentleman allow me? If he knows of an improper expenditure, I suggest to him that it is his duty to canvass it here and take us all into his confidence.

Mr. COOPER. I will say in reply to the distinguished gentleman from Illinois——

The CHAIRMAN. The gentleman from Virginia [Mr. SAUNDERS] is recognized.

Mr. SAUNDERS. The gist of the point of order made by the gentleman from New York is that the Committee on Foreign Affairs is appropriating contrary to law. If the Committee on Foreign Affairs has jurisdiction under the rules of this subject matter, then the fact that some other committee may have been appropriating from year to year in relation to the same, can not operate to oust the jurisdiction of the former committee. It is a familiar proposition that if appropriations are made from year to year for which there is no authority of law, these antecedent appropriations furnish no authority for a subsequent appropriation of the same character. The fact that the Committee on Appropriations may have appropriated in respect of this particular item, does not serve to divest the proper committee of its appropriate jurisdiction. What do the rules say with respect to the jurisdiction of the Committee on Foreign Affairs:

It has a broad jurisdiction over foreign relations, including bills to establish boundary lines between the United States and foreign nations.

In the year 1910, a treaty was made between Great Britain and the United States. A brief citation is made from that treaty to show its comprehensive scope, as well as plain intent:

Whereas a treaty between the United States of America and His Majesty the King of the United Kingdom of Great Britain and Ireland and of the British dominions beyond the seas, Emperor of India, to prevent disputes regarding the use of boundary waters and to settle all

questions which are now pending between the United States and the Dominion of Canada involving the rights, obligations, or interests of either in relation to the other or to the inhabitants of the other along their common frontier, and to make provision for the adjustment and settlement of all such questions as may hereafter arise.

This treaty unquestionably relates to the very matters which are expressly committed under the rules to the jurisdiction of the Committee on Foreign Affairs. Hence in making the appropriation to which objection is offered, they have not assumed jurisdiction. On the contrary they have simply exercised their own jurisdiction. Whatever some other committee has heretofore done in making appropriations for this subject matter, however often those appropriations may have been made, they do not operate, and can not operate, to divest the proper committee of jurisdiction, unless the familiar rules and precedents of this body are utterly disregarded. It further appears in this particular case that the estimates for this expenditure were submitted to the Committee on Foreign Affairs. Later the effort was made to withdraw these estimates for submission to another committee. This abortive effort on the part of the department that submitted the estimates, is no more potent to divest the jurisdiction of the Committee on Foreign Affairs, than the appropriations heretofore made by another committee. Jurisdiction plainly attaches under the rules to the Committee on Foreign Affairs.

Mr. FITZGERALD. Mr. Chairman, the gentleman from Texas [Mr. GARNER] made certain references to the expenditure of this commission, to their character, and, if I understood him correctly, to the impropriety of certain allowances. The gentleman from Wisconsin [Mr. COOPER] has stated that the reason that this item has been carried and is now sought to be carried in the sundry civil bill is the fact that one of the commissioners was a former Member and the chairman of the Committee on Appropriations, and therefore he went to that committee, presumably from the statement of the gentleman from Wisconsin, because that would affect the judgment of the committee in the performance of their public duties.

Mr. Chairman, the identity of any persons affected by an appropriation has never made any difference to me. So far as I am concerned I do not pay any attention to such statements as these of the gentleman from Wisconsin. I believe that the Members of this House will recognize the fact that in the discharge of my public duties I have not been influenced by the consideration that any particular individual will be benefited by this or any other item.

This commission originally consisted of Mr. James A. Tawney, formerly a Member of the House and chairman of the Committee on Appropriations; the late former Senator Thomas H. Carter, of Montana; and the Hon. Frank S. Streeter, if I recall the name correctly, of the State of New Hampshire. After the death of Senator Carter, former Senator Turner, of the State of Washington, was appointed to his place upon the commission.

After the commission was appointed the then Government of Canada—I think it was known as the Laurier government—selected three commissioners on the part of Canada and forwarded their names to Great Britain, where it was necessary for them to be confirmed, if I recall correctly, by the Privy Council. Before action was taken in Great Britain upon the nominations submitted by the Laurier government the elections, growing out of the reciprocity bill, took place in Canada, and the Borden government succeeded the Laurier government. The confirmation of the nominations was held up, and a delay took place in the submission of the nominations for the membership of this commission by the Borden government to the Privy Council. Pending action, the gentlemen who had first been named had had, if I recall correctly, an informal meeting, and then awaited the action of the Borden government. The names of men representing the party that was successful in the election were substituted for the first nominees and more delay occurred, and the result was that a very considerable time, as I recall, elapsed before it was possible for this joint commission to meet since there were no members qualified on the part of the Canadian Government.

But that did not alter the fact that under the law the American commissioners had been appointed, had been confirmed, and were entitled to their compensation.

Mr. GARNER. Mr. Chairman, may I interrupt the gentleman right there?

Mr. FITZGERALD. Yes.

Mr. GARNER. Having made the statement that I did, to the effect that the appropriation was made in 1912 without reference to the amount in hand at that time, or the necessity for additional funds for the commission that year, when there was sufficient money on hand then to run it for another year, does not the gentleman think that under those conditions the Committee on Appropriations was not justified at that time in making an appropriation of $75,000?

Mr. FITZGERALD. I think not, because it appeared that the commission, so far as it could be anticipated, in the transaction of its business would require a certain fund, and the fact that the amount was not expended was not an indication of extravagance on the part of the commission.

Mr. GARNER. I do not contend that the commission was extravagant, but here is my contention: I called the gentleman's attention to the fact that when they made that $75,000 appropriation at the end of the fiscal year they had most of the $100,000 unexpended. They did not need any of the $75,000, and they had $25,000 of the $100,000 on hand. I have the statement of Mr. Busbey when he appeared before the committee.

Mr. FLOOD of Virginia. I have the statement of the appropriations. The first appropriation for this commission was made on June 25, 1910, for $75,000, and during the next fiscal year for which that appropriation was made the commission expended $10,630. Then the second appropriation was carried in the deficiency act of March 4, 1911. The amount was $75,000, when they had $65,000 on hand. Then, in August, 1912, when the gentleman from New York was chairman of the committee, the unexpended balance, which was $103,000, was reappropriated.

Mr. FITZGERALD. That is true, and at that time the commission was for the first time in a position where it was anticipated that it could go ahead and transact its business.

Mr. FLOOD of Virginia. No; the Canadian commission had been appointed during the year 1911, and so, when that appropriation was made, the commission were entirely qualified to transact business, and early in the year 1912 they held their first meeting. But during the calendar year 1912, after they had organized and were ready to investigate all these questions, according to the statement of Mr. Busbey, their secretary, that commission were not in session over five weeks, and they only undertook to investigate one single question, a question relating to the Lake of the Woods, and nearly every dollar of money that they spent was taken up in the salaries of the commissioners, the salaries of a secretary, of clerks and stenographers, traveling and maintenance expenses, and the rent of luxurious quarters here in the Southern Building.

Mr. FITZGERALD. Mr. Chairman, as I recall the provisions of the treaty, this commission is somewhat unique in that its determinations are final and binding upon both Governments.

Mr. FLOOD of Virginia. As to some of the questions before it, but not all questions.

Mr. FITZGERALD. As to some of the questions. It is more like a final court than a commission that recommends. And as there had never been, as I recall, a situation like that, one of the difficult and the preliminary thing to be determined was the rules of procedure and the methods by which they should work. Then a question arose——

Mr. FLOOD of Virginia. May I interrupt the gentleman for a moment?

Mr. FITZGERALD. Certainly, but just permit me to complete my statement. A question arose then, as I recall, as to whether individuals should be permitted to institute proceedings before this commission, or whether they would be compelled first to apply to their respective Governments, and to have their Governments institute the proceedings. Now, the gentleman from Texas referred to the fact——

Mr. FLOOD of Virginia. Let me interrupt the gentleman there. The gentleman says a very difficult part of their work was to establish rules of procedure, and yet, according to the testimony of Mr. Busbey before the Committee on Foreign Affairs, the meeting at which they determined those things lasted less than a week.

Mr. HARRISON of Mississippi. Three days.

Mr. FITZGERALD. That may be true, Mr. Chairman, but the commissioners in advance had worked out and exchanged views and worked the rules into shape, and until they had finally got the drafts and the proposals in shape they did not meet. When they met at the city of Washington, according to my recollection, they thrashed out the question after the preliminary work had been done.

Now the gentleman from Texas [Mr. GARNER] has criticized certain allowances made to these American commissioners for expenses and subsistence made, as he states, pursuant to an executive order of the President. I do not find in this provision reported by the Committee on Foreign Affairs any limitation which would eliminate these abuses, if they be abuses, or which would curtail these allowances if they be improper.

Mr. FLOOD of Virginia. If the gentleman will allow me to interrupt him, we did this——

Mr. FITZGERALD. If the gentleman will permit me, the most ineffective method of legislating is to declaim against al-

leged abuses, criticize men for doing improper acts, and not apply the simple remedy of stopping them by appropriate language in the provision that makes the money available for the service.

Mr. FLOOD of Virginia. I will say to the gentleman that the Committee on Foreign Affairs put some very appropriate language in there that will stop the abuses complained of. We put in there language that cut down the appropriation this commission asked for. They asked for the unexpended balance and $75,000 additional. We gave them the unexpended balance, which is $80,000, which will curtail their extravagance.

Mr. FITZGERALD. The gentleman will not curtail any expenses by refusing to appropriate for services which under the law must be performed and for which under the law deficiencies can legally be incurred. The way to limit abuses and abolish them is to prohibit the expenditure of the allowances, or limit them to terms and conditions which, after investigation, are deemed appropriate.

Mr. GARNER. Mr. Chairman, I want to plead guilty to the charge of the gentleman from New York of having failed to itemize the appropriations in these unexpended balances.

Mr. FITZGERALD. I am not speaking of the appropriations.

Mr. GARNER. But I want to call the gentleman's attention to the fact that the committee of which he is chairman has made a lump appropriation for three consecutive years, without outlining what these commissioners should receive or what their expenses should be. I am simply following in his footsteps to the extent of saving $75,000.

Mr. FITZGERALD. I was not criticizing the fact that the appropriation had not been itemized.

The CHAIRMAN. The Chair will remind gentlemen that the question before the House is the point of order made by the gentleman from New York on the paragraph, and gentlemen are traveling some ways beyond that.

Mr. FITZGERALD. Mr. Chairman, I was simply referring to some statements that have been made here. I was not criticizing the fact that the appropriation had not been itemized. That would have made no difference. If the expenditure is authorized, it can be incurred whether Congress appropriates the money or not. If the President has improperly prescribed allowances for these commissioners, either for subsistence or traveling expenses, the way to cure the abuse is by prohibiting any expenditure for that purpose specifically.

I do not agree with the gentleman from Virginia [Mr. SAUNDERS]. The question has arisen in the past, and under the decisions that I have referred to—one by Mr. Blount, one by Mr. Payson, one by Mr. Hopkins—it has been held that where items have been carried in appropriation bills for a series of years the Chair will look to the condition of the appropriations, and that will control. In addition to that, I have referred to the statute of June 22, 1906, which undoubtedly makes this a violation of that act when it attempts to carry a provision over which the committee has no control.

The CHAIRMAN. The Chair is ready to rule. The Chair will not indulge in any argument, but he will say that he does not agree with the contention of the gentleman from New York that the Committee on Foreign Affairs has no jurisdiction over this matter. The Chair believes that the committee has jurisdiction over it, and has authority to make the appropriation. The point of order is therefore overruled.

Mr. FITZGERALD. Mr. Chairman, it might not affect the action of the Chair, but I hope the Chair did not overlook the fact that this paragraph creates an office not now authorized by law. The counsel provided there is not authorized in any treaty.

The CHAIRMAN. The Chair will say to the gentleman from New York that the Chair did not hear that point of order made.

Mr. FITZGERALD. I made that point of order.

The CHAIRMAN. There was some discussion that the Chair could not hear.

Mr. FLOOD of Virginia. I concede the point of order.

Mr. FITZGERALD. Then that would take out the whole paragraph.

The CHAIRMAN. The Chair did not understand the gentleman from New York to make that point of order.

Mr. FLOOD of Virginia. The point of order is to the proviso.

Mr. FITZGERALD. But it takes out the whole paragraph.

Mr. FLOOD of Virginia. I do not concede the point of order to the whole paragraph.

Mr. FITZGERALD. If the point of order is sustained to any part of it, it takes out the whole paragraph.

The CHAIRMAN. What part does the gentleman from New York make the point of order to?

Mr. GARNER. Mr. Chairman, just a moment. I submit that the provision objected to by the gentleman from New York is not subject to a point of order unless the entire paragraph on the same ground is subject to a point of order. For instance, this paragraph authorizes—

Salaries and expenses, including salaries of commissioners and salaries of clerks and other employees appointed by the commissioners on the part of the United States with the approval solely of the Secretary of State.

I submit to the Chair that under this general provision you can appoint and employ counsel, and the committee has a right to limit as a matter of limitation the salary to be paid one of these employees.

The CHAIRMAN. Did not the Chair understand the chairman of the committee to concede that the point of order was well taken to that part of the paragraph in lines 17 to 21, inclusive?

Mr. FLOOD of Virginia. Mr. Chairman, I was perfectly willing for that part to go out, but the point made by the gentleman from Texas [Mr. GARNER], that the treaty gives full authority to provide for all employees, may be well taken—all employees that are necessary, and counsel is deemed necessary, and therefore I do not think the point of order would lie.

Mr. GARNER. I call the attention of the Chair to this one fact, that this treaty authorizes the employment of all commissioners, clerks, employees, and everyone necessary to carry it into effect. Suppose the committee had put in a proviso that the commissioner should receive only $6,000, or a proviso that the clerk should receive only $2,000. Would the gentleman from New York or anyone contend that that limitation on a salary of these employees was subject to a point of order? We are simply limiting the amount of money that can be paid counsel employed under the general provisions of this treaty authorizing the employment of different ones, and we can limit the payment to the clerk, or payment to the stenographer, or the amount paid to the commissioner, or make any other limitation we desire to place on it. We have only sought in this instance to limit the amount to be paid a counsel.

Mr. FITZGERALD. Mr. Chairman, I do not wish to take an unfair advantage of these gentlemen in this matter. Counsel can not be employed under the treaty. The State Department has been endeavoring to obtain authority to employ counsel, and the purpose of this item is not to limit the compensation of counsel, but to enable them to employ a counsel that the commission says is not needed and that the commission says should not be charged against the expense of the commission. If the treaty authorizes the employment of counsel, it is the duty of the gentleman from Virginia to produce the authority. I assert that it does not.

Mr. MANN. Mr. Chairman, even if the treaty authorized the employment of counsel the language in the paragraph is still subject to a point of order. If the treaty authorizes the employment of counsel as employees, it leaves it to the commission to determine how they shall be paid. Of course under the Holman rule, or as a limitation, you could insert a provision limiting the amount that shall be paid, but the Chair will notice on line 17 that—

Any counsel employed shall be at a fixed compensation.

That is legislation. If the commission now have authority to employ counsel, they have authority to employ counsel at a fixed compensation or not at a fixed compensation, and the very purpose of that language, as the gentleman will concede, is to require them to employ counsel at a fixed compensation, and that is legislation.

The CHAIRMAN. The Chair understands the gentleman from New York to make a point of order against lines 17 to 21, inclusive, on page 19?

Mr. FITZGERALD. Mr. Chairman, my point is against the paragraph, and if any portion of the paragraph is subject to a point of order the entire paragraph is subject to a point of order.

Mr. MADDEN. Mr. Chairman, this section of the bill does not appropriate for a counsel. It simply authorizes the employment of counsel at a fixed salary. It seems to me that it simply limits the authority which the commission already has.

Mr. FITZGERALD. But they have no authority.

Mr. MADDEN. If they have not any authority, then this seeks to give them authority.

Mr. CANNON. And that is legislation.

Mr. MADDEN. And it must be subject to a point of order. Under this provision of the paragraph you could employ 50 counsel. The language says—

That any counsel employed shall be at a fixed compensation.

It does not say that one counsel shall be employed; it does not say that any counsel shall be employed; but it does say that any counsel employed shall be employed at a fixed compensation not to exceed $4,000.

Mr. COOPER. Mr. Chairman, in my judgment, the proviso relates rather to what appears after the semicolon in line 6, on page 19, as follows:

As well as for the payment of necessary expenses incurred and compensation for services rendered under the direction of the Secretary of State in the examination and preparation of cases involving the use, distribution, or diversion of waters, and other questions or matters of difference covered by the treaty of January 11, 1909, between the United States and Great Britain, and in representing this Government and the American interests involved in the presentation of such cases before the International Joint Commission constituted under that treaty.

That part of the paragraph plainly is a provision which contemplates the employment of counsel to prepare and present cases before the commission. The paragraph as a whole appropriates the unexpended balance—$80,000—for all the purposes therein mentioned, including employment of counsel. Then follows the proviso limiting the amount which can be paid to any one counsel. It would seem that the proviso can well be considered a limitation proper under the rules.

Mr. FLOOD of Virginia. Mr. Chairman, if I may be permitted to do so, I will offer an amendment striking out those words.

Mr. FITZGERALD. But the gentleman can not offer an amendment when a point of order is pending.

Mr. FLOOD of Virginia. Then I concede the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. FLOOD of Virginia. Mr. Chairman, I offer as an amendment the whole paragraph, with the exception of the word "*Provided*," in line 16, and, in line 17, the words "That any counsel employed shall be at a fixed compensation, not to exceed $4,000 per annum."

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

WATERWAYS TREATY, UNITED STATES AND GREAT BRITAIN: INTERNATIONAL JOINT COMMISSION, UNITED STATES AND GREAT BRITAIN.

For salaries and expenses, including salaries of commissioners and salaries of clerks and other employees appointed by the commissioners on the part of the United States, with the approval solely of the Secretary of State, including rental of offices at Washington, D. C., and necessary traveling and other expenses, and for the one-half of all reasonable and necessary joint expenses of the International Joint Commission incurred under the terms of the treaty between the United States and Great Britain concerning the use of boundary waters between the United States and Canada, and other purposes, signed January 11, 1909, as well as for the payment of necessary expenses incurred and compensation for services rendered under the direction of the Secretary of State in the examination and preparation of cases involving the use, distribution, or diversion of waters and other questions or matters of difference covered by the treaty of January 11, 1909, between the United States and Great Britain, and in representing this Government and the American interests involved in the presentation of such cases before the International Joint Commission constituted under that treaty, the unexpended balance of the appropriation made for this object for the fiscal year 1913 is hereby reappropriated and made available for this purpose.

Mr. CANNON. Mr. Chairman, I do not desire to get into a wrangle here about the loose talk that has been indulged in upon a point of order that was aliunde the point of order.

I am perfectly willing, if improper action has been had by anybody in connection with appropriations or legislation that is to be made, that it should be criticized. This commission, as I understand it, is a quasi court. Its jurisdiction under the treaty is important, and I desire to place, without taking time to read all of it, without objection, the history of this commission in the RECORD. Now, presto! Did this commission on the part of the United States, under this treaty, spring full-armed, like Minerva from the brain of Jove, with full power to call the spirits from the vasty deep and make a decision and award without regard to anybody else?

Mr. HAMILTON of Michigan. Minerva did not have any authority like that.

Mr. CANNON. She had pretty large authority, according to Grecian mythology. My friend from Michigan knows some things, but he was not there when Minerva came, and people say I was. [Laughter and applause.]

Mr. HAMILTON of Michigan. I did not suppose the gentleman from Illinois heard my observation.

Mr. CANNON. My friend's observations are always interesting.

Mr. HAMILTON of Michigan. The gentleman's hearing is becoming very acute.

Mr. CANNON. Oh, yes. Now, seriously, Mr. Chairman, the object of this treaty was that the water levels of the Great Lakes, the Lake of the Woods, various questions arising touching international borders, should be settled in some way between Canada and the United States or Great Britain and the United States. It provided for a commission by the United States and a commission by Canada. Now, then, the commission was appointed as the treaty provided, and it was the fixed law of the land when it was ratified on the part of the United States. It has already been explained that there was some delay in appointing the Canadian commission that was not expected, growing out of affairs in Canada and a change of government there.

But early in 1912 the Canadian commission was appointed and the joint commission had meetings, not one meeting but several meetings. They met. How was the commission to proceed? Why, it was to proceed under rules and regulations. They met, considered the rules, made the rules, which were agreed to on the part of the United States and on the part of Canada. Well, how were questions to be presented? By the United States on one hand and by Canada on the other. That was the only way they could get jurisdiction. They could not roam around loose and assume jurisdiction, but it had to be submitted and it was submitted in many instances; four important instances, as the history which I will put in the RECORD shows, one touching the Lake of the Woods, which involved an investigation touching the tributaries of that lake; touching the boundary waters. Under the treaty made prior to that time, as I recollect the treaties heretofore, Canada owns to the center and we own to the center; and there were questions as to how Canada waters would be affected on one hand and waters of the United States on the other.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CANNON. I ask for five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. CANNON. Then came the question of the pollution of the waters. Now, the history shows that the engineers have been appointed—designated by Canada, designated by the commission on our part—to protect the interests of the United States and her citizens——

Mr. STEENERSON. Will my colleague yield?

Mr. CANNON. Yes.

Mr. STEENERSON. Is the gentleman aware of the fact that this question of the Lake of the Woods not only affects the actual water in the lake, but affects the harbor improvements on the lake and hundreds of thousands of acres of land settled on by homesteaders involving values amounting to millions of dollars?

Mr. CANNON. Oh, certainly, there could not be any more important question that could come before this commission than the subjects submitted. By whom? Under the treaty by the United States upon one hand and Canada upon the other.

Mr. STEVENS of Minnesota. Will the gentleman yield?

Mr. CANNON. In a moment. Can this commission turn a double somersault? Has it power to go out and view the land? Was that contemplated? It is a quasi court with quasi administrative powers and it proceeded in an orderly way. The members of the commission are not surveyors, so far as I know—not engineers. Subjects submitted to the commission had to be heard, and heard upon their merits.

Mr. STEVENS of Minnesota. Has the gentleman any information as to the first proposition, I think, submitted to this commission, practically from this House, which was concerning the Nameukan dam, on a bill introduced by the gentleman from Minnesota [Mr. MILLER] which came up before the Committee on Interstate and Foreign Commerce, which recognized there was an international question in it? There was a dispute over it which almost amounted to bloodshed and would have made international complications, so the Interstate and Foreign Commerce Committee of this House directed that the proper department of the Government submit it under the treaty to which the gentleman has just alluded.

Mr. MANN. That is the dam at Kettle Falls?

Mr. CANNON. I am not informed touching that matter whether the greater included the less.

Mr. STEVENS of Minnesota. It is Rainy River.

Mr. CANNON. That matter is shown in the history, and under consideration by this commission, and the engineers are at work; and experts are preparing the cases upon the part of the United States and the Canadian experts are preparing the cases upon the part of Canada.

And yet they say, "What has this commission done?" As for the Livingston Channel, a man said in conversation with me—I will not give his name—"Where the devil is the Livingston Channel? Is that some water that was named after Livingstone, the great African explorer?" It is a very serious question. We have spent eight to ten millions of dollars on the Livingston Channel. There came up serious questions and protests from Canada as to the currents and cross currents and danger to the shipping. I am not mariner enough to understand the merits of the protest by the United States on the one hand and by Canada upon the other. Those have been submitted to this commission, and the experts are preparing the

case to submit to the commission. The commission went there in person, spending days, as I gather from the history. They went to the Lake of the Woods in person. There is a question of the pollution of the boundary waters, as it might affect Canada. That has been submitted on the part of Canada on the one hand and on the part of the United States upon the other hand to this commission. Other submissions have been made, and, forsooth, because a member of this commission happens to have been at one time a Member of this House——

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CANNON. I would like five minutes more.

Mr. GARNER. Mr. Chairman, I ask unanimous consent that the gentleman's time may be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CANNON. There never was an abler or a more honorable Member of this House. [Applause.] I am glad he is on the commission. Oh, they have got expensive quarters. Yes; the rent is $2,500 a year. They need the quarters, and the record, as I will print it, will show—and I hope gentlemen will do me the honor to read it to-morrow—that here is a great hurrah and smoke without any fire.

Mr. GARNER. Will the gentleman yield?

Mr. CANNON. I will yield to the gentleman presently.

Yes; it has a secretary at a salary of $3,000 and a disbursing officer at $1,000, which I learned for the first time by reading this history. It has a stenographer at $1,200, and $7,500 each a year is paid to the members of our court, and $7,500 a year on the part of the Canadian court. Do you suppose an able commission is going to serve for nothing? Ex-Senator Turner is one of the members; Mr. Streeter, of New England, is another; and James R. Tawney is another. [Applause.]

Now, I do not know whether $80,000 was spent up to the 1st of January. I doubt if $80,000 is enough for the coming year——

Mr. FITZGERALD. I will say to the gentleman the information is that they have employed a number of engineers, and are doing, as shown in one of these items, a very large amount of field work that will require a great deal more money than $80,000.

Mr. CANNON. And one of the reports, touching the pollution of water, says that one of the most competent sanitary engineers of the United States has indefinite leave of absence with this commission, without pay, to help prepare the case on the part of the United States for submission to the joint commission and who is to be paid from this appropriation. The salaries of our commissioners have to be paid from this appropriation. If they travel, I think $10 a day is a reasonable amount for their travel and their subsistence. That is my notion about it. But I do not care to haggle about 15 cents in the presence of these great questions that are to be settled between Canada and the United States. Some people think the Members of Congress get too much; that their mileage is too large; and that their magnificent offices are too extravagant, and all that kind of thing. That is leather and prunella. That is haggling. What we want is honesty; what we want is industry; what we want is ability, and I think we have it in this commission.

For one, I want the appropriation sufficient to enable them now, inasmuch as they have gotten started, and the engineers and the sanitary officials are on the field at the Lake of the Woods, Rainy River, and Livingston Channel, and very important matters have been submitted, the settlement of which means hundreds of millions of dollars to the people of the United States, to continue with the work, and I think it would be pessimistic to deny the proper appropriation. They are at work now, are ready to work, the cases are preparing to be submitted, and I am going to move to increase this by $75,000.

Mr. FLOOD of Virginia. I hope the amendment the gentleman offers will not be adopted.

Mr. CANNON. I have not offered it yet; but I will now.

Mr. FLOOD of Virginia. I hope the amendment which I have offered will be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. FLOOD].

Mr. CANNON. Oh, well, I am content that a vote should be taken on the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. FLOOD].

The amendment was agreed to.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent to return to page 2, line 19, for the purpose of asking a question of the gentleman in charge of the bill.

The CHAIRMAN. The gentleman from Massachusetts [Mr. MURRAY] asks unanimous consent to return to page 2, line 19, for the purpose of asking a question of the gentleman from Virginia [Mr. FLOOD].

Mr. FLOOD of Virginia. I can not answer the gentleman's question, Mr. Chairman. I object.

The CHAIRMAN. The gentleman from Virginia objects.

Mr. CANNON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting this history.

The CHAIRMAN. The gentleman from Illinois [Mr. CANNON] asks unanimous consent to extend his remarks in the RECORD by the insertion of the document named. Is there objection?

There was no objection.

The following is the statement referred to:

INTERNATIONAL JOINT COMMISSION HISTORY.

"For the purpose of preventing disputes regarding the use of boundary waters and to settle all questions which are now pending between the United States and the Dominion of Canada involving the rights, obligations, or interests of either in relation to the other or to the inhabitants of the other, and to make provision for the adjustment and settlement of all such questions as may hereafter arise, a treaty between the United States and Great Britain was signed on January 11, 1909, and proclaimed by the United States on May 13, 1910.

"Under article 7 of the treaty the contracting parties—

"agree to establish and maintain an international joint commission of the United States and Canada, composed of six commissioners, three on the part of the United States * * * and three on the part of the United Kingdom * * *.

"Under articles 3 and 4 of the treaty the commission is required to pass upon all applications approved by either Government for the uses, obstructions, and diversions of boundary waters on one side which may affect the level on the other side of the boundary, and for the construction of dams or other obstructions in waters flowing from boundary waters, or in waters at a lower level than the boundary in rivers flowing across the boundary the effect of which is to raise the natural level of waters on the other side of the boundary. In all cases under these articles the decision of the commission is final. The commission under article 9 may also be called upon to examine and report upon any other questions or matters of difference arising between the two Governments involving the rights, obligations, or interests of either in relation to the other or to the inhabitants of the other along their common frontier; such reports—

"shall not be regarded as decisions of the questions or matters so submitted * * * and shall in no way have the character of an arbitral award.

"Questions or matters arising between the two Governments involving the rights, obligations, or interests of either in relation to the other or to their respective inhabitants may under article 10 be referred for final decision to the commission, in the case of the United States such action being taken with the advice and consent of the Senate.

"The treaty provides that the commission shall meet and organize at Washington, and when organized the commission may fix such times and places for its meetings as may be necessary, subject at all times to special call or direction by the two Governments. Under this language the two high contracting parties have the power, acting jointly, to call upon the commission for any service in relation to the settlement of any controversy between them; in the submission of any question, however, not covered by the treaty, the high contracting parties would have to agree that jurisdiction over such question or controversy be given to the commission either for final determination or for investigation. Under the rules of procedure adopted by the commission it is provided that regular sessions of the commission shall be held annually at Washington, beginning on the first Tuesday of April, and at Ottawa, beginning on the first Tuesday of October, and that special meetings may be held at such times and places in the United States and the Dominion of Canada as the chairmen of the two sections may determine.

"Article 12 defines the powers of the commission in respect to witnesses, administering oaths, issuance of subpœnas, etc.

"The commissioners of the United States on the International Joint Commission are James A. Tawney, of Minnesota; Frank Sherwin Streeter, of New Hampshire; and George Turner, of Washington.

"The treaty provides, in article 12, that—

"The United States and Canadian sections may each appoint a secretary, and these shall act as joint secretaries of the commission at its joint sessions; and the commission may employ engineers and clerical assistants from time to time as it may deem advisable. The salaries and personal expenses of the commission and of the secretaries shall be paid by their respective Governments, and all reasonable and necessary joint expenses of the commission, incurred by it, shall be paid in equal moieties by the high contracting parties.

"The members of the commission on the part of the United States were appointed March 9, 1911; the commissioners on the part of Great Britain were appointed November 10, 1911, notice of their appointment served on this Government December 1, 1911, and the chairman of the United States section notified December 6, 1911.

"Correspondence was at once begun to arrange for the organization of the commission in Washington, as required by the treaty, and this meeting was held January 10, 1912.

"The commission organized as a joint body on that date and remained in session until January 16, when, having completed a tentative draft of rules of procedure, a recess was taken until February 1 to enable the two Governments to consider these rules and approve or suggest amendments to the same. The commission resumed its session in Washington February 1 and considered various suggestions from the State Department of the United States and the Canadian Government for amendments to the rules of procedure. These rules of procedure were finally adopted February 2, ordered printed, and copies sent to the various individuals and corporations that had made applications to the two Governments for the use of international waters along the boundary, and to those who had presented protests against the granting of these applications. Notices were also sent to those interested parties that the commission would under the rules consider all applications referred by the two Governments for its approval at its first regular session.

"The first regular session of the commission to consider applications for the use of international waters was held in Washington, beginning Tuesday, April 2, 1912, and there was received from the Department of State of the United States the application of the Rainy River Improvement Co. for the approval of plans for a dam at Kettle Falls at the outlet of Lake Namakan in the Rainy River system; the application of the Watrous Island Boom Co. for approval of plans for a log boom in the Rainy River between the mouth of the Big Fork River and the mouth of the Black River. Under the rules of the commission notice of these applications was given to the Dominion Government and by that Government to the protestants against the approval of such applications, and notice of the applications was also published in the Canada Gazette and one weekly newspaper on each side of the boundary in the locality of the proposed improvements.

"These applications were to be heard at the Ottawa meeting of the commission on the first Tuesday in October, 1912, but the Dominion Government had not concluded its consideration of the plans, and a further delay was granted to November 18, when the commission held a special session in Washington to hear arguments on the question of jurisdiction of the commission in applications for approval of works extending from shore to shore of international streams. On November 18 the Dominion Government, by the attorney general of Canada, asked leave to file objections to both applications, notwithstanding the time for the filing of such objections under the rules of procedure had expired. The commission granted the request of the Dominion Government, and under the rules 30 days is allowed the applicant for reply.

"In the meantime the Governments of the United States and Great Britain, under article 9 of the treaty, referred to the commission three questions for investigation and report, viz: On June 27, 1912, the following questions were referred:

"1. In order to secure the most advantageous use of the waters of the Lake of the Woods and of the waters flowing into and from that lake on each side of the boundary for domestic and sanitary purposes, for navigation and transportation purposes, and for fishing purposes, and for power and irrigation purposes, and also in order to secure the most advantageous use of the shores and harbors of the lake and of the waters flowing into and from the lake, is it practicable and desirable to maintain the surface of the lake during the different seasons of the year at a certain stated level; and if so, at what level?

"2. If a certain stated level is recommended in answer to queston 1, and if such level is higher than the normal or natural level of the lake, to what extent, if at all, would the lake, when maintained at such level, overflow the lowlands upon its southern border, or elsewhere on its border, and what is the value of the lands which would be submerged?

"3. In what way or manner, including the construction and operation of dams or other works at the outlets and inlets of the lake, or in the waters which are directly or indirectly tributary to the lake or otherwise is it possible and advisable to regulate the volume, use, and outflow of the waters of the lake so as to maintain the level recommended in answer to question 1, and by what means or arrangement can the proper construction and operation of regulating works, or a system or method of regulation, be best secured and maintained in order to insure the adequate protection and development of all the interests involved on both sides of the boundary, with the least possible damage to all rights and interests, both public and private, which may be affected by maintaining the proposed level?

"On August 1, 1912, the following questions as to the pollution of boundary waters between the United States and Canada were referred:

"1. To what extent and by what causes and in what localities have the boundary waters between the United States and Canada been polluted so as to be injurious to the public health and unfit for domestic or other uses?

"2. In what way or manner, whether by the construction and operation of suitable drainage canals or plants at convenient points or otherwise, is it possible and advisable to remedy or prevent the pollution of these waters, and by what means or arrangement can the proper construction or operation of remedial or preventive works, or a system or method of rendering these waters sanitary and suitable for domestic and other uses, be best secured and maintained in order to insure the adequate protection and development of all interests involved on both sides of the boundary, and to fulfill the obligations undertaken in article 4 of the waterways treaty of January 11, 1909, between the United States and Great Britain, in which it is agreed that the waters therein defined as boundary waters and waters flowing across the boundary shall not be polluted on either side to the injury of health or property on the other?

"And on October 16, 1912, the following questions relating to certain improvements in the Detroit River were received by the commission:

"1. Under all the circumstances and conditions surrounding the navigation and other uses of the Livingstone and other channels in the Detroit River on either side of the international boundary, is the erection of any dike or other compensatory work deemed necessary or desirable for the improvement or safety of navigation at or in the vincinity of Bois Blanc Island in connection with rock excavation and dredging in Livingstone Channel authorized by the river and harbor act of June 25, 1910 (36 Stats., 655), and described in House Document 676, Sixty-first Congress, second session; sundry civil act of June 25, 1910 (36 Stats., 729); sundry civil act of March 4, 1911 (36 Stats., 1405), of the United States, and now being carried out by the Government of the United States?

"2. If, in answer to question 1, any dike or other compensatory works are found to be necessary or desirable, will the work or works proposed by the United States and provided for in the river and harbor act of June 25, 1910 (36 Stats., 655), and located so as to connect the north end of Bois Blanc Island to the southeast end of the existing cofferdam on the east side of Livingstone Channel, opposite and below Stoney Island, be sufficient for the purpose; and if not, what additional or other dikes or compensatory works should be constructed, and where should they be located in order to serve most advantageously the interests involved on both sides of the international boundary?

"A conference of the chairmen of the two sections of the commission was held at Montreal August 12, 1912, to consider the reference of the questions relating to the Lake of the Woods. Engineers were employed by authority of the commission, and met with the chairmen at Montreal for consultation as to the scope of the investigation. A preliminary hearing for the purpose of ascertaining the engineering problems involved in the Lake of the Woods investigation was deemed necessary, and accordingly a meeting of the commission was called at International Falls, Minn., September 17; Warroad, Minn., September 18; and Kenora, Ontario, September 20, 1912. Notices of these meetings were published on both sides of the boundary to give interested parties the necessary information as to the questions to be considered. The commission held public hearings at these points, which were largely attended by those interested in the lake levels, and the commission made a personal survey of the Lake of the Woods, the Rainy River, Rainy Lake, the various power developments, and the shores of the river and lake where there is danger to agricultural interests from overflow and erosion. Engineers were then instructed by the commission to prepare exact surveys and estimates as to relative advantages and injuries that might accrue from various lake levels and the best and most practicable method of solving the engineering problems involved in establishing and maintaining any certain level or levels that will best conserve the water-power, the navigation, the agricultural, and fishing interests in the Lake of the Woods and its tributary waters. At Ottawa, October 2, 1912, the commission instructed the engineers to report at its meeting in November. According to their instructions the engineers appeared and submitted the following preliminary re-

port showing the progress of the work they are employed to perform:

"ST. PAUL, MINN., *November 14, 1912.*

"The INTERNATIONAL JOINT COMMISSION,
"Washington, D. C.

"SIRS: Although at the present time your engineers are not in a position to present any conclusions based upon such data as we have collected bearing upon the investigation relating to a proposed regulation of the levels of the Lake of the Woods and tributary waters, yet there are certain data of a general character setting forth the relative magnitude of some of the chief physical factors involved in this investigation, which we feel it would be opportune to place before your commission, hoping that in so doing you may in some measure be assisted in your outlook upon the Lake of the Woods problems covered by the official reference.

"The area of the watershed involved in this investigation—i. e., the combined area of land and water surface above the outlet of the Lake of the Woods at Kenora, Ontario—as ascertained from maps at present available, is approximately 26,000 square miles, of which about 15,000 square miles are in Canada and 11,000 square miles in the United States. The watershed area above the mouth of Rainy River at its entrance to the Lake of the Woods is approximately 20,000 square miles. The area of the watershed tributary to the outlet of Rainy Lake at International Falls, Minn., is approximately 14,500 square miles, and the area which contributes to the waters entering Rainy Lake along the international boundary at Kettle Falls is approximately 7,300 square miles, of which about 4,000 square miles are in the United States and 3,300 in Canada.

"The larger of the individual watersheds within the watershed of the Lake of the Woods are:

Name of river and approximate area of watershed in square miles.	
Seine River	2,100
Little Fork River	1,900
Big Fork River	1,800
Turtle River	1,800
Kawishiwi River	1,400
Vermilion River	900

"The area of the Lake of the Woods itself is variously estimated, but 1,400 square miles may tentatively be considered as representing the area of this body of water. Rainy Lake has an area of approximately 325 square miles. Lakes Namakan, Kabetogama, and Sand Point have a combined area of about 100 square miles.

"Respecting run-off, it may be interesting to observe that a cursory examination of the discharge measurements for Rainy River at International Falls indicates a run-off in a low-water year equivalent to a continuous flow of about 4,500 second-feet. For purposes of illustration it may be said that if the entire run-off for a low-water year were stored in Rainy Lake it would correspond to a rise in the level of this lake of about 15 feet. If the whole watershed tributary to the Lake of the Woods were to yield a corresponding run-off to that above assumed for Rainy Lake, this would be equivalent to a continuous flow of about 8,000 second-feet, which, if all stored in the Lake of the Woods, would correspond to a rise of about 6½ feet. The data at present available indicate that in years of high water these quantities would be increased two or three fold.

"It may be well to emphasize that the quantities herein presented are not given as any basis for deduction, nor do they warrant any. They do, however, indicate the magnitude of some of the physical factors entering into the problem.

"It will be remembered that owing to sudden illness in September Mr. Meyer was prevented from carrying out at that time certain work upon which we had agreed. In Winnipeg, however, after the hearings at Kenora were concluded, Mr. White arranged for Canadian engineers to cooperate in an investigation designed to ascertain the relationship between existing gauges on the Lake of the Woods. Subsequently we agreed upon a detailed plan for this investigation, and upon Mr. Meyer's recovery we had the work performed. Essentially this work consisted in having simultaneous readings taken half hourly for about two weeks at the different gauges, the observers recording also wind, wave action, and other relevant conditions.

"We think it will be a gratification to the commission to learn that as a result of this correlation of gauges we find that the various records of gauge heights which have been taken from time to time extending back over several years are sufficiently reliable to make them of great practical worth in this investigation.

"It may also be stated that after his recovery Mr. Meyer personally went over the territory he had intended to visit in September and examined portions of the shore line of the Lake of the Woods with a view of discovering physical evidences relating to former prevailing levels of the lake. This question as to what has been the prevailing normal or natural level of the Lake of the Woods at different seasons of the year is one which is specifically referred to in the official reference, and consequently is a question which calls for special consideration. We would here intimate that various physical evidences were observed which seem to indicate that there was a time when the prevailing level of the Lake of the Woods was considerably lower than during recent years.

"On account of the fact that considerable storage possibilities are known to exist upon the watershed comprising the Birch Lake Basin, and in view of a proposed diversion of water from this basin into the St. Louis River, Minn., it was deemed advisable to secure run-off data for this portion of the Lake of the Woods watershed. As no means had been provided by any of the departments of the State of Minnesota or of the Federal Government of the United States for securing this information, we have had a self-registering gauge installed and a metering station established on the Kawishiwi River near the outlet of Garden Lake. This work has been done in a manner acceptable to the United States Geological Survey, and it is anticipated that the water resources branch of the survey will later assume responsibility for the operation and maintenance of this station.

"In conclusion we would say that we are still gathering data from various governmental and other sources, and as a result of these efforts considerable information of a reliable character and bearing upon the matters in hand has been assembled.

"It is our intention, when seasonal conditions are satisfactory, to make a further personal reconnaissance of portions of the Lake of the Woods watershed, in order to ascertain the extent and character of the field work which will be necessary to determine the best means by which regulation may be secured, and also to determine the possible effect that certain schemes of regulation may have upon the various interests using the waters of the Lake of the Woods and the shores and harbors thereof.

"Respectfully submitted.

"ADOLPH F. MEYER,
"ARTHUR V. WHITE,
"Consulting Engineers.

"At the regular session of the commission in Ottawa, October 1, 1912, the questions relating to the pollution of boundary waters were taken up, and sanitary experts were consulted as to the extent of the pollution and the means whereby the treaty obligations could be maintained. The commission also considered the scope of these questions and requested of the two Governments information as to whether the investigation was intended to be limited to boundary waters covered by the treaty; that is, where the pollution on one side of the boundary extended to and affected the boundary waters on the other side, or whether the Governments intended the investigation should cover all boundary waters regardless, etc. The commission received from the two Governments on November 19, 1912, the following identical letter from the State Department:

"DEPARTMENT OF STATE,
"Washington, November 19, 1912.

"INTERNATIONAL JOINT COMMISSION,
"United States and Canada.

"GENTLEMEN: I have the honor to inform you that the Governments of the United States and Great Britain having considered the inquiry of the international joint commission as to the scope of the investigation required by the first of the two questions submitted jointly by the two Governments in their letter of August 1 last to the commission for their investigation and report, namely:

"'To what extent and by what causes and in what localities have the boundary waters between the United States and Canada been polluted, so as to be injurious to the public health and unfit for domestic or other uses?'

"Have reached an accord that the inquiry is to be confined to cases of pollution of boundary waters on one side of the boundary which extend to and affect the boundary waters upon the other side.

"I have the honor to be, gentlemen,
"Your obedient servant,
"P. C. KNOX.

"The commission consulted with and received the advice of sanitary experts from both the United States and Canada on November 20 as to how to proceed with this investigation, and invited the health authorities of the States and Provinces whose territory touches the water boundary between the two countries to cooperate in the investigation and to meet the commission at a conference to be held in Buffalo, December 17, 1912. The commission received assurances from a number of these State and provincial health authorities that they will heartily cooperate in this investigation, give the commission access to their records, the use of their laboratories, and the services of their scientists in the work.

"The commission on December 17, 1912, held a conference at Buffalo, N. Y., with the health authorities of the States and Provinces bordering on the international waters where the investigation is to be made, and received from these officials offers to cooperate to the extent their State and provincial laws and their appropriations would permit. At that meeting the commission decided to employ two sanitary experts, one representing each section, who should prepare detailed plans for a comprehensive investigation, and to have general supervision of the investigation under the direction of the commission.

"The commissoners from the United States consulted Dr. Blue, Surgeon General of the Public Health Service of the United States, as to the most experienced man for such work. The Surgeon General recommended Dr. Allan J. McLaughlin, of that service, because of his experience in making sanitary surveys of international and interstate waters, the results of which are embodied in Hygienic Laboratory Bulletins Nos. 77 and 83, and because of his comprehensive knowledge of the general subject referred to the commission by the two Governments. The chairman of the commission secured from the Secretary of the Treasury a leave of absence without pay for Dr. McLaughlin that he might be employed by the commission and cooperate with a Canadian expert in the preparation of detailed plans for the investigation. Dr. McLaughlin is now employed with Dr. T. A. Starkey, of McGill University, Montreal, who has been employed by the Canadian section, in the preparation of plans, which will be considered by the commission when it meets in Detroit in February. It is the purpose of the commission to begin the technical investigation early in March and press the work as rapidly as possible, considering the extent of the investigation to be made and the varied interests—international, national, State, and municipal—which must be considered.

"The commission also took up the reference of the Livingstone Channel, on November 19, in conference with Col. M. M. Patrick, United States Engineer Corps, stationed at Detroit and in charge of the Government work in the Detroit River. Mr. Stewart, engineer and chief hydrographic officer of the Dominion Government, was also present, and stated that during

this year he had collected engineering data and collected other information concerning the controversy growing out of the further improvement of the Livingstone Channel, but that he had not completed the work of tabulating and working up this data. The Dominion Government, by the attorney general of Canada, presented a request to the commission that the investigation of this question be deferred until Mr. Stewart had completed his work. The commission granted this request and postponed the beginning of this investigation until about the middle of February, 1913, when both Governments will be ready to submit their respective sides of this controversy. On December 3 the commission made a personal investigation of the Livingstone Channel, with Col. Patrick, of the United States Engineer Corps, who is in charge of the work, and Engineer Stewart, representing the Canadian Government.

"The foregoing is an outline of the commission's work and efforts to forward the consideration of the applications presented for its approval under articles 3 and 4 of the treaty, and the questions for investigation submitted by the two Governments under article 9 of the treaty.

"BENEFITS TO THE UNITED STATES.

"The three questions referred to the commission by the two Governments under article 9 of the treaty are of long standing, and the ordinary diplomatic exchanges have failed to bring solutions.

"The controversies over the water levels in the Lake of the Woods and tributary waters date back to the construction of a dam at the outlet of the lake by the Keewatin Power Co. in 1897. That dam raised the level of the lake, and settlers on the American shore complained that it caused their lands to be submerged. The construction of a dam across the Rainy River at International Falls caused complaints on the Canadian side of the boundary that it lowered the water level in the Rainy River below the falls and in the Lake of the Woods, to the embarrassment of navigation and power plants located at the outlet of the lake. There were also complaints from the Canadian side that the International Falls dam had raised the level of the water in Rainy Lake and Rainy River above the dam so as to cause much damage to property by erosion.

"The United States Public Health Service has made extensive investigations touching the pollution of interstate and international waters within the jurisdiction of this Government, but the ultimate value of these investigations must depend upon some international investigation and agreement concerning methods for the prevention of pollution injurious to the health and property on both sides of the boundary.

"The United States has expended more than $9,000,000 in the improvement of the Detroit River for the accommodation of the immense shipping on the Great Lakes, and has constructed two channels through the rock bed of the river. The engineers recommended the construction of a dam or dike to protect the Livingstone Channel from cross currents, and also to prevent the channels from drawing off the water from Lakes St. Clair and Huron and lowering lake levels there. The Congress has authorized this work and made the appropriation for it, but since the dike or dam will have to be partly on Canadian territory the work has been delayed until an international agreement can be had.

"These three questions are now before the commission for investigation and the questions considered directly between the United States and Canada. The United States and Canadian commissioners are making personal investigations in each case, sifting out the real objections and advantages in an effort to harmonize them, with fair prospects of agreement."

Mr. MILLER. Mr. Chairman, have we passed the paragraph to which the amendment offered by the gentleman from Virginia [Mr. FLOOD] applies?

The CHAIRMAN. We have; but it is in order for the gentleman to offer a pro forma amendment to strike out the last word.

Mr. MILLER. I move, Mr. Chairman, to strike out the last word.

The CHAIRMAN. The gentleman from Minnesota [Mr. MILLER] moves to strike out the last word.

Mr. MILLER. This is in reference to the paragraph just up for consideration. Inasmuch as this matter has attracted so much attention, I think it is perhaps proper that I should say a word as to what I know about the conditions that have appeared before this commission recently. Nearly all of their activities have been expended in the vicinity of the northern part of Minnesota, which lies mostly in my district.

I will say to the House, and say it with the utmost fairness and honesty, that during the period of time I have been a Member of this House there have arisen constantly questions of supreme magnitude connected with the northern part of the State of Minnesota. It happens that the boundary line between Canada and the United States, beginning at Lake Superior and extending westward for a considerable distance, is in the trough of a great drainage area, one of the greatest to be found on the face of the earth. There have never been laws, there have never been treaties, to define the respective rights of the people on either side of that line in and to the waters that originate in their respective territories.

On the United States side there are many streams rising and flowing into the international boundary-line streams; there are many acres of public domain; along these streams are water powers, and, Mr. Chairman, it is not possible to-day for Congress intelligently to legislate in respect to these water powers without recourse to this commission. The people of Canada have a property interest in every drop of water that falls within that drainage area within the United States.

We recently passed a bill permitting the establishment of a dam and a water power at International Falls, the outlet of Rainy Lake. No word was said as to how high that dam should be. The War Department of this Government tried to say it, and had to stop. There is a water power that is among the greatest in the country, and to-day, upon the banks of the stream, rising in majestic proportions, is the biggest paper mill in the United States, together with lumber mills now being constructed and others ordered to be constructed up and down on either side, and nobody knows whether that dam is being operated properly or not, and there are thousands of people on each side of the line that complain to-day about its operation. The rights of individual homesteaders, property owners, and men in business are all affected, with no law, no tribunal but this commission, to decide what shall be the operation of that great water power.

Mr. HAMILTON of Michigan. If the gentleman will permit, I would like to ask him what is the controversy with regard to the operation of the dam? Is it in regard to the flowage?

Mr. MILLER. It is in regard to the flowage and in regard to the pollution of the waters——

Mr. MANN. And also as to the height of the water.

Mr. KENDALL. What dam is that?

Mr. MILLER. The dam at International Falls, the outlet of Rainy Lake.

Mr. KENDALL. If there is any controversy on that proposition, it has not yet reached this commission.

Mr. MILLER. Oh, I beg the gentleman's pardon. The commission spent a week there last fall, and all questions arising have been referred to them.

Mr. KENDALL. Is this the Lake of the Woods proposition?

Mr. MILLER. No; this is the Rainy Lake proposition.

Mr. STEVENS of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. MILLER. Yes.

Mr. STEVENS of Minnesota. Will the gentleman explain as to the Namakan Dam?

Mr. MILLER. I was just coming to that.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. I ask unanimous consent that the gentleman have five minutes more.

Mr. FLOOD of Virginia. I shall have to object.

Mr. MADDEN. The gentleman from Minnesota has not consumed much time.

Mr. MANN. I was going to suggest to the gentleman from Virginia that I do not think it is possible to finish this bill to-night. Why not adjourn and meet at 11 o'clock in the morning?

Mr. CANNON. I want to ask that the gentleman from Minnesota [Mr. MILLER] have the additional five minutes, because I only have general knowledge, while he has specific knowledge and, I think, can give the House some information.

The CHAIRMAN. The Chair will submit the request of the gentleman from Illinois for unanimous consent that the gentleman from Minnesota have five minutes additional time. Is there objection?

There was no objection.

Mr. MILLER. Mr. Chairman, this dam is at the outlet of Rainy Lake. Rainy Lake is not a small body of water or a small pond. It is a great lake, 50 miles long and varying from 5 to 15 miles in width, a great reservoir, half of it in Canada and half in the United States; and it is for this commission to decide the height to which the waters shall be raised by this dam, having regard to the interests of navigation, having regard to the interests of the property owners who border upon that lake, and having regard to the water powers in the streams flowing into that lake. It affects a great and growing industry in a great and developing country.

My colleague, Mr. STEVENS, has suggested that some word might be specifically said in regard to the Namakan Dam. This is a dam proposed to be erected in one of the tributaries of Rainy Lake for the purpose of developing the lumber industry of that region and some other features of that locality. The War Department tried to establish proper rules for the construction of the dam and had to stop. That is but an instance of a dozen or a score of similar cases now up or soon to come up in connection with this part of the State.

Mr. STEVENS of Minnesota. Does the gentleman know how long the controversy lasted with Canada over the construction of the International Falls Dam?

Mr. MILLER. A great many years.

Mr. STEVENS of Minnesota. Over 12 years.

Mr. MILLER. I know it was a great many years, and a working arrangement was only secured with the greatest difficulty.

Passing over many minor matters we come to the Lake of the Woods region, to the westward a little way. The Lake of the Woods is a great lake, many times greater than Rainy Lake, and most difficult problems arise in connection with this lake similar in character to those about Rainy Lake. Just beyond the Lake of the Woods is found another great water power. At this point are the great flour mills known as the Kenora Mills, of a magnitude almost rivaling those of Minneapolis and Rochester. No one has yet determined how the operation of that dam for these milling purposes affects the property owners to the eastward and in the United States, but it is for this commission to decide; and I know that this commission made a trip to investigate conditions at Rainy Lake last fall. They made a trip to the Lake of the Woods and investigated conditions there. They made a trip to Kenora and undertook in a tentative way the consideration of these great international questions that directly concern the Congress of the United States, because they intimately affect the welfare of a great many thousands of people in the United States and Canada, together with many millions of dollars.

Mr. MANN. And their jurisdiction is final.

Mr. MILLER. Their jurisdiction is final. Beyond their decree there is no appeal. It is of the utmost importance therefore that these men be amply provided with what? With the services of the best engineers they can get. We do not want cheap men who will do cheap work. God knows the West has suffered from incompetent surveyors, and suffered from criminal neglect, incompetence, and rascality of men who have been hired for a small sum and gone out and made mistakes. In a matter of such international importance this commission needs the services of the best men money can get; not extravagantly expended, but properly expended. Therefore I would suggest that instead of curtailing and belittling the work, we cooperate with them in furnishing them with the necessary funds properly to carry on the work that they have undertaken. [Applause.]

Mr. GARNER. Mr. Chairman, just a moment to put myself in a correct attitude before the House. The gentleman from Illinois [Mr. CANNON] and the gentleman from Minnesota [Mr. MILLER] have made it appear that an effort is being made to belittle the personnel of the committee and the work they are doing. I submit that there has been nothing said on either side of the House up to this good hour that will justify any such thought. It is easy enough to set up a straw man and knock him down.

What gave rise to this matter was that the gentleman from Illinois [Mr. CANNON] and the gentleman from New York [Mr. FITZGERALD] wanted to hold this item in their committee, and the Committee on Foreign Affairs thought they had jurisdiction and were fighting for their rights. As to whether the correct sum of money has been appropriated in this bill, I am unable to tell. The gentleman from Illinois [Mr. CANNON], who is on the Committee on Appropriations, which has been considering the sundry civil bill and is now ready to report it, has given us no information as to how much money is needed, but he has given us a wonderful history of this individual commission. It is easy enough to say that Mr. Tawney is a good man. I shake hands with you; you are no better friend of his than I am. It is easy enough to say that Mr. Busbey, the clerk of the commission, is an excellent gentleman, and in that we are in full accord. The question that arose here was the question of who had jurisdiction of this appropriation, and who ought to have the right to say how much money they shall have; and that question having been settled, there was no question on this side of the House as to the efficiency of the men.

I may say in my own mind that I imagine from what I have learned that it is not a real hard job; that it is a job that most anybody who is anxious to draw a salary, make a trip up into Canada, have a good time at the Government's expense, railroad and sleeping-car fares paid, and $10 extra for getting something to eat, would be delighted to fill.

It is a right nice job, and I am satisfied that good and efficient men have got it. I know one of them, Mr. Tawney, and I know he is able and competent to fill the position. But the gentleman from Illinois [Mr. CANNON] and the gentleman from Minnesota [Mr. MILLER] have no right to suggest that we are criticizing this commission or criticizing the work the men are doing, for there has been no disposition on this side of the House to do it. It can be truthfully said that for the amount of work it has done up to date it has been the most expensive commission that this country has had since I have been a Member of Congress. Now, I do not mean to criticize them for that, because it has been impossible for the gentlemen on the commission to perform the duties on account of the men on the other side of the boundary line not being prepared to join them, and you can not expect gentlemen who need the money and have a certificate not to draw the salary. You can not blame the commission, having accepted its service way back in March, 1911, for drawing the salary, although they never met with the joint court for nearly a year afterwards or more than a year afterwards.

Nobody is criticizing them for drawing the salary. I do not know anything about their quarters; it may be necessary to have those quarters. I say it is the duty of your committee to ascertain, or else give it over to us and we will investigate and determine whether the quarters are proper or not. If they are, can any gentleman on the floor of this House point to a case where the Foreign Affairs Committee of this House has refused to make a legitimate and proper appropriation? Let him arise in his place and state one single instance when we have sought to hamper this Government. We have done one thing, we have tried to look into every appropriation that has come before that committee and every estimate, and we have only tried to cut down to the point where we thought we would be justified, not to affect the efficient service to the Government.

Now, Mr. Chairman, one thing further. I do not know whether this is sufficient money or not, and no one else seems to know. It may be the intention of this commission to employ an elaborate engineering corps, one of very high expense, one of very efficient service, but if it is it is the duty of this commission to make an estimate and make a showing before the Committee on Appropriations, if it wants to ignore the Committee on Foreign Affairs, and have some information upon which to base this appropriation, because the past history of it shows it has had more money than it could expend, although it has lived in luxury and has had every expense it could possibly call for ever since it was created.

Mr. CANNON. Mr. Chairman, I move to strike out the last two words. I care not, so far as the public service is concerned, what committee reports the appropriations of this commission for the consideration of the House. I am of the opinion that the Committee on Appropriations has jurisdiction. The chairman has decided to the contrary, however, and I have no mouthings to make about it.

I call the attention of the gentleman from Texas [Mr. GARNER] to the fact that it was in the argument on a point of order, a dead, dry, point of parliamentary law, that the gentleman from Texas [Mr. GARNER], in part, and some of the other members of the Committee on Foreign Affairs, traveled far outside—did not come within a mile of the point of order—and talked about extravagance; warned that it would be better for gentlemen on the Committee on Appropriations not to say anything about these expenditures. Yet the gentleman from Texas says that I set up a man of straw and undertake to knock him down.

Mr. Chairman, I recollect very well, and the RECORD will show, what the gentleman from Texas said heretofore, and how he said it. He said, "These be honorable men—oh, how I love the chairman of the commission; I honor him as much as does the gentleman from Illinois—but these gentlemen with fat jobs have not done much! Oh, no; they live in luxury—ah!" Why, Mr. Chairman, if you were to attack a woman, the best woman in the world, and say that she is virtuous and splendid and magnificent and that you love her fine character, and then end it by saying, "But, oh, oh—although—and notwithstanding"—that would be the best way to damn her reputation, because you would earn an audience by lauding her for her virtue and wisdom.

I do not care to enter further into the personal equation. I thought I was justified in referring to it, because of what had preceded it. It makes but little difference. Enough has been said, and the one-tenth part has not been said by the gentleman from Minnesota [Mr. MILLER], having knowledge more than I, and even from what little knowledge I have, living inland

as I do, on the prairies of Illinois, I know enough to say that there is not now as important a commission under treaty with a foreign nation in service, and never has been, as this, except commissions that have negotiated peace between nations.

That is all I want to say, except to add one more thing. I have read the testimony of one man, the secretary of this commission. Oh, the Committee on Foreign Affairs did not have knowledge of the fact that the Secretary of State was a proper man to consult in respect to this commission and its work! Instead, they send for an employee of the commission, the secretary, and his is the only testimony they have had. It is a well-tempered hearing, but after all, the temper of a part of the committee was shown—the preconceived temper—and it may be seen from the fair examination of the hearings. Anyone can read it and see how it crops out there.

Mr. FLOOD of Virginia. Mr. Chairman, will the gentleman yield?

Mr. CANNON. Yes.

Mr. FLOOD of Virginia. I do not think that conclusion of the gentleman is fair. The committee did undertake to get the members of this commission before it and failed. We asked Mr. Busbey to get either Mr. Tawney or ex-Senator Turner to come before our committee and give testimony, but they did not do it. Mr. Tawney was not in the city, but Mr. Turner was.

Mr. CANNON. Request made! Did the gentleman send a request to these gentlemen?

Mr. FLOOD of Virginia. We did.

Mr. CANNON. By letter?

Mr. FLOOD of Virginia. No; we sent it through Mr. Busbey.

Mr. CANNON. Were they notified by the Sergeant at Arms? Did you issue a subpœna?

Mr. FLOOD of Virginia. Oh, no.

Mr. CANNON. Oh, no!

Mr. FLOOD of Virginia. We followed the same course we do when we wish a Cabinet officer to testify before our committee and what any other committee would have done in an honest attempt to get those men before us. We had their secretary there and we sent for them by him. We thought this notice sufficient to bring the one who was in the city before the committee to defend an appropriation the commission was asking, and it was.

Mr. TOWNSEND. Mr. Chairman, I move to strike out the last two words. I want to say to the committee that the heat that has been developed in this discussion is entirely justified in the minds of those who listened to the examination of the secretary of this extraordinary body. It is a poor, miserable, drab performance. We had the one man before us who should have known everything that could justify these expenditures of the Government's money, and his performance before us was pitiful. We examined him, man after man, men sitting on both sides of this Chamber; we asked him what the duties of this commission were, and he did not know. He could parrot forth something from the statutes, but the net result of that examination was that we learned that here is a commission whose members draw $7,500 a year salary, whose expenses are paid to distant and interesting and romantic spots in Canada and the United States; who occupy here in Washington six offices in an expensive office building. And I pledge you my word that, absolutely divesting this thing as much as I can of all partisanship, the net result we obtained from the witness we had before us was that his duties for more than a year had been to sign checks for the commissioners, and the Government was paying a very considerable salary to a man to fill in the checks so that the secretary need have no other duty than to sign the checks.

It is simply drab, my brothers; it is awful. There was not a member of the committee who had so much as an explanation to give that justified this expenditure. It was a lame-duck proposition, and the lame ducks had not been trained to show a good excuse for their living. [Applause.]

Mr. MANN. Mr. Chairman, the gentleman from New Jersey [Mr. TOWNSEND] is very much interested in having a Government engineer assist in reference to the harbor lines in New York——

Mr. TOWNSEND. Without pay.

Mr. MANN. With pay, as passed by the House.

Mr. TOWNSEND. Oh, well, the gentleman can say——

Mr. MANN. I am not going to argue the question with the gentleman.

Mr. TOWNSEND (continuing). The gentleman can say with pay, but the resolutions said without pay.

Mr. MANN. Well, most every man along a little strip of the Atlantic coast does not think or know that there is any other part of the United States. This was a commission created not for the purpose of providing places for lame ducks, but for the purpose of adjusting disputes between Canada and the United States. Lo and behold, the great Committee on Foreign Affairs of the House, with Canada lying just a step away from us, comes into this House this afternoon and one after another rises on the floor of this House and abuses a commission of the United States, making misstatements concerning a commission of the United States, every word of which will be sweet news to the other side of the Canadian line. Over there they are more patriotic, and it is largely a matter of patriotism. They defend their commission and their commissioners. Over here the commission is attacked individually and as a commission without cause, without justice, to show, I suppose, and to prove the frame of mind, the cool, calm, deliberate frame of mind in which the Committee on Foreign Affairs treats the great foreign relations of our United States, and especially the relations between the United States and Canada. What some of these gentlemen ought to do is to move over to Canada and become real Canadians where possibly they could not do as much good over there for Canada as they can here by abusing a commission of the United States intrusted with the performance of great duties. I am sure the gentleman from Texas [Mr. GARNER] did not realize what his remarks were. If he reads them, he will see that he went way beyond, I think, what was in his mind. For a moment he said the commission did not have a meeting until nearly a year after it was appointed, and then corrected himself after he had reflected and said they did not have a meeting until more than a year after they were appointed. That statement is equally correct with most of the other positive statements made in this House by these members of this committee in reference to this matter; it is incorrect, wholly incorrect. I hope that the gentleman from Texas and these other gentlemen when they are correcting their remarks to be put in the permanent RECORD will at least consider that the United States ought to have some thought from them in preference to giving it all to abuse of an American commission in the interest of the Canadian question.

Mr. CANNON. Mr. Chairman, I move to strike out the last four words, and I will take but a minute. I desire, after the gentleman from New Jersey [Mr. TOWNSEND] has made his remarks touching Mr. Busbey, the secretary of that commission, and his examination, not to take the time of the House to read that examination, but to put it in the RECORD. I ask permission that I may print it in the RECORD as part of my remarks.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to insert as part of his remarks the paper to which he has referred.

Mr. TOWNSEND. All of his remarks?

Mr. CANNON. All of his remarks.

Mr. TOWNSEND. All of Mr. Busbey's examination?

Mr. CANNON. All of Mr. Busbey's examination.

Mr. TOWNSEND. From his entrance until his exit?

Mr. CANNON. Both.

Mr. TOWNSEND. Well, I will be very glad to have that done.

Mr. CANNON. From Alpha to Omega.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The statement is as follows:

STATEMENT OF MR. L. WHITE BUSBEY, SECRETARY OF THE INTERNATIONAL JOINT COMMISSION, WASHINGTON, D. C.

The CHAIRMAN. State what position you occupy in this joint high commission.

Mr. BUSBEY. I am secretary and special disbursing officer of the International Joint Commission.

The CHAIRMAN. State what work they are doing, the amount of the appropriation that is needed, and, as near as you can, give us a detailed statement of how this appropriation is to be used.

Mr. BUSBEY. I would like to say, Mr. Chairman, that Mr. Tawney, the chairman of the International Joint Commission in the United States, was informed of a change of reference, and I was under the impression that he appeared 10 days ago before the Appropriation Committee on this estimate. He was called there. This document [indicating], making a change of reference in harmony with the law, was sent to the commission.

The CHAIRMAN. Here is the document to which Mr. Busbey refers. It is from Secretary MacVeagh to the Speaker of the House of Representatives, and reads as follows:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, December 9, 1912.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of a communication from the Secretary of State of the 7th instant, inviting attention to the fact that the estimate of appropriation for the expenses of the International Joint Commission, United States and Great Britain (waterways treaty), for the fiscal year ending June 30, 1914, was inadvertently submitted with his estimates for foreign intercourse, as appears on page 279 of the annual Book of Estimates, instead of under the chapter for miscellaneous, Department of State, for inclusion in the sundry civil bill, where the same has heretofore been provided.

He therefore requests that the item be transferred from the estimates for foreign intercourse and be included in the sundry civil bill

among miscellaneous items under the Department of State, in order to carry out the provisions of the law requiring estimates of appropriations to follow preceding appropriation acts.

Respectfully,

FRANKLIN MACVEAGH, *Secretary.*

Then the Secretary of State's letter is to Mr. MacVeagh, and says:

DEPARTMENT OF STATE,
Washington, December 7, 1912.

The SECRETARY OF THE TREASURY.

SIR: In examining the Book of Estimates of appropriations required for the fiscal year ending June 30, 1914, it is noticed that the estimate for the International Joint Commission, United States and Great Britain, for $75,000, has been included under the head of "Foreign Intercourse." It was the intention of this department at the time the estimate was submitted to follow the general requirements of law and have his particular estimate made a part of the miscellaneous items to be included in the sundry civil act, in view of the fact that the appropriations for this purpose have heretofore been made in that act and the law apparently requires the estimates for new appropriations to follow preceding appropriation acts.

I shall be glad, therefore, in the event that you concur in these views, to have you take such steps as may be necessary to have the error corrected and the estimate included among the miscellaneous items for consideration in connection with the sundry civil bill. I have the honor to be, sir,

Your obedient servant, P. C. KNOX.

Mr. BUSBEY. There was a supplemental estimate which was also referred there. And, although I do not know definitely, I am under the impression that Mr. Tawney appeared before that committee regarding both the original estimate and the supplemental estimate.

The CHAIRMAN. This item was carried in the sundry civil bill last year?

Mr. BUSBEY. Yes. The original item in the appropriation act for 1911 was carried in the sundry civil bill; that for 1912 was in the sundry civil bill, and that for 1913. It has been carried in the sundry civil bill since the treaty was ratified and provision made for the commission.

The CHAIRMAN. How did it originally get in the Appropriations Committee?

Mr. BUSBEY. I am really not informed on that.

Mr. KENDALL. It is probable the treaty was ratified after it was too late to get it in the diplomatic bill.

Mr. BUSBEY. Probably that was the case. I am not informed as to that, but I have an impression that this went in the sundry civil bill under an amendment in the Senate.

Mr. TOWNSEND. Mr. Chairman, may I be permitted to ask the witness a question?

The CHAIRMAN. Certainly.

Mr. TOWNSEND. It is simply that I know we have him before us, and I know he is very well informed and might give us some information which others besides myself do not possess.

What useful duties does your joint commission perform which could not be equally well performed by the machinery of the State Department?

Mr. BUSBEY. That might lead into my discussing a question of the relative merits of the State Department and the commission. I will say to you that the principal work before this commission at the present time is under articles 9 and 10 of the treaty, by which it is provided, in article 9, that the parties to the treaty may refer any question of difference between the parties themselves or their inhabitants along the common frontier between the United States and Canada for investigation and report. Article 10 provides that both parties to the treaty may refer any question of difference between them or their inhabitants along the common frontier to the commission for investigation or for adjudication.

Mr. TOWNSEND. That, Mr. Busbey, is interesting, but it does not satisfy my natural curiosity to know why this very considerable sum of money is asked from Congress to perform a duty which, perhaps, Congress has already liberally appropriated for in its various items for the State Department. I think my curiosity is probably shared by other members, and if you can inform us what you do that the State Department and Diplomatic and Consular Service would not perform, it would be a very great favor.

Mr. BUSBEY. I would be very glad to submit a statement which I prepared, which was asked for by the State Department, regarding the work that was being done by the commission. They asked me to prepare it that the Secretary might have the material before him, and I have a copy of it here.

Mr. TOWNSEND. I will not ask you to read that now, but if you feel disposed to give me, in a few words, what you do that the State Department can not do, I shall be highly gratified.

Mr. BUSBEY. I think the original purpose, as explained in the treaty, of the commission was in reference to a number of questions that had been pending, and they had not been adjudicated by the ordinary diplomatic interchanges, and it was felt that by bringing the two parties together, the direct representatives of Canada with the direct representatives of the United States, they might make better progress and get more satisfactory results.

Mr. HARRISON. How often does the joint commission meet, Mr. Busbey?

Mr. BUSBEY. The commission has fixed two definite dates for its regular meetings. In Washington it is the first Tuesday in April, and in Ottawa, Canada, the first Tuesday in October.

Mr. HARRISON. Have they met?

Mr. BUSBEY. Yes. It is provided also that the chairman of the commission should call special meetings of the commission and fix the place or time.

Mr. HARRISON. Has he ever called a special meeting?

Mr. BUSBEY. Yes; several.

Mr. HARRISON. How many times?

Mr. BUSBEY. Let me explain right there that the two Governments in July referred to the commission a question which had for some years been a matter of controversy—regarding the level of the Lake of the Woods. The two Governments referred to the commission the question as to whether a stated level of the water there could be maintained, and if so by what methods that could be accomplished. The chairman of the commission called a meeting at International Falls September 17. We had hearings there of all the interested parties; and at Warroad, Minn., on the 18th; and at Kenora, Ontario. We spent a week there at that time.

Mr. HARRISON. Is that this last year?

Mr. BUSBEY. Yes; it was last fall.

The CHAIRMAN. At their regular meetings how long is the commission in session?

Mr. BUSBEY. The commission was in session here for a week the 1st of April. They formulated their rules of procedure in February, immediately after the commission was organized, and then the State Department referred to the commission the application——

The CHAIRMAN. All I am trying to get at now is how much time, taking the calendar year 1912, the commission was in session during that year.

Mr. BUSBEY. In formal session they were together January and February, a week each time, and in April; and then there was a conference at Montreal in July.

The CHAIRMAN. Was that a week?

Mr. BUSBEY. No; they were only two or three days there. Then this hearing on the Lake of the Woods question in September, the regular meeting at Ottawa the first week in October, in Washington in November, at Detroit, and at Buffalo in December.

The CHAIRMAN. They were in session a week in January, a week in February, a few days about the Lake of the Woods matter, and a week in October?

Mr. BUSBEY. They were a week at Kenora on the Lake of the Woods proposition.

The CHAIRMAN. Five or six weeks in session during the year?

Mr. BUSBEY. Yes.

Mr. CLINE. How many cases were disposed of during the year?

Mr. BUSBEY. They have not disposed of any.

Mr. HARRISON. What salary do you pay the commissioners?

Mr. BUSBEY. $7,500.

Mr. HARRISON. How many employees are there?

Mr. BUSBEY. They have a secretary and a clerk here.

Mr. HARRISON. How much does the secretary get?

Mr. BUSBEY. The secretary gets $3,000 as secretary and $1,000 as disbursing officer of the commission.

Mr. HARRISON. What is the balance of the appropriation used for?

The CHAIRMAN. You did not ask him what the clerk receives.

Mr. HARRISON. I thought he stated what the clerk received. How much does the clerk get?

Mr. BUSBEY. The clerk receives $2,250.

Mr. HARRISON. What is the balance of the appropriation used for?

Mr. BUSBEY. There has not been so very much of it used, but they have begun these investigations. This investigation at the Lake of the Woods is a technical investigation for which engineers had to be employed, because it is a controversy between the agriculture interests, the power interests, and the navigation interests as to the maintenance of water levels there, and the question of conservation enters into it. These two Governments have also referred to the commission the question of investigating the pollution of boundary waters. It has been agitated in both countries for some time, and the commission now has experts preparing a plan for that investigation, which will necessarily be rather expensive.

The CHAIRMAN. What have their appropriations been heretofore?

Mr. BUSBEY. The original appropriation was $75,000, and that appropriation was not used. The commission was not appointed until in March, 1911. In the appropriation bill for 1912 they appropriated $75,000 and the unexpended balance, and last year in the sundry civil bill they made the appropriation of the unexpended balance of the appropriation that was then unused.

Mr. KENDALL. Unexpended?

Mr. BUSBEY. Yes.

Mr. BARTHOLDT. Does the treaty specifically provide for a joint high commission?

Mr. BUSBEY. It does.

Mr. BARTHOLDT. What appropriation does the Dominion of Canada make?

Mr. BUSBEY. $75,000.

Mr. BARTHOLDT. The same as we do?

Mr. BUSBEY. Yes.

Mr. KENDALL. When was this treaty negotiated?

The CHAIRMAN. It is the same treaty we have been discussing in the Niagara Falls matter.

Mr. KENDALL. What is the date of the ratification of that treaty?

The CHAIRMAN. The treaty was ratified by the Senate. It was negotiated in 1909.

Mr. CLINE. It was proclaimed March 13, 1910.

Mr. KENDALL. It was ratified then?

Mr. CLINE. No; it was ratified by the Senate March 3, 1909, and ratified by Great Britain March 31, 1910, and proclaimed by both Governments, I suppose, March 13, 1910.

Mr. KENDALL. And it became operative March 13, 1910?

Mr. CLINE. It became operative March 13, 1910.

Mr. KENDALL. And that treaty provides that the Government may constitute this national commission?

Mr. CLINE. They agreed to do it.

Mr. KENDALL. Then following that, in 1911, was there legislation creating this joint commission?

Mr. BUSBEY. Yes.

Mr. KENDALL. And providing for their salaries?

Mr. BUSBEY. No. The provision was that the President should fix the salaries.

Mr. KENDALL. In 1911 the President established the commission and appointed whom as commissioners?

Mr. BUSBEY. The original commissioners were Thomas H. Carter——

Mr. KENDALL. Senator Carter from Montana.

Mr. BUSBEY. James A. Tawney.

Mr. KENDALL. Of Minnesota.

Mr. BUSBEY. And Frank S. Streeter, of New Hampshire.

Mr. KENDALL. Senator Carter has since died.

Mr. BUSBEY. He died in September, 1911. He was succeeded by ex-Senator George Turner, of Washington.

Mr. KENDALL. So, Tawney, Streeter, and Turner are now the commissioners?

Mr. BUSBEY. Yes.

Mr. KENDALL. And you were made secretary?

Mr. BUSBEY. I was at the beginning.

Mr. KENDALL. At the beginning?

Mr. BUSBEY. Yes.

Mr. KENDALL. Your first appropriation was in 1911, for $75,000, which was not expended?

Mr. BUSBEY. No. I say that in the appropriation for the fiscal year 1911 it was $75,000, and the commission was appointed, the American members of the commission, in March, 1911, so a very small portion of that appropriation was used by July. Then the appropriation for the year 1912 was $75,000 and the unexpended balance.

Mr. KENDALL. $75,000 plus whatever that balance was?
Mr. BUSBEY. Yes.
Mr. KENDALL. Then that appropriation was not all expended?
Mr. BUSBEY. No.
Mr. KENDALL. And the appropriation for 1912 was for $75,000?
Mr. BUSBEY. No.
The CHAIRMAN. For the unexpended balance?
Mr. BUSBEY. For the unexpended balance of the appropriation. There was something over $100,000 unexpended the 1st of July, 1912.
Mr. KENDALL. Of the two appropriations?
Mr. BUSBEY. Of the two appropriations. The language of the last appropriation act is "the unexpended balance of all previous appropriations for this purpose."
Mr. KENDALL. That was substantially $100,000?
Mr. BUSBEY. Yes; substantially $100,000.
Mr. KENDALL. Now you are asking for $75,000 for this year?
Mr. BUSBEY. I understand the estimate reads for $75,000.
Mr. KENDALL. You have mentioned one question which has been considered by the commission—the determination of the level of the Lake of the Woods?
Mr. BUSBEY. Yes.
Mr. KENDALL. This question has engaged the attention of the commission of sanitation.
Mr. BUSBEY. There are two other questions: The investigation of the pollution of boundary waters and the question of the Livingston Channel in the Detroit River.
Mr. KENDALL. What is that question, Mr. Busbey?
Mr. BUSBEY. That is a question of where the Government of the United States has constructed two great channels there to aid shipping at an expenditure of something like $10,000,000, but the engineers were——
Mr. TOWNSEND. You are speaking now of the Army engineers?
Mr. BUSBEY. Yes.
Mr. TOWNSEND. The Army engineers did the work?
Mr. BUSBEY. The Government of the United States did this work there. As I understand the question, their plan contemplated a dike to protect the Livingston Channel from cross currents which would endanger shipping and also to protect to a certain extent the level of Lake St. Clair. The appropriation was made for the investigation for carrying out that work, as I understand. The people of Emmetsburg, a small town on the Canadian side of the Detroit River, objected to the construction of this dike, a part of which must be constructed on Canadian territory. There was considerable diplomatic interchange regarding the matter, and the work was suspended and is suspended now. In the fall, in September or October, the two Governments referred this question to the commission for investigation as to whether this dike would injure the people of Emmetsburg or anyone there and also as to whether it was absolutely necessary. The commission met here in November and immediately took that question up. The Canadian Government represented that the chief of their engineers had made an investigation but had not completed his report and asked the commission to postpone the further consideration of that question until he could have his report ready. They have been notified that Mr. Stuart, the Canadian engineer, will be ready to report, as will Col. Patrick, the engineer of the United States in charge of Detroit, and the commission will meet in Detroit on February 17 to have a hearing on that question.
Mr. TOWNSEND. All the questions that have been presented to the commission so far have been questions which demand peculiarly the experience and knowledge of expert engineers?
Mr. BUSBEY. Those two questions.
Mr. TOWNSEND. Yes; the Lake of the Woods question and the Livingston Channel question.
Mr. BUSBEY. Yes.
Mr. TOWNSEND. And the pollution of boundary waters?
Mr. CLINE. And the question of sanitation.
Mr. TOWNSEND. And the question of sanitation. Of course, the commissioners we have appointed have, none of them, any special information on either one of those questions, and they have had to be informed by engineers of the United States Army in regard to them.
Mr. BUSBEY. Yes.
Mr. TOWNSEND. When this commission meets in Ottawa I suppose the United States commissioners will get their expenses also?
Mr. BUSBEY. Yes.
Mr. TOWNSEND. How much is allowed for expenses?
Mr. BUSBEY. They are allowed, under the President's order, $10 a day for their expenses in addition to transportation. They get, in lieu of hotel and expenses, $10 a day.
Mr. TOWNSEND. That is, the railroad fare and sleeping-car fare are paid in one item, and then, in addition to that, they get $10 a day for hotels?
Mr. BUSBEY. Yes.
Mr. TOWNSEND. And I suppose when they have a session in Ottawa the clerical force goes there, too?
Mr. BUSBEY. The secretary.
Mr. TOWNSEND. And an allowance, of course, is made for him?
Mr. BUSBEY. Yes; his actual traveling expenses.
Mr. TOWNSEND. Including hotels and everything?
Mr. BUSBEY. Yes.
The CHAIRMAN. Does the commission get its traveling expenses when it comes to Washington?
Mr. TOWNSEND. Yes.
Mr. HARRISON. What is the salary paid the commissioners on the part of Canada?
Mr. BUSBEY. $7,500.
Mr. HARRISON. The same as here?
Mr. BUSBEY. Yes. The appropriation is the same.
Mr. KENDALL. What is the present state of your fund? I understand you to say you are disbursing officer?
Mr. BUSBEY. Yes.
Mr. KENDALL. You had about $100,000 at the time the last bill was up?
Mr. BUSBEY. Yes.
Mr. HARRISON. What is the present status of the matter?
Mr. BUSBEY. At the close of the year, December 31, 1912, our appropriation was $80,000.
Mr. HARRISON. Nineteen hundred and what?
Mr. BUSBEY. December 31, 1912.
Mr. CLINE. You have $80,000 on hand?
Mr. BUSBEY. Yes; about—a little less than that, or $78,000, in round numbers.
The CHAIRMAN. And you have six months to run?
Mr. BUSBEY. Yes; but with these investigations just practically beginning. The commission has made very little expenditure on these investigations that were covered into the annual year of 1912. The expenses of these investigations practically began along in December.
The CHAIRMAN. When did the commission organize?
Mr. BUSBEY. The commission organized as a joint commission the 10th of January, 1912.
The CHAIRMAN. When did the commission organize here? When did the salaries of the commissioners and its employees begin?
Mr. BUSBEY. The American members of the commission were appointed March 16, I think, 1911. [After consulting memoranda.] The members appointed from the United States were appointed March 9, 1911.
The CHAIRMAN. They have not been in existence two years, then?
Mr. BUSBEY. No. The Canadian members of the commission were appointed November 10, 1911.
The CHAIRMAN. In that two years the salaries of the commissioners and the attachés of the commission amounted to $57,400, and during that time the commission has spent $70,000. Can you tell how much of that $12,600 was spent in traveling expenses of the commissioners and secretary?
Mr. BUSBEY. I could not give you that now. I can furnish it to you.
The CHAIRMAN. I wish you would.
Mr. BUSBEY. I was not informed as to the desire of the committee; I just received a telephone message asking me to come up, and, as I said to you in the beginning, Mr. Towney had been informed that this estimate had been transferred to the Committee on Appropriations, and he appeared before that committee and gave them all the information asked for. I can furnish it to you.
The CHAIRMAN. I would be much obliged to you if you would.
Mr. BUSBEY. Yes.
Mr. HARRISON. When did Mr. Towney appear before that committee?
Mr. BUSBEY. I will not say definitely, but he was here two weeks ago. As I remember, he prepared a statement for them, but the exact date as to when he prepared that statement or appeared before the committee, I do not know.
Mr. CLINE. On January 1, this year, you had $80,000 to the credit of the commission. Now you are asking for $75,000 more. That is $155,000 for the use of the commission from January 1, 1913, to June 30, 1914.
Mr. BARTHOLDT. A year and a half.
Mr. MCKINLEY. Does this revert back the 1st of July, as other appropriations do?
Mr. CLINE. I understand not.
Mr. KENDALL. The appropriation is of all unexpended balances, Mr. McKinley.
Mr. CLINE. Yes. What I want to know, briefly, is what this estimate of $155,000 is to be used for. What do you expect this to be needed for?
Mr. BUSBEY. The sanitary experts estimate that the investigation of the pollution of boundary waters, which is very extensive, will cost anywhere from $30,000 to $40,000 in itself.
The CHAIRMAN. But you have been in existence only two years, and you have spent $70,000; now, for the next year and a half you want $155,000.
Mr. KENDALL. Well, Mr. Chairman, I think Mr. Busbey has made it clear about their embarking upon some investigations that are necessarily, I suppose, extensive.
Mr. BUSBEY. They will necessarily be extensive.
Mr. FAIRCHILD. Mr. Busbey, what is the point of controversy as to the maintenance of the water level there?
Mr. BUSBEY. In the Lake of the Woods?
Mr. FAIRCHILD. Yes.
Mr. BUSBEY. I would say there are extensive power plants on the Rainy River, at Koochining Falls, above the Lake of the Woods, about 50 miles. There are extensive power plants at the mouth of the Winnipeg River, at the outlet of the Lake of the Woods.
Mr. FAIRCHILD. Where is the Lake of the Woods?
Mr. BUSBEY. On the boundary line between the State of Minnesota and the Province of Ontario and Manitoba.
Mr. TOWNSEND. Is fishing pretty good up there, Mr. Busbey?
Mr. BUSBEY. I have had no experience in that; I did not try the fishing. [Laughter.]
The CHAIRMAN. Have you had any questions about the diversion of water below the Niagara Falls before your commission?
Mr. BUSBEY. No.
Mr. BARTHOLDT. The three questions which you have mentioned and which the commission has under investigation now—were they taken up by the commission on their own initiative or were they referred to them by the State Department?
Mr. BUSBEY. They were referred to them by the joint action of the two Governments.
Mr. BARTHOLDT. The two Governments?
Mr. BUSBEY. By letter from the ambassador of Great Britain to the Secretary of State.
Mr. BARTHOLDT. And from that we are to infer that the State Department would not have had the time or means of solving the question themselves?
Mr. TOWNSEND. You might infer that or you might infer that the good-natured Secretary of State was trying to give this commission something to do to save their faces. When it comes to inferences, one inference is as good as another.
Mr. BARTHOLDT. Yes; but I was serious in what I was saying.
Mr. TOWNSEND. The doctor is always serious. I will give him credit for that. So am I.
Mr. KENDALL. Did not Gen. Bixby make a very elaborate report in the matter of pollution of boundary waters, Mr. Busbey?
Mr. BUSBEY. Gen. Bixby?
Mr. KENDALL. Yes.
Mr. BUSBEY. I think not. Dr. McLaughlin, of the Public Health Service, made an elaborate report, which is published in two bulletins of the Public Health Service.
Mr. KENDALL. Dr. McLaughlin is connected with the Government, is he?
Mr. BUSBEY. Mr. McLaughlin has been connected with the Public Health Service for some years. I will say there that when the commission took up this question of the pollution of boundary waters the commissioners on the part of the United States consulted Dr. Blue, Surgeon General of the Public Health Service, as to the best methods and the best man to employ as an expert. He suggested to them that Dr. McLaughlin's experience and qualifications for that were equal if not superior to any man he knew in the country, and on the request of the American members of the commission the Secretary of the Treasury has given Dr. McLaughlin a leave of absence without pay that he may take up this work for the commission.

Mr. KENDALL. He has prosecuted a very elaborate investigation and has published a report dealing with the questions that are to be considered by the commission?

Mr. BUSBEY. His report deals with international and interstate waters, but deals with that question from the standpoint of the United States alone.

Mr. KENDALL. Yes; and he has submitted detailed recommendations about what should be done?

Mr. BUSBEY. He is preparing now detailed recommendations, in conference with the expert from the Canadian side, as to the method of conducting this investigation, to begin in March, when the flood waters occur. As to the question of pollution of boundary waters, that involves the question of whether the pollution extends from one side to the other. Article 4 provides: "It is further agreed that the waters herein defined as boundary waters and waters flowing across the boundary shall not be polluted on either side to the injury of the health or the property on the other"; and that is the question.

Mr. CLINE. Mr. Busbey, do you expect to get any further additional facts than you already have on that from this report made by this gentleman?

Mr. BUSBEY. They are preparing to make this investigation this summer, the two experts.

Mr. CLINE. The same expert that has already made the investigation?

Mr. BUSBEY. I beg your pardon. His investigation attached only to American waters and did not extend across the boundary. The commission held a meeting at Buffalo in December——

Mr. KENDALL. Coming back to this canal at Detroit, that $10,000,000 you say has been already expended in the construction of the canal?

Mr. BUSBEY. The channel—deepening the channel there.

Mr. KENDALL. And that work was done under the supervision of the Army engineers by the United States?

Mr. BUSBEY. Yes.

Mr. KENDALL. And at that time the Army engineers formulated plans, I believe, relating to the whole question and submitted them?

Mr. BUSBEY. Yes.

Mr. KENDALL. They were adopted, and the channel has been constructed?

Mr. BUSBEY. Yes.

Mr. KENDALL. Your commission has power to print, of course?

Mr. BUSBEY. We were only given that power in the last appropriation bill. We have not done any printing, though.

Mr. KENDALL. You have not done any printing with reference to the action of the commission up to this time?

Mr. BUSBEY. No.

Mr. KENDALL. Are its records available so that the committee might examine to see what progress has been made in the work of the commission?

Mr. BUSBEY. Yes.

Mr. KENDALL. Take this Lake of the Woods proposition, for instance: You had hearings there, did you not?

Mr. BUSBEY. Yes.

Mr. KENDALL. Are not those printed?

Mr. BUSBEY. No. We have them in typewritten form. The commission thought that, as these were preliminary hearings, they were not of sufficient importance to print for public distribution, but reserved them as the records for anyone who cared to see them and did not go to the expense of printing them.

Mr. KENDALL. Mr. Chairman, will you ask the chairman of the Committee on Appropriations for the hearings that were had down there also?

The CHAIRMAN. Yes.

Mr. COOPER. Your offices are in the Southern Building, are they not?

Mr. BUSBEY. Yes.

Mr. COOPER. What rent are you paying for those offices?

Mr. BUSBEY. $2,500.

The CHAIRMAN. What does the stenographer get?

Mr. BUSBEY. The clerk and stenographer—there is only one man.

Mr. KENDALL. He is a $2,200 man?

Mr. BUSBEY. He is a $2,200 man.

Mr. COOPER. He is here in Washington all of the time?

Mr. BUSBEY. Yes.

Mr. COOPER. In Washington, in the Southern Building?

Mr. BUSBEY. Yes.

The CHAIRMAN. How many offices are there in the suite?

Mr. BUSBEY. We have a room for each of the commissioners and one for the secretary and clerk together, and a board room.

Mr. COOPER. Five rooms?

Mr. BUSBEY. And we have a room for the Canadian members—a conference room.

The CHAIRMAN. Six rooms in all?

Mr. BUSBEY. Six.

Mr. COOPER. Could not the conference meet in the board room?

Mr. BUSBEY. Senator Carter, when he selected the offices, said: "I think it would be a courteous matter to have a room where, when the commission is in session in the board room, should Canadian members desire to confer among themselves, they might have an office which they could call their own and feel perfectly at home; where their secretary might keep their papers and where they might dictate letters or prepare letters or anything they wanted to do."

Mr. BARTHOLDT. Have the Canadian commissioners an office at Ottawa?

Mr. BUSBEY. Yes. They treat the American members in the same way. There is a room for the American members whenever they go there for their conference.

Thereupon the committee went into executive session.

Mr. CANNON. I want to say here that Mr. Busbey is not a Member of this House——

Mr. MANN. But he is the peer of those fellows who have been attacking him.

Mr. CANNON. He is the peer of decent, honest men, and for average ability, I was about to say, of any Member of this House—is certainly my peer and that of the gentleman from New Jersey, intellectually and in every way—and as he can not be heard I am perfectly willing that this statement shall go in the RECORD to speak for itself, and I would like to have that done.

Mr. TOWNSEND. Will the gentleman yield?

Mr. CANNON. I will.

Mr. TOWNSEND. I simply want to pay a tribute to Mr. Busbey.

Mr. CANNON. Oh, no.

Mr. TOWNSEND. I do, indeed.

The CHAIRMAN. The gentleman declines to yield.

Mr. TOWNSEND. I desire to pay a tribute.

Mr. CANNON. Regular order! The gentleman can pay a tribute in his own time.

Mr. TOWNSEND. I move to strike out the last four words.

Mr. CANNON. It would be a tribute to a man after—but I will just stop there, because I might say something that would be out of order.

Mr. MANN. Mr. Chairman, I ask for the regular order.

Mr. FITZGERALD. Mr. Chairman, I want to make a statement.

Mr. KENDALL. Regular order, Mr. Chairman.

Mr. FITZGERALD. The gentleman from New Jersey [Mr. TOWNSEND] made a statement about the rooms occupied by this commission, and in justice to the members of that commission I believe it is proper that I should make a statement about it. When Mr. Tawney was chairman of the Committee on Appropriations I was one of a committee, and the gentleman from Illinois [Mr. MADDEN] was another, who were appointed by him to visit rented quarters in this city, for the purpose of eliminating abuses in connection with the renting of property for public purposes. After this commission was organized and the question of acquiring accommodations arose, he came to see me and explained the situation, which, in the opinion of the commission, necessitated certain offices. It was determined that a board room, where the court could sit, was required. There was also provided an office for the chairman of the American commission and one for the Canadian commission, and the other members were bunched together.

Mr. TOWNSEND. Oh, no.

Mr. FITZGERALD. The gentleman said they had six rooms.

Mr. TOWNSEND. They had six rooms, according to the testimony of the secretary of the commission.

Mr. FITZGERALD. That includes a board room and a general office and other offices.

Mr. FLOOD of Virginia. Each of the American commissioners have an office, and then there is an office for the Canadian commission.

Mr. TOWNSEND. To which they all retired when they went to vote.

Mr. FLOOD of Virginia. And an office for the secretary.

Mr. FITZGERALD. The Canadian Government had supplied the commission with accommodations at Ottawa. The commission was to sit at one time at Ottawa and another time in Washington.

There have been some statements about members of this commission. I know two of them intimately. One is former Senator Turner, of Washington, one of the most eminent authorities on international law in this country. So highly is he regarded that, although a Democrat, he was appointed because of his great legal ability by a Republican President to represent this country before a joint high commission on certain fisheries questions. The other is Mr. Tawney. I assert that no more patriotic, honest, industrious, level-headed man served in this House in the last half century. He sacrificed his place in this House, after a service here of 18 years, because of his conscientious devotion to duty. He declined to permit the Executive to swerve him from the path that he thought was right. What defeated Mr. Tawney in his campaign for reelection was President Roosevelt's speech at the conservation convention at St. Paul, which was made because Mr. Tawney had put an end to all the illegal methods of the President and had prevented the improper use of public money for illegal commissions.

This commission was legally created. Before the gentleman from New Jersey [Mr. TOWNSEND] came in statements were made which demonstrated the reasons for the failure of the commission to meet in Washington——

Mr. FLOOD of Virginia. I must interrupt the gentleman there.

Now, the Canadian commission was certainly appointed and organized before the beginning of the calendar year 1912, and during the whole of that year this commission was in session less than four weeks. That is the testimony of the secretary of the commission.

Mr. FITZGERALD. If the gentleman understood the treaty and the things that led up to its negotiation and the purpose to be accomplished, he would know that the greater part of the work will be done not in joint session, but when the commission is not in joint session.

Mr. MANN. Will the gentleman from New York [Mr. FITZGERALD] yield?

Mr. FITZGERALD. Yes.

Mr. MANN. The members of the Committee on Foreign Affairs get $7,500 a year each for services, most of which is committee services. Does the gentleman think the members of the committee have been in service for a hundred hours during all of last year?

Mr. FITZGERALD. I do not wish to discuss collateral matters. I made a point of order on this item because I believed it belonged to the Committee on Appropriations. I have no controversy with these gentlemen for insisting on their contention that the Committee on Foreign Affairs has jurisdiction. It was merely a question of order under the rules and usages of the House. I believe that in justice to these men, whether they are to continue or not to continue on this commission, they should not be unjustly put in a position of being grabbers of public funds, and I know that no mere tyros or novices can discharge the important functions that properly belong to that commission.

Mr. KENDALL. Mr. Chairman, I demand the regular order.

Mr. TOWNSEND. Mr. Chairman, I move to strike out the last four words.

Mr. FLOOD of Virginia. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from New Jersey [Mr. TOWNSEND] is recognized.

Mr. TOWNSEND. Mr. Chairman, I move to strike out the last four words.

Mr. FLOOD of Virginia. Mr. Chairman, I withdraw my motion that the committee rise.

The CHAIRMAN. The gentleman from Virginia [Mr. FLOOD] withdraws his motion.

Mr. TOWNSEND. Mr. Chairman, I simply want to remark that this recent alliance between the gentleman from New York [Mr. FITZGERALD] and the gentleman from Illinois [Mr. MANN] has resolved itself into a very entertaining situation.

The gentleman from New York comes to us on one day and lectures us severely on the extravagance of the House, and on the next day he comes before us and, with the same severity of voice and with the same capacity for lecturing, criticizes us because we are not extravagant. The gentleman from Illinois——

Mr. FITZGERALD. If the gentleman will permit me, I have not referred to the amount carried by this item at all.

Mr. TOWNSEND. Mr. Chairman, I have the floor. I refuse to yield.

The CHAIRMAN. The gentleman refuses to yield.

Mr. FITZGERALD. But the gentleman ought not to make inaccurate statements about me.

Mr. TOWNSEND. The gentleman from Illinois [Mr. MANN] suggests that the members of the Committee on Foreign Affairs are not earning their salaries.

Mr. MANN. I did nothing of the kind, although I might say it.

Mr. TOWNSEND. I am capable of deducing from the gentleman's language what the gentleman from Illinois intended the House to believe. Unfortunately, the Constitution did not provide that the Congress should consist of the gentleman from Illinois [Mr. MANN], who should have this power and that power and the other power. [Laughter.] It gives equal power and authority and right to each Member elected here.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I ask unanimous consent, Mr. Chairman, that the gentleman be permitted to proceed five minutes more.

Mr. TOWNSEND. It is unfortunate that we are compelled to listen to the lectures of the gentleman as to his superior merits, qualities, and abilities.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. I ask that the gentleman may have five minutes more in which to make a further exhibition of himself. He makes an exhibition of himself now, and I hope he will be permitted to complete it.

Mr. FLOOD of Virginia. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Virginia [Mr. FLOOD] moves that the committe rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RUCKER of Missouri, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, and had come to no resolution thereon.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 4043. An act divesting intoxicating liquors of their interstate character in certain cases.

HOUR OF MEETING TO-MORROW.

Mr. FLOOD of Virginia. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning.

The SPEAKER. The gentleman from Virginia asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

ADJOURNMENT.

Mr. FLOOD of Virginia. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 20 minutes p. m.) the House adjourned, pursuant to the order, until to-morrow, Friday, February 14, 1913, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting supplemental estimate of appropriation to commence the construction of necessary buildings for the accommodation of one additional regiment of Cavalry on military reservation of Fort Oglethorpe, Ga. (H. Doc. No. 1395); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting supplemental estimate of appropriation for pay of enlisted men, Quartermaster Corps, and additional pay for length of service for the fiscal year 1914 (H. Doc. No. 1394); to the Committee on Military Affairs and ordered to be printed.

3. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of Commerce and Labor transmitting sworn statements of the value of the personal effects of the officers and crew of the lighthouse tender *Armeria*, wrecked May 20, 1912, and recommending an appropriation to pay same (H. Doc. No. 1393); to the Committee on Claims and ordered to be printed.

4. A letter from the Commission for Enlarging the Capitol Grounds, transmitting report (H. Doc. No. 1392); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. HOWLAND, from the Committee on the Judiciary, to which was referred the resolution (H. Res. 802) requesting the President of the United States to furnish the House of Representatives with all the affidavits, charges, corroborating evidence, letters, and other official documents in the case of Willard N. Jones, reported the same with amendment, accompanied by a report (No. 1513), which said bill and report were referred to the House Calendar.

Mr. DUPRÉ, from the Committee on the Judiciary, to which was referred the bill (H. R. 28635) to amend section 81 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, and for other purposes, reported the same without amendment, accompanied by a report (No. 1514), which said bill and report were referred to the House Calendar.

Mr. BROUSSARD, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 28632) to authorize the construction of a bridge across Twelve Mile Bayou, in Caddo Parish, reported the same without amendment, accompanied by a report (No. 1515), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. WHITE, from the Committee on Pensions, to which was referred sundry bills, reported in lieu thereof the bill (H. R. 28746) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain

soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, accompanied by a report (No. 1512), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. WHITE: A bill (H. R. 28746) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; to the Committee of the Whole House.

By Mr. FRENCH: A bill (H. R. 28747) reserving from the public lands in Idaho as a public park for the benefit of the people of the United States, and for the protection and preservation of the game, fish, timber, and all other natural objects therein, a tract of land herein described; to the Committee on the Public Lands.

By Mr. BERGER: Resolution (H. Res. 830) to investigate the censorship of the Post Office Department over second-class mail matter; to the Committee on Rules.

By Mr. WILLIS: Resolution (H. Res. 831) for printing additional copies of Bulletin No. 85, Bureau of Soils; to the Committee on Printing.

By Mr. RICHARDSON: Resolution (H. Res. 832) authorizing the payment of $1,200 to Joseph M. McCoy for extra and expert services rendered to the Committee on Pensions during the third session of the Sixty-second Congress; to the Committee on Accounts.

By Mr. EVANS: Resolution (H. Res. 833) authorizing the Speaker to appoint three counselors; to the Committee on the Library.

By Mr. ROBERTS of Massachusetts: Resolution (H. Res. 834) providing for reprinting Senate Document No. 1018; to the Committee on Printing.

By Mr. PETERS: Joint resolution (H. J. Res. 399) authorizing the Joint Committee on Printing to publish a bulletin of committee hearings; to the Committee on Printing.

By Mr. JOHNSON of Kentucky: Joint resolution (H. J. Res. 400) regulating rates of hotels, lodging houses, boarding houses, cafés, restaurants, and similar places of abode and entertainment in the city of Washington; to the Committee on the District of Columbia.

By Mr. HAWLEY: Memorial of the Legislature of the State of Oregon, favoring Senate bill 8003, for the construction, improvement, and maintenance of post roads and rural delivery routes through the cooperation and joint action of the United States and the several States wherein said routes are located; to the Committee on the Post Office and Post Roads.

Also, memorial of the Legislature of Oregon, favoring the continued operation of the Weeks law for the protection of the watersheds of navigable streams from fire, and for further appropriation to continue the same; to the Committee on Agriculture.

Also, memorial of the Legislature of the State of Oregon, favoring the amendment of section 5 of the reclamation act of June 17, 1902, so as to make the time for payments thereunder extend for a period not exceeding 25 years; to the Committee on Irrigation of Arid Lands.

By Mr. STEPHENS of California: Memorial of the Legislature of the State of California, favoring the bill of Senator NEWLANDS to create a board of river regulation, etc.; to the Committee on Rivers and Harbors.

By Mr. NEEDHAM: Memorial of the Legislature of the State of California, favoring the bill of Senator NEWLANDS to create a board of river regulation, etc.; to the Committee on Rivers and Harbors.

By Mr. RAKER: Memorial of the Legislature of California, favoring the Newlands bill creating a board of river regulation; to the Committee on Rivers and Harbors.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNS of Tennessee: A bill (H. R. 28748) granting a pension to Henry S. Robert; to the Committee on Pensions.

By Mr. DICKINSON: A bill (H. R. 28749) granting a pension to James W. Scott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28750) granting an increase of pension to Patrick Gallagher; to the Committee on Invalid Pensions.

By Mr. GARRETT: A bill (H. R. 28751) granting an increase of pension to Eliza J. Whitson; to the Committee on Pensions.

Also, a bill (H. R. 28752) granting an increase of pension to Hudson J. Martin; to the Committee on Invalid Pensions.

By Mr. McCALL: A bill (H. R. 28753) granting a pension to Mary E. Mullen; to the Committee on Pensions.

By Mr. MANN: A bill (H. R. 28754) granting an increase of pension to Henry Haddock; to the Committee on Invalid Pensions.

By Mr. PETERS: A bill (H. R. 28755) for the relief of John J. Kane; to the Committee on Claims.

By Mr. POST: A bill (H. R. 28756) granting an increase of pension to William G. Irwin; to the Committee on Invalid Pensions.

By Mr. YOUNG of Kansas: A bill (H. R. 28757) granting an increase of pension to W. H. Mize; to the Committee on Invalid Pensions.

Also, a bill (H. R. 28758) granting an increase of pension to Samuel G. H. Whitley; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BYRNS of Tennessee: Papers to accompany bill granting a pension to Henry S. Robert; to the Committee on Pensions.

By Mr. CALDER: Petition of the Bird Lovers' Club, Brooklyn, N. Y., favoring the passage of the McLean bill, granting Federal protection to all migratory birds; to the Committee on Agriculture.

Also, petition of citizens of Brooklyn, N. Y., and members of the New York Produce Exchange, favoring the passage of House bill 3010, for the regulation of the transmission of messages by telephone and telegraph; to the Committee on Interstate and Foreign Commerce.

By Mr. FORNES: Petition of the Sailors' Union of the Atlantic, relative to the payment of the crews of the Panama Steamship Line, and the special privileges granted to said company, which is controlled and owned by the United States Government; to the Committee on Interstate and Foreign Commerce.

By Mr. GARRETT: Papers to accompany bill granting an increase of pension to Hudson J. Martin; to the Committee on Invalid Pensions.

Also, papers to accompany bill granting an increase of pension to Eliza J. Whitson; to the Committee on Pensions.

By Mr. KINKAID of Nebraska: Petition of citizens of Holt County, Nebr., protesting against the passage of legislation placing burdensome conditions or qualifications on rural wagon salesmen of domestic and stock remedies, spices, extracts, and toilet articles; to the Committee on Interstate and Foreign Commerce.

By Mr. LEVY: Petition of the New York State Conference on Taxation, Binghamton, N. Y., favoring the passage of legislation providing for the extension of the work of the Census Department; to the Committee on the Census.

Also, petition of the Downtown Taxpayers' Association, Brooklyn, N. Y., favoring the insertion of a clause in the naval appropriation bill providing for the building of one of the new battleships in a Government navy yard; to the Committee on Naval Affairs.

By Mr. MANN: Petition of the Chicago Woman's Club, Chicago, Ill., protesting against the passage of any legislation tending to destroy the present national system of the protection of forests; to the Committee on Agriculture.

By Mr. MOTT: Petition of the New York State Conference on Taxation, Binghamton, N. Y., favoring the passage of legislation for the extension of the work of the Census Department; to the Committee on the Census.

By Mr. NEEDHAM: Petition of the Christian Church of Modesto, Cal., and other citizens of Modesto and Oakdale, Cal., favoring the passage of the Kenyon "red-light" injunction bill, for the cleaning up of Washington for the inauguration; to the Committee on the District of Columbia.

Also, petition of members of the faculty and students of the University of Redlands, Redlands, Cal., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

Also, petition of the California State Board of Forestry, favoring the passage of legislation making further appropriations for Federal aid for the protection of forested watersheds of navigable streams; to the Committee on Agriculture.

By Mr. TALCOTT of New York: Petition of the Sailors' Union of the Atlantic, New York, relative to the payment of the crews of the Panama Steamship Line and the special privileges granted to said company, which is controlled and owned by the United States Government; to the Committee on Interstate and Foreign Commerce.

By Mr. WILLIS: Papers to accompany bill (H. R. 26453) granting an increase of pension to Helen G. Davis; to the Committee on Invalid Pensions.

By Mr. WILSON of New York: Petition of the Downtown Taxpayers' Association, Brooklyn, N. Y., favoring the insertion of a clause in the naval appropriation bill providing for the building of one of the new battleships in a Government navy yard; to the Committee on Naval Affairs.

Also, petition of the New York State Conference on Taxation, Binghamton, N. Y., favoring the passage of legislation for the extension of the work of the Census Department; to the Committee on the Census.

Also, petition of the Central Labor Union of Brooklyn, N. Y., favoring the insertion of a clause in the naval appropriation bill providing for the building of one of the new battleships in the Brooklyn Navy Yard; to the Committee on Naval Affairs.

SENATE.

FRIDAY, *February 14, 1913.*

(Legislative day of Tuesday, February 11, 1913.)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

CONNECTICUT RIVER DAM.

The PRESIDENT pro tempore (Mr. BACON). The Senate resumes the consideration of Senate bill 8033.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8033) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

Mr. BRANDEGEE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Connecticut suggests the absence of a quorum. The Secretary will proceed to call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Crane	Johnson, Me.	Sheppard
Bacon	Crawford	Johnston, Ala.	Smith, Ga.
Bankhead	Culberson	Jones	Smith, Md.
Borah	Cullom	Kenyon	Smith, Mich.
Bourne	Curtis	Kern	Smoot
Bradley	Dillingham	La Follette	Stephenson
Brady	Dixon	Lippitt	Sutherland
Brandegee	du Pont	Lodge	Thomas
Brown	Fall	McLean	Thornton
Bryan	Fletcher	Martin, Va.	Tillman
Burnham	Gallinger	Martine, N. J.	Townsend
Burton	Gamble	Myers	Warren
Catron	Gardner	Overman	Webb
Chamberlain	Gronna	Page	Williams
Clapp	Guggenheim	Perkins	Works
Clark, Wyo.	Jackson	Richardson	

Mr. ASHURST. I have been requested to announce that the junior Senator from New York [Mr. O'GORMAN] is absent on public business. I will let this announcement stand for the day.

Mr. KERN. I was requested to announce the unavoidable absence of the Senator from South Carolina [Mr. SMITH].

The PRESIDENT pro tempore. Upon the call of the roll of the Senate 63 Senators have responded to their names, and a quorum of the Senate is present.

Mr. BRANDEGEE. Mr. President, I gave notice yesterday afternoon, just before we took the recess, that I would this morning, having failed in several previous attempts, ask the unanimous consent of the Senate to vote upon the pending bill at a certain hour upon a certain day.

This bill, providing for the building of a dam across the Connecticut River, has, by unanimous consent, been the order of business exclusively before this body ever since last Tuesday, and this will have been the fourth day that the Senate has devoted its whole time to the discussion of the bill, which, except for one provision in it, would have been passed in the morning hour by unanimous consent.

I think we have devoted enough time to the discussion of the question. It has been made the vehicle for the discussion of the whole question of conservation, and, in my judgment, it should not be made the boat to carry ashore all the various projects that exist in the minds of men upon the conservation question. I think four days is enough to devote to the bill. No Senator can introduce a bill or present the report of a committee; no one can transact any morning business in the Senate.

We have about 12 more legislative days for the conclusion of the business of the present Congress, and it seems to me to be absurd and preposterous to have this measure, which is designed to dam the Connecticut River, damming the whole business of the Nation and obstructing the legislation of the United States of America.

Senators have made up their minds how they are going to vote on this question. I for one am ready, and have been for two or three days, to vote upon it. I think other Senators are ready to vote if they will waive their general conservation speeches and make them on some other measure and let us finish the business of this Congress.

In view of those sentiments, which I have attempted briefly to express, I ask unanimous consent that a vote be taken on the measure, in accordance with the terms of the unanimous-consent agreement which stands upon the front page of the calendar, not later than 5 o'clock next Monday afternoon.

Mr. BANKHEAD. Mr. President, speaking for myself I can see no reason why consent should not be given to vote upon the bill next Monday at 5 o'clock, and I hope that unanimous consent will be given to that effect.

Mr. BORAH. Mr. President, if this consent is given would it remove this measure as a bar to the further transaction of business on other matters?

Mr. BRANDEGEE. Not to-day; not until Monday.

Mr. BORAH. Then there is not very much consolation in the request.

Mr. BRANDEGEE. We can get through on Monday. If the Senator is willing to have the vote taken to-day, I would be very happy to ask unanimous consent that the vote be taken not later than 5 o'clock this afternoon.

Mr. GALLINGER. Why not ask that that be done?

Mr. BRANDEGEE. I asked that the time be fixed for Monday on the suggestion of the Senator from Alabama [Mr. BANKHEAD], who informed me that several Senators on the other side of the Chamber wish to discuss the measure further, and I did not want to restrict anybody in his rights.

Mr. BANKHEAD. My reason for suggesting to the Senator from Connecticut that he make his request for Monday at 5 o'clock was because several Senators desire to make some remarks upon the bill before the vote is taken. To-day must be consumed by the consideration of appropriation bills, or so much of the day as is necessary; to-morrow we can do no legislative business; and on Monday I thought the Senators who desire to address themselves on the bill would have an opportunity before the hour suggested for voting.

Mr. BORAH. I am not objecting to the consent. I was in the hope, however, that as we were violating the unanimous-consent agreement by making this agreement, we might also remove it as a bar to the further transaction of business.

Mr. BRANDEGEE. If the Senator will allow me to say so, I am heartily in accord with his motive and with what he says. I do not consider, however, that we are violating the unanimous-consent agreement that stands upon the face of the calendar simply by fixing an hour on the legislative day when we will take the vote, so that Senators may be warned and be here.

Mr. BORAH. As I said, I am not going to object. Both the Senator from Massachusetts [Mr. LODGE] and the Senator from New Hampshire [Mr GALLINGER] think that it is perfectly proper, and they are good authority on parliamentary questions, but there are a great many precedents against it. I presume, however, that this may be considered as establishing once for all in the Senate that this kind of an agreement is not a violation of such a unanimous-consent agreement.

Mr. LODGE. We make a further agreement to fix a time in the same legislative day to vote. That has been done repeatedly.

Mr. BORAH. It has been done repeatedly, but several times within the last few months it was refused.

Mr. LODGE. Unanimous-consent agreements to conclude a bill on a legislative day are comparatively new in the Senate, and I think they are a very poor kind of unanimous-consent agreements. I think we ought to fix an hour for voting.

Mr. BORAH. This establishes a precedent in the future.

Mr. BRANDEGEE. I do not think it establishes a precedent. It is in accordance with several precedents which have been made. For instance, on April 18, 1912, the Senate agreed by unanimous consent, which I have here in my hand, to vote upon the bill known as the compensation of railway employees, and upon May 2, 1912, it further agreed that "on Monday next, not later than 4 o'clock, the Senate will proceed without further debate," and so forth, to vote upon that bill. There are plenty of precedents for the action.

Mr. GALLINGER. Mr. President, I desire simply to say that if we agree to vote upon this bill on Monday next we will be voting upon the legislative day fixed originally.

Mr. BRANDEGEE. Of last Tuesday.

Mr. GALLINGER. Of last Tuesday. It does seem to me that it is competent for us to do that under the rules of the Senate or the customs of the Senate.

Mr. BRANDEGEE. I will ask unanimous consent that we vote upon this bill at 5 o'clock this afternoon.

Mr. GALLINGER. I am very glad the Senator from Connecticut makes that request.

Mr. BRANDEGEE. That will remove it as an obstruction.

Mr. GALLINGER. I desire to say—and I wish the chairman of the Committee on Appropriations would say it instead of the Senator from New Hampshire—that we have only two weeks to do the business of this Congress and the three Saturdays are preempted already. We will do no legislative business on those three days. It does seem to me that we ought to get this matter out of the way as speedily as possible and proceed with the other business of the session. I hope the amended request of the Senator from Connecticut will be granted.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Connecticut that——

Mr. WORKS. Mr. President, I am not going to object to the fixing of any time that may be satisfactory to other Senators, but I would not want it to be taken as consent on my part to the proposition that this is not a violation of the original unanimous agreement. It is so clearly in violation of the unanimous-consent agreement for the legislative day I wonder how there can be any two opinions about it. When I consent to a unanimous agreement for a legislative day it means that full discussion will be allowed; that there will be no limitation upon it until the Senate is ready to vote; and in my absence a unanimous agreement is made that limits the time of discussion, which is a direct violation of the original agreement.

Mr. JONES. Mr. President, I agree with what the Senator from California has said, but I would not object to fixing a time for a vote on Monday. However, I know that there are several Senators who are not expecting to speak to-day and I hope the Senator from Connecticut will make his request for Monday. We can take up the appropriation bills to-day. The Army appropriation bill will be taken up this morning, and other appropriation bills may follow. So they will not be delayed at all.

Mr. BRANDEGEE. The only reason why I modified the request was to accommodate the Senator from Idaho, who suggested that the agreement is operating as an obstruction to the business of the Senate. I will ask, just as I did, that we vote to-day not later than 5 o'clock, and then if the Senator from Washington objects, of course, I will ask for Monday.

Mr. JONES. Yes; I object.

Mr. BRANDEGEE. The Senator does object. Therefore, I renew the original request that we vote upon the bill—commence voting—not later than 5 o'clock next Monday.

The PRESIDENT pro tempore. The Senator from Connecticut asks unanimous consent that during the present legislative day, on Monday next, not later than 5 o'clock, the Senate will begin voting upon the bill and amendments pending and to be offered, and proceed to a conclusion of the same through the regular legislative methods. Is there objection?

Mr. BRISTOW. Mr. President, I am not specially interested in this legislation except as it may affect unanimous-consent agreements.

I want to take issue with the Senator from Massachusetts in his objection to the policy of fixing a legislative day instead of a certain hour on which to vote. My short experience here is that a fixed hour has always proved unsatisfactory, because amendments were offered when no explanation could be made without violating the unanimous-consent agreement, and I have not known of a bill on which there was much controversy, where there was a fixed hour set, that by some indirection the unanimous-consent agreement has not been violated by some Members of the Senate in order to get in an argument.

But on this measure my mind has been pretty well made up, and I am not offering an objection, though I think it is in violation of the unanimous-consent agreement absolutely, without any question.

Mr. GALLINGER. Mr. President, in view of the statements that have been made by several Senators that this is in violation of the unanimous-consent agreement, I object to the request made by the Senator from Connecticut.

The PRESIDENT pro tempore. The Senator from New Hampshire objects.

Mr. DU PONT obtained the floor.

Mr. BRANDEGEE. Mr. President, will the Senator from Delaware yield to me?

Mr. DU PONT. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, in view of the objection of the Senator from New Hampshire [Mr. GALLINGER], I want to say that I think perhaps he has wisely objected to the request for unanimous consent. Some Senators object to any unanimous-consent agreement for a vote on a legislative day, seeing the difficulties into which we are brought by that process. Other Senators, who desire unlimited debate, object to the fixing of a calendar day to take a vote upon any measure, and until the Senate can arrive by some consensus of opinion upon how to proceed to get to a vote on an important measure which it wants to dispose of, I do not think there is any better way to proceed than to keep this obstruction before the Senate until the minds of Senators are concentrated upon the obstruction, so that they will agree upon some method under which we can do business. I therefore give notice that, inasmuch as I am unable to secure the fixing of a time to vote upon this measure, in view of the fact that it was agreed to vote upon it upon the legislative day of last Tuesday, so far as is within my power, under parliamentary rules, subject to appropriation bills and conference reports, I shall attempt to keep the measure before the Senate as long as the Senate will stay in session each day.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House accepts the invitation of the Senate to attend the memorial services to commemorate the life, character, and public services of the Hon. JAMES S. SHERMAN, late Vice President of the United States, on Saturday February 15, 1913, at 10 minutes to 12 o'clock a. m.

The PRESIDENT pro tempore. The Chair lays before the Senate the following resolution from the House of Representatives, which will be read.

The Secretary read as follows:

Resolved, That on Saturday, February 15, 1913, at 10 minutes to 12 o'clock, ante meridian, pursuant to the resolution heretofore adopted, accepting the invitation of the Senate to attend the memorial services to commemorate the life, character, and public services of the Hon. JAMES S. SHERMAN, late Vice President of the United States, the House shall proceed with the Speaker to the Senate Chamber, and at the conclusion of the services it shall return to this Chamber.

The PRESIDENT pro tempore. The resolution will lie on the table.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. CURTIS. From the Committee on Appropriations I report favorably with amendments the bill (H. R. 28499) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes, and I submit a report (No. 1209) thereon. I give notice that I will call up the bill for consideration when the Army bill shall have been disposed of.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. NELSON. From the Committee on Commerce I report favorably with amendments the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and I submit a report (No. 1210) thereon. I desire to say that I shall ask the Senate to consider the bill on Monday next, after the conclusion of the routine morning business.

Mr. STONE. Will the report and the bill as reported be ordered printed? I should like to see them to-morrow morning.

The PRESIDENT pro tempore. They are always printed under the rule, and it will be so ordered. The bill will be placed on the calendar.

ARMY APPROPRIATION BILL.

Mr. DU PONT. I ask that the Senate proceed to the consideration of the bill (H. R. 27941) making appropriations for the support of the Army for the fiscal year ending June 30, 1914.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 27941) making appropriations for the support of the Army for the fiscal year ending June 30, 1914, which had been reported from the Committee on Military Affairs with amendments.

Mr. DU PONT. I ask that the formal reading of the bill be dispensed with, that the bill be read for amendment, and that the committee amendments have precedence.

The PRESIDENT pro tempore. The Senator from Delaware asks that the formal reading of the bill be dispensed with and that the bill be read for amendment, the committee amendments to have precedence. Is there objection? The Chair hears none, and that order is made.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Military Affairs was, under the subhead "Office of the Chief of Staff," on page 2, line 16, after the name "Manila," to insert "and the cost of special instruction at home and abroad, in maintenance of students and attachés," so as to make the clause read:

Contingencies military information section, General Staff Corps: For contingent expenses of the military information section, General Staff Corps, including the purchase of law books, professional books of reference, professional and technical periodicals and newspapers, and of the military attachés at the United States embassies and legations

abroad; and of the branch office of the military information section at Manila and the cost of special instruction at home and abroad, in maintenance of students and attachés, to be expended under the direction of the Secretary of War, $10,000: *Provided*, That section 3648, Revised Statutes, shall not apply to subscriptions for foreign and professional newspapers and periodicals to be paid for from this appropriation.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Chief Signal Officer," in the item of appropriation for expenses of the Signal Service of the Army, on page 5, line 19, after the word "machines," to strike out:

Provided further, That from and after the passage and approval of this act the pay and allowances that are now or may be hereafter fixed by law for officers of the Regular Army shall be increased 50 per cent for such officers as are now or may be hereafter detailed by the Secretary of War on aviation duty: *Provided*, That this increase of pay and allowances shall be given to such officers only as are actual flyers of heavier-than-air craft, and while so detailed: *Provided further*, That no more than 30 officers shall be detailed to the aviation service: *Provided further*, That paragraph 2 of section 26 of an act of Congress approved February 2, 1901, entitled "An act to increase the efficiency of the permanent military establishment of the United States," shall not limit the tour of detail to aviation duty of officers below the grade of lieutenant colonel: *Provided further*, That nothing in this provision shall be construed to increase the total number of officers now in the Regular Army.

The amendment was agreed to.

The next amendment was, under the subhead "Pay of officers of the line," on page 7, line 2, after the sum "$7,710,800," to insert: "*Provided*, That hereafter, in the administration of the act of Congress approved August 24, 1912, service actually performed by any officer with troops prior to December 15, 1912, as a regimental, battalion, or squadron staff officer shall be deemed to have been duty with a battery, company, or troop," so as to make the clause read:

For pay of officers of the line, $7,710,800: *Provided*, That hereafter, in the administration of the act of Congress approved August 24, 1912, service actually performed by any officer with troops prior to December 15, 1912, as a regimental, battalion, or squadron staff officer shall be deemed to have been duty with a battery, company, or troop.

Mr. DU PONT. I move to amend the amendment of the committee, in line 7, after the word "officer," by inserting a comma.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, under the subhead "Pay to clerks, messengers, and laborers at headquarters of divisions, departments, posts commanded by general officers, and office of the Chief of Staff," on page 10, after line 2, to insert:

In all, $317,840.

The amendment was agreed to.

The next amendment was, under the subhead "For pay of officers of the Staff Corps and staff departments," on page 11, line 8, after the sum "$95,695," to strike out:

Provided, That hereafter no further appointments of pay clerks shall be made.

So as to make the clause read:

For pay of 85 pay clerks, at $1,125 each per annum, $95,625.

The amendment was agreed to.

The next amendment was, on page 11, line 21, before the word "nurses," to strike out "twenty-five" and insert "fifty," and, in the same line, after the word "(female)," to strike out "$85,620" and insert "$106,030," so as to read:

For pay of 150 nurses (female), $106,030.

The amendment was agreed to.

The next amendment was, under the subhead "Retired officers," on page 12, line 13, after the sum "$2,877,000," to insert:

Provided, That hereafter when any officer who has been retired from active service and placed on the retired list on account of physical disability is found by an examining board, to be appointed by the Secretary of War, under the direction of the President, to be morally, physically, mentally, and professionally qualified for active service, the President may, in his discretion, by and with the advice and consent of the Senate, reappoint such officer upon the active list of the Army as an extra officer of the arm or branch in which the officer was commissioned at the time of his retirement, in the grade and with the lineal rank he would have held had he not been retired: *Provided further*, That such officer shall continue as an extra officer only until such time as a vacancy shall occur in his grade and arm of the service; and if again retired for physical disability, he shall be retired from active service with the rank held by him before his reappointment, or wholly retired from the service by the President as provided by existing law; but if his second retirement is for disability arising from wounds received in action, he shall have the rank on the retired list held by him at the time of such retirement: *Provided further*, That no officer reappointed under the provisions of this act shall be placed above another either in grade or lineal rank, in the same arm or branch, whose active service as a commissioned officer exceeds that of the officer reappointed, and for the purposes of this proviso commissioned service on the active list and on active duty while on the retired list shall be taken into consideration: *And provided further*, That hereafter in the computation of longevity pay the time served on active detail by retired Army officers shall be added to the service of said officers prior to retirement for the computation of the pay to which they shall be entitled while serving on active detail.

Mr. CLARKE of Arkansas. Mr. President, it is not necessary to consume time to consider that amendment. I think it clearly out of order. It is general legislation. It is proposed to change the rule now applicable to retired officers and confer upon officers of that class the right to be reassigned to active service in the Army under certain conditions. If that is to be done at all, it ought to be done after the whole subject has been independently considered and worked out, so that we may know that it will not be used for purposes of partiality and preference. I think it is an exceedingly inappropriate provision to be included at this time; and I make the point of order that it is general legislation that can not now be considered in the face of objection.

Mr. DU PONT. Mr. President, this amendment has received very full consideration, not only at the hands of the War Department, but in the committee. It originated in the committee, was sent up to the department, thrashed over there, sent back to the committee, and finally passed with the approval of the committee. It is intended and designed to put an end to the anomalous state of affairs under which the Government is now paying several officers retired pay who are perfectly able in every respect—physically, morally, and mentally—to do active duty. The number of these officers is very few, but if there were only one it would be right and just both to the Government and to the officer to put him back, if he so desires, on the active list.

This amendment refers, of course, strictly and solely to officers who are retired for physical disability. No officer is retired for physical disability unless a board of medical officers shall have found that he is permanently disqualified for duty; but, as we all know, medical officers, whether on boards or individually, are but human, and occasionally, in rare instances, a man who, in the opinion of a medical board, is permanently unfit for active duty, is found, after the lapse of six months or a year, to be perfectly restored in every way, and this is usually in the case of some of the younger officers where youth is a determining factor.

There are three bills pending in Congress to restore officers of this kind to the active list. It was deemed wiser and better to make a general provision to cover these cases than to have the legislation done piecemeal and from time to time. I think myself that it is wise, proper, and just legislation, particularly to the Government, and incidentally to the officers affected. I therefore hope the Senator from Arkansas will withdraw his point of order.

Mr. JOHNSTON of Alabama. I should like to say to the Senator from Arkansas that this amendment is in the interest of economy. These officers that have been retired are retired on three-fourths pay, and when they are brought back only one-fourth is added to the salary which they are now drawing while they are not doing anything. They simply take their places in the rank to which they would have been entitled by their service. So I think if the Senator will consider that this is in the line of economy and retrenchment, he will not make the point of order.

Mr. CLARKE of Arkansas. Of course, a good deal of what has been said has been for the very commendable purpose of enlightening me about matters which are pretty well known even to persons who have not been here as long as I have. There is some sort of presumption that I have at least a little familiarity with some of the things that have been exploited here for my benefit.

It was not my intention to discuss the merits of this matter at this time. It was clearly out of order, and I thought that would have disposed of it. But whenever I see anything come up from the War Department in the interest of economy, I begin to sift it pretty closely; and I should like to see it verified on some occasion when we will have ample time and opportunity to discuss it.

Mr. DU PONT. Will the Senator yield to me for a moment?

Mr. CLARKE of Arkansas. I shall be glad to yield; yes.

Mr. DU PONT. I simply wish to call the attention of the Senator from Arkansas to the fact that this suggestion did not come from the War Department. It came from the Military Affairs Committee. It was referred to the department, and was approved in a rather perfunctory manner—not very warmly, but still it was approved.

Mr. CLARKE of Arkansas. There will be something to be said about it whenever we reach it as a serious proposition of legislation. I make the point of order that we can not do it to-day.

The PRESIDENT pro tempore. The point of order is sustained.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, under the subhead "Miscellaneous," on page 15, line 18, after "$550,000," to insert "of which $100,000 shall be immediately available," so as to read:

For mileage to officers, acting dental surgeons, veterinarians, contract surgeons, pay clerks, and expert accountant, Inspector General's Department, when authorized by law, $550,000, of which $100,000 shall be immediately available.

The amendment was agreed to.

The next amendment was, under the subhead "Philippine Scouts," on page 18, line 4, after the word "precluding," to strike out "Army paymasters" and insert "officers of the Quartermaster Corps," so as to make the clause read:

All the money hereinbefore appropriated for pay of the Army and miscellaneous, except the appropriation for mileage of officers, acting dental surgeons, contract surgeons, veterinarians, pay clerks, and expert accountant Inspector General's Department, when authorized by law, shall be disbursed and accounted for by officers of the Quartermaster Corps as pay of the Army, and for that purpose shall constitute one fund: *Provided*, That hereafter section 3620, Revised Statutes, as amended by the act of Congress approved February 27, 1877, shall not be construed as precluding officers of the Quartermaster Corps from drawing checks in favor of the person or institution designated by indorsement made on his monthly pay account by any officer of the Army if the pay account has been deposited for payment on maturity in conformity with such regulations as the Secretary of War may prescribe: *Provided further*, That payment by the United States of a check on the indorsement of the indorsee specified on the pay account shall be a full acquittance for the amount due on the pay account.

The amendment was agreed to.

The next amendment was, on page 18, line 24, after "$350,000," to insert: "*Provided*, That of the amount herein appropriated the Secretary of War is hereby authorized to expend $50,000, or so much thereof as may be necessary, for the acquisition, by purchase or condemnation, of the necessary land for a suitable range for Field Artillery target practice, the land to be of such general character as to permit its use for the instruction of troops of other arms, to be located within the eastern military division, and to be so situated as to present a high degree of availability for concentration of Field Artillery," so as to make the clause read:

Encampment and maneuvers, Organized Militia: For paying the expenses of the Organized Militia of any State, Territory, or of the District of Columbia, which may be authorized by the Secretary of War to participate in such encampments as may be established for the field instruction of the troops of the Regular Army, as provided by sections 15 and 21 of the act of January 21, 1903, entitled "An act to promote the efficiency of the militia, and for other purposes," to be immediately available and to remain available until the end of the fiscal year 1915, $350,000: *Provided*, That of the amount herein appropriated the Secretary of War is hereby authorized to expend $50,000, or so much thereof as may be necessary, for the acquisition, by purchase or condemnation, of the necessary land for a suitable range for Field Artillery target practice, the land to be of such general character as to permit its use for the instruction of troops of other arms, to be located within the eastern military division, and to be so situated as to present a high degree of availability for concentration of Field Artillery.

The amendment was agreed to.

The next amendment was, on page 19, line 19, after the word "expended," to strike out "$185,000" and insert "$275,000," so as to make the clause read:

Equipment of Coast Artillery armories, Organized Militia: Equipment of Coast Artillery armories, Organized Militia—Dummy guns and mortars, mounts for dummy guns and mortars, dummy ammunition, loading appliances, range and position finding equipment, aiming and laying devices, subcaliber tubes and mountings therefor, labor and material necessary to install dummy guns and mortars, and to provide appliances and devices for instructional purposes in armory buildings provided by States for Coast Artillery companies of the Organized Militia, to be immediately available and remain available until expended, $275,000.

The amendment was agreed to.

The next amendment was, on page 19, after line 20, to insert:

To meet the expenses incident to holding an international rifle-shooting competition at Camp Perry, Ohio, in cooperation with the Perry Victory Centennial Celebration to be held in September, 1913: In connection therewith the Secretary of War is hereby authorized to loan to the management of the tournament such new United States magazine rifles, caliber .30, model 1903, as may be necessary to carry out the regulations of the international union and to detail officers and men to conduct the tournament, $25,000: *Provided*, That the rifles and equipment of the visiting riflemen be admitted under bond, and that the ammunition and personal effects of such riflemen be admitted to the United States without the imposition of duty.

The amendment was agreed to.

The next amendment was, under the subhead "Subsistence of the Army," on page 20, line 13, before the word "hospital," to insert "including employees of the harbor boat service," so as to read:

Purchase of subsistence supplies: For issue, as rations to troops, civil employees when entitled thereto, including employees of the harbor boat service, hospital matrons, nurses, applicants for enlistment while held under observation, etc.

The amendment was agreed to.

The next amendment was, on page 21, line 10, before the word "rations," to strike out "regular established" and insert "regulation," so as to make the proviso read:

And provided further, That no competitor shall be entitled to commutation of rations in excess of $1.50 per day, and when meals are furnished no greater expense than that sum per man per day for the period the contest is in progress shall be incurred. For payments: Of commutation of rations to the cadets at the United States Military Academy in lieu of the regulation ration, at the rate of 30 cents per ration.

Mr. DU PONT. Mr. President, there is a slight error there, which I move to correct. On line 10, page 21, the words "regular established" should remain, and in line 11 the word "regulation" should go in instead of "regular," so as to read:

In lieu of the regular established ration, at the rate of 30 cents per ration; of the regulation allowances of commutation.

That is the way it should be. It is a mistake in the printing.

The PRESIDENT pro tempore. The Secretary will report the proposed amendment.

Mr. DU PONT. I move that the amendment be modified as I have suggested.

The PRESIDENT pro tempore. Does the Senator move to strike out and insert?

Mr. DU PONT. I move to strike out "regulation," in line 10.

The PRESIDENT pro tempore. The proper course is to disagree to the amendment. When it is voted down, the bill will stand as originally drafted, without the amendment.

Mr. DU PONT. Yes.

The amendment was rejected.

Mr. DU PONT. I now move, on line 11, page 21, before the word "allowances," to strike out "regular" and insert "regulation."

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, in the item of appropriation for purchase of subsistence supplies, on page 22, line 11, after the word "Army," to insert: "and for extraordinary expense of subsistence of West Point cadets while attending inaugural ceremony not to exceed $2,000, which shall be immediately available"; and in line 14, after the words "in all," to strike out "$9,098,517" and insert "$9,140,097," so as to read:

For providing prizes to be established by the Secretary of War for enlisted men of the Army who graduate from the Army schools for bakers and cooks, the total amount of such prizes at the various schools not to exceed $900 per annum; for other necessary expenses incident to the purchase, testing, care, preservation, issue, sale, and accounting for subsistence supplies for the Army; and for extraordinary expense of subsistence of West Point cadets while attending inaugural ceremony not to exceed $2,000, which shall be immediately available; in all, $9,140,097.

The amendment was agreed to.

The next amendment was in the item of appropriation for regular supplies of the Quartermaster Corps, on page 22, line 25, before the word "surgeons," to strike out "acting" and insert "contract," and on page 23, line 1, before the word "dental," to strike out "contract" and insert "acting," so as to read:

Regular supplies, Quartermaster Corps: Regular supplies of the Quartermaster Corps, including their care and protection, consisting of stoves and heating apparatus required for heating offices, hospitals, barracks and quarters, and recruiting stations, and United States military prison; also ranges, stoves, coffee roasters, and appliances for cooking and serving food at posts, in the field, and when traveling, and repair and maintenance of such heating and cooking appliances; authorized issues of candles and matches; for furnishing heat and light for the authorized allowance of quarters for officers and enlisted men, for contract surgeons and acting dental surgeons when stationed at and occupying public quarters at military posts, for officers of the National Guard attending service and garrison schools, and for recruits, guards, hospitals, storehouses, offices, and buildings erected at private cost in the operation of the act approved May 31, 1902.

The amendment was agreed to.

The next amendment was in the item of appropriation for regular supplies of the Quartermaster Corps, on page 24, line 9, after the word "depots," to insert "and on military reservations in the Hawaiian and Philippine Islands," so as to read:

For seeds and implements required for the raising of forage at remount depots and on military reservations in the Hawaiian and Philippine Islands, and for labor and expenses incident thereto; for straw for soldiers' bedding, stationery, typewriters and exchange of same, including blank books and blank forms for the Quartermaster Corps, certificates for discharged soldiers, and for printing department orders and reports.

The amendment was agreed to.

The next amendment was in the item of appropriation for regular supplies of the Quartermaster Corps, on page 25, line 19, after the word "paid," to strike out "$7,634,553" and insert "$7,000,153," so as to make the proviso read:

Provided, That the funds received from such sales and in payment for such laundry work shall be used to defray the cost of operation of said ice, laundry, and electric plants; and the sales and expenditures herein provided for shall be accounted for in accordance with the

methods prescribed by law; and any sums remaining, after such cost of maintenance and operation have been defrayed, shall be deposited in the Treasury to the credit of the appropriation from which the cost of operation of such plant is paid, $7,000,153.

The amendment was agreed to.

The next amendment was, in the item of appropriation for incidental expenses of the Quartermaster Corps, on page 27, line 8, after the word "dishonorable," to strike out "discharges" and insert "discharge," so as to read:

For the apprehension, securing, and delivering of deserters, including escaped military prisoners, and the expenses incident to their pursuit, and no greater sum than $50 for each deserter or escaped military prisoner shall, in the discretion of the Secretary of War, be paid to any civil officer or citizen for such services and expenses; for a donation of $5 to each dishonorably discharged prisoner upon his release from confinement, under court-martial sentence, involving dishonorable discharge.

The amendment was agreed to.

The next amendment was, in the item of appropriation for the purchase of horses for the Cavalry, Artillery, Engineers, etc., on page 28, line 22, after "$325,240," to insert "of which $100,000 shall be immediately available," so as to make the proviso read:

Provided further, That no part of this appropriation shall be expended for the purchase of any horses below the standard set by Army Regulations for Cavalry and Artillery horses, except when purchased as remounts or for instruction of cadets at the United States Military Academy, $325,240, of which $100,000 shall be immediately available.

The amendment was agreed to.

The next amendment was, in the item of appropriation for barracks and quarters, on page 30, line 4, after the words "Secretary of War," to strike out $1,847,500" and insert "$2,073,680," so as to make the proviso read:

Provided further, That the number of and total sum paid for civilian employees in the Quartermaster Corps shall be limited to the actual requirements of the service, and that no employee therein shall receive a salary of more than $150 per month, except upon the approval of the Secretary of War, $2,073,680.

The amendment was agreed to.

The next amendment was, on page 30, line 14, after "$40,000," to insert: "*Provided*, That not to exceed $1,300 of this sum, to be made immediately available, may be used for the payment of existing indebtedness on the chapel building at Fort Sam Houston, Tex., which was incurred subsequent to March 3, 1911, for placing this chapel in condition for temporary use for recreation purposes by enlisted men of the maneuver division then encamped at Fort Sam Houston, Tex.," so as to make the clause read:

Military post exchange: For continuing the construction, equipment, and maintenance of suitable buildings at military posts and stations for the conduct of the post exchange, school, library, reading, lunch, amusement rooms, and gymnasium, including repairs to buildings erected at private cost in the operation of the act approved May 31, 1902, to be expended in the discretion and under the direction of the Secretary of War, $40,000: *Provided*, That not to exceed $1,300 of this sum, to be made immediately available, may be used for the payment of existing indebtedness on the chapel building at Fort Sam Houston, Tex., which was incurred subsequent to March 3, 1911, for placing this chapel in condition for temporary use for recreation purposes by enlisted men of the maneuver division then encamped at Fort Sam Houston, Tex.

The amendment was agreed to.

The next amendment was, on page 33, line 21, after "$642,597," to insert: "*Provided*, That upon the completion of a satisfactory sidewalk approximately 600 feet in length on Revere Street, Winthrop, Mass., bordering the property of the Government at Fort Banks, the Secretary of War is authorized to pay to the town of Winthrop not exceeding $1,500 of the amount herein appropriated: *Provided further*, That one-half of the cost of said sidewalk shall be borne by the said town: *And provided further*, That the Secretary of War is authorized and directed to sell the ripe timber in the Fort Canby Military Reserve, Wash., and so much of the money received therefrom as may be needed shall be expended, under the direction of the Secretary of War, for the improvement of Fort Canby military road in said reserve which connects with the road leading from the town of Ilwaco, Wash., to the grounds of the United States life-saving station and lighthouse, and any surplus money shall be turned into the Treasury of the United States," so as to make the clause read:

Roads, walks, wharves, and drainage: For the construction and repairs by the Quartermaster Corps of roads, walks, and wharves; for the pay of employees; for the disposal of drainage; for dredging channels and for care and improvement of grounds at military posts and stations, $642,507: *Provided*, That upon the completion of a satisfactory sidewalk approximately 600 feet in length on Revere Street, Winthrop, Mass., bordering the property of the Government at Fort Banks, the Secretary of War is authorized to pay to the town of Winthrop not exceeding $1,500 of the amount herein appropriated: *Provided further*, That one-half of the cost of said sidewalk shall be borne by the said town: *And provided further*, That the Secretary of War is authorized and directed to sell the ripe timber in the Fort Canby Military Reserve, Wash., and so much of the money received therefrom as may be needed shall be expended, under the direction of the Secretary of War, for the improvement of Fort Canby military road in said reserve which connects with the road leading from the town of Ilwaco, Wash., to the grounds of the United States life-saving station and lighthouse, and any surplus money shall be turned into the Treasury of the United States.

Mr. DU PONT. Mr. President, I suggest that, on page 33, line 22, after the word "approximately," the word "six" should be changed to "sixteen." That is a typographical error.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The SECRETARY. On page 33, in the committee amendment, line 22, it is proposed to strike out "six" before the word "hundred" and to insert in lieu thereof "sixteen."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 34, line 23, after the word "employees," to strike out "$1,519,290" and insert "$1,539,910," so as to make the clause read:

Water and sewers at military posts: For procuring and introducing water to buildings and premises at such military posts and stations as from their situation require it to be brought from a distance; for the installation and extension of plumbing within buildings where the same is not specifically provided for in other appropriations; for the purchase and repairs of fire apparatus, including fire-alarm systems; for the disposal of sewage, and expenses incident thereto, including the authorized issue of toilet paper; for repairs to water and sewer systems and plumbing within buildings; and for hire of employees, $1,539,910.

The amendment was agreed to.

The next amendment was, on page 35, line 11, after the word "amended," to strike out "$100,000" and insert "$155,000: *Provided*, That not to exceed $55,000 of this amount may be used for the protection of the Signal Corps building and terminal grounds of the Alaska Military Cable and Telegraph System," so as to make the clause read:

Construction and maintenance of military and post roads, bridges, and trails, Alaska: For the construction, repair, and maintenance of military and post roads, bridges, and trails in the Territory of Alaska, to be expended under the direction of the board of road commissioners described in section 2 of an act entitled "An act to provide for the construction and maintenance of roads, the establishment and maintenance of schools, and the care and support of insane persons in the District of Alaska, and for other purposes," approved January 27, 1905, as amended by the act approved May 14, 1906, and to be expended conformably to the provisions of said act as amended, $155,000: *Provided*, That not to exceed $55,000 of this amount may be used for the protection of the Signal Corps building and terminal grounds of the Alaska Military Cable and Telegraph System.

The amendment was agreed to.

The next amendment was, on page 38, after line 23, to insert:

The heads of the several executive departments are authorized to enter into contracts for the lease, for periods of not exceeding 10 years, of modern fireproof storage accommodations within the District of Columbia for their respective departments, at rates per square foot of available floor space not exceeding 25 cents, payable from appropriations that Congress may from time to time make for rent of buildings for their respective departments.

Mr. SMOOT. That is a rather unusual provision, and I should like the Senator having the bill in charge to explain it.

Mr. DU PONT. This provision was inserted upon the recommendation of the chairman of the Committee on Appropriations, and I will ask him, as he is better informed, to explain it. It has already been adopted in another bill.

Mr. WARREN. Last year in the consideration of an appropriation bill a proposition came to the committee to construct a building for the Department of Commerce and Labor at a rental price per foot very much lower than what it was then paying. It came from the same company that makes a bid now. Such provision was made in the bill referred to. It was left to the discretion of the Secretary of Commerce and Labor, and through that legislation he was able to get even lower bids than the first offered. The contract was made with other parties for a building that is now being constructed and near completion, which adds a great deal to the room and convenience and puts it all under one cover, and costs a great deal less, everything considered.

We are paying now in some cases as high as a dollar a foot, and I think in no case, except in some stable, less than about 55 cents. The report of the economy, or Cleveland, commission brought out the fact that in the War Department there are, as I remember it, 72 rooms that would be first class, or at least perfectly suitable rooms for clerks for office use, that are now used for the storage of papers.

Therefore, instead of renting high-priced buildings and paying at a rate of from 75 cents to a dollar a foot, it seemed best to allow the War Department to have the privilege of contracting for and renting a building at not exceeding 25 cents a foot, the contractor, however, to be at the expense of moving the records into the new building. It is in the interest of economy.

Mr. DU PONT. It is to be a fireproof building.

Mr. WARREN. Yes; a fireproof building. We were assured that there will be offers made of not exceeding the price of 25 cents a foot in some locality, acceptable to the Secretary of War, within two minutes' walk of the department, which will take care of these records and the records of other departments. If that is done, it will be a very large saving of money in rental. We all know that we are paying several hundred thousand dollars here in the District of Columbia for the rent of buildings.

Mr. SMOOT. Did I understand the Senator to say that the same provision has been put in appropriation bills heretofore?

Mr. WARREN. Yes.

Mr. SMOOT. For the Department of Commerce and Labor?

Mr. WARREN. Last year in an appropriation bill we provided in just this way, only at not so low a price, because we had to have an office building for the Department of Commerce and Labor. Under that authority the Secretary proceeded to get bids. He received bids lower than those made by the contractors who had given us the price. Of course, he was to get as low as he could. Very satisfactory arrangements have been made. But that building would not provide for this further need.

The amendment was agreed to.

The next amendment was, on page 39, line 10, after the words "Philippine Islands," to strike out "$491.48" and insert "$1,652.43," so as to make the clause read:

Claims for damages to and loss of private property: For settlement of claims for damages to and loss of private property belonging to citizens of the United States, Hawaii, and the Philippine Islands, $1,652.43.

The amendment was agreed to.

The next amendment was, under the subhead "Medical department," on page 39, line 13, after the word "included," to strike out "ambulance" and insert "ambulances," so as to read:

Medical and hospital department: For the purchase of medical and hospital supplies, including ambulances and disinfectants, and the exchange of typewriting machines for military posts, camps, hospitals, hospital ships, and transports; for expenses of medical supply depots; for medical care and treatment not otherwise provided for, including care and subsistence in private hospitals of officers, enlisted men, and civilian employees of the Army, of applicants for enlistment, and of prisoners of war and other persons in military custody or confinement, when entitled thereto by law, regulation, or contract.

The reading of the bill was continued to line 22, on page 39.

Mr. DU PONT. I move that a comma be inserted after the word "hospitals," on page 39, line 18.

The PRESIDENT pro tempore. Without objection the amendment is agreed to.

The reading of the bill was continued.

The next amendment was in the item of appropriation for purchase of medical and hospital supplies, on page 40, line 21, after the words "Medical Department," to strike out "$750,000" and insert "$775,000," so as to read:

For the payment of express companies and local transfers employed directly by the Medical Department for the transportation of medical and hospital supplies, including bidders' samples and water for analysis; for supplies for use in teaching the art of cooking to the Hospital Corps; for the supply of the Army and Navy Hospital at Hot Springs, Ark.; for advertising, laundry, and all other necessary miscellaneous expenses of the Medical Department, $775,000.

The amendment was agreed to.

The next amendment was, under the subhead "Ordnance Department," on page 45, line 7, after "$200,000," to strike out "*Provided*, That no part of any sum in this act appropriated shall be expended in the purchase of ordnance powder at a price in excess of 53 cents per pound or for small-arms powder at a price in excess of 65 cents per pound," so as to make the clause read:

Ordnance stores—Ammunition: Manufacture and purchase of ammunition and materials therefor for small arms for reserve supply; ammunition for burials at the National Soldiers' Home in Washington, D. C.; ammunition for firing the morning and evening gun at military posts prescribed by General Orders, No. 70, Headquarters of the Army, dated July 23, 1867, and at National Home for Disabled Volunteer Soldiers and its several branches, including National Soldiers' Home in Washington, D. C., and soldiers' and sailors' State homes, $200,000.

Mr. BRISTOW. I wish to make some inquiry about the amendment striking out lines 8, 9, 10, and 11.

Mr. DU PONT. I will state to the Senator from Kansas that those lines were stricken out, over an objection made by me, at the instance of the chairman of the Committee on Appropriations, who requested that this action be taken by our committee in order that the amendment would go into conference and be harmonized there with the action to be taken with respect to the fortifications appropriation bill and the naval appropriation bill, in which similar items occur.

Mr. BRISTOW. My attention was called to the matter in the last few hours. A statement and a copy of the hearings in the House were transmitted to me indicating that the cost of making powder was only about 35 cents a pound; and that being the case, it would seem that ample latitude had been given in the provision which it is proposed to strike out.

Mr. WARREN. The Senator has evidently not had his attention turned to other parts of the report, which quote quite differently from that.

It is an old matter; a matter that has come up annually for many years. In the first place, we were buying all of our powder from private concerns, and the only large concern that was fitted and equipped to make Government powder in large quantities was the Du Pont Co. It seemed best for the Government, first, to know what it would cost, and also be in a position to manufacture some powder.

It was my duty in serving upon the Committee on Appropriations to work as one of the subcommitteemen on the fortifications bill, and in the Army appropriation bill we had to take up this matter of powder. We provided on the Army side, under management of Gen. Crozier, Chief of Ordnance, that we would erect a powder factory, the idea being that we would erect an establishment large enough so that the eight-hour-a-day work would leave a possible extension of three times the usual product, through three shifts of workmen, in the case of war, in the manufacture of powder, and that additions could be made to the plant in case of serious war, the fact being impressed upon us that in war times we could not buy the powder abroad, as the Senator knows. The neutrality and the comity of nations would prevent it, and it was found that it would be impossible as then equipped, with all the machinery we had in the United States, to furnish the powder we might need, or any large percentage of it, in case of actual war.

So the United States went into the manufacture of powder in this way, without the intention of undertaking to make all the powder we use, but with the intention of knowing what it would cost and what quality we wanted, and so as to insist on other powders being all right as to both price and quality.

The year after, or the next year, the Navy proceeded in the same way, and they have a powder factory. We proceeded in that way, keeping the idea in view that out of the $5,000,000 investment in Delaware, of which over $4,000,000 is for making the Government powder, they should have a certain amount of this work to do in the interest of the United States at a price that would cover the cost. I have looked at all the tables. I find that, taking Gen. Crozier's tables, they start in, like they do in the manufacture of gas or electricity, and first figure the cost of the actual material bought and of the men paid, and then they have later regarded overhead charges so far as the Government is concerned.

The charges in another table, as the Senator will find, amount to something like 45 or 48 cents; and there is no fire loss charge, because the United States pays nothing for insurance and sets apart nothing for fire risks. There is nothing for taxes, because the United States Governments pays no tax. The addition for interest is calculated at 3 per cent only, because I will say that is not the maximum but perhaps the average which the Government pays; and no regular depreciation is charged.

Last year the House put a maximum in the bill of 71 cents for powder which the Government should purchase, and we said nothing and let it go. Powder runs from about 40 cents to 98 cents or $1.05 according to the quality. Of course, putting a maximum at a certain price would permit certain powder to come in under it and would block out certain other powders.

This concern came to the United States and said, "If you will give us so much powder to manufacture, the overhead charges are about the same whether we make 5,000,000 or 1,000,000 pounds, and so are the incidentals. Give us a contract of, say, 5,000,000 pounds and we will make it at 60 cents." I think a contract was let for 5,000,000 at 60 cents. The Government officers found that they did not need that much. So they appealed, as is shown in the House hearings, to representatives of the company to know what bonus they would charge them to allow the Government to cut off the million or two million pounds that it did not need. The company responded that under the circumstances they could deliver it along at different dates to the Government—incidental to their commercial business—and they would charge nothing for the forfeit of contract; that they would be very glad to cut it down.

I believe that we ought to cut out the limits proposed, let the matter go to conference, and see what information the other House has, and see what may be done in conference, so that we may not get entangled in a situation where we would not gain anything by the provision.

Mr. BRISTOW. The purpose is to have uniformity in all of the bills regarding this matter?

Mr. WARREN. It is, and to get further information. We do not know what information the House Committee on Mili-

tary Affairs has. We propose to put it in conference, and for that purpose the clause was stricken out.

Mr. BRISTOW. What has been the experience of the Senator in regard to the powder factories that have been established by the Government? Are they successful?

Mr. WARREN. I consider them successful in the way that they are run. I am sure they act as an assurance to the Government that the Government can make a certain amount, and, furthermore, they provide us all the time with tests as to cost and quality.

Mr. BRISTOW. That is, the powder which the Government is making is costing about 35 cents for the ordnance and for the small arms about 48 cents.

Mr. WARREN. It is costing that, as I said, for the absolute outgo for material and labor.

Mr. BRISTOW. If that is the case, why should we not make all of our powder instead of paying much more to a private company?

Mr. WARREN. In order to get that it would probably require the expenditure of $5,000,000 to $10,000,000 in works and materials. It takes so much apparatus, so much for buildings, and so forth, and about our only use of our big investment would be in war times. It would be possible to get along in times of peace with moderate powder works, but in times of war we would be entirely at the mercy of other countries unless we had a tremendous establishment.

Mr. BRISTOW. I have not studied the matter sufficiently to discuss it at length, my attention only having been called to it this afternoon, but I wanted to get all the information I could. It seems to me that we are not justified in paying so much for powder, and I think that further consideration should be given to the matter.

Mr. WARREN. I can understand the way the Senator feels. If we can make our own powder, we ought to do it. I think that is right in a certain way, but we ought not to burn our bridges so that we would not have access to a certain amount of machinery in readiness to furnish us in time of war.

The amendment was agreed to.

Mr. McCUMBER. Is the bill now being considered for committee amendments only?

The PRESIDENT pro tempore. The committee amendments are first in order.

Mr. McCUMBER. I wish to call the attention of the Senator in charge of the bill to something which does not appear as an amendment but is in the body of the bill which has just been passed over.

I call the attention of the Senator to page 16, where I find two items. The first one reads:

For amount required to make monthly payment to Jennie Carroll, widow of James Carroll, late major and surgeon, United States Army, as per act of Congress approved May 23, 1908, $1,500.

Immediately following that is the same amount to Mabel H. Lazear.

The Senator will remember that these two items were passed to the Committee on Military Affairs from the Pension Committee, and while they were considered as annuities rather than pensions, nevertheless I presume it was granted by the Senate because of the death of the husband. I am informed that one of these ladies—I do not remember which one—has remarried, and I do not think that the annuity or a pension, whatever it may be called, ought to be continued if that is the case. I have no definite information on it, and I simply ask the Senator if he has any knowledge concerning it?

Mr. DU PONT. I will say to the Senator from North Dakota that this is the first intimation I have heard of such a thing. No such information has reached the committee. If any definite information can be furnished, I have no doubt the committee will take appropriate action.

Mr. BRISTOW. Mr. President, why not strike out this provision and let it go to conference? Then, in the meantime, the chairman of the committee can ascertain whether or not the statement is true.

Mr. WARREN. Mr. President, I presume the Senator from North Dakota is perfectly familiar with the origin of this legislation, and perhaps the Senator from Kansas also is. These are items providing for the widows of those officers who were patriotic enough to offer their bodies for experiment in regard to yellow fever and diseases of that kind in Cuba and other places. They lost their lives in consequence and have left large families.

Mr. BRISTOW. And if the widow remarries, of course she would not be entitled to this money.

Mr. WARREN. Possibly so. I know nothing of that; but these items come up in the regular estimates from the War Department, as they have ever since they were provided for by law.

Mr. McCUMBER. If we had proceeded as we proceed in the regular pension cases, the matter would have been covered by a general law providing that as soon as a widow is remarried the pension shall cease, and the Pension Office generally ascertains that fact; but this is to be paid out of the Army appropriations, and does not go through the Pension Office at all. Therefore it is probably incumbent upon the Committee on Military Affairs or the War Department to ascertain whether both of these ladies are still widows. I may be entirely mistaken.

Mr. DU PONT. I have no objection, I will say to the Senator, to communicating with the War Department and asking them if they have any information on the subject. The only reason——

Mr. LODGE. If this provision is not stricken out, the matter will not be open to settlement in conference.

Mr. WARREN. That is true. I should like an expression from the chairman of the Committee on Pensions about one thing. These were extraordinary cases, as the Senator knows.

Mr. McCUMBER. The amounts granted would indicate that, of course, they were extraordinary cases.

Mr. WARREN. And if, as I recall, there are quite large families of children, some of whom are yet young, and if it so be that one of these women has remarried, and has married a man who is perhaps unable to take care of this family of children, would the Senator draw that strict line which we have heretofore drawn in regard to pensions? That is another matter to be considered. On general principles, I agree with the Senator.

Mr. McCUMBER. Then we might consider the children as the children of the officer.

Mr. WARREN. Yes.

Mr. McCUMBER. But we could hardly consider a woman a widow and grant her a pension when she is a married woman.

Mr. WARREN. In that case, in conference it would be competent to consider the wants of the children.

Mr. McCUMBER. I will say that I will try to see if I can get any definite information on the subject before the bill closes. My attention has just been called to the fact which I have stated; it was so reported in one of the newspapers. Before we get through with the bill probably I may obtain definite information, and I will call the attention of the chairman of the committee to it if I do.

Mr. DU PONT. I will say that I have no objection at all to having these items provisionally stricken out, so that they may come up in conference for that purpose.

Mr. OVERMAN. Why not strike them out now, and let the matter go to conference, so as to ascertain whether the information is correct?

Mr. DU PONT. I will move, Mr. President, that the matter be stricken out.

Mr. McCUMBER. I hope the Senator will not do that, because the information I have received may not be absolutely correct. I probably can ascertain more definitely before we get through with the bill, and it had better remain for the present. I may ascertain in a few moments.

Mr. WARREN. I want to take just a moment to say, as we are now surrounded by men who have gone through wars and since, to most men, it is nothing to go out to battle and take one's life in his hands, to be shot, as compared with a proposition to submit to an inoculation, which is almost certain death, in order to save others, in order to forward the science of medicine——

Mr. DU PONT. And to benefit mankind——

Mr. WARREN. These cases are really taken out of the category of ordinary pension cases. So, I say, we ought to hesitate before this matter is finally closed, to see that we do not do injustice. I had rather be overliberal than unjust.

The reading of the bill was resumed.

The next amendment of the Committee on Military Affairs was, on page 46, after line 21, to insert:

Automatic machine rifles: For the purchase, manufacture, and test of automatic machine rifles, including their sights and equipments, to be available until the close of the fiscal year ending June 30, 1915, $150,000.

The amendment was agreed to.

The next amendment was, on page 48, line 6, after the date "nineteen hundred and twelve," to insert: "*Provided*, That hereafter appropriations made for the Ordnance Department shall be available for the payment of royalties on all royalty contracts made during the availability of such appropriations," so as to make the clause read:

The sum of $13,913.25, a part of the sum of $200,000 appropriated by the act of March 3, 1909, for automatic rifles, and set aside by the

Ordnance Department for payment of royalties, is hereby made available for the payment of such royalty on automatic rifles completed during the fiscal year 1912: *Provided*, That hereafter appropriations made for the Ordnance Department shall be available for the payment of royalties on all royalty contracts made during the availability of such appropriations.

The amendment was agreed to.

The next amendment was, on page 48, after line 18, to insert:

On and after July 1, 1913, courts-martial shall be of three kinds, namely: First, general courts-martial; second, special courts-martial; and third, summary courts-martial.

General courts-martial may consist of any number of officers from 5 to 13, inclusive.

Special courts-martial may consist of any number of officers from three to five, inclusive.

A summary court-martial shall consist of one officer.

The President of the United States, the commanding officer of a territorial division or department, the Superintendent of the Military Academy, the commanding officer of an army, a field army, an army corps, a division, or a separate brigade, and, when empowered by the President, the commanding officer of any district or of any force or body of troops may appoint general courts-martial whenever necessary; but when any such commander is the accuser or the prosecutor of the person or persons to be tried, the court shall be appointed by superior competent authority, and no officer shall be eligible to sit as a member of such court when he is the accuser or a witness for the prosecution.

The commanding officer of a district, garrison, fort, camp, or other place where troops are on duty, and the commanding officer of a brigade, regiment, detached battalion, or other detached command may appoint special courts-martial for his command; but such special courts-martial may in any case be appointed by superior authority when by the latter deemed desirable, and no officer shall be eligible to sit as a member of such court when he is the accuser or a witness for the prosecution.

The commanding officer of a garrison, fort, camp, or other place where troops are on duty, and the commanding officer of a regiment, detached battalion, detached company, or other detachment may appoint summary courts-martial for his command; but such summary courts-martial may in any case be appointed by superior authority when by the latter deemed desirable: *Provided*, That when but one officer is present with a command he shall be the summary court-martial of that command and shall hear and determine cases brought before him.

General courts-martial shall have power to try any person subject to military law for any crime or offense made punishable by the Articles of War and any other person who by statute or by the law of war is subject to trial by military tribunals: *Provided*, That no officer shall be brought to trial before a general court-martial appointed by the Superintendent of the Military Academy.

Special courts-martial shall have power to try any person subject to military law, except an officer, for any crime or offense not capital made punishable by the Articles of War: *Provided*, That the President may by regulations, which he may modify from time to time, except from the jurisdiction of special courts-martial any class or classes of persons subject to military law.

Special courts-martial shall have power to adjudge punishment not to exceed confinement at hard labor for six months or forfeiture of six months' pay, or both, and in addition thereto reduction to the ranks in the cases of noncommissioned officers, and reduction in classification in the cases of first-class privates.

Summary courts-martial shall have power to try any soldier, except one who is holding the privileges of a certificate of eligibility to promotion, for any crime or offense not capital made punishable by the Articles of War: *Provided*, That noncommissioned officers shall not, if they object thereto, be brought to trial before a summary court-martial without the authority of the officer competent to bring them to trial before a general court-martial.

Summary courts-martial shall have power to adjudge punishment not to exceed confinement at hard labor for three months or forfeiture of three months' pay, or both, and in addition thereto reduction to the ranks in the cases of noncommissioned officers and reduction in classification in the cases of first-class privates: *Provided*, That when the summary court officer is also the commanding officer no sentence of such summary court-martial adjudging confinement at hard labor or forfeiture of pay, or both, for a period in excess of one month shall be carried into execution until the same shall have been approved by superior authority.

Articles 72, 73, 75, 81, 82, and 83 of section 1342 of the Revised Statutes; the first section of an act entitled "An act to promote the administration of justice in the Army," approved October 1, 1890, as amended by the first secton of an act approved June 18, 1898 (30 Stats., 483, 484), are hereby repealed.

Mr. DU PONT. I offer an amendment on behalf of the committee to the amendment, on line 9, page 52, after the word "repealed," to add the words which I send to the desk, the object being not to interfere with the courts actually in session at the time this provision of law goes into effect.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 52, line 9, after the word "repealed," it is proposed to add:

But courts-martial duly and regularly convened in orders issued prior to the date when this act takes effect and in existence on that date, under Articles of War hereby repealed, may continue as legal courts for the trial of cases referred to them prior to that date with the same effect as if this act had not been passed.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was concluded.

Mr. BRISTOW. Mr. President, on page 48, after line 18, I desire to offer an amendment, which I will read:

After January 1, 1914, no moneys appropriated in this bill for the purchase and maintenance of vehicles, other than automobile trucks, shall be used for the purchase and maintenance of any vehicles that are not drawn exclusively by mules.

Mr. WARREN. Whose mules?

Mr. LODGE. Mr. President, I should like to know more about that amendment before it goes through. It is clearly subject to a point of order. It is general legislation.

Mr. BRISTOW. I do not think it is subject to a point of order.

Mr. LODGE. It is general legislation.

Mr. BRISTOW. No; it relates to specific appropriations contained in this bill, and provides how they shall be expended.

Mr. BRANDEGEE. It is a limitation on the appropriation.

Mr. BRISTOW. It is not general legislation at all, but is a limitation on the appropriation.

Mr. LODGE. The point at which the Senator offers it relates to the loan of tents by the Secretary of War to the Grand Army of the Republic and Confederate Veterans.

Mr. BRISTOW. Evidently the Senator did not pay close attention to the reading of the amendment. It is a separate paragraph and reads:

After January 1, 1914, no moneys appropriated in this bill for the purchase and maintenance of vehicles other than automobile trucks shall be used for the purchase and maintenance of any vehicles that are not drawn exclusively by mules.

The mule is an American animal, and a very useful one, and is hardier than the horse in the drawing of heavy loads.

Mr. BRANDEGEE. Is he exclusively American?

Mr. BRISTOW. He may not be exclusively American.

Mr. WARREN. What about automobiles?

Mr. BRISTOW. The amendment cuts out the automobiles, of course.

Mr. WARREN. Then, you would have to buy more wagons.

Mr. BRISTOW. Wagons are cheaper than automobiles, anyway; and I, for one, am tired of having my life endangered by automobiles that are driven by subordinate Government officials, with the name "Quartermaster's Department," or something like that, painted on them in nonpareil type.

Mr. SUTHERLAND. Does not the Senator think that a mule is quite as deadly as an automobile?

Mr. BRISTOW. He is not quite so speedy.

Mr. BRANDEGEE. It depends upon which end you have reference to. [Laughter.]

Mr. BRISTOW. I think my amendment would be a most excellent provision to incorporate in this bill, and would stop a very noxious abuse.

The PRESIDENT pro tempore. Does the Senator from Massachusetts make the point of order against the amendment?

Mr. LODGE. I think it is subject to the point of order, though I recognize it is a limitation. It is, however, very general in its character, affecting an entire branch of the service.

Mr. BRISTOW. It affects nothing except the appropriations we are now making.

Mr. LODGE. It affects only Army appropriations, but it is apparently designed for the promotion, development, and increase of mules.

Mr. BRISTOW. It is to prevent the misuse of the moneys we are now appropriating.

Mr. TILLMAN. And incidentally to make a market for mules. [Laughter.]

Mr. BRISTOW. Oh, no. I do not care anything about mules, except I think they are good beasts of burden.

Mr. LODGE. I make the point of order against the amendment, Mr. President.

The PRESIDENT pro tempore. The Chair does not think the point of order is well taken. The amendment relates strictly to the subject matter of the appropriation.

Mr. WARREN. Mr. President, in private business I have advised people to do something like the Senator from Kansas is advocating for the Army—to get as many mules as they could. They can be bought down in the southern part of the country quite freely; but I think this amendment is so sweeping that, instead of being a matter of economy and accommodation, it will obstruct and impede the proper handling of the vehicles of the Medical Department, the Quartermaster Corps, and other branches of the service. I should like to see an amendment of that kind have a little further consideration. I should like to hear what the responsible officers of the Army, who have charge of the administration of the law, have to say about it. I presume that what the Senator is aiming at particularly—and I have no fault to find with his amendment in that respect—is the abuse, in a private way, of the privileges of public vehicles and conveyances. I agree with him that that ought to be checked to the very last degree; but here is the entire Army, scattered all over this country, with quite a proportion of it at other points, with its ambulances and doughertes, light driving and freight wagons, one part arranged for horses and another part, of course, for automobiles. I should like to know what effect a change brought about on such short notice would have on the expense of the Army.

Mr. BRISTOW. I think, indeed, it will result in economy. As the Senator knows, in the various sections of the country, mules are now used for the drawing of these ordnance and commissary wagons. It is principally directed to the city of Washington, where Government officials drive thousand-dollar horses behind elegant vehicles, or buy automobiles for the use of a few people, who use them principally for private purposes, though they are provided at public expense.

Mr. WARREN. The Senator is both right and wrong. He is right in saying that mules are used; that is true; but he is wrong in saying that they are exclusively used outside of Washington. He is quite wrong in that, because a great many of the posts use horses. I presume if the Senator will examine the posts in his own State he will find that a large proportion of the motive power is horses instead of mules.

Mr. BRISTOW. That has not been my observation.

Mr. WARREN. I will say to the Senator that I do not want to be led into any depreciation of the mule. I have recognized their utility for a good many years, and I wish we had more of them. It may be that we can eventually land in the territory which the Senator is laying out for us; but it is a little bit sudden, if I may use the expression, to put it without previous consideration into an appropriation bill.

Mr. DU PONT. Mr. President, if the Senator will permit me, I stand, as I assume, with every other member of the committee, in favor of all reasonable and proper economies and as opposed to all abuses of the public transportation. But this matter has not been considered in the committee at all and was not brought up there. It is impossible to tell in advance what the actual results would be—whether they would be immediately expensive or immediately economical. It may be that in some places special conditions exist where the adoption of this amendment would result for the moment in a larger expenditure; and if that is the case, it would be in order to see whether, by making this larger expenditure for the moment, we could in the future produce great economies. All those things must be weighed.

Then there is a question in my mind about the care of the sick and the transportation of the sick to hospitals, as to whether they would be content to be carried in ambulances drawn by mules. There are a great many special questions that should be examined. I hope the matter will be more carefully investigated before we pass on it.

Mr. BRISTOW. I think the Senator will find that the ambulances are drawn by mules now. At least, that has been my observation.

Mr. DU PONT. Not in this city.

Mr. BRISTOW. They may not be in this city, but they are in different parts of the country.

Mr. JOHNSTON of Alabama. I want to say that I am heartily in sympathy with the purpose of the Senator from Kansas in regard to this abuse of the purchase of unnecessary automobiles by officials of the Government; but his amendment would affect transportation facilities that I think it would hardly be proper to affect, because I am informed that the Quartermaster's Department have some steam automobile trucks, which they use in moving their very heavy freight.

Mr. BRISTOW. I have excluded trucks.

Mr. JOHNSTON of Alabama. The Senator has excluded them?

Mr. BRISTOW. Yes; automobile trucks are excluded. They are not within the inhibition of this amendment.

Mr. BBANDEGEE. I ask that the amendment may be again reported.

The PRESIDENT pro tempore. The amendment will be stated by the Secretary.

The SECRETARY. On page 48, after line 18, it is proposed to insert:

After January 1, 1914, no moneys appropriated in this bill for the purchase and maintenance of vehicles, other than automobile trucks, shall be used for the purchase and maintenance of any vehicles that are not drawn exclusively by mules.

Mr. BRANDEGEE. Mr. President, let me ask the Senator from Kansas, why should not the Army be allowed to have vehicles drawn by horses if it wants to?

Mr. BRISTOW. The purpose of this amendment is to eliminate an abuse. I have been advised that the Army is paying as high as $1,000 apiece for horses to draw carriages for the convenience and pleasure of Army officers and their families.

Mr. WARREN. Mr. President, I wish the Senator would give us his authority for that statement.

Mr. BRISTOW. I have seen it in the papers, and I have been advised that it is true by those who claim to know. Certainly I have seen horses on the streets of Washington drawing carriages of the Quartermaster's Department that I know were very expensive spans, and the equipage was very elegant. I think that is an outrageous abuse, and I want to stop it. The pride of these people will prevent them from riding behind a team of mules, and the mules will do the work that we want done better than the horses will. He is a better animal for the hard work of the Government, though not so well suited for pink-tea occasions.

Mr. WARREN. The Senator is mistaken about that. A great many would prefer to ride behind a mule rather than a horse, while others would prefer to ride behind a horse rather than a mule.

Mr. BRISTOW. That would depend upon the occasion.

Mr. WARREN. I take issue with the Senator on the matter of high-priced horses. We had an opportunity not long since, in the matter of these remounts, breeding horses, et cetera, to purchase some very expensive horses for a not large price—inside of a thousand dollars. We were immediately met with the objection that we could not pay over $200, I think, or it might have been $175, each for them. While there may be elegant horses being ridden or being driven, as the Senator knows, there is an allowance made to any officer entitled to a horse to ride who furnishes his own horse. A great many officers buy high-priced horses, and receive from the Government $150 a year instead of being furnished with a horse.

I feel just as the Senator does about automobiles and fine horses being bought by the Government and used by officers for private use, but I find that spans of horses are owned by those officers that can afford them. Furthermore, you will often find an officer of high grade, especially here in Washington, who owns his own automobile. It is hardly fair because an officer rides in his own automobile to inveigh against the entire Government ownership of automobiles.

Mr. BRISTOW. This does not affect him at all.

Mr. WARREN. The Senator will find that a great many horses are being ridden by their owners under this allowance.

Another thing: I have been running this matter over in my mind since the Senator spoke. Except on the frontier, the transportation is very largely made, and economically made, with horses. To make a sudden change of this kind would throw onto the market, or, rather, would condemn in itself, a very large number of horses, and, on the other hand, would put us into the market for a large number of mules, the price of which would, of course, be greatly advanced if we made the purchase of a great many in a short time.

Mr. BRISTOW. I will say that this amendment was originally suggested by an Army officer of high rank, who thought it would be a mighty good thing if such a provision were incorporated in the Army appropriation bill, and he thought it would accomplish a good purpose.

Mr. BRANDEGEE. Mr. President, if I understand the Senator from Kansas, his motive is economical administration of the Government.

Mr. BRISTOW. Proper administration and economical administration, of course; yes.

Mr. BRANDEGEE. The Senator has stated that the horses that are bought cost too much. Instead of attempting to differentiate between the breeds of animals that are to be employed by the Government, why does not the Senator lay his amendment upon the basis of the expense of the animals employed by the Quartermaster Department, irrespective of whether they are mules or horses, or any other kind of animal? I should think it would be more appropriate to provide that no draft animal purchased by the department should cost more than so much money, and leave it to the discretion of the purchaser to decide which is best adapted for the particular location where the animal is to be used. A horse might be better in some localities, and a mule in others.

Mr. BRISTOW. That might be; but that limitation would be somewhat difficult to enforce, because some heavy draft teams of mules would be expensive.

Mr. BRANDEGEE. My suggestion proceeds upon this theory, Mr. President: I am perfectly sure there are mules to be bought in the market that cost a good deal more than the ordinary first-class horse.

Mr. BRISTOW. Yes.

Mr. BRANDEGEE. A first-class mule is a very valuable animal.

Mr. DU PONT. A very expensive animal.

Mr. BRANDEGEE. The limitation suggested by the Senator would not necessarily reduce the expense. If the Government should purchase the best mules in the market, I have no doubt the expense would be much more than it is at present in the purchase of horses.

Mr. DU PONT. I would suggest to the Senator from Kansas that he should limit his amendment, as a preliminary step, to the city of Washington, and see what the effect would be there,

and then if found desirable, perhaps it could be extended to the whole country.

Mr. TOWNSEND. Mr. President, do I understand the Senator to mean that this limitation should extend for longer than the next four years?

Mr. BRISTOW. No; during the operation of this bill.

The PRESIDENT pro tempore. The question is upon the adoption of the amendment offered by the Senator from Kansas [Mr. BRISTOW.] [Putting the question.] The Chair is in doubt.

Mr. BRISTOW. I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. SUTHERLAND. Mr. President, I offer the amendment, which I send to the desk.

The PRESIDENT pro tempore. The amendment offered by the Senator from Kansas has not yet been disposed of. There were so few voting that the Chair was about to put the question again. [Putting the question.] By the sound the "noes" have it. The "noes" have it, and the amendment is rejected.

Mr. TILLMAN. Mr. President——

The PRESIDENT pro tempore. The Senator from Utah first addressed the Chair.

Mr. SUTHERLAND. I offer the amendment, which I send to the desk and ask to have read.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 9, line 6, after the numerals, it is proposed to insert the following:

Provided, That the words "civil-service employees" used in section 4 of "An act making appropriations for the support of the Army for the fiscal year ending June 30, 1913, and for other purposes," are hereby declared to extend to and include all employees in the unclassified service under the jurisdiction of the War Department, not accompanying troops in the field.

Mr. SUTHERLAND. Mr. President, I hope that amendment will not be antagonized by the chairman of the committee. I think it is a very necessary amendment. Section 4 of the Army appropriation bill of last year provided:

That as soon as practicable after the creation of a Quartermaster Corps in the Army not to exceed 4,000 civilian employees of that corps, receiving a monthly compensation of not less than $30 nor more than $175 each, not including civil engineers, superintendents of construction, inspectors of clothing, clothing examiners, inspectors of supplies, inspectors of animals, chemists, veterinarians, freight and passenger rate clerks, civil-service employees, and employees of the classified service, employees of the Army transport service and harbor boat service, and such other employees as may be required for technical work, shall be replaced permanently by not to exceed an equal number of enlisted men of said corps.

The purpose of that amendment seems to have been to get rid of about 4,000 of the civilian employees of this corps and to put in their places permanently the enlisted men of the Army.

I have no objection to that so long as it is applied to that corps when it is in the field; but it ought not to be applied to those employees who are engaged in the cities or about the quartermasters' depots. I think it is a very great mistake to put in the place of these civilian employees, engaged in these cities and about the quartermasters' depots, these enlisted men.

It is bad for two or three reasons. In the first place, farther along in this same section provision is made for the enlistment of 6,000 men in this corps, the evident purpose being by that means to bring pressure upon the civilian employees to enter service in the Army. The rule under which enlistments are made is that they shall be confined to unmarried men. The consequence of the operation of the rule is that married men are thrown out of employment, and unmarried men take their places.

Everybody understands perfectly that the employee who is married is ordinarily a better employee, and can be more depended upon, than the single man; so that that result is unfortunate. I think it is a great mistake to have a provision of this kind which operates as a pressure upon men, which compels them to enlist in the Army rather than to lose their jobs.

As I understand the position of the Quartermaster General, he is not opposed to a provision of this character as I have now drawn it. I call attention to the hearings before the Senate committee, on page 18, where Gen. Aleshire, the Chief of the Quartermaster Corps, stated:

A number of unclassified civilian employees required to accompany troops in the field, such as assistant wagon masters, cargadors, teamsters, and laborers, have already been replaced by enlisted men of the Quartermaster Corps under the provisions of section 4, Army appropriation act, fiscal year 1913. The proposed amendment, if enacted would continue in their respective positions all of the employees who had not been replaced upon the date of approval of the act, and thereby nullify in a great measure the operation of section 4 of the act making appropriation for the support of the Army for the fiscal year 1913.

Then he continues—and this is what I call attention to:

The personnel accompanying troops in the field would be in part civilian employees and in part enlisted men of the Quartermaster Corps, which is considered undesirable.

I quite agree with that statement, that it would be undesirable, and the amendment which I have proposed excludes men engaged in that particular service. Then he proceeds:

In the opinion of this office the proposed amendment declares the intent of Congress in enacting the original section, and thereby may make this intent retroactive and thus give unclassified employees who have been separated from the service a claim for reemployment in the positions from which discharged when replaced by an enlisted man.

Of course, he is mistaken about that. It is not intended to be retroactive, and unless it provided in express terms that it should be retroactive, of course it could not be given that construction.

Then he concludes:

In this connection it may be remarked that all classified employees are secure in their positions under the present law, and no unclassified employees in cities, at general depots of the Quartermaster Corps, such as packers, teamsters, and laborers, have been discharged for the purpose of filling the position with an enlisted man, nor is it the intention of this office to do so in the future.

It being true, as he says, that it has not heretofore operated so as to put the enlisted men in the place of these civilian employees, and it being the intention of the Quartermaster not to do that in the future, certainly the amendment which I have proposed carries out the announced policy of the department.

I trust the chairman of the committee will consent to the amendment.

Mr. DU PONT. Mr. President, I am always desirous of extending all possible courtesies to the Senator from Utah; but I can not accept the amendment on the part of the committee, for the reason that the matter was discussed in the committee and unanimously rejected, for reasons based on this very letter to the Secretary of War, signed by the Quartermaster General of the Army, who recommends that the proposed amendment be not favorably considered, and be adversely reported upon. I do not see how the committee could rescind their action, in view of the fact that they have already discussed this matter.

Mr. SUTHERLAND. If the Senator will permit me, I will call his attention to the fact that the amendment which was being considered has now been altered by the addition of the words "not accompanying troops in the field," and as thus amended it clearly agrees with the announced policy of the Quartermaster General himself. I can not see the slightest objection to putting that sort of an amendment in. He says in his report:

In this connection it may be remarked that all classified employees are secure in their positions under the present law, and no unclassified employees in cities, at general depots of the Quartermaster Corps, such as packers, teamsters, and laborers, have been discharged for the purpose of filling the position with an enlisted man, nor is it the intention of this office to do so in the future.

That being the announced policy of the department, why should there be any objection to making it clear in this law? On the other hand, if the department undertakes to depart from that policy in the future, in my judgment it would be doing an exceedingly unwise thing, which this amendment will prevent.

Mr. DU PONT. Owing to the very fact that it is stated—

That all classified employees are secure in their positions under the present law, and no unclassified employees in cities, at general depots of the Quartermaster Corps, such as packers, teamsters, and laborers, have been discharged for the purpose of filling the position with an enlisted man, nor is it the intention of this office to do so in the future.

In the opinion of the committee it is unnecessary to put this legislation into the Army appropriation bill. Under the circumstances I must confess that it seems to me to be clearly susceptible to the point of order that it is general legislation, and I make the point of order.

Mr. SUTHERLAND. I want to be heard for a moment on the point of order, but before I do it, if the Senator will withhold it——

Mr. DU PONT. Certainly; I withhold it.

Mr. SUTHERLAND. I want to make another suggestion to him. I thought it quite likely the Senator would give the reply he now makes, that inasmuch as it is the policy of the department it is unnecessary to put it into the law. But the Senator overlooks the suggestion which I made, that the effect of this legislation is to operate as a pressure upon these civilian employees to enlist against their own desire in the Army. That that is so I call attention to two letters written by the Quartermaster General.

Mr. DU PONT. May I interrupt the Senator from Utah for a moment?

Mr. SUTHERLAND. Certainly.

Mr. DU PONT. I understand that now they can not enlist if they are married men. Therefore it is a pressure which can only come to those who are single men.

Mr. SUTHERLAND. That is quite true.

Mr. DU PONT. I understood the Senator to say a short time ago that most of these men were married.

Mr. SUTHERLAND. No; I did not. I do not know what proportion of them are married; but I stated that the effect of the legislation was, so far as the law was put in operation, to put married men out of employment and unmarried men in to the extent to which the unmarried men enlist.

Mr. DU PONT. I misunderstood the Senator.

Mr. SUTHERLAND. The Quartermaster General says, among other things, in a letter which I have in my hand:

Employees at depots who were appointed from the unskilled civil-service lists, who are under 45 years of age, will be required to enlist, and refusing enlistment their places will be filled by enlisted men of the Quartermaster Corps of the Army.

In another letter he says:

In view of the wording of the law and the decision of the Secretary of War, it would appear that unless the law is changed the unclassified employees must be discharged in order that men may be enlisted.

Statements of that kind coming from the War Department rather compel the civilian employees, in order to feel secure in their positions, to enlist in the Army, and I object to that sort of thing. I should object to a conscription act in a time of peace, and this very nearly approaches that kind of an act.

As to the point of order, Mr. President, the amendment suggested is clearly in order, because it is a limitation upon the appropriation for the pay of these identical enlisted men, amounting to the sum of $810,000. To the extent that my amendment will alter the law, it will affect the amount of that appropriation which will be expended.

The PRESIDENT pro tempore. Will the Senator please restate his point again? The Chair did not exactly hear it.

Mr. SUTHERLAND. The bill makes an appropriation for the pay of enlisted men, Quartermaster Corps, and additional pay for length of service, $810,000. That appropriation is for these identical enlisted men who are to take the places of the civilian employees. Under the terms of the law as it now exists these civilian employees can be put out of their positions and enlisted men put in, and these enlisted men would take their places and will share in this appropriation of $810,000.

The effect of my amendment is to limit the provisions of existing law so as to prevent a certain proportion of the civilian employees from being eliminated from the service, and of course to that extent it will operate as a limitation upon the expenditure of the appropriation.

The PRESIDENT pro tempore. The point the Senator makes is that it does not increase, but limits the amount.

Mr. SUTHERLAND. Precisely. It will limit the amount of the expenditure.

Mr. DU PONT. My point of order, Mr. President, is that it is new legislation. It has not only been dealt with by the committee, but it has been formally disapproved by the committee.

Mr. SUTHERLAND. That does not settle it with the Senate, I trust.

The PRESIDENT pro tempore. Unless the Senator from Delaware desires to say something in response to the argument as to the point of order, the Chair will overrule the point of order, the intention being undisputed, the Chair understands, to limit the appropriation. The question, then, is on agreeing to the amendment submitted by the Senator from Utah.

The amendment was agreed to.

Mr. OVERMAN. I offer an amendment to come in on page 12, line 2. I ask that it be read.

The PRESIDENT pro tempore. The amendment submitted by the Senator from North Carolina will be read.

The SECRETARY. In line 2, page 12, after the amount "$10,400," insert the following proviso:

Provided, That hereafter the number of majors in said department shall be seven.

Mr. OVERMAN. I wish to say that is strongly recommended by the Secretary of War and the Judge Advocate General. I think the chairman of the committee understands it, and he will probably accept the amendment.

Mr. DU PONT. I understand the question fully. I have heard it discussed a great many times, and it has been repeatedly recommended by the Secretary, both in writing and to me personally, and by the Judge Advocate General as well. I really think that it will be for the benefit of the service, and under the circumstances I will therefore accept the amendment.

The amendment was agreed to.

Mr. OVERMAN. I ask that an extract from a letter of the Secretary of War which I send to the desk in support of the amendment just agreed to may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JANUARY 20, 1913.

Hon. H. A. DU PONT,
Chairman Committee on Military Affairs,
United States Senate, Washington, D. C.

SIR: I desire to invite your attention to the following suggestions as to legislation touching the Army and the War Department, with the recommendation that the suggestions be considered with a view to legislative action during the current session of Congress.

I. Legislation to increase the personnel of the Judge Advocate General's Department and to place it on a detail basis similar to that prescribed for the Ordnance Department.

In view of the wide range, great importance, and increasing volume of the work of the Judge Advocate General's Department, made strikingly manifest during the past year, it is certain that any reorganization of the Army will involve a considerable increase in the commissioned personnel of that department. Pending the completion of plans for such reorganization, recommendation as to what the increase should be is deferred. I therefore limit my recommendation at this time for further legal personnel in the Army to that imperatively needed in the Judge Advocate General's office in the War Department. The requirements made of that office necessitate the presence of a greater number of commissioned assistants to the Judge Advocate General than can be supplied from the small commissioned personnel of the department, and it has been found necessary to detail one line officer for duty in the office, that officer being required to do the work and assume the responsibilities which should naturally fall upon officers commissioned in the department. Observation during the past year and a half has led me to the definite conclusion that the public interest demands an immediate increase of at least one officer in the Judge Advocate General's Department, in order that the increasing volume of business requiring legal attention in the Judge Advocate General's office may be expeditiously and efficiently disposed of. I therefore recommend the addition of at least one major to the commissioned personnel of the department.

Since the passage of the act of February 2, 1901 (31 Stat., 755), the detail system has been applicable to all staff departments of the Army normally recruited from the line, but in the Judge Advocate General's Department, in which the detail system was first introduced in 1884 (sec. 1, act of July 5, 1884, 23 Stat., 113), it has been applicable only to the lowest grade, that of captain (sec. 15, act of Feb. 2, 1901, 31 Stat., 751). The work required of the Judge Advocate General's Department is highly technical in character and is constantly increasing in volume, complexity, and importance. The Judge Advocate General is of the opinion, in which I concur, that under the detail system now applicable to the Ordnance Department, involving as it does competitive qualification for entry into the department and the necessity for defending tenure therein by meritorious work, there will be greater assurance of securing and maintaining the high-grade commissioned personnel necessary to the efficient administration of the Judge Advocate General's Department.

It is therefore recommended that, in addition to the increase suggested above, the detail system now applicable to the Ordnance Department be made applicable to the Judge Advocate General's Department. The plan thus suggested may be given legislative expression in substantially the following form:

That the Judge Advocate General's Department is hereby increased by one major, the vacancy thus created to be filled in accordance with existing law, and hereafter the provisions of section 26 of the act of February 2, 1901, as modified for the Ordnance Department by section 2 of the act of June 25, 1906, and by the act of March 3, 1909, shall be held to include the Judge Advocate General's Department: *Provided*, That the board of officers which is to recommend officers for detail in the Judge Advocate General's Department shall be composed of officers of that department: *And provided further*, That acting judge advocates may be detailed for tactical brigades, and when not immediately required for service with geographical departments or tactical divisions or brigades, acting judge advocates may be assigned to such other legal duty as the exigencies of the service may require.

* * * * * * *

Mr. TILLMAN. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 7, after line 8, insert:

That nothing contained in the proviso under the heading "Pay of officers of the line" in the act approved August 24, 1912, entitled "An act making appropriation for the support of the Army for the fiscal year ending June 30, 1913, and for other purposes," shall be held to apply to the service of Capt. Frank Parker, United States Army, for the period necessary for him to complete his present tour of duty at L'Ecole de Guerre, France.

The amendment was agreed to.

Mr. WORKS. I offer the amendment I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. It is proposed to amend by inserting, after line 18, page 49, the following:

That the Pacific Branch of the National Home for Disabled Volunteer Soldiers, located at Santa Monica, Cal., together with all property, including furniture and the records pertaining exclusively to said branch home, be, and the same is hereby, transferred to the War Department, such transfer to be effective July 1, 1913; and on and after said date the said branch home shall be under the jurisdiction and control of the Secretary of War, and all appropriations therefor shall be expended under his direction and accounted for as other appropriations for the War Department; and the Secretary of War is hereby authorized to impose such conditions as he may deem advisable for the admission or retention of those entitled to membership under existing laws who are receiving a pension in excess of $20 per month.

Mr. DU PONT. Mr. President, the amendment proposed by the Senator from California is in harmony with the recommendations of the subcommittee of the Committee on Military Affairs, which carefully investigated the whole subject. I will therefore accept the amendment.

The amendment was agreed to.

Mr. BRISTOW. Following the amendment which has just been adopted, I offer an amendment. I think I have framed it now so as to remove the objection to it from the chairman of the committee and the Senator from Wyoming. I send it to the desk to be read.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. After the amendment just agreed to on page 48 insert:

After January 1, 1914, no moneys appropriated in this bill for the purchase and maintenance of vehicles that are used in the District of Columbia, other than automobile trucks, shall be used for the purchase, maintenance, or use of any vehicles that are not drawn exclusively by mules.

Mr. GALLINGER. I should like to hear the amendment read again, Mr. President.

The Secretary again read the amendment.

Mr. WARREN. We all love the mule and we respect the horse; but it seems to me that the proposed amendment is an invidious distinction and a sin against the horse that I will not be able to support.

Mr. BRISTOW. Mr. President, the Senator from Wyoming understands the purpose of the amendment. As it was originally drawn he objected to it because he said it might in some sections of the country where mules are not easily obtained result in added expense. But that could not be the case in the District of Columbia. The purpose, as the Senator well knows, is to stop an abuse which I think is scandalous, that of using Government property for private purposes in the District of Columbia.

There is not a Senator here who, when he walks down the streets any day when the weather is pleasant, does not see officers of the Army and of the military establishment using horses and carriages and automobiles for private purposes that are maintained at public expense. We undertake to cut out this abuse as much as we can in the civil establishment, but the abuse is much more widespread, I think, from the military appropriations than from any other of the appropriation bills.

This is not a joke; it is simply a scandal, and this is a means that I think will effectively break it up.

Mr. TOWNSEND. Mr. President, if I understood the Senator from Kansas correctly, his object in adopting the mule was to prevent officers from using it, because he would not want to drive a mule down the street. I have understood that the mule was never more popular than now. If it were wanted really to accomplish this particular purpose, it seems to me we had better adopt oxen, because if we had that as a means of locomotion it is quite certain no officer would drive down the street; and that is, I understand, what we are trying to prevent.

Mr. GALLINGER. Mr. President, I was not in the Chamber when this matter was up a few moments ago, and I have just heard the proposed amendment read with interest and astonishment. I do not think it ought to be agreed to. If the Senator from Kansas should offer an amendment to absolutely prohibit the use of public moneys for the purposes indicated in his amendment, I would have some sympathy with it, but I do not think we ought to gratuitously slur Army officers and thus make ourselves subject to the criticism that will fall upon us if we adopt an amendment of that kind. Therefore I feel constrained to make the point of order against it.

Mr. BRISTOW. The point of order has been made, and it was decided that the amendment is in order. It is simply a limitation upon the expenditure of the money.

Mr. GALLINGER. I was not aware of that fact. If the Chair has decided that, of course I submit to the decision of the Chair. Then, Mr. President, I move to lay the amendment on the table.

The PRESIDENT pro tempore. The Senator from New Hampshire moves to lay the amendment on the table.

Mr. BRISTOW. On that motion I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. GALLINGER. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from New Hampshire suggests the absence of a quorum. The Secretary will proceed to call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	McCumber	Smith, Ga.
Bacon	du Pont	Martin, Va.	Smith, Md.
Borah	Fall	Martine, N. J.	Smith, Mich.
Bourne	Fletcher	Nelson	Smoot
Brandegee	Foster	Oliver	Stephenson
Bristow	Gallinger	Overman	Stone
Bryan	Gamble	Page	Sutherland
Burton	Jackson	Percy	Swanson
Chamberlain	Johnston, Ala.	Perkins	Thomas
Clapp	Jones	Pomerene	Thornton
Clark, Wyo.	Kenyon	Richardson	Townsend
Culberson	Kern	Root	Warren
Cullom	La Follette	Sheppard	Webb
Cummins	Lippitt	Simmons	Williams
Curtis	Lodge	Smith, Ariz.	

The PRESIDENT pro tempore. On the call of the roll 59 Senators have answered to their names. A quorum of the Senate is present.

Mr. GALLINGER. A quorum having been developed, I ask that the amendment be again stated.

The PRESIDENT pro tempore. The amendment will be read.

The SECRETARY. On page 48, line 18, after the amendment already agreed to in that place, insert the following:

After January 1, 1914, no moneys appropriated in this bill for the purchase and maintenance of vehicles that are used in the District of Columbia other than automobile trucks shall be used for the purchase, maintenance, or use of any vehicles that are not drawn exclusively by mules.

The PRESIDENT pro tempore. The Senator from Kansas [Mr. BRISTOW] offers the amendment which has just been read, and the Senator from New Hampshire [Mr. GALLINGER] moves to lay the amendment on the table. Upon that question the yeas and nays have been ordered, and the Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the Senator from Missouri [Mr. STONE]. In the absence of that Senator I withhold my vote.

Mr. GALLINGER (when his name was called). I have a general pair with the junior Senator from New York [Mr. O'GORMAN]. I do not see him in the Chamber, and I transfer my pair to the Senator from New Mexico [Mr. CATRON] and vote. I vote "yea."

Mr. RICHARDSON (when his name was called). I have a general pair with the junior Senator from South Carolina [Mr. SMITH]. I therefore withhold my vote.

Mr. SIMMONS (when his name was called). I am paired with the junior Senator from Minnesota [Mr. CLAPP].

Mr. SMITH of Michigan (when his name was called). I am paired with the junior Senator from Missouri [Mr. REED]. If he were present, I would vote "yea." I withhold my vote.

Mr. WILLIAMS (when his name was called). I have a pair with the senior Senator from Pennsylvania [Mr. PENROSE], and I therefore withhold my vote.

The roll call was concluded.

Mr. GUGGENHEIM. I wish to inquire if the senior Senator from Kentucky [Mr. PAYNTER] has voted.

The PRESIDENT pro tempore. The Chair is informed that he has not.

Mr. GUGGENHEIM. I withhold my vote, as that Senator is absent.

Mr. DILLINGHAM. I observe that the senior Senator from South Carolina [Mr. TILLMAN] has not voted, and as I have a general pair with that Senator I withhold my vote. Were he present, I would vote "yea."

Mr. KERN. I inquire if the junior Senator from Kentucky [Mr. BRADLEY] has voted.

The PRESIDENT pro tempore. The Chair is informed that Senator has not voted.

Mr. KERN. Having a general pair with the junior Senator from Kentucky, I withhold my vote.

The result was announced—yeas 35, nays 21, as follows:

YEAS—35.

Ashurst	Fletcher	Martine, N. J.	Stephenson
Bankhead	Foster	Myers	Sutherland
Bourne	Gallinger	Oliver	Swanson
Brandegee	Gamble	Percy	Thornton
Burnham	Jackson	Perkins	Townsend
Crane	Lippitt	Root	Warren
Culberson	Lodge	Smith, Ariz.	Webb
Cullom	McLean	Smith, Md.	Wetmore
du Pont	Martin, Va.	Smoot	

NAYS—21.

Bacon	Clarke, Ark.	Kern	Sheppard
Borah	Crawford	McCumber	Smith, Ga.
Bristow	Fall	Nelson	Thomas
Bryan	Johnston, Ala.	Overman	
Burton	Jones	Page	
Chamberlain	Kenyon	Pomerene	

NOT VOTING—39.

Bradley	Dillingham	Lea	Shively
Brady	Dixon	Massey	Simmons
Briggs	Gardner	Newlands	Smith, Mich.
Brown	Gore	O'Gorman	Smith, S. C.
Catron	Gronna	Owen	Stone
Chilton	Guggenheim	Paynter	Tillman
Clapp	Hitchcock	Penrose	Watson
Clark, Wyo.	Johnson, Me.	Poindexter	Williams
Cummins	Kavanaugh	Reed	Works
Curtis	La Follette	Richardson	

So Mr. BRISTOW's amendment was laid on the table.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. CURTIS. Mr. President, I heretofore gave notice that I would call up the District of Columbia appropriation bill immediately after the bill which has just been passed was disposed

of; but the print of the District bill, I am informed, will not be delivered in the Senate Chamber for a few minutes. I understand the Senator from Minnesota [Mr. NELSON] is ready to proceed on the bill which was under discussion yesterday.

CONNECTICUT RIVER DAM.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8033) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

Mr. NELSON. Mr. President, I propose for a few moments to express my views upon the bill now pending before the Senate, known as the Connecticut River bill. I do not intend to enter into an extensive or academic discussion of the subject. I propose briefly to state the character of the bill, the rights that it confers upon the Connecticut River Co., the rights of the Federal Government, and the property that the Federal Government has to lease or sell in this case.

The Connecticut River Co., the beneficiary of this bill, was incorporated many years ago by the State of Connecticut, originally as a navigation company. It built a canal, and for some time charged tolls. Afterwards the canal was abandoned and the company became essentially a water-power company. The locality in question is between Hartford and Holyoke, a reach of the river that, in its natural condition, as I understand, is not navigable except for logs, small boats, skiffs, and similar things.

It may seem, Mr. President, ungracious for me to oppose a bill of this kind, a local bill, as it were, in reference to conferring a right on a stream in the State of Connecticut; and were it not for one provision in the bill, the bill would meet with my hearty concurrence. All the provisions except one are satisfactory to me. There is, however, one provision in the bill which is objectionable; objectionable in itself, but most of all it is objectionable because it proposes to set an unwise and unjust precedent and is entirely in derogation of the rights of the State and the rights of the riparian owners.

As long ago as 1835, almost a century ago, the Supreme Court of the United States settled the question in whom is the title, ownership, and sovereignty of waters in a State. Is it in the State and the people of the State, or is it in the Federal Government? In a very early case arising in New Jersey the Supreme Court of the United States laid down the doctrine briefly, in the terms which I am about to read. After discussing the right of the Crown in the tidewaters of New Jersey and what rights were vested in the charter given to the Duke of York before he became King James, and discussing what rights the State of New Jersey inherited when it became independent of England, the court uses this clear and emphatic language:

> For when the Revolution took place the people of each State became themselves sovereign; and in that character hold the absolute right to all their navigable waters, and the soils under them, for their own common use, subject only to the rights since surrendered by the Constitution to the General Government.

The watercourses, Mr. President, within the borders of a State are the absolute property of the people of that State, the riparian owners, and the State combined, and the Federal Government would have no interest in them whatever except for what we call the commerce clause of the Constitution. The commerce clause of the Constitution subrogates the rights of the State and the rights of the riparian owners to the rights of the Federal Government in respect to navigation, and nothing else. The Federal Government has no property, no interest, no right in any navigable stream except for purposes of navigation. Everything else in that stream is the property either of the people of the State or of the riparian owner, or both combined.

Mr. BURTON. Mr. President——

The PRESIDING OFFICER (Mr. OLIVER in the chair). Does the Senator from Minnesota yield to the Senator from Ohio?

Mr. NELSON. Certainly.

Mr. BURTON. Will the Senator from Minnesota please yield to me for a moment? I do not want to interrupt him, but only wish to ask from where he reads the case which he has cited?

Mr. NELSON. It is the case of Martin *v.* Waddell (16 Pet., 367). That case was afterwards followed by a case arising in Alabama, that of Pollard *v.* Hagan (3 How., 212), where the same doctrine was reiterated. The cases of Martin against Waddell and Pollard against Hagan, it is true, were tidewater cases, but in the case of Barney *v.* Keokuk (94 U. S., 324), an Iowa case, the Supreme Court uses this language:

> These cases—

Referring to the two cases I have quoted—

> related to tidewater, it is true, but they enunciate principles which are equally applicable to all navigable rivers.

In other words, the same principle that was laid down in the case of Martin against Waddell applies to the streams of this country.

In this country, Mr. President, when it comes to the question of riparian rights, the States may be grouped into two classes. In most of the mountain and mining States, the arid States, the doctrine of prior appropriation prevails in one form or another, perhaps in its most extreme form in Arizona, in Wyoming, and in Colorado, and in its most modified and diluted form—diluted by the common-law doctrine of riparian rights—in California. In all the other States of the Union the doctrine of riparian ownership, as defined by the principles of the common law, is the prevailing doctrine. It is true that in some of the States of New England—I think in Massachusetts and in Maine—the doctrine has been slightly modified.

I now desire to call the attention of the Senator from Ohio to a decision of the supreme court of his own State, which enunciated very clearly the doctrine as to the rights of riparian owners. I read from the case of Walker *v.* Board of Public Works (6 Ohio, 540, 1847). The court, after discussing the subject, used this language:

> In disposing of this subject it is well, in the first instance, to consider what are the respective rights of the public and riparian owners in the streams within our borders which are in fact navigable. The question is not new in this State. It has been repeatedly before this court, and the rule is this: He who owns the land on both banks of such river owns the entire river, subject only to the easement of navigation, and he who owns the land upon one bank only, owns to the middle of the main channel, subject to the same easement. The right of the public is merely the right to use the water within the channel for the purposes of navigation. The proprietor of the lands upon its banks may use the waters of the river in any way not inconsistent with the public easement—

That is, navigation—

> or of private rights—

That is, the superior rights acquired either by condemnation, purchase, or prescription—

> and neither the State nor any individual has the right to divert the water to his injury. The right of the adjacent proprietor to the water of the stream is an usufructory right, appurtenant to freehold, not an absolute property.
>
> Hence the State in its exercise of the right of eminent domain can subject the waters of such stream to other public uses the same as any other private property by making a just compensation for the injury, and not otherwise.

That means the State can authorize that right to be secured by condemnation proceedings in behalf of a superior public purpose. For instance, to illustrate: Water power is created, in the first instance, to operate a gristmill or a sawmill, and eventually a big town or city grows up in the neighborhood. The town or the city may need the water in that dam for domestic use to supply its inhabitants. That, under the circumstances, would be a superior public right, and the State could authorize the property of the water-power company to be condemned for that purpose, but it could not take it absolutely without compensation.

What right has the Federal Government in the Connecticut River? It has no other right than that pertaining to navigation. All other property in that stream of whatsoever character, under the decisions of the Supreme Court, belongs to the riparian owners there.

What is this case? Analyze it, and it amounts to this: That this company, being the riparian owners of the site where the dam is constructed, of the lands that would be subject to flowage in consequence of the construction of the dam, being the absolute owners, under the decision of the courts of that State, they are required to pay compensation to the Federal Government for the use of their own property. That is the effect of this bill; that is what it amounts to. It would establish a most dangerous principle.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Connecticut?

Mr. NELSON. I qualify my statement to the extent that the riparian right, of course, is subject to the sovereignty and superior rights of the State.

Mr. BRANDEGEE. Will the Senator yield for a question?

Mr. NELSON. Certainly.

Mr. BRANDEGEE. The Senator knows, of course, that at this point in the reach of the river it is not navigable.

Mr. NELSON. It is not navigable?

Mr. BRANDEGEE. At this point there are rapids.

Mr. NELSON. Yes, sir.

Mr. BRANDEGEE. Does the Senator question the right of the United States, under the commerce clause of the Constitution, to require the company to maintain a lock in connection with the dam?

Mr. NELSON. No. I will come to that if the Senator will listen to me.

Mr. BRANDEGEE. I wanted to follow that up with another question.

Mr. NELSON. If the Senator will wait until I finish my argument, he can then ask me as many questions as he pleases.

Mr. BRANDEGEE. I do not want to interrupt the Senator if it is not agreeable to him.

Mr. NELSON. I am not objecting to interruptions. I am able to take care of myself, I think, in that respect; but I prefer to state what I have to state in a consecutive manner, so that one part will dovetail with another.

Mr. BRANDEGEE. The Senator does not desire to be interrupted at this point, then?

Mr. NELSON. If it is merely for a question, I will yield. State what is the question.

Mr. BRANDEGEE. The question is, if the Senator admitted the right of the United States to require a lock to be built there at the expense of half a million dollars, why by the same authority could not the Government require a money payment for the improvement of navigation in other respects?

Mr. NELSON. They have no right to require payment for the improvement of navigation in other respects. If an improvement is made in that part of the river, and for the ends of navigation a lock and gate are needed, the Government can require their installation; but when they go to work to compel that company to pay a royalty for the use of water, the money to be devoted not for that reach of the river, but for the river in general, they are perpetrating an act of injustice not warranted by the principles of our Government or by the Constitution.

Mr. BURTON. Mr. President, in that connection——

Mr. NELSON. Just listen until I finish my answer to the question. What right has the Federal Government to assess a private company that has constructed a dam with its own capital to furnish money for the improvement of the Connecticut River in general? If the Connecticut River needs improvement for the purposes of navigation, the fund to make that improvement should be contributed by all the people of the United States, as they are contributing from year to year under the river and harbor bill.

Mr. BURTON. Mr. President, will the Senator from Minnesota, right in this connection, yield to several questions?

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Ohio?

Mr. NELSON. I yield to the Senator.

Mr. BURTON. First, the Senator concedes the right to make it a condition of the enjoyment of that dam there that the Government shall control the flow over the dam, does he not?

Mr. NELSON. I will tell the Senator what I concede. I concede this—and the Senator can apply it to suit himself—that if, without any act of Congress, a company should go to work and build a dam with locks and gates in the manner prescribed in this bill, they could do so without any legislation. The Government could not go into court and enjoin them from building that dam, unless it were shown to be an obstruction to navigation.

Mr. BURTON. Well, could not the Government in carrying out that plan of improvement prescribe a certain depth to be secured in the river?

Mr. NELSON. The Government can prescribe whatever may be needed for navigation.

Mr. BURTON. Well, suppose they want 12 feet, as is now the provision, can they not compel those who have this authority so to construct their works as that 12 feet may be secured?

Mr. NELSON. Certainly they can, if it is necessary for the purposes of navigation; but that is foreign to the question.

Mr. BURTON. I think it will appear that it is applicable. Can they not, in carrying out that purpose to have 12 feet, prescribe the quantity which must be released and flow over the dam?

Mr. NELSON. They can prescribe it to the extent that it is necessary for navigation, but for no other purpose.

Mr. BURTON. Well, for 12 feet?

Mr. NELSON. Yes; if that is necessary for navigation, but not for any other purpose.

Mr. BURTON. Oh, well, that, of course, is taken for granted. Suppose it should appear that that 12 feet could be provided either by allowing the total flow to go uninterrupted over the dam at all times, or, if the company desired to use all the water, by suspending the flow at some times and dredging below the dam. This bill provides that the flow over the dam shall be absolutely under the control of the Federal Government, so as to secure a depth of 12 feet. Now, suppose the company should, in dealing with the Government, say, "We should like to hold back the water at certain times," and the Government should say, "If that is the case, dredging must be done below to maintain and to secure the 12 feet, because you do not give the uninterrupted flow of water," could not the Government by just the same authority by which they require all the water to go over the dam also require that, if these parties suspend the flow, they shall pay the cost of dredging to secure exactly the same result?

Mr. NELSON. Not necessarily. It depends upon the purpose for which the Government should undertake to exercise the authority.

Mr. BURTON. It is for the purpose of navigation in most cases.

Mr. NELSON. Now let us look at the facts in the case. Here is a reach of the river that is not navigable. By the erection of this dam a pool for navigation purposes is created by the company, not by the Federal Government. The Federal Government has the right to say that in building that dam they must not build it or use it in any manner that will interfere with navigation. The Government has a right to prescribe, for the purposes of navigation, the size of the lock and the gates, and how they shall be operated; and it has a right to prescribe the manner in which the water shall be used for the purpose of navigation, but for no other purpose.

Mr. BURTON. I do not think the Senator from Minnesota understood my question.

Mr. NELSON. Well, the Senator knows that I hope to enlighten him on all points and not on one only.

Mr. BURTON. I always gain enlightenment from the Senator from Minnesota. Two things might happen: The Government might compel the overflow to go by at all times or a part of the flow might be suspended.

Mr. NELSON. No; it could not compel it unless it were necessary for the purposes of navigation.

Mr. BURTON. Of course that is taken for granted all the time.

Mr. NELSON. Does the Senator understand the law of hydraulics—that if a dam is erected and is once filled with water the flow of water then over the dam will be in the same quantity as it would in the state of nature? After the dam has been built the water will continue to flow over the dam.

Mr. BURTON. Barring evaporation and some little waste, that is true. The Senator from Minnesota, I think, has not fully understood my question. Two cases might arise—one a suspension of the total flow during low water; the other the requirement that the flow should at all times go by——

Mr. NELSON. Now, suppose there was a total suspension during low water, would you make the company pay for the act of God in suspending the rainfall and drying up the stream?

Mr. BURTON. The Senator from Minnesota does not yet understand my question. Suppose a certain depth of 12 feet were required and the company desired at certain times to hold back the natural flow. As a compensation for that could the Government not compel that company to pay the cost of dredging to put the stream in the shape in which it would be if it went by at all times?

Mr. NELSON. No; not in the case the Senator puts; because if no dam were constructed there would be no navigable channel at all.

Mr. BURTON. I think, if the Senator from Minnesota will reflect on that, he will find that it would be an absolute impossibility——

Mr. NELSON. I hope the Senator from Ohio will reflect on it. I was about to remark when the questions were asked me, or I started initially to make the statement, that there are two systems of riparian rights which prevail in this country—one the doctrine that prevails in the mountain, the arid, the semiarid, and the mining States, which is commonly called the doctrine of prior appropriation. In most of the States east of the Mississippi, with perhaps a little modification in some States—I think in one or two of the New England States, for instance—the doctrine of the common law prevails; that is, that the riparian owner owns to the center of the stream, subject to the public easement of navigation. For all other purposes that stream is his, but he can not use it under the common law to the detriment or the damage of the owners above or below. If there is a water power on his stream, if there is a water power on his land, he has a right to utilize that, and no one can make him pay for the use of that water.

In this case what is it proposed to do, Mr. President? It is proposed to have this company build a dam with its own money on a reach of the river where there never heretofore existed any navigation, where there is an obstruction, an impediment to navigation in the stream. The company are to build a dam costing, perhaps, one or two million dollars—I do not know how much—they are to put into the dam a lock and gates for

opening it; they are to furnish those locks and gates and convey them to the Federal Government and convey the electric power to the Federal Government to operate that dam.

In addition to erecting a dam, creating a pool of water, making a reach of the river in part navigable that never was navigable before—in addition to doing that, without any expense to the Federal Government whatsoever, the Government comes in by this bill and says, "You must pay for the use of that water over and above what is needed for navigation purposes." In other words, they must pay for using that water for other purposes. That is the plain English of it.

There is one thing—and we have no need to be modest in stating it—that seems to me passing strange. Men come here from Connecticut and other portions of the country to secure legislation; they go to the Secretary of War and confer with him about it, and he tells them what they can do and what they can not do. He assumes to be the chief high mogul in the determination of these matters. He tells them bluntly "Such and such conditions must be put in the bill, or you can not have this legislation." Until this practice arose I always supposed that Congress, Mr. President, had the right to determine the policy of the Government in these cases, and that it did not appertain to any department of this Government to tell people what kind of legislation they ought to have or could get. It is for both Houses of Congress to determine that question, and not for the Secretary of War.

There is another thing—and we might as well talk plainly in this matter—the President of the United States when he was Secretary of War, and it so appears in this report published for the use of the committee, took exactly the same ground we are taking in this case. I know from my own knowledge that that was his position; but, unfortunately, he has a Secretary of War who belongs to one of the ultraconservation schools, who are seeking to fasten upon us this new doctrine, and to sweeten it and make it palatable they have changed front. Originally the royalty was to be paid into the Treasury generally; but now the sweetening, to make this plan palatable, is that the royalty which we exact must go to pay for other improvements on this river. What an injustice that is—to segregate this company from all the other citizens of Connecticut and from all the other people of the United States, and say: "Because you build a dam over the rapids in the Connecticut River in a reach of the river that is not navigable, because you have the audacity with your own capital to make a pool for navigation, because you have the audacity and the nerve and the capital to do that, you must pay a penalty; you must furnish money to improve all the rest of the Connecticut River."

What a monstrous doctrine that is, Mr. President! What has the Federal Government to sell here? What has the Federal Government to lease? It has no interest at all in the use of the water except for purposes of navigation. The Government of the United States is not in the habit of charging tolls for the use of its watercourses, its streams, and its navigable harbors. They are free to all the people of the United States.

In this case the Government of the United States does not undertake to charge any tolls for navigation purposes; but it undertakes to impose a charge upon these people who are investing their own capital and are making a reach of the river that is now worthless for navigation purposes in part of value for navigation purposes.

The principle is the same in the one case as in the other, Mr. President. In the one case the royalty was to be paid into the general fund of the Treasury. In this case it is limited to the improvement of one stream and its tributaries.

There is a different doctrine prevailing in reference to another class of dams. Where the Federal Government, for the purposes and in the interest of navigation, erects a dam in a river entirely with money appropriated by it, and incidentally to that improvement for purposes of navigation the Federal Government creates a water power in connection with it, that water power should not be left idle, without use; and inasmuch as the power has been created by the Government for purposes of navigation, the Government has a right to charge a reasonable compensation for it.

There is where I draw the distinction, and I think it is justifiable in fact and in law. Where the Government of the United States with its own capital, without any outside help, secures the riparian lands, the site of the dam, the flowage rights, and with its own money builds the dam, it is entitled to all that there is in it. In that case the Government is not only using its own money, but it is the riparian owner; for the Government never erects a dam or improves navigation by means of a dam without securing the riparian lands necessary for the site of the dam and the flowage rights.

So the Federal Government is exactly in the same position that the Connecticut River Co. is in respect to its riparian lands. If the Federal Government is a riparian owner, and builds a dam with its own money, why should not the Federal Government in that case pay a royalty to the State of Connecticut for improving the Connecticut River down in the State of Rhode Island or up in the State of Massachusetts?

Mr. President, it is because the principle laid down in this bill is so far-reaching in its consequences that I am opposed to this paragraph of the bill. I am quite willing that this company should have this right. They are entitled to it as riparian owners. The Government has no interest in the water except for purposes of navigation. I am willing that the company should have that right, and make the best use of it they can. If it yields them an income on the capital they have to invest, let them have it; but let us not levy tribute upon it.

We have now secured the adoption of an income-tax amendment to the Constitution. If we must levy tribute on the people of this State for governmental purposes, let us levy the tribute on all alike by tariff taxes, by internal-revenue taxes, and by income taxes. Let us not segregate a private company that is the riparian owner, that owns the site of the dam, that owns the lands to be flowed, that puts only its own money into the enterprise. Let us not penalize such companies and make them pay the Government for something that the Government does not own.

Here is an attempt on the part of the Government to require compensation for something that the Government does not own. To my mind, it is abhorrent to the principles of our Government, to our dual system of government, and abhorrent to the fundamental principles of right and justice.

I hope this provision will be stricken out of the bill, and that it will be passed without it.

As I said a moment ago, in every case that I have had under consideration or that has come before the committee of which I am a member, where the Government with its own money and as the riparian owner has constructed a dam in a watercourse for purposes of navigation, I have always believed, and that is my belief now, that the Government is entitled to compensation as the owner of the surplus power incidentally created by means of the construction of the dam. But where a dam is constructed wholly by private capital upon the lands of the riparian owner, and the Government does not advance a dollar of its own money, and nothing is done to hinder navigation, but on the contrary, navigation is improved, in that case the Government has no right to sell and has no moral or legal right to charge any compensation.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. CURTIS. Mr. President, I move that the Senate proceed to the consideration of the bill (H. R. 28499) making appropriations to provide for the expenses of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes.

Mr. KENYON. Mr. President, as I understand, this bill has been put on our desks within the past 20 minutes. I know that I would like an opportunity to go through the bill, and I think other Senators would.

Mr. CURTIS. I will say to the Senator that I am sure that if he will watch the reading of the bill he will be satisfied with the amendments that have been made. The bill was very carefully considered, and in no case has the estimate of the department been exceeded. In fact, the bill as reported carries a less amount than the estimates, and in every way the bill has been carefully considered. I am confident the Senator will have no objection, and I hope he will consent that we shall take it up now, without any further delay, because these bills must be passed.

Mr. KENYON. Mr. President, here is a bill carrying some eleven or twelve million dollars——

Mr. CURTIS. Eleven million dollars.

Mr. KENYON. With no opportunity at all for Senators to investigate it. I do not believe such legislation should be hurried in this manner.

Mr. CURTIS. I will state further that if, in reading the bill, there is any objection to any item in it, as chairman of the subcommittee having charge of it I shall consent that the item go over.

Mr. KENYON. There is no chance, of course, to discover that. If it is in order to make an objection, I am going to make an objection.

Mr. CURTIS. I move that the Senate proceed to consider the bill.

The PRESIDING OFFICER. The Senator from Kansas [Mr. CURTIS] moves that the Senate proceed to the consideration of the bill notwithstanding the objection.

Mr. KENYON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Iowa suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	McCumber	Smith, Mich.
Bacon	Dillingham	McLean	Smoot.
Bankhead	du Pont	Martine, N. J.	Sutherland
Borah	Fall	Nelson	Thomas
Bourne	Fletcher	Oliver	Thornton
Bradley	Gallinger	Page	Townsend
Brandegee	Gamble	Perkins	Warren
Bristow	Jackson	Pomerene	Webb
Burton	Johnson, Me.	Richardson	Williams
Clark, Wyo.	Johnston, Ala.	Sheppard	Works.
Clarke, Ark.	Jones	Simmons	
Crawford	Kenyon	Smith, Ariz.	
Cullom	Kern	Smith, Md.	

The PRESIDING OFFICER. Forty-nine Senators have answered to their names. A quorum of the Senate is present. The Senator from Kansas [Mr. CURTIS] moves that the Senate proceed to the consideration of the bill (H. R. 28499) making appropriations to provide for the expenses of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes, notwithstanding the objection of the Senator from Iowa [Mr. KENYON].

Mr. KENYON. Mr. President, I desire to make a point of order.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. KENYON. It is that under Rule XXVI the report of a committee, which is practically what this is, must lie over one day for consideration, unless by unanimous consent. That is the provision of part 2 of Rule XXVI.

Mr. CURTIS. Mr. President, that would have been true had the objection been made before the motion was made to take up the bill. The Senator did not make that point then, and I think it now comes too late. I will confess that, if it had been made at first, the measure would have had to go over for the day.

The PRESIDING OFFICER. The present occupant of the chair is of the opinion that the point of order is well taken.

Mr. CURTIS. Then, Mr. President, I give notice that I shall call up the bill at the first opportunity on Monday next.

Mr. McCUMBER obtained the floor.

Mr. WARREN. Will the Senator yield to me for just a moment?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Wyoming?

Mr. McCUMBER. Yes.

Mr. WARREN. Of course, I do not know what the objection is to the bill. I assume, perhaps, the Senator wishes to look it over further. But I want to say that we shall have to ask Senators, as far as they can, to forbear asking extra time, because there are only a few days of the session left, and not a single appropriation bill, save the smallest of the lot, has passed. For instance, in this case, while it is true that this is the same day the bill was reported, there are so few changes that it was assumed that its consideration would be unanimously agreed to.

To-morrow is set aside for memorial exercises. On Monday we have notice of the river and harbor bill and the Indian appropriation bill; and if we add this to the others, of course it will more than use the day. Either the rule that the Senator has invoked would have to be abrogated, or we would have to let appropriation bills run over, when we were approaching the end of a session.

Mr. KENYON. I do not want to be captious about my objection; but this bill was placed on my desk about 20 minutes ago, and it carries a large appropriation. For my part, I should like to have an opportunity to go through the bill.

Mr. WARREN. The matter having been settled, I simply wanted to appeal to the Senate to try to help the various committees that have the appropriation bills in charge, for never in my experience here have we had so many unfinished appropriation bills so late in the session, and I fear that we may have to let some of them go over.

Mr. SMOOT. Mr. President, the Senator from Kansas [Mr. CURTIS], who has the bill in charge, also stated that if there was a single objection made during the reading of the bill he would lay it over until the following day. Of course that would protect anybody who desired to consider the bill further, under the statement made by the Senator.

INDIAN APPROPRIATION BILL.

Mr. McCUMBER. Mr. President, I wish to give notice at this time of a motion to recommit to the committee House bill 26874—the Indian appropriation bill—because of the fact that it is reported without an amendment which was adopted by the committee, and I desire to have it returned to the committee in order that it may be corrected in that respect. I shall not press the motion at this time, because the chairman of the committee is not present in the Chamber.

Mr. SMOOT. Mr. President, I will ask the Senator if it would not answer just as well to have the amendment offered on the floor as a committee amendment, and not take the time that would be necessary to refer the bill back to the committee?

Mr. McCUMBER. I do not think it will take much time to reconsider the matter.

Mr. SMOOT. The bill would have to lie over for a day before we could consider it; and if the chairman of the committee will offer the amendment it will save the return of the bill to the committee.

Mr. McCUMBER. I have no objection; but there is an amendment which the record will show was adopted by a vote of 4 to 3, and the bill was reported with that amendment out of it.

Mr. GAMBLE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from South Dakota?

Mr. McCUMBER. I do.

Mr. GAMBLE. I reported the bill referred to on the 12th of February, with all amendments adopted by the committee, and at that time gave notice that later I should submit a report in connection with the bill. I think I shall be able to submit the report before the recess to-day. I am not advised as to what particular amendment the Senator from North Dakota refers to. I shall be glad to be advised.

Mr. McCUMBER. I will call the Senator's attention to it now. I have looked up the stenographic report to see if I was absolutely correct. I find that the loyal Creek claim was placed upon the bill by a vote of 4 to 3; that afterwards, when I was not present, the matter was considered, and without any further vote on the matter it was left out. It having been voted into the bill, I shall ask that the bill be returned to the committee, and I shall appeal to the record for the basis of that motion, for the purpose of having the item placed in the bill as an amendment.

Mr. GAMBLE. Mr. President, perhaps the matter can be more appropriately taken up when the motion is made. The amendment to which the Senator from North Dakota refers was brought up before the committee; and while I do not want to state unduly what occurred before the committee, I will say that the Senator from Kansas [Mr. CURTIS] took a position against the amendment. The discussion was somewhat protracted. Other business intervened, and the Senator from Kansas was called to the floor of the Senate. The matter was submitted after the hearing, but it was suggested at the time before the committee that as the Senator from Kansas had taken a position in opposition to it, his vote should be counted in the negative. It was not determined at that time. The matter was finally determined later in the afternoon, when the vote stood 4 to 4, and the motion did not prevail. The Senator from Kansas was present, and indicated his opposition to the amendment.

I am satisfied that the accuracy of the statements I make can be demonstrated to the Senate from the record, because I have taken pains to go through the matter carefully, for the reason that the Senator from North Dakota spoke to me concerning it.

Mr. McCUMBER. If the Senator will give me a copy of the corrected print of the record at that time, I shall have very little difficulty in establishing to the Senator's own mind that his view is erroneous as to what took place in the committee. If the Senator desires to go into the matter, the facts were about like this:

A motion was made by myself to include the loyal Creek claim in the Indian appropriation bill. A vote was had upon that, and the vote was 4 in favor of and 3 against placing it upon the bill. It was suggested at that time that the Senator from Kansas [Mr. CURTIS], who was absent, would, if present, vote against it. I then made the suggestion that there were other Senators who possibly might overcome his vote by voting for it. Thereupon I also suggested that the Senator had already given notice that he would raise a point of order on the amendment upon the floor of the Senate, and that he would have the opportunity to do that, so that his rights would be protected in any event. Later in the afternoon, when I was absent, the matter was again taken up, but no further vote was had upon the proposition nor was it put a second time.

I simply stand upon the right to have an amendment which has been carried in the committee placed in the report of the committee and upon the bill.

Mr. BRANDEGEE. Mr. President, I rise to a point of order.

The PRESIDING OFFICER. The Senator from Connecticut will state his point of order.

Mr. BRANDEGEE. I exceedingly dislike to interfere in the interesting discussion which is taking place, but I should like to make a parliamentary inquiry as to what is the pending matter before the Senate.

The PRESIDING OFFICER. The pending matter before the Senate is Senate bill 8033, known as the Connecticut River dam bill.

Mr. BRANDEGEE. Then I suggest that the pending controversy is not particularly germane to the pending measure.

Mr. GAMBLE. Mr. President, will the Senator from Connecticut permit me to say just a word?

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from South Dakota?

Mr. BRANDEGEE. I yield to the Senator.

Mr. GAMBLE. I want to say to the Senator from North Dakota that the matter was submitted subsequently to the statement to which he refers. The Senator from Kansas [Mr. CURTIS] was there and indicated his opposition to the measure, and it was stated before the committee that the motion did not prevail. So if it is referred back to the committee there will be a protracted delay. As it is now, we will be ready to take up the matter before the Senate on the first day of next week, and then the Senator from North Dakota can submit his amendment to the Senate.

Mr. McCUMBER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from North Dakota?

Mr. BRANDEGEE. I yield.

Mr. McCUMBER. My opinion is that it will delay the matter very much longer if this case does not receive just treatment in the committee than it would if it should go back and the case should be tried out in the committee.

Mr. GAMBLE. We appreciate the fact that nearly the whole afternoon was given to the consideration of the proposed amendment. The measure which was advocated by the Senator from North Dakota had the fullest consideration of any measure submitted to the committee during the present session.

Mr. McCUMBER. Yes; and it was carried, too.

CONNECTICUT RIVER DAM.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8933) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

The PRESIDING OFFICER. The bill is before the Senate as in Committee of the Whole, and open to amendment.

Mr. BANKHEAD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Alabama suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	Lodge	Simmons
Bacon	du Pont	McCumber	Smith, Ariz.
Bankhead	Fall	McLean	Smoot
Borah	Fletcher	Martine, N. J.	Sutherland
Bourne	Gallinger	Nelson	Thomas
Brandegee	Gamble	Oliver	Thornton
Bristow	Jackson	Page	Warren
Burton	Johnston, Ala.	Perkins	Webb
Clark, Wyo.	Jones	Richardson	Wetmore
Cullom	Kenyon	Root	Williams
Curtis	Kern	Sheppard	Works

The PRESIDING OFFICER. Forty-four Senators have answered to their names—not a quorum.

Mr. BRANDEGEE. I suggest that the names of the absentees be called.

The PRESIDING OFFICER. The Secretary will call the names of the absent Senators.

The Secretary called the names of the absent Senators, and Mr. NEWLANDS, Mr. SMITH of Georgia, Mr. SMITH of Maryland, Mr. SMITH of Michigan, and Mr. TOWNSEND answered to their names when called.

Mr. BURNHAM, Mr. CHAMBERLAIN, Mr. BRADY, Mr. GRONNA, Mr. GARDNER, Mr. GUGGENHEIM, Mr. MYERS, and Mr. FOSTER entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty-seven Senators have answered to their names. A quorum of the Senate is present.

Mr. BRANDEGEE. What is the pending amendment?

The PRESIDING OFFICER. There is no pending amendment.

Mr. BRANDEGEE. No amendment is pending?

The PRESIDING OFFICER. No amendment.

Mr. BRANDEGEE. Then I ask for a vote on the bill.

Mr. BANKHEAD rose.

Mr. BORAH. Mr. President——

Mr. BANKHEAD. I yield to the Senator from Idaho.

Mr. BORAH. There is an amendment which I offered and it is on the Secretary's desk. I offer the amendment.

The PRESIDING OFFICER. The Senator from Idaho offers an amendment, which will be read. The Senator from Idaho has offered two amendments.

Mr. BORAH. It is the amendment with reference to interstate commerce.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. Strike out all after the word "further," in line 19, page 2, including the word "charges," in line 8, page 3, and insert in lieu thereof the following:

That the provisions of the act entitled "An act to regulate commerce," passed and approved on the 4th day of February, 1887, together with the amendments thereto, shall apply to any corporation or any person or persons engaged in transmitting hydroelectric power or electricity from one State, Territory, or District of the United States to any State, Territory, or District of the United States, or from one place in a Territory to another place in the same Territory or to any foreign country, and that the term "common carrier" as used in said act and the amendments thereto shall include companies engaged in transmitting hydroelectric power or electricity as aforesaid: *Provided*, That said act shall not apply to the transmission of hydroelectric power or electricity wholly within one State and not transmitted to or from a foreign country, from or to any State or Territory as aforesaid; that the rules prescribed in said act as to just and reasonable charges or rates and the procedure relative to other common carriers, in so far as applicable, shall apply to such company, person, or persons transmitting hydroelectric power or electricity as aforesaid, and to the fixing and establishing of just and reasonable charges or rates fully and completely.

Mr. BORAH. Mr. President, the effect of this amendment, if it should be adopted, would be to strike out that portion of the original bill covered by line 19, on page 2, to line 8, on page 3, which relates to the power of the Secretary of War to impose reasonable charges, and so forth, and to insert in lieu thereof this amendment, which provides for the fixing of rates through and by means of the Interstate Commerce Commission.

I discussed the matter at some length yesterday, and therefore I do not desire to do more than to call the attention of the Senate to the nature of the amendment.

Mr. NELSON. I understand the amendment proposes to strike out all after line 18, on page 2, down to the end of the section, in line 8.

Mr. BORAH. And to insert in lieu thereof as an amendment a provision that the Interstate Commerce Commission shall have jurisdiction to fix the charges of companies transmitting power across State lines.

Mr. BURTON. Will the Senator from Idaho please answer a question? Do I understand that his proposed amendment seeks to establish a general principle, or is it applicable only to this bill?

Mr. BORAH. It would apply to all power of companies transmitting hydroelectric power across State lines.

Mr. BURTON. It is then establishing a general principle.

Mr. President, I am really gratified to note that the Senator from Idaho takes that ground. It is inevitable that with the development of this industry its interstate phase will become so manifest that there must be Federal control either by the Interstate Commerce Commission or by some other agency of the Federal Government; but I do not think we ought to take up that question here. This is a local bill. This amendment would establish a universal rule. I do not think we are quite ready to take such a step. For a considerable time the States can make adequate regulations relating to charges, secure consumers against extortion and the public against monopoly. I repeat, however, I am satisfied that the ultimate disposition of this question will be that in the case of power transmitted from the place where the water is harnessed and the installation is made into another State some Federal agency must control.

Mr. President, there is another reason why I hope this amendment will not be adopted. It is open to the suspicion that it is intended to accomplish the defeat of this bill.

Mr. BORAH. I should like to relieve the Senator's suspicion as much as I can by saying that I know one more vote that the bill will get in case the amendment is adopted.

Mr. BURTON. But the Senator from Idaho proposes to strike out the provision under which a certain charge is to be made for this water power, which is a vital part of the bill, and establish in place of that provision a rule with reference to the methods under which charges for power are to be made.

Mr. BORAH. The purpose of the amendment is to provide a means by which the ultimate consumers of the power can get the benefit of the power without carrying the burden which would be imposed upon them by reason of the provision which is now in the bill.

Mr. BURTON. I wish to discuss that question. Why does not the Senator from Idaho introduce this as a separate amendment, not in place of any clause in the bill, but as an entirely separate proposition? If he wishes to enunciate that principle, there is an easy way to do it. I do not believe in its being put

into this local bill, but if it must be added there is an easy way to do it by adding it as an amendment to another section of the bill instead of striking out a part of it.

Mr. BORAH. I will be as frank with the Senator from Ohio as he is with the Senate in giving the construction of it. I offered it in this way because I am opposed to this provision in the bill. I have made no concealment of the fact that I would dislike very much to vote for the bill with that provision in it. But if it should transpire that this amendment is defeated as it is offered, I shall offer it as a separate provision of the bill.

Mr. BURTON. The argument of the Senator from Idaho is that as a result of this proposed charge the cost will be increased to the consumer. I wish to state some facts in that connection. It is, of course, a general rule that wherever you increase the cost to the producer the consumer must bear a part of that increase in the price which he must pay for the service or commodity. But in the great majority of instances in this country the cost for water power must be determined by competitive conditions. What are those conditions? A part of our electrical power is produced by the agency of coal and a part by that of falling water. Practically speaking, these are the only primary sources of power on a large scale.

At present the larger share of the power is produced by the burning of coal. Electrical power can be produced, in some instances, by hydroelectric installation for $16 or less per horsepower per year, 24-hour service. The cost where coal is burned is not less than $28. Suppose you have an industrial center in which the consumption of power is 500,000 horsepower per annum, 400,000 furnished by steam and 100,000 by water. That proportion does not present an unusual case. The figures may be incorrect, but the proportion is substantially accurate. With 500,000 horsepower required, 400,000 of it to be furnished by the burning of coal and 100,000 by water, we will assume that the one will cost the producer $16, the other $28. Now, what is going to be the result? Suppose you have a public-service commission that is to fix the rate. Is the commission going to say that one class of power, which brings exactly the same result and is of the same efficiency and value, shall be furnished on a cost basis of $16, and that the other may be sold on a cost basis of $28?

No, Mr. President, in the very first instance the complaint would come from the consumer. The consumer would say, "I am paying $12 per horsepower more for the power I use than my neighbor across the street, who is engaged in the same class of manufacturing. That difference is enough to drive me out of business." The result would be that a uniform price would be fixed, consistent with all the conditions. Now, what are you going to do in such a case as that? The producer who generates his current by water power has a very large profit.

Mr. BORAH. Mr. President——

Mr. BURTON. I would be glad to yield to the Senator from Idaho.

Mr. BORAH. Suppose this condition of affairs——

Mr. CLARKE of Arkansas. May I disturb the Senator from Idaho sufficiently to ask that the pending amendment be reported? It would enable some of us to understand better the discussion that is going on. Some of us were not in the Chamber when the amendment was submitted. I ask that it be read to the Senate.

The PRESIDING OFFICER. The amendment will be again read.

The Secretary again read Mr. BORAH's amendment.

Mr. BANKHEAD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BANKHEAD. I believe under the rules and practice of the Senate the committee reporting the bill are entitled to perfect the bill, if they have amendments to offer, before other amendments are considered. Am I correct?

The PRESIDING OFFICER. The Chair will state that that has been the custom so far as the Chair is informed. There is no rule on the subject.

Mr. BANKHEAD. That has been the custom, Mr. President.

The PRESIDING OFFICER. So the Chair understands.

Mr. BANKHEAD. There is an amendment pending offered by a majority of the committee. I offered that amendment in the beginning of this discussion and had it read from the desk with a view that it might be pending when the time came to act upon it.

The PRESIDING OFFICER. When the bill was taken up a few minutes ago the Chair was informed by the clerks at the desk that no amendment was then pending. Thereupon the amendment was offered by the Senator from Idaho.

Mr. BANKHEAD. Evidently the clerks were mistaken, because the RECORD will show that I offered the amendment and had it read from the desk.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Will the Senator from Ohio yield to the Senator from Minnesota?

Mr. BURTON. I yield to the Senator from Minnesota. I believe I already yielded to the Senator from Idaho, but if there in entire concurrence between them I should be glad to yield to the Senator from Minnesota.

Mr. NELSON. I suggest to the Senator from Alabama and the Senator from Idaho to let us have a vote first on the motion to strike out these lines.

Mr. BANKHEAD. That is what I propose.

Mr. NELSON. Then the Senator from Idaho can afterwards offer his amendment, if that is agreeable to the Senator.

Mr. BORAH. That is entirely agreeable. I offered my amendment because no one else was offering anything. I do not desire to interfere with the committee's action.

The PRESIDING OFFICER. The Chair will state, if the Senator having the floor will allow him, that the bill as reported by the committee contains no amendment. There are no italics in the bill, and therefore there were no committee amendments proposed.

Mr. BANKHEAD. I do not know whether the Secretary remembers reading it or not, but the Senate will remember that when I took the floor I sent an amendment typewritten to the desk and asked to have it read. It appears in the RECORD as having been read from the Clerk's desk. It must have gone there.

The PRESIDING OFFICER. The RECORD shows that it is an amendment intended to be offered by the Senator from Alabama.

Mr. BANKHEAD. At the same time I suggested that under the practice of the Senate the majority of the committee would be entitled to perfect the bill before other amendments were considered.

The PRESIDING OFFICER. The Chair is compelled to rule that the amendment of the Senator from Idaho having been offered and placed before the Senate, it is the pending amendment.

Mr. BORAH. By the consent of the Senate, I will withdraw the amendment. I withdraw the amendment, then, and give the Senator from Alabama an opportunity to do what he desires to do.

The PRESIDING OFFICER. In that case, the amendment of the Senator from Alabama is in order and will be read.

The SECRETARY. Strike out of section 1, beginning after the word "act," in line 15, on page 2, the following:

And provided further, That the rights and privileges hereby granted may be assigned with the written authorization of the Secretary of War or in pursuance of the decree of a court of competent jurisdiction, but not otherwise: *And provided further*, That the Secretary of War, as a part of the conditions and stipulations referred to in said act, may, in his discretion, impose a reasonable annual charge or return, to be paid by the said corporation or its assigns to the United States, the proceeds thereof to be used for the development of navigation on the Connecticut River and the waters connected therewith. In fixing such charge, if any, the Secretary of War shall take into consideration the existing rights and property of said corporation and the amounts spent and required to be spent by it in improving the navigation of said river, and no charge shall be imposed which shall be such as to deprive the said corporation of a reasonable return on the fair value of such dam and appurtenant works and property, allowing for the cost of construction, maintenance and renewal, and for depreciation charges.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. The Senator from Alabama having offered the amendment to the bill, will that Senator yield to the Senator from Idaho?

Mr. BANKHEAD. I have no desire to occupy the floor at this time; I simply wanted to get this amendment before the Senate.

Mr. BURTON. I should like to finish at least a part of my remarks.

Mr. BANKHEAD. I would be glad to hear the Senator from Ohio.

Mr. BURTON. Do I understand that the Senator from Alabama desires to speak to that amendment?

Mr. BANKHEAD. I will determine that when I hear from the Senator from Ohio.

The PRESIDING OFFICER. The Chair had overlooked the fact that the Senator from Ohio is entitled to the floor.

Mr. BORAH. I wish the Senator from Alabama would consider the proposition of amending his amendment. So far as I am concerned I do not want to interfere with taking out the first proviso. The first provision is:

And provided further, That the rights and privileges hereby granted may be assigned with the written authorization of the Secretary of War, or in pursuance of the decree of a court of competent jurisdiction, but not otherwise.

It seems to me that that ought to remain in the bill. I should very much prefer to have the amendment submitted simply striking out the second proviso.

Mr. BANKHEAD. As far as I am concerned I am perfectly willing that that proviso shall remain in the bill, and with the consent of the Senate I would be willing to withdraw that part of my amendment.

Mr. BORAH. Very well.

Mr. BANKHEAD. That is not the part of the bill I am after. I have no objection to that part. I have no objection to all the supervision of that sort of business that can properly be had.

Mr. JONES. I wish to suggest to the Senator from Alabama that he can modify his amendment and simply strike out the last proviso.

Mr. CLARKE of Arkansas. In line 19.

Mr. MARTIN of Virginia. He can modify the amendment.

Mr. BANKHEAD. I want to get the thing straight before the Senate. I am willing that the first proviso contained in the amendment shall remain in the bill. Therefore, would it not be competent for the Senate to give its consent, if it will, that the amendment may be so amended?

Mr. MARTIN of Virginia. You can not do it without consent.

Mr. BANKHEAD. Then, Mr. President, if I have the right, as the mover of the amendment, I will withdraw that part of the amendment included in the first proviso and leave the other portion of the amendment before the Senate.

The PRESIDING OFFICER. Without objection, the Senator from Alabama withdraws that part of the amendment which will be read.

The SECRETARY. The proviso reads:

And provided further, That the rights and privileges hereby granted may be assigned with the written authorization of the Secretary of War, or in pursuance of the decree of a court of competent jurisdiction, but not otherwise.

Mr. BANKHEAD. That part of the amendment is withdrawn, Mr. President.

The PRESIDING OFFICER. The question is on the adoption of the amendment offered by the Senator from Alabama, as modified, which is to strike out all of that section after the word "further," in line 19, on page 2.

Mr. NELSON. All of the section after line 18.

Mr. BURTON. Mr. President, it appears from the circumstances under which electric power is furnished that the ordinary rule—that the extra cost resulting from such a charge would fall on the consumer—does not apply at least in most parts of the country, and it is probable that such a condition will continue for a very long time. It is perfectly well known that there is no business in which the chances for profit are greater than in the development of hydroelectric power. That is shown by the number of promoters who have been crowding to this Congress for the last 12 years. The anxiety with which these privileges are sought should awaken our attention. If there is any one thing in which we should safeguard the public interest, it is in placing proper restrictions upon these grants of the right to construct dams in navigable streams to develop power. If there is any problem which assumes magnitude not only in present but promises far greater importance in the future, it is the control of the hydroelectric business.

What is the object of this provision? In such cases as that which I have named, where power is selling on a cost basis of $28 per horsepower, and it can be profitably produced for $16, the difficulty prevails of equalizing charges. My contention is that a proper portion of the difference between the cost of production by steam and by water power, enjoyed under grant of Congress, should go to the Government of the United States for the improvement of the stream in which such dam is located.

There have been long arguments here to the effect that it is all right to allow a company to acquire land and put in a dam; it is all right that Congress should require the building of a lock, though that has nothing whatever to do with the development of power; it is all right that you should require that the light and power should be furnished to the end of time for the operation of that lock, but you can not impose a charge expressed in dollars.

Mr. President, if there has been an absurdity presented to the Senate for some time, it is the attempt to draw the dividing line between these conditions and the imposition of a charge. The moment you seek to distinguish between them you find yourself in the fog. Both alike are based on the power to impose conditions in the interest of navigation. Let me give a very few simple illustrations, based on this very bill here:

SEC. 2. That the height to which said dam may be raised and maintained shall not be less than 39 feet above zero on the Hartford gauge.

The project of the Government is to secure 12 feet from Hartford for 52 miles to the sea. Suppose the engineers of the company seeking permission to build the dam on examination should find that it would be more economical, so far as the development of power is concerned, to construct that dam to a height of 35 instead of 39 feet, and the officers of the company should say to the officials of the Government: "You are asking us to make that dam 39 feet, but we can more profitably construct it to a height of 35 feet," and the Government engineers should find that if the height is only 35 feet it would be necessary to do a considerable amount of dredging to deepen the channel below, and that it would also be necessary to continue that dredging each year at considerable cost; is there anybody who would go to the absurd length of saying that the Government could not in its contract with the corporation consent that the dam be diminished in height to 35 feet, but the condition be added that money enough be paid to maintain that 12-foot channel? That is, a 12-foot channel would be maintained by 39 feet, but the company may desire a height of 35 feet; and in order to maintain the 12-foot channel with a 35-foot dam, it would be necessary to incure expense each year. Is there anyone who would say that there could not be claimed from that corporation money year by year sufficient to maintain that depth?

Let us take another case. There is a provision here that the corporation shall "provide a minimum discharge past the dam of not less than 1,000 cubic feet per second." Suppose the company should say: "It is much more profitable for us to allow only 800 feet to go past the dam." In that case there would be an added expense below the dam for dredging and for maintenance. Would it be maintained that in such a case as that there could not be an annual charge imposed thereafter for the maintenance of the dredging below?

Still further, there is one great central fact. This river is an entirety. Navigation, in order to exist at all with profit, must be maintained both above and below this proposed improvement. The proposed improvement alone does not make the Connecticut River navigable from Holyoke to the mouth. That is but one part, one specific locality, a few miles of the whole stream, and the Government can, with the utmost propriety, not only impose the condition that you shall build a dam and lock and furnish power, but that you shall also aid in effectuating this improvement of which your dam is a part, to wit, the navigation of the river.

Mr. BANKHEAD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Alabama?

Mr. BURTON. Yes.

Mr. BANKHEAD. I should like to ask the Senator from Ohio if he thinks the question that he is discussing, the regulation of the flow and all that sort of business, has any relation whatever to the provision that we are trying to strike out, which simply authorizes the Government to charge a toll for the use of the water?

Mr. BURTON. It does have a most direct relation.

Mr. BANKHEAD. All the provisions that the Senator is discussing will remain in the bill. They will not be affected at all.

Mr. BURTON. Yes; but you were stating that it was utterly improper to put on an annual charge, and here I have suggested instances in which it would not only be absolutely proper but necessary.

Mr. BANKHEAD. I understand that; but what I wanted the Senator to show was that the phase of this question which he is discussing is applicable to this amendment.

Mr. BURTON. It is, decidedly. The dam and the dredging would be part of the navigation of the same river; it includes not merely a few mills from Enfield Rapids but throughout the whole length of the river.

Mr. BANKHEAD. Of course, it is a part of the same river; but when that language goes out of this bill it will not be a part of the bill. The language which we propose to strike out has no reference whatever to the question that the Senator from Ohio is discussing.

Mr. BURTON. I do not wish, Mr. President, to go over my argument in regard to rights in this water. Of course, the rule is, as laid down by the supreme court of my own State in 6 Ohio, at page 540, and in Barney against Keokuk; but what did the court rule, for instance, in Barney against Keokuk? Below the point to which the abutting owner on the Mississippi owned, the city of Keokuk put in a wharf for public use, and the abutting owner, who owned to the water line, said, "No; you can not do that. So far as there is any occupancy, I go clear out to the middle of the stream, and you can not put in that public wharf right in front of my property without paying me." The Supreme Court of the United States decided that any occupancy of the river bed below high-water mark was for public use and that the owner was not entitled to an iota of compensation.

The Senator from Minnesota [Mr. NELSON] said that this whole case was settled by a decision of the Supreme Court in relation to land under water in New Jersey. In my prior argument I referred to a case where the Government of the United States authorized a private corporation to build a bridge across from the mainland in New Jersey to Staten Island. In the building of that bridge it was necessary to place piers in the bed of that stream, which, as the Senator has argued, belonged to the King, and later to the State of New Jersey. The State of New Jersey came in and said, "We are entitled to compensation; that is our land." This was a private corporation, not the Government of the United States; but in the circuit court Justice Bradley, of the Supreme Court—and his opinion has been quoted with approval by the Supreme Court—said: "You do not own that land except for the public. This locating of a pier there, though by a railroad company, is by a corporation which is seeking to promote interstate commerce, and it has a right, in carrying out that public purpose, to locate that pier in the bed of that stream without asking your leave under the consent that it has from the Government of the United States."

The rights of the abutting owner are very well defined in all the textbooks. He has not any property in the water except the right to utilize its flow. I do not want to go into that branch of the subject again, Mr. President, as I entered into it quite fully in my previous argument.

Mr. President, we must not look at this question from any strict or technical interpretation of the Constitution. That is out of place in this present-day civilization, when the loudest demand of the time is for the greatest degree of efficiency and the greatest regard for the public welfare, when technical private rights must yield to the public good.

But there is no right which is confiscated under this bill. The abutting owner is the licensee. If he does not own all the flowage right, he must acquire it by purchase. The bed of the stream—how about that? There is a certain qualified ownership in the State of Connecticut, but that is in trust for public use. The paramount and supreme right is that of navigation, and of that the Government has absolute control. The Government can either act itself or it can authorize some one else to act. In either case, whether it is done directly by the Government or done through a private corporation, conditions may be imposed, always provided they do not violate fundamental principles of law. It is expected also that the legislature will impose conditions for the public good.

We have been incurring great expense in the improvement of the Connecticut River. Is it not proper and fair that a part of that expense should be met from this exceedingly valuable privilege, for of all the propositions of this nature which have been before us, Mr. President, this is the one locality where the utilization of water power can be had under the most favorable circumstances? It is in a locality where there are almost countless industrial establishments in the near neighborhood. A market will not have to be sought; it will be ample from the very first day.

I can not understand how the Senator from Minnesota could make such an appeal for this company which seeks this privilege. I must say, Mr. President, that it is indeed rare that anyone in the Senate so complains of the injustice that would be done to a private corporation. The Senator from Minnesota, I am very sure, is the last man who would be expected to make that kind of an argument.

Mr. BORAH. Mr. President——

Mr. BURTON. I will yield to the Senator in a moment. The Senator from Minnesota seems to think that we are treading on the toes of this corporation; that we ought to let them have this privilege free, imposing no charge upon them; that we ought to make no provision for navigation; that we must disregard the interests of the Government, and on some theory of State rights or private rights let the corporation thrive and flourish.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Idaho?

Mr. BURTON. I yield to the Senator.

Mr. BORAH. I want to ask the Senator's attention to this proposition, for I do not think he was in the Senate Chamber yesterday when I discussed it. The contract which has been drawn up in contemplation of this bill going through provides as follows:

Mr. BURTON. From what page is the Senator reading?

Mr. BORAH. Page 5 of the contract. It provides:

(c) The actual and bona fide cost of all labor, material, supplies, and other expenses of maintenance and operation, excluding depreciation. Such cost of operation shall be taken to the initial points of distribution, to be fixed subject to the approval of the Chief of Engineers.

Of the net profits of the company as thus ascertained the company shall be entitled to all of the said profits up to an amount equivalent to 8 per cent of the actual amount of capital invested as provided in section 1 of this memorandum. The said net profits beyond 8 per cent, and not exceeding 9 per cent, shall be divided between the United States and the company equally. The net profits beyond 9 per cent shall be divided between the company and the United States at ratios and in manner to be provided in the above-mentioned permit and agreement, but in no event is the share of the United States to be less than 50 per cent of such excess profits.

Mr. President, unless we consider the Government of the United States and the people as one, and also that the highest duty of the people is to pay taxes, suppose that the consumers of power in the vicinity of this power site should come to the conclusion that the company and the United States together were receiving entirely too much profit—because they agree to share the profits—then to whom would the people appeal in order that they might have that profit reduced to a reasonable figure and in order that they might not be imposed upon by extraordinary charges?

Mr. BURTON. In the first place, there is a provision for readjustment at the end of each 10-year period. If there were an undue profit, the public-utility commission of Connecticut would be the body to fix the rates. Under the proposition of the Senator from Idaho, the Interstate Commerce Commission, or some similar agency, would have the right to fix the rates to be charged for power. It is only after the public-service commission of Connecticut, or whatever the body is, fixes the price and after the company still earns its 8 per cent that there is to be any division at all.

Mr. BORAH. Precisely; but when the company shall have earned 8 per cent, then the rate-fixing power and the company could go into business together, neither one of them interested in reducing the rates or keeping them down, but both interested in raising the rates; and the third party, the people, would have no protection at all under this contract.

Mr. BURTON. The public-service commission of Connecticut fixes the rate the consumers pay, and what else do they need protection for?

Mr. BORAH. Who fixes the rate they pay?

Mr. BURTON. The public-service commission of the State of Connecticut.

Mr. BORAH. That is true.

Mr. BURTON. But if the power is sold outside of the State, if the policy which I think must ultimately prevail is adopted, then, in that case, the Interstate Commerce Commission would fix the rates.

Mr. BORAH. Well, Mr. President, under the amendment which I have offered, if the power is transmitted in interstate commerce or across the State line, the rate is fixed by the Interstate Commerce Commission; but if it is intrastate, it is fixed by the utilities commission of Connecticut. So the amendment which I have offered does nothing more than to erect a tribunal which shall provide and control the charges. I do not think that it can be properly said that we are deliriously anxious to protect the interests of the corporation when we are trying to insert here a provision which creates a tribunal which shall keep that rate down to a reasonable figure.

Of course we proceed in our legislation upon the theory that the Government can do no wrong, as it used to be said that the King could do no wrong; but it is not safe to place in the hands of an officer of the Government the power to fix a rate when he is particularly interested in having that rate raised all the time in order to get more proceeds.

Mr. BURTON. I do not agree that he is interested in having it raised. This provision would apply only in case the profit did reach 8 per cent. In that case and in order either to check exorbitant profits or give the public some share in them jurisdiction is then given to the Secretary of War.

Mr. BORAH. Well, Mr. President, when you take into consideration the fact that these departments are always as desirous of securing as much money for the several departments as possible, it is not, it seems to me, a wise proposition to have the department fixing the rate from which it is to derive its revenue.

Mr. BURTON. I do not quite understand what the Senator from Idaho means by that statement.

Mr. BORAH. Well, in the first place, this corporation could fix any rate that it saw fit so far as this bill is concerned.

Mr. BURTON. No; it could not.

Mr. BORAH. Why not?

Mr. BURTON. It could so far as any provision in this bill is concerned; but we all know perfectly well that there is a public-utilities commission which has ample right to fix the rate. I stated early in the discussion that in other bills I have proposed an amendment by which the Secretary of War might control the charges, and I should have been very glad were

such a provision in this bill; but I regarded that provision as merely academic, because, according to representations made to me by those most familiar with the subject, there was ample machinery for that purpose in the State of Connecticut; and I thought that for the present, at least, we should leave that matter as far as possible to the State itself.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Connecticut?

Mr. BURTON. I do.

Mr. BRANDEGEE. Mr. President, I desire to make a suggestion to the Senator from Ohio and to the Senator from Idaho. It seems to me that, if the net profits of this company should ever go above 8 per cent, almost any public-utilities commission would say that the charges from which that excess over 8 per cent resulted were unreasonably high charges, and they would be reduced. I do not think there is the slightest danger in that regard.

Mr. JONES. If the company will not be able to earn above 8 per cent, why the necessity of putting such a provision in the bill?

Mr. BRANDEGEE. It has not been put in the bill. It is in the proposed agreement submitted by the Secretary of War as to what might be done if this bill is passed.

Mr. JONES. Why put the provision in as to charges if, under the agreement and under the circumstances, the profit is not going to come up to the limit at which the Government will be able to divide?

Mr. BRANDEGEE. I do not know how much there will be.

Mr. BURTON. I have endeavored to set forth a reason for that.

Mr. NELSON. Mr. President, will the Senator yield to me?

Mr. BURTON. If the Senator will allow me to proceed for just a moment I will then yield to him. Under conditions existing by which part of the power is supplied by coal generation and part by water power there will be trouble. In the same localities, if there were a great difference in cost between the two, the public-utilities commission surely would not make fish of one and fowl of the other. Although they are of different origin, yet they are furnishing the same facilities.

Mr. JONES. I asked my question based upon the same line as that of the Senator from Connecticut. I heard the argument of the Senator along that line a few moments ago.

Mr. WORKS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from California?

Mr. BURTON. The Senator from Minnesota [Mr. NELSON], I believe, first rose, and I yield to him.

Mr. NELSON. For a very mild question. I am a little curious to know under what legislative authority the Secretary of War is acting in negotiating with these people and entering into a preliminary agreement before Congress has acted on the subject.

Mr. BURTON. Of course, Mr. President, that is easy to see. It is as the Secretary of War states in the document transmitted. There is nothing final to this; it is merely preliminary.

Mr. NELSON. He is willing to give Congress a little show in the matter.

Mr. BURTON. He gives Congress all the show. Indeed, I think Congress is exercising its will on this bill without limit and at most considerable length.

Mr. SMITH of Arizona. Mr. President, let me ask one question.

Mr. BURTON. The Senator from California [Mr. WORKS] first arose to ask a question, and I will yield to him.

Mr. WORKS. Mr. President, the contract referred to by the Senator from Idaho [Mr. BORAH] provides that out of the gross earnings of the corporation it shall be allowed for its maintenance and operating expenses. I should like to ask the Senator from Ohio whether the amount the Government would be allowed to charge under this bill, if it becomes a law, would be included as a part of the cost of maintenance and operation?

Mr. BURTON. I do not think it would; that is, the charges for maintenance and operation must first be computed and together with that a reasonable profit. The bill provides at the end of section 1:

> And no charge shall be imposed which shall be such as to deprive the said corporation of a reasonable return on the fair value of such dam and appurtenant works and property, allowing for the cost of construction, maintenance, and renewal and for depreciation charges.

It seems to me the bill answers that question.

Mr. WORKS. Then, I suppose, under the view of the Senator from Ohio, if this particular charge would consume all the profits, the company would be entitled to no credit on account of that charge being made?

Mr. BURTON. That charge would only be made in the event that after payment of cost of operation, allowing for the cost of construction, which would probably mean the interest on the construction, maintenance, and renewal, there is still a balance left.

Mr. WORKS. I am afraid the Senator from Ohio has not given very careful attention to the decisions with respect to the charges that a corporation has a right to have taken into account before it can commence to count profits. I think all the authorities hold that the corporation would first be allowed a sufficient rate to repay this amount, together with other fixed charges, and the reasonable profits in addition.

Mr. BURTON. The Senator from California evidently misapprehends the fundamental fact in this case, namely, that this is a special charge to be made under certain circumstances, which are very carefully detailed here.

Mr. WORKS. Mr. President, it is a charge which will eventually be a charge against the consumers of this company. There is no escaping from that fact.

Mr. BURTON. Mr. President, I think I have answered that sufficiently. That is a mere repetition of a general fact, which it is very easy to state as a general principle, but which does not in any way apply in this case.

Mr. CUMMINS. Mr. President——

Mr. BURTON. The Senator from Arizona [Mr. SMITH] asked me to yield to him awhile ago, and I will yield to him first.

Mr. SMITH of Arizona. What I wanted to ask is this: If the United States has the power to do anything with this contract, if it can fix a rate, impose a charge, or lay certain duties on the company, what right has the State to come in and pass any rule, law, or regulation through any tribunal it has to affect in any way the power that the Government is exercising in this matter? In other words, my contention is—and I want information from the Senator—that if the Government has any power at all here, it has exclusive power. If it can fix that, it can fix a rate. If it can fix a rate, the State can not change it. Therefore I say it has no power at all. Therefore it is an invasion of the rights of the State to fix the rate.

Mr. BURTON. I think possibly the Senator from Arizona has misapprehended one point in this matter, namely, that the Government does not fix the rate. The charge that would be paid to the Government would arise only after the payment of the revenue to the company and the deduction of the charges which are specified.

Mr. SMITH of Arizona. Further, if they can do this, could not the Secretary of War, at some subsequent time, spread this a little further? Could he not, under this power, make a contract as to what the consumer should pay?

Mr. BURTON. He could fix other charges at the end of 10 years.

Mr. SMITH of Arizona. Then the Federal Government would invade the State, in spite of all the efforts of the State, and fix the rate which consumers would pay for the power?

Mr. BURTON. Not at all. The whole machinery regarding charges is still under the control of the State. If power were furnished in another State, then the Senator from Idaho [Mr. BORAH] suggests that the charges should be placed under the Interstate Commerce Commission.

Mr. SMITH of Arizona. I am speaking of power furnished in the State of Connecticut. If they have the power to fix any charge at all——

Mr. BURTON. They have.

Mr. SMITH of Arizona. Then how can the State affect the Federal charge?

Mr. BURTON. The Federal charge is a claim upon the fund that is left, after the deduction of the expenses named here from the income derived from rates fixed by the State of Connecticut.

Mr. SMITH of Arizona. But that does not touch the principle of the right to charge. If they can do what they propose to do in this bill 10 years from now, does the Senator deny that they could fix the rate at which the consumer should take this power or at which the company should furnish it?

Mr. BURTON. Not at all. No right is given to fix the rate to the consumer.

Mr. SMITH of Arizona. The Federal Government has no such right?

Mr. BURTON. It has no right to fix the rate to the consumer under the provisions of this bill.

Mr. SMITH of Arizona. Then what right has it?

Mr. BURTON. As I said a few minutes ago, I favor—and I favored in the case of the Coosa River bill—lodging in the Federal Government the right to review the rates charged; but it was not thought necessary in this case, because the State of

Connecticut has a commission which, as I understand, is entirely competent to do that work.

Mr. SMITH of Arizona. If the Senator will pardon one more interruption——

Mr. BURTON. Certainly.

Mr. SMITH of Arizona. I was asking for a suggestion from the Senator, in whose judgment I have very great confidence. My contention is that the Government had nothing whatever to do with this matter. The Senator's contention is that the Government has the power; and I am trying to measure what power the Government has. If it has the power to lay an embargo, to lay a toll or a duty or an imposition, that duty, toll, or imposition ultimately comes out of the consumers of this power, confessedly made through State property and within State lines. If the Government can do that, it can go to the other limit of absolutely ruining all State power.

Mr. BURTON. Not a particle of State property is involved. It is not the laying of any embargo on the company or on the consumer or on anyone else. The object of this provision is to prevent this corporation from reaping an inordinate profit from that enterprise. If the rate of 8 per cent is reached, then, in that case, a certain proportion is to be paid over to the Government to be applied to purposes of navigation.

I am frank to say that to me the rate of 8 per cent seems rather high; but it is well known that in many of these enterprises the return has far exceeded that amount. It is a somewhat uncertain business.

The cost of constructing a lock and dam, though it can be computed with a fair degree of accuracy, has some elements of uncertainty. The cost of installation furnishes a still greater element of uncertainty. The amount of power developed is even more uncertain still. The market in this locality would be a comparatively fixed factor, and it could be estimated with some degree of assurance. But the Senator from Arizona well knows that in proportion as the results of investments are uncertain, investors expect a larger return.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Iowa?

Mr. BURTON. Certainly.

Mr. CUMMINS. Mr. President, is it the view of the Senator from Ohio that we ought to consider the proposed contract between the Secretary of War and this company in determining whether or not the bill before us should pass?

Mr. BURTON. I believe the Senator from Iowa can tell as well as I with reference to that. I do not at all understand that this agreement is a finality.

Mr. CUMMINS. I think the Senator from Ohio will agree with me that in determining the merit of this bill, we ought not to take it for granted that any contract is made, or is about to be made, between the Secretary of War and the company. We ought to look at the terms of the bill alone in order to determine whether or not it should pass.

Mr. BURTON. I should say so.

Mr. CUMMINS. The question I intend to ask the Senator from Ohio is this——

Mr. BURTON. That is to say, that is all we have before us. We have here an intimation of a probable contract that may be made; that is all.

Mr. CUMMINS. I do not want the Senator from Ohio to think that I disagree with him about certain phases of this bill, but I do disagree with him about certain provisions of it. I have no doubt that the Government of the United States in this instance, under the conditions of the Connecticut River, can grant permission to build a dam across it which is really a part of the system of improvement already determined upon, and that the company which builds the dam can dispose of the power generated by it. So far the Senator from Ohio and myself are in agreement; but we only reach that conclusion upon the theory that the Connecticut River Co. is doing what the Government of the United States might otherwise well do. If the Government built the dam and generated the power, of course it would fix the price at which the power would be sold.

Mr. BURTON. If I may interrupt the Senator from Iowa, I will state that the question was raised here a few days ago whether, in case the Government generated the power, the rates would be subject to the ruling of any State commission. I should like the opinion of the Senator from Iowa upon that point.

Mr. CUMMINS. In my opinion, very clearly not. If the Government builds the dam and has the right to sell the power—and concerning that I will leave the discussion to others here, but I will assume that it has—undoubtedly it has the right to determine at what price it will sell the power. It may be well assumed that it will sell it at a price that will do no injustice to the people to whom it is supplied.

If the Government gives to the Connecticut River Co. the permission to build the dam and sell the power, it seems to me that, unquestionably, the Government ought to reserve the right to fix the rate at which the power shall be sold—not only the rate on power that is transmitted from one State to another, but the rate on power that is used in the State of Connecticut alone.

So far as I am concerned, I never can bring myself to favor a measure that does not reserve that right on the part of the Government. I am now assuming that this is a proper instance for the grant of the permission. I assume that as my initial premise.

My objection to the bill is because the Government does not reserve the right to declare what a reasonable rate shall be; and furthermore—I shall not deal with that now, however, because there is a false and fictitious standard of value sought to be established in the bill for application in the event that the permission is ever withdrawn from the Connecticut River Co.

The Government ought not to bind itself to take this improvement under a valuation the test of which is proposed in this bill. That, however, is not up now, and I shall not divert the attention of the Senator from Ohio to that point. But I am sure that the point that was under discussion when I came in—namely, the propriety of the Government reserving the right to fix the rates in every instance in which it has the right to grant permission—ought not to be questioned.

Mr. BRANDEGEE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Connecticut?

Mr. BURTON. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, the Senator who objected to my request, made this morning, for unanimous consent to vote upon this bill and all amendments to it in accordance with the terms of the unanimous-consent agreement which stands upon the calendar, informs me that he has no objection, and therefore I renew the request. The request was that under the terms of the unanimous-consent agreement as it stands on the calendar we shall commence voting upon this bill and all amendments, to final disposition of the same, not later than 4 o'clock on Monday next, without further debate.

The PRESIDING OFFICER. The Senate has heard the request for unanimous consent made by the Senator from Connecticut. Is there objection?

Mr. SMITH of Arizona. I did not hear the request.

Mr. BRANDEGEE. The request is for unanimous consent that we shall vote not later than 4 o'clock next Monday afternoon on the pending bill.

Mr. SMITH of Arizona. What time does that give? Is there any special order for that day, or any appropriation bill that will consume all the time?

Mr. BRANDEGEE. We could convene at an earlier hour on that day, if the Senator desired.

Mr. NELSON. Mr. President, I do not like to object, but I wish to suggest to the Senator that I have given notice that I intend to call up the river and harbor bill on Monday, after the conclusion of the regular routine morning business.

Mr. SMOOT. And the District of Columbia appropriation bill is to be called up on Monday.

Mr. BANKHEAD. It seems to me, if the Senator from Minnesota will permit me, that if any appropriation bill should be under consideration on Monday when the hour of 4 o'clock arrives, we might suspend the consideration of that bill long enough to vote upon this bill.

The PRESIDING OFFICER. Is there objection to the request for unanimous consent?

Mr. GALLINGER. Mr. President, as I objected this morning, I very gladly withdraw the objection, because I very much want to have this matter disposed of. I will venture to suggest to Senators who have charge of appropriation bills that this bill is blocking all the work of the Senate. I suggest that they might well agree to withhold the consideration of appropriation bills until this bill is disposed of. I am sure I would do that if I had charge of an appropriation bill.

Mr. CURTIS. Mr. President, if the Senator will yield, I wish to state that if I have charge of the District appropriation bill, and it is up at the hour of 4 o'clock on Monday when this matter is to be voted upon, I shall gladly ask that the bill be laid aside until a vote can be had.

Mr. SMITH of Arizona. Mr. President, I do not want to stand in the way of the Senator from Connecticut getting a vote upon this bill. I have not been in condition to say what I wish to say to the Senate about it, and I do not know whether I shall be on Monday or not, but I had desired to speak for a while, at least, on certain provisions of the bill. I should like, if it could be conveniently done, if I find myself at that time able to take the floor, to have an opportunity to say something

about it, but I do not want that feeling of mine to stand in the way of a vote on the bill. I shall not object.

The PRESIDING OFFICER. The Secretary will read the unanimous-consent agreement requested by the Senator.

The SECRETARY. The Senator from Connecticut asks unanimous consent that, in accordance with the terms of the unanimous-consent agreement now in existence, the Senate will proceed to vote without further debate on any amendment that may be pending, any amendments that may be offered, and upon the bill, S. 8033, through its parliamentary stages, to its final disposition, on Monday next, the calendar day of February 17, 1913, not later than 4 o'clock.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. BURTON. I am glad to know that the Senator from Iowa favors inserting in each of these bills a reservation of the right of the Federal Government to control charges. I do not know that I should go quite as far as that. I think the power should be one of revision—at least at present—rather than of immediate control; and if local agencies prove inadequate, then the Federal Government should act. But I think we are failing in our duty unless we assert larger and larger powers in the control of this enormous asset of the country, our water power. Such a condition was proposed when other bills were pending, but was omitted in this case, because it was thought the State of Connecticut had ample power to take care of this phase of the problem.

There is one thing to which I wish to call particular attention. We ought to interpret the Constitution in the same way whether the question concerns the right of the States or the right of the Federal Government. Every Senator here has taken an oath, and it is his duty to support the Constitution, and to observe its provisions. That includes the most careful regard for the interests of the United States. If we look upon that Constitution as written on tablets of stone, it seems as if a thick veil were drawn before it whenever any measure proposed is in favor of a State. There is a growing tendency to disregard the Constitution and its provisions in such cases. But if the question is one where they seek to make the interest of the State subservient to that of the Federal Government, then we throw a strong light on it and give to it as technical an interpretation as possible.

Almost two years ago to-day we passed here the Appalachian Forest Reserve bill. That was a measure the object of which was to purchase forests, to establish parks, to protect land in the States from erosion. It was started as a measure of purely local interest, until all at once some one discovered that we had no constitutional right to do that just as a mere local proposition; we must have some reason of national concern for it. Then the argument was made, "Why, it promotes navigation." So it was proposed that we should buy forests 300 miles away from any navigable river, with the idea that they promoted navigation by increasing the flow in rivers where their chief difficulty was not that they had insufficient water but that every year they were suffering from floods. Then, when you finally reached the rivers themselves, they had no navigation worth mentioning at any time of the year.

Did anybody raise the point of the Constitution and State rights then? No. Money was being expended from the Federal Treasury for the benefit of localities.

I want to quote what one Senator said with reference to that bill. How excellently he expresses the limits of constitutional power!

> We are theorizing largely here—

I think, Mr. President, that could be repeated in regard to this debate—

> We are theorizing largely here. I had a practical experience in 1908. In the watershed of the mountains bordering in North Carolina onto the foothills in South Carolina there was an unusual rainfall. In that territory, on the hillsides, which produce nothing in proportion to what the lower and more level lands produce, there was an unusual rainfall in 1908. All the streams of South Carolina—the Pedee River, Lynches River, the Wateree, the Congaree, and the Santee—destroyed millions upon millions of dollars' worth of property permanently by the erosion of these hills, which could not have happened had there been forests on them, because tons upon tons of silt, sand, and rock were carried down and deposited upon the level alluvial land, and made sand bars and mud banks in the navigable streams, costing the State more than those counties were practically worth. It seems to me it would be a wise provision on the part of the Government to make such an appropriation as will forestall any future flood.

That is, whether the stream is navigable or not, if the improvement will forestall a flood and save the quality of the land, we are asked to make an appropriation for it. But when, in the course of the improvement of rivers, enormous expense is incurred—and I want to say to my fellow Senators that the extravagance in all our river and harbor appropriations has been most striking in canalizing these streams which need locks and dams; that is the place where there is waste—when the Government, by taxing the whole people, appropriates for building a lock and dam, or when there exists a point where a water power of value can be developed, then, Mr. President, there is a place where it would be well for us to safeguard the National Treasury.

Mr. President, what else do we do? Why, we build levees on rivers. They have a remote bearing on navigation. But to save private property, to make lands worth $100 an acre that are now worth $3 an acre, or are entirely worthless—we are doing this under the very Constitution to which such a touching appeal has been made here during the last week.

Oh, what a dread there is lest we violate the Constitution when we retain that which is incidental to the great work of developing commerce; but how little we hear the voice of fear when money goes out into the States and into the districts. There the Constitution is hidden from our faces.

Mr. McLEAN. All three political parties are committed in their party platforms to the proposition that the Government should appropriate funds to reconstruct and maintain levees.

Mr. BURTON. I think so. I do not know whether or not they considered the Constitution when they did that. What is the Constitution in the midst of a political campaign, when there are multitudes whose votes are sought? But that Constitution grows very strong here when we seek to make use of water power incident to navigable streams. Then the rights of the State are asserted, though that rule seems never to be invoked when appropriations are sought.

Why, barely two weeks ago, without a roll call, we passed here what is called a vocational bill, under which it is proposed to enter a State and spend a certain amount of money for education—a most commendable purpose, but one which, under the old ideas of Jeffersonian democracy, should be left to the States and to the local communities. It was thought by Jefferson and his followers that the Central Government should have only such powers as were necessary to maintain the supremacy of the Nation; that it was far better for each city and each State to be left to itself, just as in individuals we teach self-reliance and develop strength by imposing personal responsibility and compelling each man to work his own way in the struggle of life. Nobody said anything about the Constitution when the vocational bill was up here.

Mr. SMOOT. How about the general-welfare clause?

Mr. BURTON. Oh, under the "general-welfare" clause people sometimes think we could do anything. We could wipe out the lines between the States. If Congress chose to do so, we could take over to ourselves the control of cities. We could go into cities and build hospitals—which are very necessary—for the prevention of tuberculosis. Physical life and health are just as necessary as is education. In short, they say we could do anything under the "general-welfare" clause.

Mr. BANKHEAD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Alabama?

Mr. BURTON. I really should like to proceed briefly, since I have had so many interruptions, if the Senator will kindly excuse me. Perhaps the Senator from Alabama desires to offer some other illustration of going beyond Federal powers without any protest here. I could state so many that I do not think it is worth while.

Mr. President, I am surprised at the opposition to this bill. I thought it would be a mere matter of the merits of this bill. But it is said there is a precedent in it. This case stands by itself, though I repeat what I said at the beginning: So far as I am concerned, it is a precedent, and while we may never have exactly the same conditions again, I am in favor in the future of placing the strictest restrictions on these grants of water power. Such a policy is necessary to prevent monopoly. I want to say to Senators that we are just in the beginning of discussions on this subject. But why hold up this bill?

It is favored in the locality which is immediately interested. If the conditions are severe, a company has been found which is willing to submit to them. I have no doubt they would like it far better without this provision for the imposition of a charge, but they regarded that as fair and were willing to accept it. The Secretary of the Interior framed like regulations pertaining to the grant of water power in the great West, where even more severe restrictions have been imposed and accepted.

What do Senators expect? Do they think that the time is coming when the American people are going to be negligent in the matter of conserving these great resources? If they do, I think they are in error. The people are waking up to the importance of the matter. They recognize that land and forests and minerals have gone into the hands of great organizations, and that a favored few have gained an advantage in many cases to the detriment not merely of the development of the country but of the equal opportunities of our citizens. They are not going

to allow water power to be wasted or to fall into the hands of a few exploiting corporations.

Personally, I should favor somewhat stricter rules than are contained here. It is quite interesting to note that while on the other side there are so many who think State rights are offended by this bill and the National Government receives too much power, the Senator from Iowa thinks the Federal Government has not gone far enough. I come nearer to agreeing with him on that proposition than I do with those who have the opposite contention.

Mr. President, it seems to me that we should pass this bill as it was introduced by the Senator from Connecticut. I have no personal affiliation with this locality or with any of the parties. My interest is based in part on a realization 10 years ago of the importance that this problem would assume. The bill relating to the Hales Bar, passed in 1904, providing for a dam below the town of Chattanooga, in the Tennessee River, was one that I drew myself. That bill inaugurated this policy of making a condition when water power was developed in navigable streams and to compel him who enjoyed the privilege to contribute to the development of the river for navigation. In that case the dam and the locks were built by the licensee. I am sure that in the future the people of this country will insist that instead of lessening restrictions and conditions in the grant stronger restrictions safeguarding the public interests and preventing monopoly should be imposed.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had approved and signed the following acts:

On February 13, 1913:

S. 3952. An act repealing the provision of the Indian appropriation act for the fiscal year ending June 30, 1907, authorizing the sale of a tract of land reserved for a burial ground for the Wyandotte Tribe of Indians in Kansas City, Kans.

On February 14, 1913:

S. 109. An act to authorize the sale and disposition of the surplus and unallotted lands in the Standing Rock Indian Reservation in the States of South Dakota and North Dakota, and making appropriation and provision to carry the same into effect.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the following bills:

S. 186. An act for the relief of Francis Grinstead, alias Francis M. Grinstead;

S. 3873. An act for the relief of Lewis F. Walsh;

S. 4043. An act for the relief of Sylvester W. Barnes; and

S. 5262. An act for the relief of Sylvester C. Parker.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 18787) relating to the limitation of the hours of daily service of laborers and mechanics employed upon a public work of the United States and of the District of Columbia, and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia.

IMMIGRATION OF ALIENS—VETO MESSAGE (S. DOC. NO. 1087).

Mr. LODGE. I ask the Chair to lay before the Senate a message just received from the President of the United States.

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was read:

To the Senate:

I return herewith, without my approval, S. 3175.

I do this with great reluctance. The bill contains many valuable amendments to the present immigration law which will insure greater certainty in excluding undesirable immigrants.

The bill received strong support in both Houses and was recommended by an able commission after an extended investigation and carefully drawn conclusions.

But I can not make up my mind to sign a bill which in its chief provision violates a principle that ought, in my opinion, to be upheld in dealing with our immigration. I refer to the literacy test. For the reasons stated in Secretary Nagel's letter to me, I can not approve that test. The Secretary's letter accompanies this.

WM. H. TAFT.

THE WHITE HOUSE, *February 14, 1913.*

Mr. LODGE. I ask that the message be printed, together with the accompanying letter from the Secretary of Commerce and Labor, and that it lie with the bill on the table. I give notice that immediately on the expiration of the unanimous-consent agreement I shall ask the Senate to consider the message and the bill under the terms of the Constitution.

The PRESIDING OFFICER. Without objection, the message and accompanying paper and the bill will be printed and lie on the table.

CONNECTICUT RIVER DAM.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8033) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

Mr. CUMMINS. Mr. President, I shall consume but a very few minutes. The only reason I speak at all is because I intend to vote against the bill in its present form and yet heartily approve the general principle upon which it is founded.

I stated a few moments ago in an interruption that it seemed to me altogether inconsistent to grant this permission without reserving the right on the part of the Government to fix the charges that shall be made by the river company for the power that is generated in or by the dam. I do not care to enlarge upon that. If an amendment shall be adopted that does reserve that right to the Government, it will remove my objection on that score.

My second objection, and it seems to me to be a most serious one, is to that provision of the bill which provides that under a certain contingency the Government must take this improvement and must pay for it according to the standard fixed in the bill.

I do not think that we ought to agree with the Connecticut River Co. to take its improvement at any time or under any circumstances. It may be that if the promise is ever withdrawn a sense of justice would require the Government to make compensation. But sufficient unto the day is the evil thereof. It is in the highest degree unwise and impolitic for the Government of the United States to now enter into an agreement with the Connecticut River Co. that it will take and will pay under any circumstances.

I desire to call the attention of the Senate to just what we agree to do—a most extraordinary agreement. I do not believe its parallel can be found in the annals of legislation:

SEC. 5. That upon the termination for any cause whatever of the authority, rights, and privileges granted hereby, or any renewal thereof, the United States may renew the same or the grant may be made or transferred to other parties.

Now, mark: Upon the termination, no matter what the offense or delinquency of the Connecticut River Co. may have been, if this permission is terminated for any cause, and the Government does not renew it to either that company or to its assignees, then the consequences which I am about to recite follow:

Unless the grant is renewed to the original grantee or its assigns, as herein provided, the United States shall pay or require its new grantee to pay to said original grantees or its assigns, as full compensation, the reasonable value of the improvements and appurtenant works constructed under the authority of this act and of the property belonging to said corporation necessary for the development hereby authorized, exclusive of the value of the authority hereby granted.

It is not within the human mind to conceive what property that may embrace in the development of the next quarter of a century or half of a century. This permission is in its terms perpetual—it does not continue for a term of years; and it is repugnant to my sense of justice to say that if for any cause we may desire to withdraw the permission, thereupon we must take all the property that is connected in any way with this particular dam and pay for it upon any basis whatsoever.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Colorado?

Mr. CUMMINS. I yield to the Senator from Colorado.

Mr. THOMAS. In this connection I should like to call the attention of the Senator from Iowa to what is recited in the proposed agreement with the Secretary of War. The total investment is estimated at $5,500,000; so that if immediately after it is completed the terms of that part of the contract which has just been read become effective the Government would at once be obliged to pay over this enormous sum to the grantee.

Mr. CUMMINS. I have not read the proposed contract. I do not consider it in reaching the judgment that I have reached, but I consider only the terms of the bill.

Mr. BURTON. If the Senator from Iowa will yield to me, there has been discussed very largely the different kinds of franchises, and this seemed best for the public and best for the exploiter. If there are terms which will secure the interests of the Government in any possible degree, let them be

brought forward. I do not regard that condition, if for any reason the Government desires the property, as being one of more than a very general nature, and I can conceive of no conditions under which that would become effective.

Mr. CUMMINS. I do not know when or how it will become effective. I only know that it is unsound in principle. It is a most dangerous precedent. Only a few years ago the Congress of the United States granted permission to a company to build a dam across the Mississippi River. There was no agreement assumed or expected there that if in the future the permission should be withdrawn the Government should undertake to pay. This is perpetual.

Mr. ROOT. No; 50 years.

Mr. CUMMINS. I have not observed that there is any limit to the privilege granted here, taken in connection with the renewal that is provided for, but if it is limited to 50 years it is all the worse, Mr. President, because——

Mr. ROOT. I withdraw it.

Mr. CUMMINS. That magnifies and intensifies the objection I have to it because if it were to run for 200 years the property might be entirely worn out.

Mr. ROOT. May I ask a question of the Senator from Iowa?

Mr. CUMMINS. Certainly.

Mr. ROOT. How does this differ from the ordinary provision in long leases which provides for renewal? Ten thousand leases have been made within our lifetime under which it is provided if the lease is not renewed the grantor of the right shall pay for the property that is put on.

Mr. CUMMINS. Precisely. As between private parties it is a most customary and indeed a most wise provision.

Mr. ROOT. Is there any reason why this should be different?

Mr. CUMMINS. Yes, sir. I will try to state to the Senator from New York and to the Senate why this is so essentially different. There the lessor receives a stated rental. It is supposed to adequately compensate him for the use of the property and for all the other obligations into which the lessor enters. If the lessor under such circumstances agrees that upon a failure of the lease or upon a termination of the lease the improvements which the lessee has placed upon the property shall be paid for, well and good; but we are here granting a permission without any compensation whatever. We are granting a permission that is supposed to be for the general welfare, and yet under those circumstances it is proposed to fasten upon the permission the agreement of the Government that upon the termination of the grant, no matter what the cause may be, this obligation on the part of the Government to pay shall arise.

Mr. ROOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield further to the Senator from New York?

Mr. CUMMINS. I yield.

Mr. ROOT. If the permission be for the general welfare, do we not receive compensation? Are not the improvement of navigation of the river, the building of the lock, the canal, the contribution toward the improvement of the river in general, compensation for the interests that we are bound to promote?

Mr. CUMMINS. It would be, Mr. President——

Mr. ROOT. And why should we be less just toward the grantee of a right which is terminated than a private party is toward the grantee of a right that is terminated? Why do not the same principles of right conduct apply to us that apply to a private person?

Mr. CUMMINS. Simply because——

Mr. BURTON. Let me ask the Senator from Iowa another question?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Ohio?

Mr. CUMMINS. I do.

Mr. BURTON. Suppose it is known that in the 50 years there is no right of renewal and that the party must lose his property, his trust. Does not the Senator from Iowa know that the charge to the consumer during all those 50 years will be very greatly increased—doubled in some cases—so that in the end the public are much worse off than they would be without this kind of a condition?

Mr. CUMMINS. I do not, Mr. President. I assume——

Mr. BURTON. I want to ask further, has not that been the conclusion of public-service commissions—of students of the subject? I understand it is the rule in the State of Wisconsin, where this subject has been very carefully considered, that the best way to do was not to confiscate the value of the structures or buildings at the end of a certain period, but to make some allowance for them.

There is another point in connection with it. There is no encouragement for the owner of such a plant to go on and improve it. He will maintain it at the very lowest stage of efficiency if he knows that at the end of 50 years he will have no interest whatever in it. There is a situation here in which there are plainly two sides to the question. The general conclusion has been, I think, that means of compensation at the end of 50 years, or some other stated period, is best.

Mr. CUMMINS. Mr. President, I do not think the case put by the Senator from Ohio and the case under consideration are parallel. We are securing our object in the improvement of the river. We are not building this dam for the purpose of creating power. The power is a mere incident. It would be very unjust for the Government after the dam was built to withdraw the permission without just cause. I agree with that. But I assume that the Congress of the United States will be as just then as it is now. My objection is to the positive obligation that is created and that will arise upon a contingency that no one can foresee or foretell.

Mr. BURTON. If the Senator from Iowa will yield to another question, what kind of a franchise would he recommend?

Mr. CUMMINS. If I were doing it, I would grant this permission for any reasonable length of time, I care not whether a year or a hundred years, but I would not enter into any agreement that at the end of that time the Government of the United States would undertake to buy the property at the rate that is here prescribed.

Mr. BURTON. Which does the Senator, if I may ask, regard as best—a hundred-year franchise with no provision for renewal or 50 years with this kind of provision?

Mr. CUMMINS. It matters not. Of course the Government of the United States could by process of condemnation take the property at any time and therein exercise its undoubted privilege and pay for the property according to rules of law; but that is a very different thing from entering now into a contract to take the property at a certain valuation upon the termination of the grant.

Mr. BURTON. To take or renew.

Mr. CUMMINS. Yes; no matter how it might seem at the time, we would be compelled to renew it in order to avoid the payment.

Mr. BURTON. Oh, not necessarily. If there was a very valuable privilege others would come forward and say that they would take it and pay. It is only to safeguard the interest of the Government that that provision is there. Does not the Senator from Iowa realize that if you do not make some provision for compensation you must necessarily double or treble the length of the privilege that you give?

Mr. CUMMINS. I understand perfectly that, in order to invite the investment necessary for the construction of such a work as this, it would be necessary to give a time within which those who invested their capital could repay it to themselves with a profit; but that is a vastly better course, in my opinion, than to agree to take the property under the uncertain contingency named in the bill.

Mr. BRANDEGEE. Mr. President——

Mr. CUMMINS. But that is only one——

Mr. BURTON. I do not know that I understand the Senator from Iowa.

The PRESIDING OFFICER. To whom does the Senator from Iowa yield?

Mr. CUMMINS. I yield to the Senator from Connecticut [Mr. BRANDEGEE]. I observe he has been addressing the Chair for quite a few minutes.

Mr. BRANDEGEE. Mr. President, I thank the Senator very much. Sometimes it is not necessary to get permission to interrupt a fellow Senator. The bill provides that the rights conveyed shall be subject to what is known as the general dam act, which is the act of June 23, 1910. If the Senator from Iowa will read section 4 of that act, he will find that the language there employed is identical with the language of the bill, and this very bill authorizing the construction of a dam, if passed by Congress, will be subject to section 4 of the act to which I refer. It also provides that, if the Government shall not renew the grant, the Government shall take the property under condemnation proceedings. When the Senator from Iowa shall have concluded his remarks I will put section 4 into the RECORD.

Mr. CUMMINS. Does the Senator from Connecticut say that section 5 of this bill is an exact reproduction of any part of the so-called general dam act?

Mr. BRANDEGEE. If the Senator will allow me now—though if he prefers not to be interrupted I will not interrupt him—if he will read the bill, I will read the act and we can in that way compare them.

Mr. GALLINGER. Why not read the section?

Mr. BRANDEGEE. I will.

Mr. CUMMINS. I did not know that it was the same; I did know that it contained many features of this general law; but, if it does, the general law is bad.

Mr. BRANDEGEE. That may be so. I did not help to pass it. I am simply saying that this bill, instead of departing from precedents or from the general policy of the Government, is strictly in accord with them. If the general policy is bad, instead of picking out this particular bill for the victim, let us repeal the general policy—the general law.

Mr. CUMMINS. Does the act to which the Senator from Connecticut now refers provide that the Government shall take the property and pay "the reasonable value of the improvements and appurtenant works constructed under the authority of this act and of the property belonging to said corporation necessary for the development hereby authorized, exclusive of the value of the authority hereby granted"?

Mr. BRANDEGEE. Yes; it does; and more, too; but I should like to have the Secretary read the act, if the Senator will allow it.

Mr. CUMMINS. Very well. I have no objection to hearing it.

Mr. BRANDEGEE. I send to the desk a paper published by the Committee on Commerce of the Senate, and ask the Secretary to read from it section 4 of the act to which I refer.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

SEC. 4. That all rights acquired under this act shall cease and be determined if the person, company, or corporation acquiring such rights shall, at any time, fail, after receiving reasonable notice thereof, to comply with any of the provisions and requirements of the act, or with any of the stipulations and conditions that may be prescribed as aforesaid by the Chief of Engineers and the Secretary of War, including the payment into the Treasury of the United States of the charges provided for by section 1 of this act: *Provided*, That Congress may revoke any rights conferred in pursuance of this act whenever it is necessary for public use, and, in the event of any such revocation by Congress, the United States shall pay the owners of any dam and appurtenant works built under authority of this act, as full compensation, the reasonable value thereof, exclusive of the value of the authority or franchise granted, such reasonable value to be determined by mutual agreement between the Secretary of War and the said owners, and in case they can not agree, then by proceedings instituted in the United States circuit court for the condemnation of such properties: *And provided also*, That the authority granted under or in pursuance of the provisions of this act shall terminate at the end of a period not to exceed 50 years from the date of the original approval of the project under this act, unless sooner revoked as herein provided or Congress shall otherwise direct: *Provided, however*, That this limitation shall not apply to any corporation or individual heretofore authorized by the United States, or by any State, to construct a dam in or across a navigable waterway, upon which dam expenditures of money have heretofore been made in reliance upon such grant or grants.

Mr. CUMMINS. Mr. President, in my opinion that bears no more resemblance to the provisions of this bill than though it were connected with a different subject. There the power of the Government is to be exercised whenever it desires to take the property for a public use; and, when it so desires, it takes it under laws and rules relating to eminent domain. That is not this case. This bill provides:

SEC. 5. That upon the termination for any cause whatever of the authority, rights, and privileges granted hereby, or any renewal thereof—

That these consequences shall follow.

Mr. NELSON. Will the Senator allow me to suggest, if the company should become bankrupt and could not proceed, would not that be operative?

Mr. CUMMINS. Certainly; or if it should decline to render any service.

Mr. NELSON. Yes.

Mr. CUMMINS. All those things might authorize the Government to revoke the permit; but I want to proceed a step further. The Senate will have observed in the reading of the section to which the Senator from Connecticut [Mr. BRANDEGEE] refers that there is no description of property to be taken and paid for such as is contained in this bill. That section does not say, as does this bill:

The reasonable value of the improvements and appurtenant works constructed under the authority of this act and of the property belonging to said corporation necessary for the development hereby authorized, exclusive of the value of the authority hereby granted. Said improvements and appurtenant works and property shall include the lands and riparian rights acquired for the purposes of such development, the dam and other structures, and also the equipment useful and convenient for the generation of hydroelectric power or hydromechanical power, and the transmission system from generation plant to initial points of distribution, but shall not include any other property whatsoever.

Here is a broad, general description of the property that must be taken by the Government. It may have some relation to the dam that is authorized here, but its relation may be so vague, it may be so remote, that it would be worse than folly for the Government of the United States to undertake to become its owner by condemnation. But that is not all.

Mr. BRANDEGEE rose.

Mr. CUMMINS. Mark, now, what follows:

Such reasonable value shall be determined by mutual agreement between the Secretary of War and the owners, and in case they can not agree, then by proceedings instituted in the United States district court for the condemnation of such properties.

There the general act closes, and the law relating to the value of property covers the procedure for the condemnation of the property. But mark what we have here:

The basis for determining the value shall be the cost of replacing the structures necessary for the development and transmission of hydroelectric power by other structures capable of developing and transmitting the same amount of marketable power with equal efficiency, allowance being made for deterioration, if any, of the existing structures in estimating such efficiency.

Mr. President, no court in Christendom has ever declared that that was the rule of condemnation. No court has ever declared that that is the rule for ascertaining the value of property when the Government undertakes to exercise its sovereign power in the way of fixing rates for the use of that property.

Mr. ROOT. Does the Senator say it is an unjust rule?

Mr. CUMMINS. I do.

Mr. ROOT. Why?

Mr. CUMMINS. I say it is a very unjust rule.

Mr. ROOT. Why?

Mr. CUMMINS. I am rather fresh from that question. We have for three days before the Interstate Commerce Committee been discussing that very proposition. We are about to undertake, I hope, to value the property of all the railroads in the United States, of all the common carriers in the United States, in order to furnish evidence to those to whom the information is material when the Interstate Commerce Commission comes to act or the courts come to act in cases in which the value of the property is material. It is true that the cost of reproduction, under some circumstances, may be one factor to be considered in ascertaining the value of property. It is not, however, the only factor, as has been declared by the Supreme Court of the United States and by every other court that has ever had occasion to deal with the subject. I think we would do the people of this country great injustice if we would bind them to pay, in the event the Government becomes the owner of this property, the cost of reproducing the property. All that the Government ought to pay, in any event, would be the fair value of the property for the purposes for which it was created. In ascertaining that fair value the cost of reproduction, the original cost, and the earning capacity possibly, all may be taken into account; but we are here binding the Government to a single criterion for the ascertainment of the value of property, and that, in all probability, a criterion which fixes the highest possible value that can be placed upon the property.

Mr. ROOT. Mr. President, it seems to me that these provisions limit the Government's liability; that they are all in the direction of the limitation of the Government's liability. We know perfectly well that the general course and tendency of electrical science is to increase the efficiency of machinery, to make it possible to produce a greater amount of electrical current from a given amount of water power; but this provision relieves the Government from the necessity of paying the cost of replacing the structures that may be there and limits its obligation, in case it sees fit to take the property, to the cost of replacing the structures necessary to develop the same amount of power.

Mr. CUMMINS. Precisely.

Mr. ROOT. Which, in the ordinary course of the development of the science, would be far smaller and far less expensive structures than were necessary years before. You can go to Niagara Falls to-day and produce the same amount of power that was manufactured by the original company that put up the first works there for the transformation of water power into electricity—you can put up structures that will reproduce the same amount of power for less than half what it cost the original company. The effect of that reduction is secured to the United States by this provision. Further, the United States is to have the benefit of an allowance for all deterioration in the property. So that these provisions, instead of imposing upon the Government a larger obligation, are limitations upon its obligations.

Mr. CUMMINS. Mr. President, that may or may not be true. It may be that at a given time the cost of reproduction is the lowest value; it may be that under other circumstances the cost of reproduction is the highest value that could be attached to the property. The riparian rights, the riparian property, and such other property as may be incident to the work proposed to be carried on by the Connecticut River Co. may become in 50 years or in 100 years of vastly more value than the entire physical structure and all the appurtenances connected with it.

We can not foresee what may happen, and if we are disposed to enter into the contract at all, all that we ought to do is to leave the law to determine the value of the property and not to attempt at this time to create one test of the value of the property and impose it to the exclusion of all others.

But that is not all. Allowance is made for deterioration, and then the bill provides:

If any of the existing structures in estimating such efficiency, together with the fair value of other properties herein defined, to which not more than 10 per cent may be added to compensate for the expenditure of initial cost and experimentation charges and other proper expenditures in the cost of the plant which may not be represented in the replacement valuation herein provided.

I think it very unsafe to attempt to set up any such standard of value. We have never attempted to do it in any other subject. It would be idle for Congress to attempt to set up a standard of value by which the railway company should be measured, and so it is unwise, because it is impossible for the mind to comprehend or conceive the conditions which may exist at the time the property is to be valued.

Therefore, Mr. President, for these three reasons—first, because we should not enter into any contract binding ourselves to take the property upon the uncertain event named in the bill; second, because the description of the property to be taken and paid for is so general and so broad that it may embrace a great deal of property that ought not to be taken by the Government under the rule which is contended for by the advocates of the bill; and, third, because we attempt here to institute a test or standard for the valuation of the property that is not recognized in the law, and that may work great injustice to the American people—I could not vote for the bill, although, as I said in the beginning, I am heartily in favor of a policy which will enable the Government to employ the instrumentalities in existence, in which it can do so with profit to itself, rather than to carry on or construct the improvement directly. Notwithstanding these things, the two defects I have pointed out are so serious and they establish, in my opinion, a precedent so dangerous that I could not give my assent to the bill.

Mr. GALLINGER. Will the Senator permit me?

Mr. CUMMINS. Certainly.

Mr. GALLINGER. I have been interested in the Senator's discussion of the question. There is a great deal of agitation in the public mind just now as to Government ownership of public utilities. I would like to ask the Senator this question. Supposing the Government concluded to take over the electric-lighting plant of the District of Columbia, as an illustration, upon what basis would the Senator think the Government ought to compensate the present owners? Would not the Senator think that they ought to get at least the full value of the property?

Mr. CUMMINS. Certainly. I would employ the word "fair" instead of "full."

Mr. GALLINGER. "Fair" is a better word.

Mr. CUMMINS. It is the word that is ordinarily used.

Mr. GALLINGER. It is a better word. It seems to me from the reading of the bill, as the Senate has read it, that is all that is contemplated in the bill that is now before us.

Mr. CUMMINS. On the contrary, as I look at it, if that rule were applied to any public-utilities company, at least any with which I am familiar, the chances are that the public would pay a great deal more than the fair value of the property for it.

I will give the Senator an illustration. In the taking over, we will say, of railroad property, if the Government were to undertake to become the owner of the railroad property of the country and pay for the terminals and for the rights of way through the country and through the cities and towns at the rate which adjoining property commands for other purposes, in my opinion the railroads would receive vastly more than the fair value of their property.

Mr. GALLINGER. I should think that was probably true.

Mr. CUMMINS. And just so in the city of Washington.

Mr. GALLINGER. But would not the Government in that transaction pay only what the corporation had paid?

Mr. CUMMINS. Not at all. On this theory it would pay the cost of reproduction. What is the cost of reproduction? It is the cost of going from one end of the line to the other and buying at prevailing rates or condemning under the rules of the law property at the value which that property now bears.

Mr. GALLINGER. I would not so construe it, but I may be wrong. I am not a lawyer. It seems to me it would be a reproduction on the basis of the original development, rather than saying that they should go out and buy other property equivalent in area at greatly increased prices beyond what the corporation paid.

Mr. CUMMINS. Moreover, suppose some new device or devices were to come into use that would obviate the generation of power in the way in which it is now generated. We can not tell what may happen in that respect. This bill would require us to pay for the reproduction value of the sort of property of the efficiency suggested here, namely, the efficiency of the plant originally constructed.

Mr. GALLINGER. It seems to me the Government could well afford to make generous compensation, rather than to build a competing line and go into a disastrous competition with a domestic corporation.

Mr. CUMMINS. Undoubtedly it could; but, after all, it ought to pay in every instance, if it pays anything, the fair value. As is well recognized by the courts, there is no single test for fair value. It is a result reached by consideration of many conditions, many circumstances, and many facts.

Mr. BRANDEGEE. Mr. President, I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to, and (at 5 o'clock and 45 minutes p. m., Friday, February 14) the Senate took a recess until Saturday, February 15, 1913, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, *February 14, 1913.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in heaven, lead Thou us on by the light of Thy grace. We do not ask to see the distant scene; one step is enough for us. Each day brings its own duties and responsibilities. Help us to discharge them in accordance with the light Thou hast given us, and give us strength to bear each burden, that we may be prepared for the next step; and all praise we will give to Thee; in the spirit of the Master. Amen.

The Journal of the proceedings of yesterday was read and approved.

PENSIONS.

Mr. RUSSELL. Mr. Speaker, I call up the bill (S. 8314) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, and I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Missouri asks unanimous consent that the bill be considered in the House as in the Committee of the Whole. Is there objection?

Mr. BARTLETT. Reserving the right to object, I desire to ask the gentleman from Missouri how many of these bills he intends to call up and pass to-day?

Mr. RUSSELL. There are three—all Senate bills and all small ones. I believe it will not take more than 20 minutes to pass them, as I understand there will be no objection to them.

The SPEAKER. Is there objection.

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

ORDER OF PROCEDURE FOR TO-MORROW.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The Clerk read as follows:

House resolution 835.

Resolved, That on Saturday, February 15, 1913, at 10 minutes of 12 o'clock a. m., pursuant to the resolution heretofore adopted accepting the invitation of the Senate to attend the memorial services to commemorate the life and character and public services of the Hon. JAMES S. SHERMAN, late the Vice President of the United States, the House shall proceed, with the Speaker, to the Senate Chamber, and at the conclusion of the services it shall return to this Chamber.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The resolution was agreed to.

PENSIONS.

Mr. RICHARDSON. Mr. Speaker, I call up the bill (H. R. 28672) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, and I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Alabama calls up the bill H. R. 28672, and asks unanimous consent that it be considered in the House as in Committee of the Whole. Is there objection,

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Mary Rebecca Carroll, widow of Zachariah H. Carroll, late of Company A, Twelfth United States Regiment, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Frederick Burnett, late of Troop M, Eighth Regiment United States Cavalry, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of William A. Hickey, late of Company C, First Regiment District of Columbia Volunteer Infantry, and Company C, Forty-fifth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Sophia C. Neil, dependent mother of Charles T. Neil, late of Company F, First Regiment Tennessee Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month.

The name of Sara Jane Staddon, widow of Julian Staddon, late of Company B, Twelfth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month, with $2 per month additional on account of each of four minor children of the soldier until they respectively reach the age of 16 years.

The name of Ada Hurst, widow of Curtis Hurst, late of Company I, Sixth Regiment United States Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month, with $2 per month additional on account of each of four minor children of the soldier until they respectively reach the age of 16 years.

The name of James H. Williams, late of Battery K, Fifth Regiment United States Artillery, and pay him a pension at the rate of $10 per month.

The name of Ann E. Timmons, widow of Patrick Timmons, late a landsman, U. S. S. Germantown, United States Navy, War with Mexico, and pay her a pension at the rate of $12 per month.

The name of Georgia Kelley, widow of Albert Kelley, late of Company G, Ninth Regiment Illinois Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month, with $2 per month additional on account of each of two minor children of the soldier until they reach the age of 16 years.

The name of Sylvia Call, late nurse, Medical Department, United States Army, War with Spain, and pay her a pension at the rate of $12 per month.

The name of Susan McGrath, widow of John McGrath, late of Troop C, Seventh Regiment United States Cavalry, and pay her a pension at the rate of $12 per month.

The name of Alfred Skibbe, late of Company K, Thirtieth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Walter P. Norris, late of Company D, Fourth Regiment Kentucky Volunteer Infantry, War with Spain, and pay him a pension at the rate of $8 per month.

The name of Jesse M. Dobbs, late of Company K, Tenth Regiment United States Infantry, and pay him a pension at the rate of $12 per month.

The name of Margaret Fynaut, widow of Peter Fynaut, late of Company I, Two hundred and third Regiment New York Volunteer Infantry, War with Spain, and pay her a pension at the rate of $12 per month.

The name of M. B. Sasser, late of Company A, Second Regiment Kentucky Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Joseph J. Caldwell, late of Company H, One hundred and sixty-first Regiment Indiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The names of Devereaux Shields, Thomas C. Shields, and Margaret G. Shields, minor children of Devereaux Shields, late captain Company F, Twenty-ninth Regiment United States Volunteer Infantry, War with Spain, and pay them a pension at the rate of $20 per month, with $2 per month additional on account of each child until they respectively reach the age of 16 years.

The name of Zorel Tipton, late of Company M, Nineteenth Regiment United States Infantry, and pay him a pension at the rate of $40 per month.

The name of Courtenay A. Stovall, widow of Marcellus A. Stovall, late of Capt. Robertson's company, Georgia Mounted Volunteers, Florida War with Seminole Indians, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Theo Rasner, late of Company F, Twenty-third Regiment United States Infantry, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Charles L. Quaintance, late private of Company C, Fifth Regiment Illinois Volunteer Infantry, War with Spain, and pay him a pension at the rate of $15 per month.

The name of George W. Platter, late of Company I, Fifth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay him a pension at the rate of $6 per month.

The name of Jean L. Peabody, late of Company L, Twelfth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Robert M. Leef, late of Company G, First Regiment Illinois Volunteer Cavalry, War with Spain, and pay him a pension at the rate of $14 per month in lieu of that he is now receiving.

The name of Marshall V. Vaden, late of Company D, Signal Corps, United States Army, War with Spain, and pay him a pension at the rate of $15 per month in lieu of that he is now receiving.

The name of William Dotson, late of Company I, Eighth Regiment Illinois Volunteer Infantry, War with Spain, and pay him a pension at the rate of $30 per month.

The name of William Cunagim, late of Fifty-eighth Company, Coast Artillery, United States Army, and pay him a pension at the rate of $12 per month.

The name of Jennette Rice, widow of John O. Rice, late of Company I, Third Regiment Tennessee Volunteer Infantry, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The foregoing bill is a substitute for the following House bills referred to the Committee on Pensions:

H. R. 2829. Mary Rebecca Carroll.
H. R. 3720. Frederick Burnett.
H. R. 4798. William A. Hickey.
H. R. 5237. Sophia C. Nell.
H. R. 6707. Sara Jane Staddon.
H. R. 6990. Ada Hurst.
H. R. 8541. James H. Williams.
H. R. 11981. Ann E. Timmons.
H. R. 12654. Georgia Kelley.
H. R. 13053. Sylvia Call.
H. R. 20565. Susan McGrath.
H. R. 21182. Alfred Skibbe.
H. R. 21517. Walter P. Norris.
H. R. 23551. Jesse M. Dobbs.
H. R. 23756. Margaret Fynaut.
H. R. 24210. M. B. Sasser.
H. R. 24239. Joseph J. Caldwell.
H. R. 24542. Devereaux, Thomas C., and Margaret G. Shields, minor children.
H. R. 24748. Zorel Tipton.
H. R. 24903. Courtenay A. Stovall.
H. R. 25298. Theo Rasner.
H. R. 25448. Charles L. Quaintance.
H. R. 26070. George W. Platter.
H. R. 26301. Jean L. Peabody.
H. R. 27023. Robert M. Leef.
H. R. 27060. Marshall V. Vaden.
H. R. 27904. William Dotson.
H. R. 28317. William Cunagim.
H. R. 28551. Jennette Rice.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. RICHARDSON. Mr. Speaker, I call up the bill S. 8275, an act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors, and I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Alabama calls up the bill S. 8275, and asks unanimous consent that it be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of John W. Slaughter, late of Company L, Second Regiment Kentucky Volunteer Infantry, War with Spain, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of Warren Hilliard, late of Company B, Eighteenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $8 per month.

The name of Louisa A. Thatcher, widow of Joseph L. Thatcher, late carpenter, United States Navy, and dependent mother of William J. Thatcher, late chief turret captain, U. S. S. Georgia, United States Navy, and pay her a pension at the rate of $24 per month in lieu of that she is now receiving.

The name of George Holledercr, late of Troop I, Third Regiment United States Cavalry, and pay him a pension at the rate of $12 per month.

The name of Charles W. Camp, late of Company M, Twenty-seventh Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $20 per month in lieu of that he is now receiving.

The name of George R. Smith, late of Company B, One hundred and sixtieth Regiment Indiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $20 per month.

The name of Edward Seaton, late of Company K, Forty-fourth Regiment United States Volunteer Infantry, and pay him a pension at the rate of $15 per month in lieu of that he is now receiving.

The name of Florida Kennerly, widow of Pierre M. Kennerly, late of Capt. McKinstry's Volunteers, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Charles M. Baughman, late of Company K, Sixth Regiment Illinois Volunteer Infantry, War with Spain, and pay him a pension at the rate of $30 per month.

The name of Elizabeth S. Lewerenz, widow of Alfred C. Lewerenz, late civil engineer, United States Navy, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving, and $2 per month additional on account of the minor child of said Alfred C. Lewerenz until he reaches the age of 16 years.

The name of Minnie Wadsworth Wood, widow of Oliver E. Wood, late colonel, Artillery Corps, and brigadier general, United States Army, retired, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The name of Francis Redmond, late of Troop K, Ninth Regiment United States Cavalry, and Hospital Corps, United States Army, and pay him a pension at the rate of $12 per month.

The name of Charles E. Harris, late of Company G, Tenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Annie V. Smith, widow of Sebree Smith, late captain, Third Regiment United States Artillery, and pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The name of Barbara B. Haws, widow of William Haws, late of Capts. Robert Thomas and Coleman Boren's companies, Utah Volunteers, Utah Indian war, and pay her a pension at the rate of $12 per month.

The name of Martha A. Hughes, widow of Edward M. Hughes, late commander, United States Navy, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The name of Charles L. Stevens, late of Troop E, Fifth Regiment United States Cavalry, and pay him a pension at the rate of $16 per month.

The name of Emily W. Tilley, widow of Benjamin F. Tilley, late rear admiral, United States Navy, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of James McMahon, late of Company B, Twenty-sixth Regiment United States Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Israel Wood, late of Company K, First Regiment Oregon Riflemen, Cayuse Indian War, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of George W. Thurman, late of Capt. Abel George's Company B, Second Regiment Oregon Mounted Volunteers, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Andrew G. Aiken, late of Capt. William H. Harris's company of Minute Men, Ninth Regiment Oregon Mounted Volunteers, Oregon and Washington Territory Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of James P. Bartlett, late of Capt. William Strong's Company A, Washington Mounted Volunteers, Oregon and Washington Territory Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Mary F. Read, widow of Thomas Read, late of Company A, Fourth Regiment United States Infantry, War with Mexico, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of William Cornell, late of Company M, First Regiment United States Volunteer Engineers, War with Spain, and pay him a pension at the rate of $10 per month.

The name of Michael Hoffman, late of Company B, United States Mounted Rifles, Texas and New Mexico Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Ornan F. Hibbard, late of Capt. Hiram Wilbur's Company B, First Regiment Oregon Volunteers, Oregon and Washington Territory Indian war, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Emma Myers, widow of Fred Myers, late of Troop K, Sixth Regiment United States Cavalry, and pay her a pension at the rate of $12 per month.

The name of Frederick M. Douglass, late of Capt. Stewart's company, First Regiment Florida Mounted Volunteers, Seminole Indian War, and pay him a pension at the rate of $16 per month in lieu of that he is now receiving.

The name of Sara S. Dowdy, widow of Robert W. Dowdy, late major, Twenty-sixth Regiment United States Infantry, and pay her a pension at the rate of $25 per month.

The name of Green Hines, dependent father of Hilton P. Hines, late of Company F, Second Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Esther B. Shultz, widow of Joseph S. Shultz, late civil engineer, with rank of lieutenant, United States Navy, and pay her a pension at the rate of $35 per month in lieu of that she is now receiving, and $2 per month additional on account of the minor child of the said Joseph S. Shultz until she reaches the age of 16 years.

The foregoing bill is a substitute for the following Senate bills referred to the Committee on Pensions:

S. 199. John W. Slaughter.	S. 7088. Charles L. Stevens.
S. 443. Warren Hilliard.	S. 7097. Emily W. Tilley.
S. 824. Louisa A. Thatcher.	S. 7228. James McMahon.

The following committee amendments were read:

On page 1, line 8, strike out the figures "20" and insert the figures "12."

The amendment was agreed to.

On page 2, strike out lines 4 to 9, inclusive.

The amendment was agreed to.

On page 2, line 16, strike out the figures "20" and insert the figures "16."

The amendment was agreed to.

Page 2, lines 17 to 20, strike out the following: "the name of George R. Smith, late of Company B, One hundred and sixtieth Regiment Indiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $20 per month."

The question was taken, and the amendment was lost.

On page 3, strike out lines 5 to 7, inclusive.

The amendment was agreed to.

On page 3, strike out lines 8 to 13, inclusive.

The amendment was agreed to.

On page 3, strike out lines 14 to 18, inclusive.

The amendment was agreed to.

On page 4, strike out lines 5 to 8, inclusive.

The amendment was agreed to.

On page 4, strike out lines 13 to 15, inclusive.

The amendment was agreed to.

On page 4, strike out lines 20 to 23, inclusive.

The amendment was agreed to.

On page 4, strike out lines 24 and 25, and page 5, strike out lines 1 and 2.

The amendment was agreed to.

On page 5, strike out lines 3 to 6, inclusive.

The amendment was agreed to.

On page 5, strike out lines 7 to 11, inclusive.

The amendment was agreed to.

On page 5, strike out lines 12 to 16, inclusive.

The amendment was agreed to.

On page 6, strike out lines 1 to 4, inclusive.

The amendment was agreed to.

On page 6, strike out lines 5 to 9, inclusive.

The amendment was agreed to.

On page 6, strike out lines 13 to 16, inclusive.

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. RICHARDSON. Mr. Speaker, I call up the bill (H. R. 28746) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to widows of such soldiers and sailors, and I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Henrietta Stuart, widow of John A. Stuart, alias John Vanderpool, late of United States steamer Saratoga, United States Navy, War with Mexico, and pay her a pension at the rate of $12 per month.

The name of Eugene J. Pierrelee, late of Company F, First Regiment South Dakota Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of John Middleton, late of Troop H, Fourth Regiment United States Cavalry, and pay him a pension at the rate of $18 per month in lieu of that he is now receiving.

The name of Laura S. Converse, widow of George A. Converse, late rear admiral, United States Navy, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of Bertha A. Mulhall, widow of Stephen J. Mulhall, late first lieutenant, Fourteenth Regiment United States Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of John H. Gray, late of Company A, First Regiment Tennessee Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of William H. Brown, late of Company E, Fifth Regiment Ohio Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Franziska Nimtz, widow of Albert Nimtz, late of First Band, Artillery Corps, United States Army, and pay her a pension at the rate of $12 per month.

The name of Margaret A. Montague, widow of Daniel Montague, late chief boatswain, United States Navy, and pay her a pension at the rate of $25 per month, with $2 per month additional on account of each of three minor children of the sailor until they respectively reach the age of 16 years, in lieu of that she is now receiving.

The name of Belle McP. McCrackin, widow of Alexander McCrackin, late captain in the United States Navy, and pay her a pension at the rate of $40 per month in lieu of that she is now receiving.

The name of Charles W. Wood, late of Company L, Fourth Regiment Ohio Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The foregoing bill is a substitute for the following House bills referred to the Committee on Pensions:

H. R. 195. Henrietta Stuart.	H. R. 17771. William H. Brown.
H. R. 9044. Eugene J. Pierrelee.	H. R. 18561. Franziska Nimtz.
H. R. 9619. John Middleton.	H. R. 24852. Margaret A. Montague.
H. R. 11352. Laura S. Converse.	H. R. 27109. Belle McP. McCrackin.
H. R. 11979. Bertha A. Mulhall.	H. R. 27954. Charles W. Wood.
H. R. 17176. John H. Gray.	

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

JAMES PARSONS.

Mr. HAY. Mr. Speaker, I call up the bill (H. R. 24661) for the relief of James Parsons. This is a bill to remove the charge of desertion. I ask unanimous consent to consider the bill in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, let us first hear the bill read.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That in the administration of the pension laws governing the National Home for Disabled Volunteer Soldiers, or any branch thereof, James Parsons shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a lieutenant of Company D, Second Regiment Colorado Volunteer Cavalry: *Provided*, That no pension shall accrue prior to the passage of this act.

The SPEAKER. Is there objection to considering the bill in the House as in Committee of the Whole? [After a pause.] The Chair hears none.

The Clerk again read the bill.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

SYLVESTER G. PARKER.

Mr. HAY. Mr. Speaker, I call up the bill (S. 5262) for the relief of Sylvester G. Parker, and I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, let us have the bill reported first.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon honorably discharged volunteer officers, Sylvester G. Parker, who was a captain of Company H, Sixty-third Illinois Volunteer Infantry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as of said organization on the 4th day of September, 1863: *Provided*, That no pension, bounty, or arrears of pay shall become due or payable by reason of the passage of this act.

The SPEAKER. Is there objection to considering the bill in the House as in Committee of the Whole?

There was no objection.

The Clerk again reported the bill.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read the third time, and passed.

LEWIS F. WALSH.

Mr. HAY. Mr. Speaker, I call up the bill (S. 3873) for the relief of Lewis F. Walsh. This is a bill to remove the charge of desertion, and I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That in the administration of the pension laws Lewis F. Walsh, who was a private in Company C, Third Regiment Michigan Volunteer Cavalry, shall hereafter be held and considered to

have been honorably discharged from the military service of the United States as a member of said organization on the 25th day of November, 1864: *Provided*, That no pension shall accrue prior to the approval of this act.

Mr. LAFFERTY. Mr. Speaker, I move to strike out the last word. I desire to say a few words relating to the rules of the House touching the Private Calendar. Clause 6 of Rule XXIV provides that on Friday of each week, after routine business is disposed of, it shall be in order for any Member to move that the House resolve itself into Committee of the Whole House for the purpose of considering bills on the Private Calendar, preference being given on the second and fourth Fridays of each month to private pension claims and bills to remove charges of desertion, and on the other two Fridays of each month preference being given to claims reported from the Committee on Claims and bills from other committees of the House which are of a private nature. I have served in this House one term—three sessions—and the bills on the Private Calendar reported from the Committee on Claims, the Committee on the Public Lands, and other committees that fall within the second class referred to in the rule have never been reached upon the docket, so to speak. They never will be reached during this Congress. It will not do to say that Members could by diligence get meritorious bills passed under present rules. Not a single bill on the Private Calendar of the class referred to has been considered on regular call during any of the three sessions of the Sixty-second Congress. The only two bills that I am interested in personally were reported at the very beginning of the Sixty-second Congress and have never been reached on a regular call. When the Private Calendar has been called twice as a matter of grace, as a unanimous-consent calendar, both these bills have been objected to, and all other Members having private bills have met with the same trouble. It is not right. This calendar should be called and bills voted on upon their merits. It is not so called, and bills from the Private Calendar can not be put upon the regular biweekly Unanimous Consent Calendar, a privilege which all other bills enjoy. I think private bills should also enjoy that privilege, which would relieve matters greatly. People having claims against the United States which must be presented to the committees of Congress are absolutely remediless unless the rules of this House be changed. On the second and fourth Fridays the House usually resolves itself into the Committee of the Whole for the purpose of considering pension legislation, but on the first and third Fridays a motion is always made by the chairman of some committee that the House resolve itself into the Committee of the Whole House for the purpose of considering some appropriation bill, or some other course is taken which prevents the Private Calendar from being called. About 10 days ago an order was adopted that on Monday last the House should take a recess at 5 o'clock in the afternoon until 8 o'clock in the evening, at which time the Private Calendar should be called for the purpose of considering such bills thereon as I am now referring to as should not be objected to.

After calling something like half of the private bills upon the calendar, and every single, solitary bill, with one exception, was objected to, the House adjourned. The proceeding was farcical. Another order has been entered for a second call of this calendar as a unanimous-consent calendar to-night, excepting the bills which were objected to or called on last Monday evening. The result will be that none of these bills will be passed at this session of Congress, or even considered. I say that it devolves upon this House and upon the Committee on Rules, if it is going to do justice to the people of the United States, to amend the rules providing that this calendar shall be called during the sessions of Congress, and I would merely suggest that when it is called as a unanimous-consent calendar that the rule might be changed so that it would require the objections of at least three Members instead of one to require that a bill be passed over. These claims, nearly every one, represent bread and butter in the mouth of some individual, and you place rancor in the heart of every citizen of this country who comes here with a just claim and has it considered by the Committee on Claims, has its merits thoroughly gone over, has it favorably reported and presented to this House, and it is then shut off from any consideration during three long sessions of Congress by an objection of a single capricious individual. [Applause.] That is not the way to make patriotic citizens. That is not the way to do business. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. MANN. Mr. Speaker, under the rules Friday is set apart for the consideration of business on the Private Calendar, two days in the month being specially devoted to pension bills and bills to remove charges of desertion, the other Fridays being devoted to bills on the calendar. During this Congress, I believe, the Private Calendar has been under consideration more days than during any other Congress during my service in the House. If the gentlemen who introduce bills will persist in neglecting to call attention to the bills and not get them reported early at the first regular session of Congress, they ought not to expect that when those bills are reported at the second regular session there will be time enough to obtain consideration for them, because it is impossible to get through with the consideration of public bills at the second regular session of Congress if all the special days are devoted to special business which is permissible under the rules. The Private Calendar now is very long. Most of the bills upon the Private Calendar now have been reported at this session of Congress, and I think everyone has understood that, in the main, in the reporting of these bills, it amounts to nothing, unless they pass by unanimous consent, except an expression of opinion on the part of a committee which may report the same bills early in the next Congress. That has always been the experience and doubtless always will be. There are bills enough on the Private Calendar which, if considered under the rules of the House in regular order, would occupy all the days in a long session of Congress before they could be passed.

The SPEAKER. The gentleman from Oregon withdraws his pro forma amendment, and the Clerk will read.

The bill was again read.

The bill was ordered to be read a third time, was read the third time, and passed.

WILLIAM HOMMELSBERG.

Mr. HAY. Mr. Speaker, I call up the bill H. R. 2839.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 2839) for the relief of William Hommelsberg.

Be it enacted, etc., That in the administration of the pension laws William Hommelsberg shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of Company B, First Regiment United States Cavalry, on the 30th day of November, 1865.

Mr. HAY. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole House on the state of the Union.

The SPEAKER. The gentleman from Virginia asks unanimous consent to consider this bill in the House as in Committee of the Whole House on the state of the Union. Is there objection?

Mr. SABATH. Mr. Speaker, reserving the right to object, I would desire to have some information on this bill, or, rather, what the record of this gentleman shows.

Mr. HAY. Mr. Speaker, I will ask the Clerk to read the report.

The SPEAKER. The Clerk will read the report.

The Clerk read as follows:

Report to accompany H. R. 2839.

The Committee on Military Affairs, to whom was referred the bill (H. R. 2839) for the relief of William Hommelsberg, having considered the same, report thereon with a recommendation that it do pass.

This soldier had nearly five years of meritorious war service. He participated, according to evidence submitted, in a dozen of the greatest battles of the Civil War. After the war was over he went upon a spree and deserted to go to his home. This bill does not remove that charge, but under the circumstances of the splendid war record of this soldier the committee believes he should at this late date receive a pensionable status.

THE STORY OF THE SOLDIER.

STATE OF MICHIGAN, *County of Eaton, ss:*

In re the matter of H. R. 2839, for the relief of William Hommelsberg.

William Hommelsberg, of the city of Charlotte, Mich., being first duly sworn, deposes and says that I am the identical person who served during the war of the late rebellion in Company B, First United States Cavalry; that I enlisted on the 21st day of June, 1860, and that I served until the 12th day of July, 1864, when I received an honorable discharge; that I immediately reenlisted in the same day in same company and regiment for three years, and served until the 30th day of November, 1865, when I was granted a furlough for a few days to visit at Baton Rouge, La.; that during my furlough I fell in with some companions, went on a spree and became intoxicated, and when I sobered up found myself in Cairo, Ill., without money to return to my regiment, and being informed that the war was over did not report back for duty.

That during the War of the Rebellion I fought in the battles of Williamsburg, Va.; White Oak Swamp, Va.; Peach Orchard, Va.; Seven Pines, Va.; Fair Oaks, Va.; Gaines Mills, Va.; Malvern Hill, Va.; Bottoms Bridge, Va.; Mechanicsville, Va.; Yellow Tavern, Va.; Antietam, Md.; Gettysburg, Pa.; Wilderness, Va.; Spotsylvania, Va.; Cold Harbor, Va.; Winchester, Va.; Cedar Creek, Va.; Fishers Hill, Va.; Five Forks, Va.

And all other engagements of which my regiment bore an honorable part; that I was slightly wounded in the knee at the battle of Cedar Creek, Va.; and also received a saber stroke during one of our engagements in the Shenandoah Valley, but did not give up and go to a hospital; that during my whole service I was never disciplined, reported off duty, or violated any military rules or regulations; that I have no hospital record, and was always found in my place with my regiment ready to perform my duty as a faithful soldier; that I fought in many skirmishes and took part in the many arduous duties with my regiment besides the battles above mentioned, all of which I performed in a soldierly and patriotic manner, enduring the fatigue and hardships incident to Army life; that I am now past 70 years of age; that I live in a small board shanty just outside the corporation of Char-

lotte, Mich.; that I am not married and have no children; that my only means of support is from gardening 1 acre of land; that my only property consists of 3 acres of low, wet land (1 acre being tillable), valued at $150; that I belong to and am a member of A. S. Williams Post, No. 40, Grand Army of the Republic, of Charlotte, Mich.; that my health is bad, and am poor and needy.

WILLIAM HOMMELSBERG.

Subscribed and sworn to this 6th day of March, 1912.
[SEAL.] JONATHAN D. BUTLER, *Notary Public.*

My commission expires January 18, 1912.

STATE OF MICHIGAN, *County of Eaton, ss:*

In re the matter of H. R. 2859, for the relief of William Hommelsberg.

Asa N. Smart, of the city of Charlotte, Mich., being duly sworn, deposes and says that he is commander of the A. S. Williams Post, No. 40, Grand Army of the Republic, of the city of Charlotte, Mich.; that he has known William Hommelsberg for many years; said Hommelsberg is a member of said A. S. Williams Post; he is regarded as a good, worthy member; that he is also well regarded by his neighbors; that he is a man of good character, industry, and habits, and our citizens speak well of him; that his only property consists of 3 acres of low, wet land, of which he has a garden of about 1 acre, and he has a small board shanty thereon in which he lives alone; that he is now past 70 years of age and unable to work; that he is not married and has no children. This comrade is in need, and our post members are rendering such aid as they can.

ASA N. SMART.

Subscribed and sworn to before me this 6th day of March, 1912.
[SEAL.] JONATHAN D. BUTLER, *Notary Public.*

My commission expires January 18, 1912.

The SPEAKER. Is there objection?

Mr. SABATH. Mr. Speaker, due to the excellent record of this soldier, I withdraw my objection.

Mr. TAGGART. Mr. Speaker, reserving the right to object, I am almost constrained to inquire upon what occasion and under what propitious circumstances there must have been a quorum of that committee present. I had a case presented to that committee of a man who was shot out of the Army instead of drinking himself out of the Army. He was wounded in one of the first engagements of the war, fought in a great number of great battles——

Mr. HAY. I did not understand what the gentleman said about the quorum of the committee.

Mr. TAGGART. I beg the gentleman's pardon.

Mr. HAY. I did not understand what the gentleman said about the quorum of the committee.

Mr. TAGGART. Whenever I had, and I assume also whenever anybody else had, one of these cases to present to that committee there was not a quorum present.

Mr. HAY. Well, the gentleman is mistaken about that. The bill could not have been reported without a quorum, and if the gentleman is so unfortunate as not to have been present when there was a quorum present it is his fault and not the fault of the committee.

Mr. TAGGART. I will proceed to disclose a case when I was present when there was a quorum. It is the case of a man who was wounded and went through life with a crippled hand. It was favorably passed upon by the subcommittee and by the committee, and afterwards his case was taken up and rescinded by the committee. I have arrived at the conclusion that a man is deserving of greater credit at this time for fighting booze while in the Army than fighting the enemy. But I do not want to become captious about these things. I do not want to claim that there was any personal discourtesy shown to me, but I have endeavored to present cases to that committee and never was able to find a quorum of them present except once. I am astonished that there is one case that was successfully presented to the committee.

The SPEAKER. The time of the gentleman from Kansas [Mr. TAGGART] has expired.

Mr. TAGGART. Mr. Speaker, I withdraw my objection to this bill.

The SPEAKER. Is there objection to considering this bill in the House as in Committee of the Whole? [After a pause.] The Chair hears none. The Clerk will report the bill.

The bill was again read.

Mr. HAY. Mr. Speaker, I offer the following amendment.

The SPEAKER. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Add at the end of the bill the following: "*Provided*, That no pension, bounty, or allowances shall accrue by reason of this act."

The SPEAKER. The question is on agreeing to the amendment.

Mr. TAGGART. Mr. Speaker, I wish to inquire at what date the desertion of this soldier is alleged to have occurred? Was it the 30th day of November, 1865?

The SPEAKER. The 30th day of April, 1865, or somewhere along there.

Mr. TAGGART. If he served until the 1st day of May, 1865, he is pensionable under the statute of 1889, without any private bill.

Mr. COX. Mr. Speaker, will the gentleman from Virginia [Mr. HAY], in charge of the bill, yield to an inquiry?

Mr. HAY. I will. It is not my bill, but a bill of the gentleman from Michigan [Mr. J. M. C. SMITH].

Mr. COX. I would like to ask the gentleman if, since he has been chairman of that great committee, there has been a bill introduced here removing the charge of desertion and securing a pension?

Mr. HAY. No; the committee can not do that, for the reason that we can not change the record of the War Department.

Mr. COX. If the gentleman's amendment is carried here, will that give the soldier a pensionable status?

Mr. HAY. It will.

Mr. MANN. The gentleman's amendment will permit any pension prior, or for back pay.

Mr. COX. From the time of the adoption of the bill the soldier, then, notwithstanding the amendment to it, will be entitled to a pension?

Mr. HAY. He will be entitled to apply for a pension.

Mr. MANN. He will be entitled to apply for a pension.

Mr. COX. Why I am trying to get at it is because I have a case in my district which appeals to me very strongly.

Mr. HAY. I will say to the gentleman that this is a provision which is put on all of these bills, and it does not prevent a soldier from applying for and obtaining a pension if in other respects he is entitled to one.

Mr. COX. In other words, then, the effect of this bill, with the amendment, will be to remove the charge of desertion?

Mr. HAY. Will give him a pensionable status.

Mr. COX. If he can make his case out before the Bureau of Pensions he can go ahead and get a pension?

Mr. HAY. That is right.

Mr. SHERWOOD. How much back pension will this permit this soldier to draw?

Mr. HAY. He will draw no back pension at all.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read a third time, and passed.

FRANCIS GRINSTEAD, ALIAS FRANCIS M. GRINSTEAD.

Mr. HAY. Mr. Speaker, I desire to call up the bill (S. 186) for the relief of Francis Grinstead, alias Francis M. Grinstead, which is a desertion bill, and I ask unanimous consent to consider the bill in the House as in the Committee of the Whole.

The SPEAKER. The gentleman from Virginia asks unanimous consent to consider the bill in the House as in the Committee of the Whole. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

A bill (S. 186) for the relief of Francis Grinstead, alias Francis M. Grinstead.

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to correct the military record of Francis M. Grinstead, late of Company G, Third Regiment Kentucky Volunteer Cavalry, and grant him an honorable discharge.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, was read a third time, and passed.

SPEAKER PRO TEMPORE AT EVENING SESSION.

The SPEAKER. The Chair designates the gentleman from Missouri, Mr. LLOYD, to preside at the session to-night.

LEWIS WOOD.

Mr. HAY. Mr. Speaker, I call up the bill (H. R. 18727) for the relief of Lewis Wood. I ask unanimous consent that it may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Virginia asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 18727) for the relief of Lewis Wood.

Be it enacted, etc., That in the administration of the pension laws Lewis Wood, who was captain of Company E, Seventy-seventh Regiment New York Volunteer Infantry, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of said company and regiment on the 11th day of November, 1862.

Mr. HAY. Mr. Speaker, I offer an amendment, the same as that I offered to the other bill, providing that no pension,

bounty, or allowances shall accrue prior to the passage of this act.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend the bill by adding, at the end of line 9, "*Provided*, That no pension, bounty, or allowances shall accrue by reason of this act."

Mr. MANN. I think the gentleman does not mean that no pension shall accrue on account of this act, because that is the purpose of the act.

Mr. HAY. It should read "prior to the passage of this act."

Mr. MANN. That is not the way the Clerk read it.

The SPEAKER. The Clerk will again report the amendment.

The Clerk read as follows:

Provided, That no pension, bounty, or allowances shall accrue by reason of this act.

Mr. HAY. It should be "prior to the passage of this act."

Mr. CRUMPACKER. Mr. Speaker, if the gentleman from Virginia will allow a suggestion, the amendment that the Clerk read was the one that was agreed to in connection with the preceding bill. I suggest that the amendment to that bill ought to be corrected.

The SPEAKER. How does the gentleman want this amendment to read?

Mr. HAY. It should read "accrue prior to the passage of this act."

Mr. SABATH. If that amendment is adopted it will give him the right to apply for a pension after the act is passed?

Mr. HAY. Yes.

Mr. SABATH. Was that the custom before?

Mr. HAY. Always.

Mr. SABATH. I was under the impression that a man of that kind never could secure a pension.

Mr. HAY. That is the purpose of the bill—to give him a pensionable status.

Mr. SABATH. I thought we could not remove the bar.

Mr. FOWLER. I wanted to inquire, Mr. Speaker, if it would not be better to have an amendment to this bill, the same as to all the other bills of like character?

Mr. HAY. I think so, and I tried to draw it so. I will say to the gentleman that the custom of the committee is to report these bills with that proviso incorporated, and I do not know why this bill was reported without the proviso.

Mr. FOWLER. I suggest, then, that if it is intended that no allowances shall be granted to these soldiers prior to the passage of these acts it shall be so stated, so that there will be no mistake about it.

Mr. HAY. That is what I am trying to do.

The SPEAKER. The Clerk will report that amendment again.

The Clerk read as follows:

Provided, That no pension, bounty, or allowances shall accrue prior to the passage of this act.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

WILLIAM HOMMELSBERG.

Mr. HAY. Now, Mr. Speaker, I ask unanimous consent that the amendment that was adopted to the Hommelsberg bill be changed so as to conform with the amendment just adopted to this bill.

The SPEAKER. The gentleman from Virginia [Mr. HAY] asks unanimous consent that the language of the amendment in the Hommelsberg bill—the second bill back—shall be changed to conform to the language of the amendment in this last bill.

Mr. J. M. C. SMITH. Mr. Speaker, can we have the amendment read again in the Hommelsberg case as it was amended?

The SPEAKER. The Clerk will report the amendment in the Hommelsberg case and in this one. First report the amendment in the Hommelsberg case.

The Clerk read as follows:

Provided, That no pension, bounty, or allowances shall accrue by reason of this act.

The SPEAKER. That is the Hommelsberg amendment. Now read the Wood amendment.

The Clerk read as follows:

Provided, That no pension, bounty, or allowances shall accrue prior to the passage of this act.

Mr. J. M. C. SMITH. That is to be the amendment in the Hommelsberg case?

Mr. HAY. Yes.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will amend the Hommelsberg bill in accordance with the request.

CHARLES A. BESS.

Mr. HAY. Mr. Speaker, I call up the bill (H. R. 6793) for the relief of Charles A. Bess, and I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

Mr. MANN. Reserving the right to object, I should like to ask the gentleman if there has been a reprint of this bill?

Mr. HAY. I do not know of any.

Mr. MANN. I suppose the gentleman is aware of the fact that the bill was not correctly reported to the House.

Mr. HAY. I will say to my friend from Illinois that these bills were reported by other members of the committee, being considered by subcommittees, and I am not advised as to the facts.

Mr. MANN. I shall not object if the amendment set forth in the report is agreed to.

The SPEAKER. The Chair hears no objection, and the Clerk will report the bill.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to remove the charge of desertion from, correct the military record of, and grant an honorable discharge to Charles A. Bess, late of Company B, First Regiment California Volunteer Infantry.

Mr. HAY. Mr. Speaker, I ask unanimous consent to pass this bill over, because it is not in proper shape.

Mr. MANN. Mr. Speaker, the committee in their report have set forth an amendment to the bill putting it in proper shape; but through the carelessness of the gentleman who reported the bill, the same Member who introduced it, the bill was not properly presented to the Clerk, and it was not properly printed.

The SPEAKER. The gentleman from Virginia [Mr. HAY] asks unanimous consent to pass this bill over.

Mr. MANN. He asked that because he was not familiar with the facts in reference to it. If the Clerk will report the committee amendment, then I think the gentleman will not want to pass it over.

Mr. HAY. I ask the Clerk to report the committee amendment. I think gentlemen ought to be here to attend to their own bills.

Mr. MANN. They ought to have them properly reported.

Mr. HAY. I think so.

The Clerk read as follows:

The Committee on Military Affairs, to whom was referred the bill (H. R. 6793) for the relief of Charles A. Bess, having considered the same, report thereon with a recommendation that it be amended by striking out all after the enacting clause and inserting in lieu thereof the following:

"That in the administration of the pension laws and the laws governing the National Home for Disabled Volunteer Soldiers, or any branch thereof, Charles A. Bess shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of Company B, First Regiment California Volunteer Infantry, on the 20th day of June, 1866: *Provided*, That no pension shall accrue prior to the passage of this act."

The SPEAKER. The question is on agreeing to the amendment which has been read.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

WILLIAM H. SEWARD.

Mr. HAY. Mr. Speaker, I call up the bill (H. R. 8921) to correct the military record of William H. Seward, and I ask unanimous consent that the same be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman asks unanimous consent to consider this bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the charge of dismission be removed from the military record of William H. Seward, second lieutenant Company I, Second Regiment Michigan Infantry Volunteers, and the same is hereby removed; and the said William H. Seward is held and considered to have been honorably discharged from Company I, Second Regiment Michigan Infantry Volunteers, from the 30th day of August, 1862, the date of his dismission from the service.

With the following committee amendment:

Strike out all after the enacting clause and insert:

"That in the administration of the present laws William H. Seward, who was a second lieutenant of Company I, Second Regiment Michigan Infantry Volunteers, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of the said company and regiment on the 30th day of August, 1862."

Mr. KAHN. Mr. Speaker, the amendment says—

That in the administration of the "present" laws.

That should be—

That in the administration of the "pension" laws.

I move to strike out the word "present" and insert in lieu thereof the word "pension."

The Clerk read as follows:

Strike out the word "present" and insert the word "pension" in the amendment.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was accordingly read the third time, and passed.

ALONZO D. CADWALLADER.

Mr. HAY. Mr. Speaker, I call up the bill (H. R. 24296) for the relief of Alonzo D. Cadwallader, a desertion bill, and I ask unanimous consent that it may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman asks unanimous consent to consider the bill in the House as in Committee of the Whole. Is there objection?

There was no objection.

The bill was read, as follows:

Be it enacted, etc., That Alonzo D. Cadwallader be, and he is hereby, held and considered to have served as a private in Company K, Seventeenth Regiment Michigan Volunteer Infantry, from the 27th day of June, 1862, to the 30th day of September, 1862.

Mr. MANN. Mr. Speaker, this is an unusual form of bill, and there is absolutely no information in the report upon it. The report is very short, and I will read it.

Being in an unusual form, and there being no information in the report, it seems to me somebody ought to give us a little information before the bill passes.

Mr. HAY. I will yield to the gentleman who introduced the bill [Mr. HAMILTON of Michigan].

Mr. HAMILTON of Michigan. Mr. Speaker, I think I can state all the facts in connection with this bill, and if I am unable to do so the gentleman from Michigan [Mr. SWEET], who is a member of the subcommittee which reported the bill to the full committee, can supplement what I have to say, as can also the gentleman from Maryland [Mr. LEWIS], the chairman of the subcommittee.

This bill simply proposes to give this soldier credit for service from the 27th day of June, 1862, to the 30th day of September, 1862. He was a mere boy when he enlisted—less than 15. Almost immediately after he was mustered in he entered active service, and in September, 1862, he participated in the Battle of Antietam, one of the bloodiest battles of the Civil War, and conducted himself with bravery, as befits a soldier from Michigan.

Mr. SABATH. Will the gentleman yield?

Mr. HAMILTON of Michigan. Yes.

Mr. SABATH. I notice that this is the fourth bill this morning from Michigan, four out of eight bills. I want to know what the gentleman means by the words "befitting a soldier from Michigan"?

Mr. HAMILTON of Michigan. The gentleman from Illinois is mistaken. This is not a desertion bill.

Mr. SABATH. I understood the chairman to say that it was.

Mr. HAMILTON of Michigan. And, furthermore, there has been only one other bill from Michigan, and, as I said, this is not a desertion bill. The gentleman, who is almost always accurate about his facts, is misinformed as to the facts in this case. But, Mr. Speaker, as I was saying, the boy participated in the battle, and then he and a companion, on the 30th of September, started for Michigan without leave. [Laughter.] He was arrested, and afterwards a writ of habeas corpus took him out of the service entirely on account of his being under age.

Mr. FOSTER. That was after he got back to Michigan?

Mr. HAMILTON of Michigan. Yes.

Mr. FOSTER. Probably the writ was waiting for him when he got there.

Mr. HAMILTON of Michigan. No; it was not. Later on he was honorably discharged. Now, there are two records in the War Department, or rather the records show two dates of departure—one that he left the vicinity of Antietam about September 20 and the other that he left about September 30. When it became apparent that this bill would be reached I sent over to the committee room of the Committee on Military Affairs for the files in this case, but there was a notice on the door that the clerk would be back in an hour, and so I have not the files. I am therefore speaking from memory.

As I say, there are two records in the War Department—one that he went home on or about the 20th of September and the other that he went home on or about the 30th of September. He himself swears—and his affidavit is sustained by other testimony—that he went home on or about the 30th of September. All we are seeking to do is to give this soldier credit for the services which he actually rendered.

Mr. FOWLER. Was his companion who went home with him a soldier?

Mr. HAMILTON of Michigan. Yes.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

SYLVESTER W. BARNES.

Mr. HAY. Mr. Speaker, I now call up the bill (H. R. 18217) for the relief of Sylvester W. Barnes, and I ask unanimous consent to consider it in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Virginia calls up the bill H. R. 18217, and asks unanimous consent that it be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the bill as follows:

Be it enacted, etc., That, in the administration of any laws conferring rights, privileges, or benefits upon persons who have been honorably discharged from the military service of the United States, Sylvester W. Barnes, late first lieutenant Company H, Thirtieth Regiment New York Volunteer Infantry, shall hereafter be held and considered to have been honorably discharged from the said company and regiment on the 13th day of September, 1862: *Provided*, That nothing in this act shall be made the basis of a claim for pension or other pecuniary claim against the United States.

Mr. HAY. Mr. Speaker, I move to substitute for the House bill the bill S. 4030, in the identical language of the House bill.

The SPEAKER. The gentleman from Virginia asks unanimous consent to substitute the Senate bill of the same tenor for the House bill. Is there objection?

Mr. MANN. Reserving the right to object, I would like to have the Senate bill reported.

The Clerk read as follows:

An act (S. 4030) for the relief of Sylvester W. Barnes.

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, or benefits upon persons who have been honorably discharged from the military service of the United States Sylvester W. Barnes, late first lieutenant Company H, Thirtieth Regiment New York Volunteer Infantry, shall hereafter be held and considered to have been honorably discharged from the said company and regiment on the 13th day of September, 1862: *Provided*, That nothing in this act shall be made the basis of a claim for pension or other pecuniary claim against the United States.

Mr. MANN. Has the Clerk the engrossed copy of the Senate bill?

The SPEAKER. He has.

Mr. MANN. I will not object.

Mr. TAGGART. Mr. Speaker, reserving the right to object, the bill as passed by the Senate would not give the veteran any benefit at all. If it is the purpose of the bill only to correct the record of the soldier it is sufficient, but it would give him no benefit.

Mr. TALCOTT of New York. Mr. Chairman, the veteran named in this bill is dead. He failed to report after being detailed on recruiting service, because he had died of tuberculosis. The evidence before the Senate committee and before the House committee was clear and undisputed. This is an act of long delayed justice to the members of his family.

Mr. MANN. The report shows that the bill is not intended to give any benefit.

The SPEAKER. Is there objection to the substitution of the Senate bill for the House bill?

There was no objection.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The House bill H. R. 18217 was laid on the table.

DAVID CROWTHER.

Mr. HAY. Mr. Speaker, I call up the bill (H. R. 26648) for the relief of David Crowther. I ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the pension laws David Crowther shall hereafter be held and considered to have been absent with proper authority and in the line of duty as a soldier while serving as a member of Company I, Sixth Regiment Maine Volunteer Infantry.

Mr. HAY. Mr. Speaker, I offer as an amendment to this bill the same amendment that I have offered to the former bills.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend by adding to the bill the following:

"*And provided*, That no pension, bounty, or allowances shall accrue prior to the passage of this act."

Mr. MANN. Mr. Speaker, a few moments ago the gentleman from Kansas [Mr. TAGGART], who is now rendering a brilliant service to his country in his first term, took some exception to the action of the Committee on Military Affairs in not having reported one of these desertion bills for him. I have served here now close to 16 years, and have had a good many bills of that character that I thought were very meritorious, and up to date I believe have never been able to secure a favorable report on any of them. Possibly that is owing more to my negligence than to the action of the committee. I have no criticism to make of the committee, because I appreciate the difficulties which the committee has in passing upon these cases. There are thousands of cases throughout the country seeking relief, but it does seem somewhat odd that the committee was able to make a favorable report in this case while not being able to make a favorable report in many other cases. I would just like to read a word contained in the report from The Adjutant General of the Army, Gen. Ainsworth. This man was court-martialed. He came before a court-martial twice. Gen. Ainsworth says:

Upon his trial it appears of record that he made no defense or explanation of the charge and specification other than the plea that he was not guilty, and nothing has been found of record to corroborate the statement now made by him that he left his company and regiment for the purpose of seeking food. On the contrary, from the testimony of his company commander adduced at the trial, it appears that Crowther deserted from his company and regiment on the 1st day of May, while the regiment was lying on the north side of the Rappahannock, near Franklin Crossing, and about to cross and engage the enemy; that he left his gun and equipments behind him, and that he remained absent until the 27th of May, when he was brought back under guard, having been found at Aquia Creek landing.

Nothing has been found of record to show whether or not his arms and equipment were restored to him, or whether he participated in the Battle of Gettysburg, July 1 to 3, 1863, although the records show that he was present with his company June 30, 1863, and that the command with which the organization was serving was present at the Battle of Gettysburg. With respect to his statement that he took part in the Battle of Chancellorsville, it should be observed that that battle took place from May 1 to 3, 1863, and although the command with which the organization was serving was present at that battle, Crowther at that time was absent from his company in desertion.

The court-martial found this man guilty and sentenced him to hard labor without pay during the rest of his term of enlistment, which was, I believe, nearly two years or more. It is true that after that he served for a number of years in the Regular Army. I am not objecting to his having the privilege of a pension upon that ground, because he did obtain thereafter, I think, a number of honorable discharges from the Regular Army. He may be entitled to a pension for that reason; yet, appreciating, as I do, the difficulties which the Committee on Military Affairs has to prevent reporting all of these bills, I am trying now to lay an additional obstacle which they may use in the future to help them keep from reporting this class of bills.

Mr. HAY. Mr. Speaker, I want to say to the gentleman from Illinois [Mr. MANN] and to the House that there are pending before the Committee on Military Affairs about 1,800 of these bills, and three-fourths of those bills are there without anybody ever having come to the committee or the subcommittee and asking any action to be taken upon them. We have endeavored in this Congress as in past Congresses, when bills have been brought before us and Members have taken the trouble to prepare their cases, to report such bills as we believe are meritorious and ought to receive favorable consideration.

This bill to which the gentleman particularly refers is a very unusual one. It was introduced by the gentleman from New York [Mr. REDFIELD]. He spent a great deal of time in collecting the evidence, and I think if the gentleman will carefully read the report——

Mr. MANN. I have read every word of it.

Mr. HAY. He will find that that man did take part in this battle, and that the whole case turned upon whether or not he did take part in the battle. The committee was convinced from the evidence brought before it that the man ought not to have been court-martialed; that he did take part in the battle; that after the Battle of Chancellorsville he took part in the Battle of Gettysburg, and was not court-martialed until after that battle. So that the man really did the service and was entitled to this relief.

I want to say for the Committee on Military Affairs that we are anxious to do what is right in these cases; that it is almost impossible for us to consider all of them; and that whenever gentlemen come before us and take the trouble to prepare their cases, they are given a hearing, and the committee tries to report such bills as ought to be reported. It is, generally speaking, a rule of the committee not to consider a case favorably if the soldier has not had at least two years of honorable service, nor does this always entitle him to relief.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read a third time, and passed.

WILLIAM H. SEWARD.

Mr. KAHN. Mr. Speaker, I ask unanimous consent to return to Calendar No. 349, to the bill (H. R. 8921) to correct the military record of William H. Seward. In looking over the bill as passed I find the proviso which has been passed in bills of this character is omitted, and I ask unanimous consent that there be added to that bill "*Provided*, That no pension, bounty, or allowances shall accrue prior to the passage of this act."

The SPEAKER. The gentleman from California [Mr. KAHN] asks unanimous consent to return to the bill (H. R. 8921) for the relief of William H. Seward.

Mr. MANN. Mr. Speaker, I shall not object because perhaps it ought to be there, but the addition or omission of that paragraph to the bill neither adds to nor detracts from the provisions of the bill, because all that these bills do is to give the right to apply for a pension. It can not date back of the date of the application under any circumstances, and the soldier under these bills gets no other right than the assumption of an honorable discharge when he is applying for a pension.

The SPEAKER. The gentleman from Illinois [Mr. MANN] objects.

Mr. MANN. No; I do not object.

The SPEAKER. The gentleman says he does not object. Is there objection to returning to this bill? [After a pause.] The Chair hears none. Without objection, the Clerk will insert that paragraph in the bill. [After a pause.] The Chair hears no objection.

Mr. KAHN. I also ask that the title be amended so as to read, "A bill for the relief of William H. Seward."

The SPEAKER. The title will be amended to conform with the revised text. [After a pause.] The Chair hears no objection.

On motion of Mr. HAY, a motion to reconsider the votes by which the several bills were passed was laid on the table.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. HAY. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, with Mr. RUCKER of Missouri in the chair.

The CHAIRMAN. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent to recur to page 2, line 19, for the purpose of asking the gentleman in charge of the bill a question in regard to that provision.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. FOSTER. What is the object of returning? The gentleman can do that without returning.

Mr. MURRAY. I want to fix attention at that particular place.

The CHAIRMAN. Is there objection to the request of the gentleman? [After a pause.] The Chair hears none.

Mr. MURRAY. Mr. Chairman, I have been asked to learn whether or not the provision "*Provided*, That no salary herein appropriated shall be paid to any official receiving any other salary from the United States Government" restricts the appointment of one on the retired list of the Army or the Navy to any of these places. I desire to get an expression of opinion from the gentleman in charge of the bill with reference to that matter.

Mr. FLOOD of Virginia. My understanding is that there is a law prohibiting a retired Army or naval officer from being appointed to the Diplomatic or Consular Service.

Mr. MURRAY. One on the retired list?

Mr. FLOOD of Virginia. That is my understanding of the law.

Mr. MURRAY. Therefore it is not because of this proviso that they can not be appointed, but because of some other provision?

Mr. FLOOD of Virginia. Because there is a law prohibiting it.

Mr. MURRAY. The gentleman can not give me a reference to that law?

Mr. FLOOD of Virginia. I can look it up.

Mr. MURRAY. I would be glad to have the gentleman incorporate it in the RECORD if he will.

Mr. FLOOD of Virginia. I will.

Mr. MURRAY. Thank you.

The Clerk read as follows:

Peace Palace at The Hague: For the payment of the contribution on the part of the United States toward the expenses of the Palace of Peace at The Hague, $1,045.25, or so much thereof as may be necessary.

Mr. FOWLER. Mr. Chairman, I make the point of order against the paragraph that it is without authorization.

The CHAIRMAN. The gentleman from Illinois makes the point of order against this section.

Mr. KENDALL. Mr. Chairman, I did not hear what the point of order made by the gentleman from Illinois was.

The CHAIRMAN. The point of order is that it is not authorized by law.

Mr. FLOOD of Virginia. Mr. Chairman, this appropriation is made as the part which this Government contributes toward the maintenance of the Peace Palace at The Hague. That palace at a cost of a million and a half dollars was furnished by Mr. Carnegie and is maintained at a cost of $19,900, and our portion of that, under agreement between our representative and the representatives of some 30 or 40 nations, is this $1,045.25, which is appropriated in this bill.

Now, that is an agreement entered into by the representative of this Government with the representatives of these other Governments. The court sits in this palace, and these different Governments are to maintain its gardens and the interior of the palace for the purposes of this court.

Mr. COX. How did they get at the amount that was to be assessed to these nations?

Mr. FLOOD of Virginia. It is based on some unit system as to our standing.

Mr. COX. The population of the countries?

Mr. FLOOD of Virginia. Yes.

Mr. HAMLIN. May I ask by what authority our representative entered into this kind of an agreement?

Mr. FLOOD of Virginia. By authority of a treaty.

Mr. BARTHOLDT. If the gentleman will permit, the Secretary of State said that while this was not a treaty it had the force and effect of a treaty. It is an agreement between the several Governments to contribute pro rata toward the maintenance of that palace.

Mr. HAMLIN. I understood the chairman of the committee to make that statement, but the question I asked was where this representative of our Government got authority to enter into any such agreement. I do not know as I especially object to the appropriation, but what I want to find out is if our representative acted with the authority or without the authority of this Government.

Mr. FLOOD of Virginia. I will say to the gentleman that my opinion is the Hague convention of 1899 gave to this tribunal authority to agree to this charge on the part of the United States.

Mr. MANN. Will the gentleman from Missouri [Mr. HAMLIN] yield?

Mr. HAMLIN. I will.

Mr. MANN. When this matter was before The Hague tribunal and acted upon favorably, it was voted for by the representative of the United States, subject to the subsequent approval of his Government. How far under the treaty the State Department has authority to do that I do not pretend to say, but I assume that in the payment of small expenses on routine work probably somebody had authority to do it without asking for a new treaty being made. I do not know, however.

Mr. HAMLIN. I just want to say that I understand the purpose of this, and that it would be somewhat embarrassing, perhaps, to our Government if we did not participate. But I want to take advantage of this occasion to also observe that my judgment is that some people who are authorized to represent our Government in certain capacities voluntarily expand their authority frequently, with the result that we are involved, in the aggregate, in very large expense. I do not believe that ought to be permitted. I think——

Mr. MANN. But you do not make that charge at this time?

Mr. HAMLIN. I am not making it now. I am speaking generally.

Mr. MANN. The reason that I interrupted the gentleman was because that when a representative does not do certain things it is thought that we ought to give special recognition to the fact.

Mr. HAMLIN. I am not speaking of this special representative, because I do not know who he was. There is nothing personal in the matter. I think that perhaps he exceeded his authority if he sought to bind this Government without special authority to do so. But I do not mean he acted in bad faith, and perhaps he did what he should have done, outside of the fact that he ought to have waited first for the express authority. But what I was saying did not have any special reference to this item alone, but was a general reflection on the conduct of our representatives in dealing with international affairs. I think there is too loose a practice, and that our representatives frequently assume to themselves authority which they do not have. It is no reflection upon the committee, because they feel likely as I do about this item. It would be embarrassing if we did not approve it. But committees often feel called upon to come into the House and appropriate money to make good on obligations incurred by our agents abroad, when these agents were not authorized to commit this Government to these projects. I think they ought to understand that they must not attempt to bind this Government unless special authority is given to them. I think this appropriation ought to be made, although I think the paragraph is subject to a point of order.

Mr. COOPER. Mr. Speaker——

Mr. FLOOD of Virginia. I yield to the gentleman from Wisconsin [Mr. COOPER].

Mr. COOPER. Mr. Chairman, may I ask the chairman of the committee if this controversy is over the appropriation asked for as the contribution from this Government to The Hague tribunal?

Mr. GARNER. Yes, it is.

Mr. KENDALL. It is our contribution for the maintenance of the palace.

Mr. COOPER. If the gentleman will permit me, I heard the gentleman from Missouri [Mr. HAMLIN] inquiring whether our representative on the administrative council at The Hague acted beyond his authority. On page 9 of the report on this bill is a copy of a translation of the order of the day covering the proceedings of the administrative council on the day when this question came before it. It appears that the provision for this appropriation was carried by the votes of the representatives of the respective governments, and that the representative of the United States voted for it, subject to the approval of this Government. The translation of the minutes of the order of the day is as follows:

In order to carry this out the Foundation requests that the administrative council will furnish an annual contribution of 49,504 f.

The President submits to the meeting the proposition of the French minister:

"The administrative council decides that a sum of 49,504 f. shall be entered on the budget of the international bureau of the court as an annual contribution of the powers toward the cost of the Palace of Peace.

"The administrative council takes note of the undertaking of the Committee of Directors of the 'Carnegie Foundation' to communicate to the administrative council as information annually the accounts and the balance presented to the controlling committee of the Foundation."

This proposition was voted for by the President and the representatives of Germany; also by the representative of the United States of America, subject to the subsequent approval of his Government.

And all the other nations represented voted. It thus appears that our representative clearly acted within his authority.

Mr. FLOOD of Virginia. Mr. Chairman, speaking to the point of order, the approval of the Government contemplated in that order was the approval of the executive department of the Government. It did not have reference to the approval by Congress. My understanding of the situation is that——

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. FLOOD of Virginia. Yes.

Mr. FOWLER. By what authority does the President have the right to make such approvals?

Mr. FLOOD of Virginia. By virtue of The Hague treaty of 1899.

Mr. FOWLER. What law gives him the authority to make such approvals?

Mr. FLOOD of Virginia. That treaty contemplates the maintenance of a building at The Hague by the nations that are parties to that treaty. The United States is one of the parties to it. This is simply the proportion of the United States that is necessary for keeping up this building there. The building has been erected and belongs to the nations that are parties to this treaty.

Mr. FOWLER. This is the first time this question has ever come up in Congress?

Mr. FLOOD of Virginia. Yes; because this is the first time this amount has ever been set aside for the maintenance of the Peace Palace at The Hague.

Mr. FOWLER. And whatever was done by our representative was done subject to the approval of the United States?

Mr. FLOOD of Virginia. I think so, Mr. Chairman. I think, when we ratified the treaty that gave to our representative the right to bind the Government to help maintain the building in which this court was to sit, and our representative in this council agreed to this, subject to approval by the Government, which means the executive department of the Government.

The CHAIRMAN. The Chair is prepared to rule. The information possessed by the Chair on this subject is so meager that it leaves the question raised by the point of order in serious doubt. The Chair will decide the question as he thinks it ought to be decided, and if the ruling appears to the gentleman to be wrong the Chair will be glad to submit it to the committee for its approval or disapproval.

The point of order made by the gentleman from Illinois [Mr. FOWLER] is overruled.

Mr. BARTHOLDT. Mr. Chairman, I offer an amendment as a separate paragraph.

The CHAIRMAN. The gentleman from Missouri [Mr. BARTHOLDT] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Insert as a separate paragraph at the end of page 19 the following: "Contribution toward the adornment of the Peace Palace at The Hague: To enable the United States to contribute to the adornment of the Palace of Peace at The Hague by sending some object of art of national production, $30,000."

Mr. FOWLER. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] makes a point of order against the amendment.

Mr. BARTHOLDT. Mr. Chairman, I hope the gentleman will reserve his point of order for a moment.

Mr. FOWLER. Yes; I will reserve it.

Mr. BARTHOLDT. Mr. Chairman, I am in doubt myself as to whether or not this is subject to a point of order. In support of the amendment I wish to make this statement:

There is being erected, through the generosity of an American citizen, a great palace dedicated to the cause of international peace at The Hague. It appears that the several representatives of the Governments assembled at the second Hague conference agreed to request their Governments to donate, for the adornment of that palace, certain gifts typical of the production of each nation, and our representatives were a party to that agreement. In the summer or fall of this year that great palace is to be opened, and all the Governments signatory to The Hague convention and parties to that agreement have furnished their gifts—some of them tapestries, others stained-glass windows, just in accordance with what the respective countries produce—and the most prominent place in that palace has been assigned to the United States for the purpose of erecting at the foot of the stairway in the main corridor a group of statuary.

And that distinction has been accorded to the United States because it was an American citizen with whose money this palace is to be erected.

It would be almost a national disgrace if this Government alone should fail to be represented among those who are carrying out their agreements. In my judgment, this obligation by our Government is an honorable one, and if this item is not carried in the House I am quite sure it will have to be put on in the Senate. Therefore I should like to appeal to my friend from Illinois to withdraw his point of order. It is true it is not a convention or treaty, but it is an agreement into which our representatives entered, with the understanding that they would go to their Government and ask for its approval.

Mr. FOWLER. Mr. Chairman, there is no doubt in my mind but what the original sum carried in the bill, as well as that proposed by the amendment of the gentleman from Missouri [Mr. BARTHOLDT], is intended to act as an aroma to a conscience drug of Andrew Carnegie. If he is able to build peace palaces, or any other kind of palaces, in foreign countries, he is able to adorn them, and I am in favor of letting that responsibility rest on his shoulders. It is true that he has contributed much money throughout the United States for library buildings, but upon each occasion he has saddled upon the shoulders of the people of the locality in which the library is constructed the responsibility of keeping up and perpetuating the library; and in the event that the library is not kept up, then the property reverts to the fund of the quasi donor. I speak of him as the quasi donor instead of the donor because the people have played an important part in such donations.

Mr. COOPER. Mr. Chairman, will the gentleman permit an interruption?

Mr. FOWLER. Yes.

Mr. COOPER. The gentleman says these libraries have been "saddled"—that was his word—upon these communities. Is there any one of these communities that has not voluntarily assumed the burden by a vote of its city council or other municipal authority?

Mr. FOWLER. I used the word "saddled" in speaking of the perpetuation of these libraries, and not in the establishment thereof.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FOWLER. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. BARTHOLDT. Will the gentleman reserve his point of order for a moment?

Mr. FOWLER. Yes; I will reserve it. I will make the point of order if the Chair requires that it shall be passed upon now.

The CHAIRMAN. The Chair does not require that.

Mr. FOWLER. I, of course, will be courteous enough to my colleague to reserve the point of order to allow him to make a statement.

Mr. BARTHOLDT. Mr. Chairman, I merely wish to suggest that this great peace palace will be used in the future for the great international conferences to be held by the Governments as well as by the parliaments of the world; and but for the existence of that peace palace the Governments would probably be called upon to make an appropriation to secure a proper location for holding these conferences. After this palace is completed it will be donated free for the use of all the nations. So in this way we will save money; and I will ask the gentleman, if he were a delegate representing this great Government at The Hague, and the other delegates were to propose that some gifts representative of the industries of their countries be given for the adornment of that great peace palace, whether he alone would stand out against such a proposition and say, "The American Government and the American people are too poor or too niggardly to contribute their share for that purpose"? I hope some day the gentleman may be a delegate, and I am sure he would not do as he said a little while ago on this floor that these American delegates should have done.

Mr. FOWLER. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

SECOND PAN AMERICAN SCIENTIFIC CONGRESS.

To enable the Government of the United States suitably to participate in the Second Pan American Scientific Congress, to be held in Washington, D. C., in October, 1914, and for the necessary expenses for clerks, printing (including the publication of the proceedings of the congress in English and Spanish), stationery and supplies, and other incidental expenses, including rent in the District of Columbia, and for the entertainment of the delegates, $50,000, to be expended under the direction of the Secretary of State; and the Secretary of State is hereby authorized to invite the Governments of the American Republics to be represented by delegates at the said congress.

Mr. FOWLER. Mr. Chairman, I make the point of order against the paragraph, because there is no authorization, and for the further reason that the fund is not to be used until October, 1914. There is ample time to make an appropriation for maintaining the Pan American Congress.

Mr. FLOOD of Virginia. I will ask the gentleman from Illinois to reserve his point of order.

Mr. FOWLER. I will reserve the point of order.

Mr. FLOOD of Virginia. The item is subject to a point of order. It is a new item, and there is no law or treaty authorizing it. But the gentleman from Illinois is mistaken in saying that there is ample time in another appropriation bill to provide for this item. Invitations will have to be issued soon if the congress is to be a success, and these invitations can not issue until this appropriation is made. The Committee on Foreign Affairs regards this as an important appropriation. It is for the purpose of entertaining the scientific congress of Pan Americans, to whom an invitation has been given by our representatives. I do not pretend that they had any authority of law to extend the invitation, but they did extend it, or accepted the suggestion that the congress meet here. The congresses are resulting in great good to our business, scientific, educational, and agricultural interests. I have here the hearings containing the statement of a gentleman in the Agricultural Department.

Mr. KENDALL. If it will not interrupt the gentleman, I understand this discussion is on the point of order?

Mr. FLOOD of Virginia. Yes.

Mr. KENDALL. These scientific congresses have been held since 1904 in different countries, alternating back and forth. Is not that true?

Mr. FLOOD of Virginia. Not exactly. The scientific congresses have been held in which South American countries participated, but I think this is only the second Pan American scientific congress.

Mr. KENDALL. I have a recollection that in 1908 the same congress met in Chile, and the Chilean Government made an appropriation of $150,000 or $200,000.

Mr. FLOOD of Virginia. Yes; that was the first one. It was held at Santiago, Chile, and that Government spent $154,000.

Mr. KENDALL. The gentleman means a congress that met with the United States. The Chilean Government entertained the congress and made an appropriation, I think, of $150,000.

Mr. FLOOD of Virginia. Yes; $154,000.

Mr. KENDALL. This congress is to convene in Washington in October, 1914, and I think the gentleman from Illinois misinterprets the language of the act.

Mr. FOWLER. No; that is my understanding, October, 1914.

Mr. KENDALL. The preparations are going forward now to entertain this congress; the plans are being perfected, and the department insists that it will be seriously embarrassed unless this money is available in the near future.

Mr. FOWLER. I think it is quite clear that the appropriation at the next session of Congress would be in ample time to make provision for the United States to entertain this scientific congress.

Mr. KENDALL. The gentlemen in the State Department and in the Pan American Union having the matter in charge maintain that they ought to have the money at once, and if we design to continue this scientific congress of nations, which has contributed so much to the welfare of the western world, as the gentleman from Illinois will discover if he investigates, and done so much to promote the excellent relations which ought to prevail among American Republics, I think the appropriation ought to be made at this time.

Mr. COX. Will the gentleman yield?

Mr. KENDALL. I am trespassing upon the time of the gentleman from Virginia.

Mr. FLOOD of Virginia. I will yield to the gentleman.

Mr. COX. What is the necessity of applying a part of this appropriation for rent in the District of Columbia?

Mr. FLOOD of Virginia. They will have to rent rooms to carry on the preliminary work to get ready for the congress.

Mr. COX. Is there not any room or headquarters where the Pan American Union can get together?

Mr. FLOOD of Virginia. It is not the Pan American Union. The Pan American Union is in sympathy with this congress, but is a different institution.

Mr. COX. This congress, then; is there no room which is available for them without renting quarters?

Mr. FLOOD of Virginia. There might be and might not be. They want authority if there is not.

Mr. COX. Has the gentleman any information as to how much will be applied for rent?

Mr. FLOOD of Virginia. Just as little for rent as possible, because this appropriation has been cut down to the smallest possible amount.

Mr. COX. Did the gentleman have any hearings before the committee in relation to it?

Mr. FLOOD of Virginia. Yes; we have quite a lot of hearings.

Mr. COX. What is the probable estimate?

Mr. FLOOD of Virginia. I do not think there is any estimate of what the rent would be. The testimony was as to the importance of the congress, as to the smallness of the appropriation that is contained in the bill, and the general way in which it would be expended.

Mr. COX. I see it provides for additional clerks. Has the gentleman any idea about how many additional clerks will be required?

Mr. FLOOD of Virginia. I have not; but I can tell the gentleman the amount that will probably be spent for clerks here.

Mr. COX. Any testimony taken before the committee in regard to it?

Mr. KENDALL. There was an estimate as to clerical assistance of $3,500. Mr. Rowe appeared before the committee, as shown on page 9; he was a delegate to the first Pan American congress. He submits these items: For clerical and stenographic assistance prior to the holding of the congress, $6,000.

Mr. COX. Prior to the holding of the congress?

Mr. KENDALL. That is to make preliminary arrangements for holding it.

Mr. COX. Is the $6,000 to come out of the $50,000?

Mr. KENDALL. Of course. Then, for clerical and stenographic assistance during the progress of the congress, $3,500.

Mr. COX. That is nearly $10,000 for clerical and stenographic assistance—$6,000 to be expended before the congress convenes and $3,500 during the congress.

Mr. KENDALL. Six thousand dollars for clerical and stenographic assistance prior to and $3,500 during the sessions of the congress.

Mr. COX. How many clerks do they propose to employ with that $9,500?

Mr. KENDALL. I do not believe anybody instituted an investigation as to how many clerks will be employed.

Mr. COX. And there is no limit on the pay. This will be a lump-sum appropriation, and the Secretary of State will pay them whatever salaries he wishes.

Mr. KENDALL. Yes. We have to trust the Secretary of State not to be too extravagant in disbursing the $10,000. Then there was an estimate for the translation of papers, $3,000.

Mr. COX. That makes $12,000?

Mr. KENDALL. And the publication of the proceedings in English and Spanish, $20,000.

Mr. COX. That is $32,000.

Mr. KENDALL. And extra expenditures necessary, which the director general will probably spend in the use of the Pan-American Building, $2,500.

Mr. COX. That is $34,500.

Mr. KENDALL. I have no doubt that it is intended to employ that $2,500 to defray the expense of rent.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. KENDALL. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Virginia be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FLOOD of Virginia. Then they contemplate that entertaining the delegates will cost $15,000.

Mr. COX. That leaves about $15,000 for entertainment.

Mr. FLOOD of Virginia. Yes.

Mr. COX. So that there will be $3,500 expended for clerical hire, and so forth, and the remaining $15,000 for entertainment.

Mr. KENDALL. I know it will be gratifying to the gentleman from Indiana to know that if we appropriate all of the money asked for by the American representatives——

Mr. COX. How much did they ask for?

Mr. KENDALL. Fifty thousand dollars.

Mr. COX. And the committee gave them all they asked?

Mr. KENDALL. Yes. I was about to say that I know it will be gratifying to the gentleman from Indiana, who is an economist, that even though we grant all that they ask——

Mr. HAMILTON of Michigan. An economist or a political economist?

Mr. KENDALL. Both—even though we grant all the American representatives asked, the amount will still be only one-third of what the comparatively small Government of Chile appropriated for a similar purpose in 1908.

Mr. COX. The gentleman in his calculations has consumed here the sum total of $50,000 and left nothing for rent. Was there any evidence at all before the committee as to the probable amount that would be required for that?

Mr. FLOOD of Virginia. There is $500 left to cover the rent.

Mr. COX. Does the gentleman think that will cover the rent?

Mr. FLOOD of Virginia. Yes.

Mr. CLINE. Mr. Chairman, I desire to say just a word about this. I believe the $50,000 will be the best money we could invest in this enterprise. There is not a man on the floor who does not know that in Europe Germany and some other foreign countries have a little more friendly relation with the South American Republics than we have, not because of any antagonism between them and us, but chiefly because they do not know us so well. They have that because they are in touch with Europeans along lines of trade. We are opening up the Panama Canal. If there is anything we want, it is the trade of the South American Republics, and we want them to be our friends first. We ought to invoke every opportunity to cultivate the warmest friendly relations with the 20 South and Central American Republics, that have four billions of trade, and we ought to have 80 or 90 per cent of that. [Applause.] We have a handicap of 3,000 miles over our nearest competitors. If we expect to get this trade, we ought to cultivate those relations that will bring the trade to us. There is no way that we can expend $50,000 that will be better, more economically spent for the trade of this country than the $50,000 that is to be expended in inviting the representatives of these Republics here and giving them an exhibition of what we have in this country. I hope the gentleman from Illinois will withdraw his point of order, because of the very meritorious object that is involved in this expenditure.

Mr. MOORE of Pennsylvania. Mr. Chairman, this item ought to remain in the bill, if only because of the good will it expresses toward the Latin American countries. One of the commercial drawbacks of the United States is our lack of knowledge of the good qualities of the people of South America. We ought to encourage a better understanding of them and their customs, and there is no better way than to hold these occasional Pan American congresses. The Chilean Government appropriated $154,000 to defray the expenses of the First Pan American Scientific Congress, which was eminently successful, and since that congress voted to assemble in the United States we ought to be in a position to extend the hand of hospitality. If the gentlemen insist upon the point of order, it will lead to much confusion and misunderstanding, which will be regrettable. I hope the item may be permitted to remain in the bill.

Mr. MANN. Mr. Chairman, I ask for the regular order.

The CHAIRMAN. Does the gentleman from Illinois make the point of order on this section?

Mr. FLOOD of Virginia. Mr. Chairman, I want to make a suggestion——

Mr. MANN. I asked for the regular order, Mr. Chairman.

Mr. FLOOD of Virginia. Will the gentleman just wait for a moment? He is taking me off my feet——

Mr. MANN. I asked for the regular order. We are wasting too much time on this. We ought to get through some time.

The CHAIRMAN. Does the gentleman insist upon his point of order?

Mr. FOWLER. Mr. Chairman, I desire to be courteous to the chairman of this committee, and I would be very glad——

The CHAIRMAN. The regular order is demanded. Does the gentleman withdraw his point of order?

Mr. FOWLER. Mr. Chairman, I desire to ask unanimous consent that the chairman of this committee be permitted to make his statement.

Mr. MANN. Mr. Chairman, I demand the regular order. We ought to have passed this bill before this time.

Mr. FOWLER. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order will be sustained.

The Clerk read as follows:

International congress on uniform bills of exchange, etc.: For the participation by the United States in the adjourned meeting at The Hague of the international congress for the purpose of promoting uniform legislation concerning bills of exchange and checks, including compensation, clerical assistance, and actual and necessary traveling and subsistence expenses of an expert delegate, $7,000, or so much thereof as may be necessary.

Mr. FOWLER. Mr. Chairman, I make the point of order against the paragraph.

Mr. HAMLIN. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. HAMLIN. I make a point of order against the paragraph.

The CHAIRMAN. The point of order has been made by the gentleman from Illinois.

Mr. FLOOD of Virginia. Will the gentleman reserve his point of order for a moment? I desire to make a statement if the gentleman will.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. MANN. I suggest the point of order has been reserved. I think we ought to get through with this bill.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. FLOOD of Virginia. I want to be heard on the point of order.

Mr. MANN. I have no objection to the gentleman making a statement with reference to the matter, but it seems to me we ought to progress, and I will ask for the regular order.

Mr. FLOOD of Virginia. I can be heard on the point of order.

Mr. MANN. Has the point of order been made?

The CHAIRMAN. Yes; and the Chair desires to hear the gentleman in opposition to it.

Mr. MANN. That is all right; I understood the point of order was reserved.

Mr. FLOOD of Virginia. Mr. Chairman, I will say to the gentleman from Illinois [Mr. FOWLER] and the gentleman from Missouri [Mr. HAMLIN] that this is also an important item carried in this bill, and it has been carefully considered by the Committee on Foreign Affairs, and while probably subject to the point of order, it is an item of expenditure which would mean a great saving to the United States. We have had several of these conferences on bills of exchange. The first appropriation for this purpose was in 1909, amounting to $9,000; another in 1911, amounting to $3,000; and another in 1912, amounting to $2,000. Conference was held in 1910—June 23 to July 16—and in 1912, from June 16 to July 23. The first conference considered the unification of laws relating to international exchange and submitted drafts of a convention. The second conference revised and considered the drafts and also considered the subject of uniform laws relating to checks. These subjects are to be considered at the proposed conference during the present year. All principal European and Latin American countries are represented. The conference is endeavoring to reduce about 40 systems of legislation in relation to exchange to 2 systems and simplify use of checks in international financial transactions. Banking, exporting, and legal interests would be benefited. It costs an extravagant amount to get exchange in some of the eastern countries now, and the object of this authorization is to complete the work that has been done by these former conferences and make uniform, or nearly so, systems of bills of exchange.

Mr. HAMLIN. Will the gentleman yield?

Mr. FLOOD of Virginia. Yes.

Mr. HAMLIN. I have read very carefully the report submitted by the committee, and I find we took up this work in 1909. We have already expended $14,000, and so far as I know there has been nothing accomplished.

Mr. FLOOD of Virginia. Oh, yes, there has.

Mr. HAMLIN. Now we propose to appropriate $7,000 more, and I find nothing in the report that leads to any hope or assurance that we will have accomplished anything when we have expended that, which would make a total of $21,000, and it will go on ad infinitum it seems to me. Then, I want to make this further suggestion. Nothing in the report indicates if we could agree on some uniform bill or system of exchange that we would save anything. There is no indication that rates would be made lower or anything of the kind, and it seems to me we are loading down this appropriation bill to no good purpose.

Mr. FLOOD of Virginia. If the report indicates that nothing has been done the report is in fault. As to the working of the present system, I will ask the gentleman from Pennsylvania [Mr. DIFENDERFER] to give a little history of his experience and knowledge of this subject.

Mr. DIFENDERFER. Mr. Chairman, so far as I am personally concerned and so far as my experience has gone, I feel that it is essentially important there should be universal exchange in these eastern countries——

The CHAIRMAN. Permit the Chair to say to the gentleman that the only question before the committee now is the point of order made by the gentleman from Illinois [Mr. FOWLER].

Mr. FLOOD of Virginia. We are trying to get him to withdraw that point of order.

Mr. HAMLIN. I will say to the gentlemen of the committee that if the gentleman from Illinois [Mr. FOWLER] withdraws the point of order, I will renew it.

Mr. MANN. Then I ask for the regular order.

Mr. FOWLER. Mr. Chairman, I have made the point of order and will stand by it.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

International radiotelegraphic convention: For the share of the United States for the fiscal year 1914, as a party to the international radiotelegraphic conventions heretofore signed, of the expenses of the radiotelegraphic service of the International Bureau of the Telegraphic Union at Berne, Switzerland, $2,000.

The Clerk concluded the reading of the bill, as follows:

CONTINGENT EXPENSES, UNITED STATES CONSULATES.

Expenses of providing all such stationery, blanks, record and other books, seals, presses, flags, signs, rent (allowance for rent not to exceed in any case 30 per cent of the officer's salary), postage, furniture, including typewriters and exchange of same, statistics, newspapers, freight (foreign and domestic), telegrams, advertising, messenger service, traveling expenses of consular officers and consular assistants, compensation of Chinese writers, loss by exchange, and such other miscellaneous expenses as the President may think necessary for the several consulates and consular agencies in the transaction of their business, $471,600.

Mr. FLOOD of Virginia. On page 24, line 2, after the word "postage," I want to insert the words "for repairs to consular buildings owned by the United States."

The CHAIRMAN. The gentleman from Virginia [Mr. FLOOD] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 24, line 2, before the word "postage," insert the words "repairs to consular buildings owned by the United States."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia [Mr. FLOOD].

The question was taken, and the amendment was agreed to.

Mr. FOWLER. Mr. Chairman, on page 24, I discover that the amount is $21,600 more for the last paragraph than was carried in the bill a year ago. I desire to offer an amendment making the sum $450,000 instead of $471,600.

The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 24, line 10, strike out the figures "471,600" and insert in lieu thereof the figures "450,000."

Mr. FLOOD of Virginia. That reduces it to $450,000?

Mr. FOWLER. Yes.

Mr. FLOOD of Virginia. I will say to the committee that $450,000 is not enough for this item. They had $450,000 and ran short, and they had to cut off some of the most important matters for which this money is spent. For instance, making repairs to consulates has absolutely been neglected ever since this appropriation has been cut down, and the telegraphic service has been cut off. It has been demonstrated that $450,000 has not been sufficient.

Mr. FOWLER. What was the amount two years ago?

Mr. FLOOD of Virginia. The amount two years ago, I think, was $475,000.

Mr. FOWLER. And was it cut in the last bill?

Mr. FLOOD of Virginia. It was cut in the last bill.

Mr. CLINE. They spent last year $465,000.

Mr. FLOOD of Virginia. And they were cramped at that. The Consular Service apparently costs this Government $2,000,000 a year, but they get back in fees alone every cent of it except $200,000. This service is doing great good to the country and is costing the Government very little.

Mr. FOWLER. Is there a deficit in this fund now?

Mr. FLOOD of Virginia. There is a deficit of $8,000 right now.

Mr. FOWLER. Mr. Chairman, the explanation of the chairman of the committee makes out a good case, and I do not desire to cripple this fund at all. If it is necessary, I do not desire to press my amendment, and I ask unanimous consent to withdraw it.

The CHAIRMAN. The gentleman from Illinois [Mr. FOWLER] asks unanimous consent to withdraw the amendment just offered. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I ask for the regular order.

Mr. FLOOD of Virginia. Mr. Chairman, I ask unanimous consent to go back to page 14 of the bill, and offer an amendment, in line 8, as follows:

Page 14, line 8, after the word "the," where it first occurs, insert the word "calendar."

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia [Mr. FLOOD]? [After a pause.] The Chair hears none. The question is on the amendment offered by the gentleman from Virginia, which the Clerk will report.

The Clerk read as follows:

Page 14, line 8, after the word "the," where it first occurs, insert the word "calendar."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. FLOOD of Virginia. Mr. Chairman, I ask unanimous consent to be allowed to offer an amendment on page 20, "Second Pan American Scientific Congress," changing the appropriation from $50,000 to $30,000. We could get the other $20,000 in the next appropriation.

The CHAIRMAN. The gentleman from Virginia [Mr. FLOOD] asks unanimous consent to return to page 20 of the bill, for the purpose of offering an amendment.

Mr. MANN. That is the item that went out on the point of order, and I object.

The CHAIRMAN. Objection is heard.

Mr. FLOOD of Virginia. I ask that the totals in the bill be changed.

The CHAIRMAN. The gentleman asks unanimous consent that the Clerk may correct the totals in the bill. Is there objection?

There was no objection.

Mr. FLOOD of Virginia. Mr. Chairman, I move that the committee do now rise and report the bill and amendments to the House.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RUCKER of Missouri, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment?

There was no demand for a separate vote.

The SPEAKER. If not, the amendments will be considered in gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FLOOD of Virginia, a motion to reconsider the vote whereby the bill was passed was laid on the table.

EIGHT-HOUR BILL.

Mr. WILSON of Pennsylvania. Mr. Speaker, I call up the conference report on the bill (H. R. 18787) relating to the limitation of the hours of daily service of laborers and mechanics employed upon the public work of the United States and of the District of Columbia, and of all persons employed in constructing, maintaining, or improving the rivers and harbors of the United States and of the District of Columbia, and ask that the statement be read in lieu of the conference report.

The SPEAKER. Is there objection to the reading of the statement in lieu of the conference report? [After a pause.] The Chair hears none. The Clerk will read the statement.

The conference report is as follows:

CONFERENCE REPORT (NO. 1497).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 18787, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 2.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 4, 6, 7, 8, and 9, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows:

After the word "persons," in line 2, page 3, strike out all the words down to the end of section 1 and insert the following: "Employed in connection with dredging or rock excavations in any river or harbor of the United States or of the District of Columbia while not directly operating dredging or rock excavating machinery or tools, nor to persons engaged in construction or repair of levees or revetments necessary for protection against floods or overflows on the navigable rivers of the United States," so that the proviso in section 1 will read:

"*Provided*, That nothing in this act shall apply or be construed to apply to persons employed in connection with dredging or rock excavation in any river or harbor of the United States or of the District of Columbia while not directly operating dredging or rock-excavating machinery or tools, nor to persons engaged in construction or repair of levees or revetments necessary for protection against floods or overflows on the navigable waters of the United States."

And the Senate agree to the same.

W. B. WILSON,
FRANK BUCHANAN,
Managers on the part of the House.
WM. E. BORAH,
BENJ. F. SHIVELY,
Managers on the part of the Senate.

The statement was read, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 18787) relating to the limitation of the hours of daily service of laborers and mechanics employed upon a public work of the United States and the District of Columbia, and of all persons employed in constructing, maintaining, or improving a river or harbor of the United States and of the District of Columbia, submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report as to each of the amendments of the Senate, namely:

Amendments Nos. 1, 3, 4, 6, and 7: Strike out the word "snagging," leaving the bill so that it applies to "dredging, or rock excavation" instead of to "dredging, snagging, or rock excavation" as it appeared in the bill as it passed the House.

Amendment No. 2: Struck out the words "terminate within nine hours from the beginning of the workday" after the word

"shall," in line 11, page 2, and inserted the words "be continuous except for customary intervals for meals or rest." The effect of the restoration of the language used in the House bill is to prevent the workday being extended by means of long intervals for meals or rest.

Amendment No. 5: Would have repealed the eight-hour law of August 1, 1892. The amendment proposed by the conference corrects that defect.

Amendment No. 8: Excludes from the operations of the act work done under contracts entered into under the provisions of appropriation acts approved prior to the passage of this act.

Amendment No. 9: Provides that this act shall become effective and be in force on and after March 1, 1913.

W. B. WILSON,
FRANK BUCHANAN,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

PENSION APPROPRIATION BILL.

Mr. BARTLETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes; and, pending that motion, I desire to know from my colleague on the committee, the gentleman from Iowa [Mr. GOOD], what provision we can make with reference to general debate? I will state that we have on this side applications for 2 hours and 15 minutes. Has the gentleman any applications for time?

Mr. GOOD. I have very little demand for time on this side. I suggest that we limit the time to an hour and a half on a side, and I will yield the gentleman from Georgia some of my time to care for requests on his side.

Mr. BARTLETT. Very well. Mr. Speaker, I ask unanimous consent that general debate be limited to three hours, one hour and a half to a side, to be controlled, respectively, one-half by the gentleman from Iowa and one-half by myself.

The SPEAKER. The request of the gentleman from Georgia is that general debate be confined to three hours, one half to be controlled by himself and the other half by the gentleman from Iowa [Mr. GOOD]. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. BARTLETT. I move, Mr. Speaker, that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 28730) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1914, and for other purposes, with Mr. DAVIS of West Virginia in the chair.

Mr. BARTLETT. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. GOOD. Mr. Chairman, I yield 45 minutes of my time to the gentleman from Georgia [Mr. BARTLETT].

Mr. BARTLETT. I thank the gentleman for yielding to me a portion of his time. I will not undertake at this moment to discuss this bill except to say that it carries for the next fiscal year $180,300,000.

The last pension appropriation bill carried $152,000,000, and the increase has been due to the act of May 11, 1912, known as the Sherwood bill, and afterwards in the Senate as the McCumber bill.

It is estimated that the decreases in pensions will amount to about $2,000,000, so that there will be necessary an increase of $30,000,000 added to the $150,000,000 of last year. In other words, if it had not been for the act of May 11, 1912, this bill probably would not have exceeded $150,000,000. By reason of that act it becomes necessary to appropriate $30,000,000 additional.

There is also carried in this bill a provision for surgeon's examination fees. Last year the bill carried $200,000, which amount was sufficient. This year we carry $100,000 additional. This increased appropriation grows out of the increased necessity for surgeon's personal examinations of applicants, as a result of a decision made by the Secretary of the Interior, which decision has doubled the number of surgeon's examinations over those which had theretofore been made. I have that decision and will call attention to it at the proper time.

It is fair to say that there will be a deficiency in this item for the present year, and that will be asked for on the deficiency bill. That deficiency will amount to $100,000 more, so that the total will be $400,000 instead of $200,000, as carried in the last bill, which we will be compelled to pay for surgeons' examination fees by reason of this decision.

In addition to that, it appears that there will be a deficiency in the present fiscal year which will have to be provided for of $15,000,000, not taken care of in this bill as a matter of course, but already incurred by reason of the act of May 11, 1912.

This bill carries a provision which declares that pensions now paid to parties residing in foreign countries and who are not citizens of the United States, but are citizens of foreign countries, shall no longer be paid. It also carries a provision to use an unexpended balance for the purpose of providing the files and necessary labor-saving office fixtures in order to carry on the work in the office, and an appropriation of $500 for postage on foreign pensions. That is the whole bill. Now, Mr. Speaker, I will yield to my colleague from Georgia——

Mr. MARTIN of South Dakota. Before the gentleman from Georgia yields the floor will he yield for a question?

Mr. BARTLETT. Certainly.

Mr. MARTIN of South Dakota. Upon the subject of the increase of $200,000 for additional surgeons' fees for examinations, is it the judgment of the gentleman that that additional expenditure is represented by a better or a more just administration of this service?

Mr. BARTLETT. I have the decision of the Secretary of the Interior with reference to those examinations, and I will insert it in the RECORD. I did not intend to discuss it at this time.

It appears that the Commissioner of Pensions, in determining whether an applicant was entitled to a pension under the act of 1912 by reason of being incapacitated from disease, decided a case upon the evidence submitted—that is, the doctor's evidence and the affidavits of people who knew the applicant. The commissioner held this to be a question of fact, and determined it from that. Three or more of these cases were appealed to the Secretary of the Interior, who reversed that ruling of the Commissioner of Pensions, and held that such cases were entitled to be passed upon only after there had been an examination by some member of the surgeons' board in the particular locality; in other words, required before finally passing upon it either adversely or favorably, that there should be a surgeon's examination of the applicant himself and not simply the testimony by affidavits of the applicant's physician and those who knew him. This increased the necessity for surgeons' examinations to such an extent that it has doubled the work. Twice as many examinations are required as heretofore, when they could pay the expenses with $200,000, but now will require $400,000.

Mr. MARTIN of South Dakota. My question was whether, in the judgment of the gentleman, from what knowledge he has of the administration of the office, it has resulted in a better administration of this service, or otherwise.

Mr. BARTLETT. The gentleman has asked me a question, and I am going to state very frankly that I do not think it has resulted in a better administration. The gentleman will recall that this House, upon the legislative, executive, and judicial appropriation bill of last year or the year before, abolished this board of pension appeals.

Notwithstanding the pension board of appeals, there is now existing in the Assistant Attorney General's office in the Interior Department virtually another board of appeals. Four are men on the rolls of the Pension Office, with salaries running up to $1,800, who are detailed from that office to the Assistant Attorney General's office, and, with other men detailed to his office, they pass upon these appeals. They pass upon the judgment of those in the Pension Office who are their superior officers with a higher salary.

Such is the law which was undertaken to be remedied in the provision reported in the legislative, executive, and judicial appropriation bill at this session—that there should be no appeal except upon questions of law. That went out on a point of order. Now you can appeal every case you desire directly to the Secretary of the Interior on both questions of law and questions of fact. I think there should not be any appeal on questions of fact from the decisions of the officers in the Pension Office. I think that it becomes a question of fact to be determined by the Commissioner of Pensions whether a man is incapacitated to work, by his own testimony, the testimony of those associated with him, or the family acquainted with his physical condition.

It puts an additional burden of expense on the Government to require the Government, before it can determine whether a man is entitled to a pension, or to require the claimant before determination to have some one of these numerous physicians that we appoint all over the country examine him and have the Government pay this additional $200,000. I do not think it is good policy for the administration of the Pension Office or an economical administration of the affairs of the Government.

Mr. MARTIN of South Dakota. It occurs to me that if it does not result in better service it is hardly worth while to incur the expense.

Mr. BARTLETT. If the gentleman desires to move to strike it out, he can do so, but the gentleman must understand that the Appropriation Committee having charge of this bill and all bills must endeavor to give to the officials of the Government enough money to run it. I apprehend that there would be quite a protest, to put it mildly, from gentlemen in this House upon that side and upon this if we refuse to furnish to these applicants for pensions under the act of 1912 the means to have it ascertained by medical experts whether or not they are entitled to a pension. The Secretary has formerly decided that that is the only way in which the department can correctly determine whether the claimant is entitled to a pension, and has reversed the Commissioner of Pensions in deciding that a man was not entitled to a pension without requiring the medical examination.

Mr. BURKE of South Dakota. Will the gentleman yield?

Mr. BARTLETT. Certainly.

Mr BURKE of South Dakota. Can the gentleman tell us how many persons will be affected, and how much will be saved if the limitation in lines 20 to 23, on page 2, is in this bill when it becomes a law?

Mr. BARTLETT. Mr. Chairman, we pay the people residing in foreign countries the sum of $967,863.89. In addition, we provide $500 for postage for sending the pension vouchers through the mails. We could not do it under the check system that we have provided for in the last pension bill, but we have to continue the voucher system in that regard.

This proposition was in the last pension appropriation bill, and upon that I gave some information to the House obtained by an examination of the Commissioner of Pensions before the subcommittee. We find from his report that there resides out of the United States 5,465 people on the pension roll to whom pensions are paid. That embraces countries from Algeria to Wales.

The Commissioner of Pensions testified before the committee last year that there were very few who were citizens of the United States. The most of them who are citizens of the United States were people connected with foreign service of United States, or who were traveling abroad, not citizens of any other country. There were some on the Canal Zone to whom they were sent. The number, he said, would not exceed 20 all told.

It is fair to say that the construction that may be put upon his testimony is that he intended to say that there were not over 20 connected with the service of the Government who were abroad not as citizens but temporarily residing there. That is all the information I have on the subject.

Mr. BURKE of South Dakota. I do not think the gentleman quite understood my question. As I understand it, the amount of pensions paid to soldiers who are nonresidents of the United States amounts to something like $940,000.

Mr. BARTLETT. No; to people who were abroad, whether residing abroad temporarily or who were abroad in the service of the United States.

Mr. BURKE of South Dakota. What I want to know is, If the gentleman can tell how many of those are drawing pensions for actual disabilities incurred in the service, because they will continue to draw pensions under this bill?

Mr. BARTLETT. We undertook to find that out and we did not get any information. I will very cheerfully give the gentleman all of the information I have. We undertook to find out about it, but neither the Pension Commissioner nor the chief statistician, Dr. Thompson, could give it to us.

I now yield 30 minutes to my colleague, the gentleman from Georgia [Mr. RODDENBERY].

Mr. RODDENBERY. Mr. Chairman, standing at the closing days of the last session of the Sixty-second Congress, we are about to conclude the passage through the House of the various annual appropriation bills. The bill now under consideration is the pension appropriation bill, carrying with it $180,000,000. This money, after it is appropriated by Congress, is disbursed through the Pension Office. Several days ago I made some remarks touching the official character and qualities of a few of the officers drawing big salaries in connection with this department. I hold here a photograph of five Union soldiers. Three of them are partially legless and on crutches. Two of them are armless. They stand together. They represent in true type the character of men that a Government ought to pension. There are other worthy classes still, but it was never contemplated in the early days that able-bodied men with ample financial resources should receive the bounty of the Government. We shall not discuss at any great length those 800,000 on the pension rolls of to-day; but, adverting to the head from the Pension Bureau, I desire to say that in a few weeks the Democratic Party will take charge of the administration of that department, as well as of all the other departments of the Government. I hope that they will get a one-armed or one-legged old fighter of the days of 1860 and 1865 and put him at the head of that department to measure out to these old soldiers what the Government contributes to them and to administer its affairs. I hope that the next four years will not witness as the head of that department a pensioner who draws a $5,000 salary and a pension besides upon the ground that he is totally incapacitated for work and labor.

There is an eminent candidate for that position now. He has publicly announced his candidacy for Commissioner of Pensions. His picture is on one side of this sheet of paper and his pedigree on the other. It begins like the biographies in our Congressional Directories. He was born on the farm, he was educated in the common schools, he taught school, he studied law, he was admitted to the bar, he held a little office, he went to the war, and he returned. He took a keen interest in politics, he held school-board positions and others. He goes into detail to tell the country what his great services have been, even to being physically able to be a candidate for Congress as late as 1908; but he does not anywhere tell that he has been for nearly 20 years drawing a pension as an invalid pensioner, incapable of performing labor. Although he now draws a liberal salary in the Pension Bureau, he still draws a pension granted and continued on the ground of physical incapacity, and according to his platform he is so well, hale, hearty, and strong as to aspire to a $5,000 office. Gentlemen, is that the kind of man whom you can expect to fairly administer pension laws? I call attention to it. Possibly the suggestion may aid us in obtaining the "highest efficiency" at one place in the public service. I do not know the gentleman whose record speaks for itself. He is doubtless an estimable gentleman, but if he is qualified to draw an invalid pension he is disqualified for Commissioner of Pensions.

Mr. BATES. Mr. Chairman, does the gentleman claim that one of the glaring faults of the Republican Party is that it has had a man administering the Pension Office who is himself a pensioner? If that is true, I would like to ask the gentleman if during the last two Democratic administrations Union soldiers were not appointed to administer the Pension Office, and if they themselves were not pensioners.

Mr. RODDENBERY. I want to say to the gentleman that my remarks are not addressed in any partisan way at all.

Mr. BATES. I understand, but the gentleman questions the propriety of a pensioned Union soldier administering the Pension Office. I want to ask the gentleman if that has not been the practice of both the Democratic and Republican Parties?

Mr. RODDENBERY. Why, I just remarked that if you will take one of these old one-legged and one-armed veterans, if he is drawing a pension, and gets it for his wounds or fighting qualities, and he is not incapacitated from performing valuable service, he should be preferred; but I assert as a matter of common honesty an office ought not to be given to a soldier who draws an invalid pension on the ground that he is a physical wreck and unable to care for himself. Under the law, unless that condition of physical disability continues, he is not entitled to a pension. If the condition does continue, he can not be qualified for Commissioner of Pensions. Do not give to such a man an office that requires the services of a man worth $5,000 a year. In other words, give us an old soldier and not a fraud on the pension rolls. That is what I ask for, regardless of what party is in charge.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. RODDENBERY. Yes.

Mr. CALLAWAY. The gentleman's objection is not that he gets a pension, but that he draws it on a lying basis.

Mr. RODDENBERY. If the gentleman is capable of being Pension Commissioner, that is fairly and quite well stated.

Mr. CALLAWAY. The gentleman thinks if he gets a pension for fighting qualities it ought to so state.

Mr. RODDENBERY. The old soldiers of the country who are entitled to pensions want them, and they want their comrades to have them. The old soldiers of the country who deserve pen-

sions do not want any more frauds on the roll than a citizen who never was a soldier, and you will never convince the old soldiers of this country that a man who can hold that $5,000-a-year job down is an invalid and a physical wreck and incapacitated to labor. Moreover, we need not expect, and nobody will expect, that department to be well administered if the chief executive officer is a man who is drawing a pension to which he is not entitled himself.

I adverted to this, not that I expect to direct my remarks further now to it, but to call attention to the fact that in a few days a head of that department will be named. Therefore, now is the time for Democrats to look out for honest and efficient administrators. Do not let us make the same mistake the Republicans have lately made, and, so far as I know, the same mistake Democrats in former times may have made. Get as the chief officer of that department an old soldier of a high type, which characterizes the great majority of those who now draw pensions.

I had risen, however, Mr. Chairman, to speak on another line. The Republican platform last enunciated says that—

> We commend the earnest effort of the Republican administration to secure greater economy, and increase the efficiency in the conduct of public business. Extravagant appropriations and the creation of unnecessary offices are an injustice to the taxpayer and a bad example to the citizen.

The Roosevelt platform, on the same line, said:

> We pledge our party to a readjustment of the business methods of the National Government and a proper coordination of the Federal bureaus which increase the economy and efficiency of the Government service, prevent duplications, and secure better results to the taxpayer for every dollar expended.

The Democratic platform said:

> We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriations of recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand a return to that simplicity and economy which befits a Democratic Government and a reduction in the number of useless officers, the salaries of which drain the substance of the people.

Here we see that all three political parties, which went to the people last November proclaimed against wasteful extravagance and unjustified expenditure of public money. The Republicans had been in power for many years and they pointed out that henceforth vast extravagance would be curtailed; the new party, seeking the approval of the people, announced that there was necessity for the same thing; the victorious party, with the light of the past legislation before them and with full consciousness of what the future held out, denounced the waste of the money wrung from the people by the Republicans and demanded a return to simplicity and economy.

The people took our party at their word. They had a right to if you can believe what men say in declarations of principles and policies. The concluding paragraph of our platform says:

> Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign.

We reiterated these pledges during the campaign, we pledged the people we would keep them when intrusted with power. The supreme pledge of our platform was lowering taxes, abating Republican extravagance, and retrenching public expenditure; that if we were charged with the responsibility of government the profligate waste of the past Republican administrations would cease, and that the wasteful expenditure of the people's toil money would come to an end. How can that be done? There are about 14 great appropriation bills. If these bills carry a reduction, our pledges will be performed. If these bills do not carry a reduction our pledges can not be performed, but they will be repudiated. The bare statement of the case makes this conclusion self-evident. Let me, then, take up the appropriation bills one by one. The agricultural appropriation bill up to the Senate now is but nominally increased. The Army bill increases by approximately $3,000,000 the previous appropriation. Gentlemen, are we carrying out our pledge to the people that we told them we would live up to in office as well as during the campaign? The diplomatic and consular bill, you know the increase there; the District of Columbia bill, you know the increase there; the fortifications bill, you know something of the increase of a million and a fraction there.

Mr. SHERLEY. Will the gentleman yield?

Mr. RODDENBERY. No; I do not yield.

Mr. SHERLEY. I would like to have the gentleman make a statement about the fortifications bill, as I am responsible for that bill.

The CHAIRMAN. Will the gentleman yield?

Mr. RODDENBERY. No; I will not yield. The gentleman can correct any statement I make. I state again that that bill is larger than it was for the present appropriation year, therefore our pledge has not been executed there. The Indian appropriation bill has shriveled a little from providential causes.

The legislative, executive, and judicial bill is one of the fixed charges of the Government, and in view of the fact that Congress will soon be increased by forty-odd Members and their secretaries and other charges, of course, we were obliged to meet the conditions as they presented themselves to us. The Military Academy bill is next; you know the status of that bill. The naval appropriation bill is increased practically $30,000,000. We denounced the past extravagance of expenditure of Republicans, and now what have we in this bill to prove the justice of that denunciation? We said in our platform that our pledges are to be kept in office as well as relied upon to get into office. Does the $30,000,000 in the naval bill repudiate our platform or not?

Mr. MURRAY. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield?

Mr. RODDENBERY. I can not yield to my colleague.

The CHAIRMAN. The gentleman declines to yield.

Mr. RODDENBERY. The pension appropriation bill is next, and it is now before us, carrying $180,000,000, and $15,000,000 more, as deficiency, yet to come in another bill. I said over a year ago, when this propaganda was on, that the budget on this item would go to $200,000,000, and gentlemen smiled. It is already on the threshold of it. Ah, but you say a certain general pension bill has been passed in the meantime. Of course, that is true, and, gentlemen, I will not discuss it now; but a Democratic House passed it, and if this is to our credit, take credit for it; if it is not, we must take the discredit.

Mr. BARTLETT. May I ask the gentleman—I will give him some time——

Mr. RODDENBERY. I yield.

Mr. BARTLETT. The Democratic convention which made that platform, and every member of it, knew at the time it made that declaration that that pension bill had been passed and that it would increase the payment of pensions, estimated at from thirty to forty or fifty million dollars, did not they?

Mr. RODDENBERY. I so understand.

Mr. BARTLETT. In spite of that, they put a plank in the platform providing for liberal pensions, did they not?

Mr. RODDENBERY. I think they did.

Mr. MURRAY. Mr. Chairman——

Mr. RODDENBERY. If my colleague is in position to extend my time somewhat, I can yield; but if not, I can not yield.

Mr. BARTLETT. I am not in that position just now. I will give the gentleman the time I took to ask him a question.

Mr. RODDENBERY. Then, I can not yield. The rivers and harbors bill has passed the House and is practically twice as large as the previous bill. There is about $17,000,000 to $20,000,000 increase. The sundry civil bill we have not seen yet. The deficiency bill has not come in yet. These enumerated bills cover substantially all the annual appropriations. Gentlemen, where is the bill in which we have carried out our pledge to reduce the expenditure of the people's money and correct Republican extravagance? Now, I see gentlemen standing around, who want to ask me what our platform says about liberal pensions; what it says about extending our river improvements; what it says about an efficient Navy, et cetera. I see them wanting to rise up now. Gentlemen, we are all familiar with the platform, but where is the man who will say that those declarations were intended to nullify our charge against the Republicans or their wasteful and profligate expenditure of public money? Where is the man who can deny our pledge to reduce instead of increase appropriations? Do gentlemen argue that the declarations of our platform touching these great public improvements were intended to nullify that plank of the platform and to O. K. the previous expenditures of the Republicans? If so, then, it was a deliberate effort to deceive the American people. It was not intended to be done. Where are the useless salaries that these Republicans have been putting in the appropriation bills, and that we have been raising hades about for 16 years, that we have trimmed down? Where are the Republican fraudulent and useless offices and projects that we charged to be leeches on the people that we have cut out? Where are the money reforms that we have worked?

Gentlemen, I am speaking as a Democrat who needs no certificate to that Democracy, and invites any criticism that gentlemen here or elsewhere may desire to indulge. I do not belong to that school of Democrats who will announce a platform and run on it to get into office, and then by every appropriation bill we pass violate it in letter and in spirit. In our platform we charged that "lavish appropriations of recent Republican Congresses" kept "taxes high." Why, do not the pending more lavish appropriations convict us, as Democrats, of the same charge? The people will not be deceived; we can

not be deceived. We may just as well face it. As painful as the facts are, I am speaking the plain unvarnished truth. I make these observations now, gentlemen, at a time when it is not too late to keep the faith and to live up to our platform. If our party meant what it said when it pledged that we would cut out unrighteous expenditure and extravagant appropriations, we have time and power yet in which to do it. Upon the pretense of party unity I will not acquiesce in party perfidy. Gentlemen, a Democratic President will be inaugurated inside of three weeks. A Democratic House will convene here and a Democratic Senate will convene yonder. Why not halt now and relieve Democrats who give up their office on the 4th of March, and a hundred Republicans who go out here to be supplanted by Democrats on the 4th of March, and a Senate that will be transferred from Republicanism to Democracy—why not let these freshly chosen servants whom the voters have elected shape and frame these charges on the Federal revenue? What folly—I can not say hypocrisy—to let the retiring Congress incur the largest charge upon the Treasury in the history of the Republic, and then expect the next extra session to cut down the revenues needed to pay them by a substantial revision of the tariff. It will confront us on every schedule. Apologists will say that this is the short session, and that it is customary that appropriations should be passed now. If we can pass them, and do it in compliance and performance with our platform, well and good; but if on their face they show a violation of our pledge to the people, no custom will justify it. Such a course will at the outset impede our President in every step he takes to be true to the people and his high office.

Gentlemen, these bills not only carry $115,000,000 more than the Republicans ever appropriated, but the naval bill, the rivers and harbors bill, the military bill, and other bills, authorize contracts by the Government to be carried out in the future, which during each succeeding year will be a tax and a burden during the entire term of Mr. Wilson's administration. I declare it to be a violation of our duty to the party as well as to the country to pass these exorbitant bills, carrying appropriations and carrying future obligations to appropriate, and unload them upon a Democratic President on the very threshold of his administration.

You say to delay these bills until the extra session will break precedents. If we have the President I think we have, we will break several precedents. Every precedent broken will be a bad precedent and broken for the purpose of living up to our pledges and keeping faith with the people. If we as Democrats do not break precedents, we will accomplish nothing. In order to preserve inviolate our political honor and carry into effect our platform utterances it absolutely demands the breaking of precedents. Thus only will we overthrow misrule and bring to pass the plighted promise to give the country a return to simplicity and economy. The President elect has already broken one or two precedents. Our platform says to return to "simplicity and economy." He has put the ring into the nose of this King George coronation ball and led it around to the back door and said, "You are about to inaugurate a Democratic President with a Belshazzar's feast. Get thee hence"; and a lordly precedent is shattered. So far as the President elect is concerned, he has lived up to the simplicity part of it. We stand to-day face to face with our obligation to live up to the economy part of it. Shall we let our President, on the 4th of March, come into office confronted and handicapped at the beginning of his administration with the most appalling and profligate expenditure of public money the Republic has ever seen? We are responsible for these outrages, not the Republicans. This is a Democratic House. I implore you, shall the first Democratic President for nearly two decades be hobbled and finally slaughtered in the house of his friends? Are our platform declarations of economy to be lived up to in office as scrupulously as we were diligent in denouncing this very extravagance in the campaign?

Gentlemen, let the Democrats who have lately been elected carry out their pledges to the people. We can meet in extra session on the 4th of March or the 5th of March or at any early time and pass these bills rather than violate party honor or sacrifice and surrender public confidence. There is no urgency for these appropriations. It will be the 1st of July before any of this money can be expended. The present appropriations are already made to that date. This great and apparently irresistible pressure to ram through these bills now in the dying hours of a Congress make me suspect that there are certain interests of sinister purpose in this country which know that unless they can get their hands deep down into the Public Treasury now, saddling onerous burdens on honest toil, they will not be able to do it after the 4th of March. The Democratic House and Democratic Senate which are in the extra session to levy the taxes ought also, by every token of reason and justice, control and expend the taxes which they levy.

Gentlemen, I am willing to join you in a concerted crusade to postpone legislation which violates our pledge to the people. But whether you do it or not, let me say to you that henceforth, between now and the 4th of March, as a Representative and as a Democrat, with our platform as the contract our party has made with the people, so far as I can, though but little it be, this violation of solemn party pledges will not dishonor the statute books unresisted and unopposed. We charged the Republicans in the express language of our platform with wringing money from the people's toil by extravagant appropriations.

Are we going to expect the people to think that the Republicans have been grafting on the Treasury and recklessly wasting the substance of the people when we appropriate all they did and a hundred millions more the first dash out of the box? [Laughter.] I am almost ready to apologize to the disconsolate Republicans if that is so. [Applause.] On the 4th of March we will bid a lot of them good-by, but if this unprecedented and indefensible extravagance is a sample of Democratic government, on the 4th of March, 1915, there will be a lot of them here to tell us "Howdy," and in a few hours thereafter there will be several of us who will go to them and say, "Our people have called us home; good-by."

We need not take the people of this country for a set of driveling idiots or infernal fools. Do we suppose that with a Democratic propaganda, waged for 16 years, on the argument that the Republicans were robbing the people, were putting intolerable burdens upon their backs, were raping the Public Treasury, and ought to be turned out, when they take our word for it and turn them out and turn us in, that they will not chastise us with brands of burning shame and hurl us from power when we not only rape the Treasury as the Republicans did, but with a $115,000,000 increase dagger cut its throat and stab party integrity to the heart? [Applause on the Republican side.]

Gentlemen, I have no apologies to make for these remarks. My innermost soul yearns to see the party of Jefferson live up to its political contract just as its members live up to their private obligations. I desire to see the Democratic Party perform its pledges to the people just as we perform our pledges in private affairs. Every Democrat knows the staggering total of these impending appropriations, if enacted, will be a violation of public faith and party trust as indefensible as the betrayal of the Republicans in passing the Payne tariff law for which the people in 1910 rebuked them. I appeal to the Members here who love vital Democracy and have burning in their hearts the spirit of fidelity to the people, to rise now and let the Democratic powers on this side—if powers they be—understand that they can not pass this legislation unless it squares with the platform on which our party campaign was conducted, and unless it is in accordance with the contract we made with the people when they intrusted us with power. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Chairman, I will ask the gentleman from Iowa [Mr. GOOD] to consume some of his time.

Mr. GOOD. Mr. Chairman, I yield 30 minutes to the gentleman from Massachusetts [Mr. GARDNER].

The CHAIRMAN. The gentleman from Massachusetts [Mr. GARDNER] is recognized for 30 minutes.

Mr. GARDNER of Massachusetts. Mr. Chairman, it will not be possible to expedite business in this body until there is a thorough revision of the rules of the House. There ought to have been a thorough revision long ago, but every time that the rules of the House have been altered it has been in the middle of a hair-pulling match.

I am very, very tired of the argument that our rules must be good rules because they have existed since the beginning of the Government. You might just as well say that quill pens and mounted messengers would serve our purposes as well as typewriters and telephones. Why, Mr. Chairman, a self-respecting parliament of pterodactyls or dinosaurs would get rid of half these rules. If it is possible so to draft them, rules ought to be so simple that an ordinary Member of the House of Representatives might have some sort of a chance on this floor even against the most expert leader of the minority.

I used to wonder why a thorough revision has been so long delayed. I discovered the reason by asking myself this question, "GARDNER, why is it that you advocate a complete revision of the rules when you know at heart that you do not want them revised?" I believe that the rules ought to be revised, and yet it will rob me of a good deal of my stock in trade if a revision takes place, because familiarity with the mysteries of the rules gives me a great advantage. A good many other men are in the same situation as I am. We advocate the revision

of the rules; we will support a proposal for revision; but at heart there is not one of us who is praying for it to take place.

During this Congress I have introduced a number of resolutions looking to changes of the rules in certain respects. For instance, I have introduced a resolution aimed against the filibustering which takes place on Calendar Wednesday. Mr. Chairman, I was the stork that brought Calendar Wednesday, and I am rather ashamed of the infant which I left on the doorstep of this body. But, to tell you the truth, he has been led astray by persons in this House who ought to have nursed him tenderly.

Then, again, in this Congress I introduced a resolution looking to a change in our absurd system of pairs, under which the attitude of Members on pending legislation is concealed rather than revealed. I have introduced a resolution taking away from the Speaker the power of arbitrary recognition in the matter of motions to suspend the rules. I do not mean to say that the Speaker has too much power. I doubt whether he has enough power. Perhaps we have gone from one extreme to the other. Nevertheless, I have always believed that, whenever possible, recognition should be governed by rules and customs. Ordinarily, recognition ought to be a right. Certainly it ought never to be a favor.

Mr. SHERLEY. Will the gentleman tell us where he proposes to place the power touching recognition on a motion to suspend the rules?

Mr. GARDNER of Massachusetts. My resolution requires the Speaker to recognize Members on suspension day. The gentleman would naturally say that under such a rule recognition would depend on youth, agility, and vociferousness. To a greater or less extent that is true.

Mr. SHERLEY. I am not criticizing the gentleman's resolution. I am asking for information.

Mr. GARDNER of Massachusetts. I understand that the gentleman is not criticizing. I am not satisfied that the resolution I have introduced would accomplish the object which I seek; but with good faith on the part of the Speaker I think it would do so.

Mr. Chairman, I do not intend this afternoon to discuss the rules in general except so far as they relate to the clarity of our statutes. I am here to talk about certain measures which are pending before this House—measures which soon will be reported—measures whose adoption, I believe, will result in such an improvement in the drafting of our laws, that in the future their lucidity and simplicity will equal the standard set by the statutes of Great Britain.

In Great Britain the members of the cabinet have at their service an official known as the parliamentary counsel, together with his assistants. The business of the counsel's office is to draft bills for the administrative officers of the Government and to watch these bills on their passage through Parliament. As you know, Mr. Chairman, almost all the public laws which the British Parliament enacts originate with the cabinet, and the cabinet embraces the heads of the principal administrative departments of the Government. Under the British system the heads of departments are selected from the membership of Parliament.

When a bill is on its passage through Congress there are certain stages where it must be carefully watched or its meaning may be rendered obscure, contradictory, or even repugnant to the object which it is sought to attain. When an individual Member first introduces an important bill it makes very little difference whether it is well drafted or not. In reality it is but little more than a suggestion for legislation. Everyone here knows that all the important bills are reported after they are thrashed out by the committee which has jurisdiction. In reality an important bill when reported is a combination of many men's ideas, although it may carry the name of the committee chairman.

The first point, then, at which we need legislative counsel occurs when a committee is about to report a bill, for it is the bill as reported, not the bill as introduced, which is going to be considered by the House. Accordingly, at the reporting stage occurs our first opportunity of going wrong.

The next opportunity for the injection of confusion into a measure occurs when amendments are offered either in the House or in Committee of the Whole. Ill-considered amendments, plausible-sounding amendments, are often adopted by the House without the slightest consideration as to what effect those amendments in one section are going to have on some other section that has not been read, or, perhaps, has been read and agreed to. There is no let up when once a measure is under way toward its passage; no time to reconcile inconsistencies produced by hasty amendment, no chance to reform faulty or obscure wording.

The next opportunity for confusion arises when the bill is in conference. Nothing could have been clearer than the necessity of legislative counsel in the conferences that took place on the immigration bill. We conferees were criticized and forced to confer three times before we got that bill right. Very likely we might have got it right the first time if we had had legislative counsel to aid us. It is almost certain that we should have required but two conferences. But the provision of legislative counsel will not by itself insure lucidity and uniformity in our statutes. We ought to have a reference bureau as a part of the Library. It ought to be possible for Members of Congress, for chairmen of committees, for the legislative counsel to go to the Library and say, "Present to us the comparative legislation of different countries and different States on the pending question; present to us the arguments for it and the arguments against it; show us what has been done on this same line in this country or elsewhere; show us with what statutes we must beware of conflict. Give us this information in available form, concentrated and digested." Wisconsin was the pioneer State in adopting the reference-bureau system and the official bill drafting system, and certainly the statutes of Wisconsin are models of clearness.

If our statutes are to be lucid, I regard it as essential, first, that we install a reference bureau in the Library so that we may readily secure the information on which to act; and, second, that we employ legislative counselors, appointed by the Speaker for the House of Representatives. Presumably the Senate would adopt a similar plan. These legislative counselors should serve with committees when a bill is about to be reported. They should also, on occasion, have the privilege of the floor when bills of importance are up, so as to guard against the adoption of ill-drafted amendments. They should be at the service of the House managers in conferences between the two Houses.

But even then, when we have established the reference bureau, when we have supplied the legislative counsel, we must go a step further and provide ample opportunity under our rules for the counselors to exercise their functions. Suppose that the House adopts an ill-considered amendment to some bill. The counsel may be aware of the fact that the amendment distorts the meaning of half a dozen sections which have already been agreed to. He may know that the amendment creates a new crime and yet no new penalty to correspond, or that its wording covers a far wider scope than is intended. Of what use is all that knowledge if no opportunity is offered to find out just what sections are distorted, just what laws are repealed, and just what steps should be taken to get the matter into proper form? Unless a definite opportunity is offered for corrections that bill, counselors or no counselors, must go to the Senate, as it does to-day, with all its iniquities upon it.

And so I advocate the creation of a committee on bills in the third reading. To-day when a bill is before the House the stages of engrossment and third reading are consolidated. I propose their separation. To-day when all amendments have been dealt with, the question is on the engrossment and third reading of the bill. If that question is answered in the affirmative, and if the previous question has been ordered according to custom, the bill is at once put upon its passage unless a motion to recommit is interposed.

I propose that after the amendments are disposed of the question shall be on the third reading only of bills and joint resolutions. If that question is answered in the affirmative, I propose that bills and resolutions shall go at once to the committee on bills in the third reading for correction. The committee on bills in the third reading, with the assistance of the legislative counselors, will prune out all inconsistencies and false references, simplify all complexities in wording, reconcile the measure with existing statutes, and then report it back to the House. The committee should be authorized to make minor changes, but every change of importance should be reported as an amendment for the House to act upon, and every change, important or unimportant, should be clearly designated. Then, Mr. Chairman, after the report had been received and the amendments disposed of, the question would come on the passage of the bill. In this way we can at least insure the correct drafting of bills sent to the Senate. If the Senate were to adopt a similar system, the toils of a conference committee would be vastly less.

Adopting these reforms, to wit, the reference bureau, the legislative counsel, and the committee on bills in the third reading, separating the stages of the third reading and engrossment, will go far to clarify our statutes. In addition, if it can be devised, I should like to see some system adopted under which important amendments might be printed in the RECORD before they are offered. I am aware of the difficulties that present themselves in trying to adopt a change of that sort. We

might adopt the system of the British Parliament, which, to some extent, remedies the evil. If we could do so, it would help still further to clarify our statutes.

There is another reform which I hope to see adopted in time, with the same purpose in view. We try too much to work out details in our statutes. We ought to trust more to our executive officers. We try to prescribe, work out, the administration of our laws down to the last particular, apparently out of jealousy or mistrust of our departmental heads.

To use the immigration bill as an illustration once more: That bill prescribes down to the smallest detail the manner in which the reading ability of an immigrant shall be tested. Infinite and perplexing detail is characteristic of the whole of our immigration law. Now, if we only could make up our minds to place sufficient confidence in our Secretaries of Commerce and Labor no such minutiæ need be inserted. It would be quite sufficient to lay down certain broad provisions to be adjusted and enforced by rules and regulations to be laid down by the Secretary of Commerce and Labor.

The time has come—in fact, it came some time ago—when it is the permanent officials who really conduct the departments of this Government. Whether a Secretary of Commerce and Labor is favorable or unfavorable to immigration, except in a very few exceptional instances, the administration of the immigration law is certain to be substantially the same. There will shortly be presented to this House for its consideration a resolution prepared by the gentleman from Illinois [Mr. EVANS]. This resolution will provide for the appointment of legislative counselors by the Speaker. The gentleman from Illinois will likewise report in a new draft a bill introduced by the gentleman from Wisconsin [Mr. NELSON] providing for a legislative reference bureau. Both the resolution and the bill have the unanimous approval of the Committee on the Library. Incidentally I might say that the gentleman from Pennsylvania [Mr. WILSON] also introduced a bill somewhat similar to that introduced by the gentleman from Wisconsin [Mr. NELSON]. However, inasmuch as Mr. NELSON organized the hearings and brought us a wealth of information upon the subject, and, moreover, pressed the matter with the greatest intelligence, diligence, and convincingness, the committee agreed with Mr. EVANS that the measure ought to carry Mr. NELSON'S name.

Mr. GOLDFOGLE. Mr. Chairman, will the gentleman yield?

Mr. GARDNER of Massachusetts. Yes.

Mr. GOLDFOGLE. From what body would the legislative counselors be drawn? From this body?

Mr. GARDNER of Massachusetts. Oh, no; they would be the very best lawyers we could get for the price. I am informed that the Parliament of Great Britain pays $12,500 for its chief counselor and $10,000 for its second counselor.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. GARDNER of Massachusetts. Certainly.

Mr. LONGWORTH. Does not the gentleman think it would also be a good rule to provide that bills introduced to amend statutes should on the face of the bill show the language as it would read if the amendment prevailed, either in italics or otherwise?

Mr. GARDNER of Massachusetts. I think, at all events, that every bill reported by a committee ought to show on its face the resultant reading of any statute which it seeks to amend. I am not sure that it is essential to require so much when a Member introduces a bill. I am confident that every bill to amend an existing law ought, when reported from a committee, to show not only the changes proposed but also the resultant language of the law which would follow the enactment of the amendatory measure.

Mr. LONGWORTH. That method is in vogue in the Ohio Legislature. Before it can be considered, the bill must show upon its face the new wording of the statute and the statute as it existed.

Mr. GARDNER of Massachusetts. Before it may be considered by a standing committee?

Mr. LONGWORTH. Yes.

Mr. GARDNER of Massachusetts. Suppose a bill in conflict with that rule is introduced into the Ohio Legislature, what becomes of it?

Mr. LONGWORTH. I have forgotten now whether a motion to reject would be in order, but it is such a well-fixed rule that no member would think of introducing the bill and not complying with it.

Mr. GARDNER of Massachusetts. Offhand, I should say that such a rule sounds wise.

Mr. MURRAY. Mr. Chairman, I would like to inquire if my colleague, who has given me a good deal of information since he rose, has at all considered the amendment to the rules suggested by the gentleman from Kentucky [Mr. SHERLEY] creating a committee on estimates and expenditures.

Mr. GARDNER of Massachusetts. I have that in my portfolio; yes.

Mr. MURRAY. And whether the gentleman has any opinions which he wishes to express upon that subject.

Mr. GARDNER of Massachusetts. I have not gone into it critically. So far as I have formed an opinion, I am entirely in agreement with the purpose of that resolution of the gentleman from Kentucky.

Mr. SHERLEY. Mr. Chairman, if the gentleman will permit, I will say that I introduced another resolution dealing with another matter more directly in connection with what the gentleman said to-day——

Mr. GARDNER of Massachusetts. I have that other resolution also on my desk.

Mr. SHERLEY. That was a resolution introduced some years ago for the appointment of a clerk by the Speaker, who should hold office during good behavior, and who should bear the same relation to substantive law that the parliamentary clerk bears to parliamentary law.

Mr. GARDNER of Massachusetts. I have the gentleman's resolution on my desk. I did not think to mention the fact that he had introduced it at a prior Congress, but I was aware of the fact. It was an omission on my part not to call attention to it.

Mr. GOLDFOGLE. Will the gentleman yield?

Mr. GARDNER of Massachusetts. I will yield.

Mr. GOLDFOGLE. Has the gentleman from Massachusetts considered the advisability of a rule requiring the furnishing to each Member, either in his room or on his desk, a copy of all the public bills introduced, so they may not, as is now the case, be taken unawares when a bill suddenly comes up, either by way of unanimous consent or otherwise?

Mr. GARDNER of Massachusetts. I have not considered that idea, and, as a casual opinion, I do not think that such a rule is required. Advance information as to the consideration of measures is fairly accessible to Members. Not always, but frequently, a Member's lack of diligence results in his being taken unawares.

Mr. GOLDFOGLE. That is true; but would it not be better if we have some rule, so that bills might go to the Members' rooms or——

Mr. GARDNER of Massachusetts. I can not agree that we are paid $7,500 to do nothing but say yea and nay and attend to our constituents' chores.

Mr. GOLDFOGLE. I agree with the gentleman on that.

Mr. GARDNER of Massachusetts. I really think that one of the great faults of this House is that Members do not do the drudgery which is necessary in order to train themselves to keep track of what is going on legislatively.

Mr. MARTIN of South Dakota. If the gentleman will permit, it occurred to me while the gentleman has been speaking that he has now struck at one of the great difficulties about legislation in the House, and the query has been in my mind whether if we create an expert to do all the details of this work it will not lead to still greater carelessness upon the part of individual Members?

Mr. GARDNER of Massachusetts. The gentleman from South Dakota mistakes the purpose of the resolution. The resolution does not supply legislative counselors for the use of any individual Members. There is no reason why we should not draft our own bills. If we do not know how to do it, we ought to learn. If we can not learn, we might as well give way to some one better qualified to earn a salary of $7,500 per annum. It is of no importance to the Nation whether the bill which I introduce or which you introduce is correctly drawn; the important question is whether the bill which comes out of the committee is correctly drawn. The Evans resolution provides that the legislative counselor shall be available for committees, not for individual Members. If you or I wish to introduce a bill on any subject, it is a great deal better for everyone if we puzzle it out ourselves. That is the way in which you have acquired the training which has given you your desirable standing in the House of Representatives. You have worked things out for yourself.

Mr. MARTIN of South Dakota. Does not that at least tend to develop in the House a few individuals, regarding a few particular measures, who do go to the bottom of and become experts upon that subject, and is not that a very valuable asset in legislation?

Mr. GARDNER of Massachusetts. Unquestionably; the specialist is very valuable.

Mr. MARTIN of South Dakota. It occurs to me whether or not the body of our law is not now so large that if we depend upon a legislative counselor or a body of legislative counselors who become experts upon a part of it that it may lessen this habit of individual Members becoming expert in certain branches of legislation.

Mr. GARDNER of Massachusetts. It is largely a question of judgment as to where the balance should rest. Of course I can see, as the gentleman does, the objection to hiring men to do our work for us, and for that reason I opposed in committee the proposition that these counselors should be available for the use of private Members. I took the point of view that the public has no interest in the accuracy of the drafting of a bill until the time arrives when the committee report is about to be presented.

Now, Mr. Chairman, to go on at the point where I left off. I have said that Mr. EVANS has prepared and will report a resolution providing for legislative counselors. I have told you that Mr. EVANS will also report in a new draft the Nelson bill for a reference bureau. The new draft of Mr. NELSON'S bill strikes out all after the enacting clause and inserts the text of the Evans or committee bill, but that does not mean that Mr. NELSON'S ideas are stricken out. As a matter of fact the Evans draft is replete with Mr. NELSON'S ideas, but for the sake of convenience we have adopted the method of striking out all after the enacting clause.

Mr. HARDWICK. I desire to ask the gentleman, when does the gentleman hope to obtain consideration for this measure?

Mr. GARDNER of Massachusetts. Consideration of it can only be obtained by unanimous consent, which means, I suppose, that the matter must go over until the next Congress.

The fact is that these measures have not actually as yet been reported, although a report has been ordered. The gentleman realizes, however, that in order to get the mind of the House on any new question it usually is necessary to start the agitation some time beforehand.

Mr. HARDWICK. How many of these propositions which the gentleman has been discussing belong properly to the jurisdiction of the Committee on Rules?

Mr. GARDNER of Massachusetts. The resolution which I myself am going to introduce to-day, providing for a committee on bills in the third reading—and it is rather an elaborate rule—must of necessity go to the Committee on Rules. The proposition for the library reference bureau falls within the jurisdiction of the Library Committee. As originally introduced the library reference bureau bill provided for a bill-drafting department, with legislative counselors for the service of Senators and Representatives. The Library Committee thought it better to separate the question of a reference bureau from the counselor question. Hence the separate Evans resolution for counselors.

Mr. HARDWICK. Just a moment, if the gentleman please. The counselors matter would not belong at all to the Library Committee, would it?

Mr. GARDNER of Massachusetts. Well, we discussed that question with Mr. Crisp, and I admit that our jurisdiction would be doubtful if the matter were to come up entirely anew. But the Library Committee was given jurisdiction of the whole question when the original Nelson bill was referred to it.

Mr. SHERLEY. If the gentleman will permit, my resolution, which dealt with one subject, went to the Committee on Rules.

Mr. GARDNER of Massachusetts. Mr. Chairman, the fact is this. The four principal bills dealing with this question were introduced by Senator OWEN, Senator LA FOLLETTE, Mr. NELSON, and Mr. WILSON of Pennsylvania. All four of those bills combined the legislative reference bureau and the counselors into a separate division of the Library, under charge of the Librarian of Congress. That was the origin of our jurisdiction in the matter. Now, of course, we had no jurisdiction of any rule which contemplates a change in the manner of considering bills in this House. I, as a private Member, may introduce such a rule, and, in fact, I have drawn such a rule and propose to introduce it, but there is no way by which I can steer it within the jurisdiction of the Library Committee.

Of course, this whole question probably will not arise until the next Congress, but I sought this opportunity to explain the whole scope of our plan and the correlation of its various parts, in order, if I might, to interest the Members in this effort to improve the composition of our statutes. I felt that some one ought to explain that the problem, in our opinion, must be dealt with in separate parts by different committees. Without a full knowledge on the part of the House of the entire plan I believed that we should be exceptionally handicapped in its proper execution.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOOD. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. SHERWOOD].

Mr. SHERWOOD. Mr. Chairman, I read from the report accompanying this bill:

> In the hearings before the committee it is stated that $30,000,000 will be required to make payment of pensions under the act of May 11, 1912.

From all the information that I can obtain from the Pension Office, no later ago than last week, the bill of May 11, 1912, will not take out of the Federal Treasury in the ensuing year over $22,000,000. The statistics that I was able to obtain from the Pension Office on last Thursday are as follows:

Three hundred thousand cases have already been adjudicated or passed upon. The average increase on those 300,000 cases is $6 per month, or $72 per year. That makes the aggregate increase $21,600,000 on account of this bill.

The soldiers of the Civil War are dying at the rate of about 3,000 per month, or about 36,000 per year, and the number of deaths that will occur within the ensuing year will more than offset the pensions to be further allowed, which amount to a very few outside of those that are in dispute, where the evidence is not sufficient. I find also that this increase of pensions is largely on account of the war against the Filipinos or in the Philippine Islands. There are now on the pension rolls 50,638 soldiers outside of the soldiers of the Civil War, and there are not over 1,300 soldiers outside of the soldiers of the Spanish-American War and the Philippine insurrection, which would include the soldiers of the War with Mexico.

I find the average pension paid to the soldiers who lost their health in the Philippines, or from disability, is $160 per year, an aggregate of $9,542,080. That increase is not on account of the Sherwood pension bill passed last May, but it is on account of pensions drawn under other pensions laws and in other wars.

You will remember that when the bill known as the Sherwood pension bill was under discussion in the House there were amendments put on that bill on the floor of the House that increased the aggregate over and above the amount of the bill as framed by the committee between $11,000,000 and $12,000,000, and you will recall also that on a stand-up vote in this House, when the House was in Committee of the Whole, it lacked only 23 votes, or a change of 13 votes, to have passed a bill that would have carried $75,000,000, not for pensions based on service but based upon age alone.

I think it is due to the House to know that when that bill came back from the Senate, with the Pension Office report claiming that the original House bill would carry $75,000,000, I stated on the floor of this House that this bill as amended in the Senate would not carry over $22,000,000.

These figures are fairly verified by the statistics from the Pension Office, obtained last week, indicating that it will not carry over $21,600,000. Hence the charge is unfounded that we have increased by $75,000,000 the pension roll on behalf of the soldiers of the Civil War—a charge made in the New York Herald last week; also charging me with the responsibility of that bill. Instead of its being $75,000,000, it will be less than $22,000,000. I have an idea—and I do not want to advise this committee—that the pensions under that act could be cut at least $8,000,000 and still leave enough to pay all the pensions under that law.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. SHERWOOD. Yes.

Mr. BARTLETT. Will the gentleman take the responsibility of offering an amendment to reduce the amount?

Mr. SHERWOOD. I would not take the responsibility of advising any committee of this House, because I have perfect confidence in the judgment of the committee.

Mr. BARTLETT. I will say to the gentleman from Ohio that if we could reduce this amount I for one would be very glad to do it.

Mr. SHERWOOD. I am giving you the best figures I could obtain from the Pension Office.

Mr. BARTLETT. We had the officials from the Pension Office before us. They said before that it would be nearly $75,000,000, and they came near proving it from the estimates we have.

The CHAIRMAN. The time of the gentleman has expired.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. BULKLEY having taken the chair as Speaker pro tempore, a message from the President was communicated to the House of Representatives, by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On February 7, 1913:

H. R. 23451. An act to pay certain employees of the Government for injuries received while in the discharge of their duties;

H. R. 2359. An act to refund certain tonnage taxes and light dues;

H. R. 12813. An act to refund duties collected on lace-making and other machines and parts or accessories thereof imported subsequently to August 5, 1909, and prior to January 1, 1911;

H. R. 20385. An act to reimburse Charles S. Jackson; and

H. R. 24365. An act providing for the taking over by the United States Government of the Confederate cemetery at Little, Rock, Ark.

On February 10, 1913:

H. R. 25741. An act amending section 3392 of the Revised Statutes of the United States, as amended by section 32 of the act of August 5, 1909;

H. R. 26549. An act to provide for the construction or purchase of motor boat for customs service; and

H. R. 27157. An act granting an extension of time to construct a bridge across Rock River, at or near Colona Ferry, in the State of Illinois.

On February 11, 1913:

H. R. 8151. An act providing for the adjustment of the grant of lands in aid of the construction of the Corvallis and Yaquina Bay military wagon road, and of conflicting claims to lands within the limits of said grant; and

H. R. 23351. An act to amend an act entitled "An act to provide for an enlarged homestead."

On February 12, 1913:

H. R. 8861. An act for the relief of the legal representatives of Samuel Schiffer; and

H. R. 25002. An act to amend section 73 and section 76 of the act of August 27, 1894, entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes."

On February 13, 1913:

H. R. 21524. An act for the relief of Frederick H. Ferris;

H. R. 27879. An act providing authority for the Northern Pacific Railway Co. to construct a bridge across the Missouri River in sec. 36, T. 134 N., R. 79 W., in the State of North Dakota;

H. R. 27944. An act to extend the time for constructing a bridge across the Mississippi River at Minneapolis, Minn.;

H. R. 27986. An act to extend the time for constructing a bridge across the Mississippi River at Minneapolis, Minn.;

H. R. 27987. An act to extend the time for constructing a bridge across the Mississippi River at Minneapolis, Minn.;

H. R. 27988. An act to extend the time for constructing a bridge across the Mississippi River at Minneapolis, Minn.;

H. R. 28186. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes; and

H. R. 16450. An act to punish the unlawful breaking of seals of railroad cars containing interstate or foreign shipments, the unlawful entering of such cars, the stealing of freight and express packages or baggage or articles in process of transportation in interstate shipment, and the felonious asportation of such freight or express packages or baggage or articles therefrom into another district of the United States, and the felonious possession or reception of the same.

On February 14, 1913:

H. R. 15181. An act for the relief of Harry S. Wade;

H. R. 18425. An act for the relief of Simon Nager;

H. R. 28094. An act to amend section 96, chapter 5, of the act of Congress of March 3, 1911, entitled "The Judicial Code"; and

H. R. 1332. An act regulating Indian allotments disposed of by will.

PENSION APPROPRIATION BILL.

The committee resumed its session.

Mr. BARTLETT. Mr. Chairman, I yield 40 minutes to the gentleman from Texas [Mr. CALLAWAY].

The CHAIRMAN (Mr. GARRETT). The gentleman from Texas [Mr. CALLAWAY] is recognized for 40 minutes.

Mr. CALLAWAY. Mr. Chairman, I want to discuss a report (No. 1506) from the Committee on Expenditures in the Interior Department, filed by Mr. HENSLEY, chairman of the subcommittee which went to Arizona to make an investigation of the Salt River irrigation project and the irrigation project on the Gila River Indian Reservation. I was a member of that committee. We had with us Judge M. C. Burch and E. C. O'Brien from the Department of Justice and the office of the Attorney General, who rendered us material aid in our investigation and also in the preparation of this report.

Mr. Chairman, in order to make myself clearly understood, it will be necessary for me to give the gist of the desert-land laws applicable, because that is desert country, and also the gist of the reclamation act passed in June, 1902. The desert-land act provides for the sale of desert land in certain States and Territories and is, in part, as follows:

Any person of requisite age, upon payment of 25 cents per acre, may file a declaration under oath with the register and the receiver of the land district in which any desert land is situated that he intends to reclaim a tract of desert land not exceeding one section by conducting water upon same within the period of three years thereafter: *Provided, however,* That the right to the use of water by the person so conducting the same on or to any tract of desert land of 640 acres shall depend upon bona fide prior appropriation. At any time within the period of three years after filing said declaration, upon making satisfactory proof to the register and receiver of the reclamation of said tract of land in the manner aforesaid, and upon the payment to the receiver of the additional sum of $1 per acre for a tract of land not exceeding 640 acres to any one person, a patent shall be issued to him: *Provided,* That no person shall be permitted to enter more than one tract of land and not to exceed 640 acres. * * * Nothing herein contained shall prevent a claimant from making his final entry and receiving his patent at an earlier date than hereinbefore prescribed, provided that he then makes the required proof of reclamation to the aggregate extent of $3 per acre: *Provided,* That proof be further required of the cultivation of one-eighth of the land.

You can see from the excerpts that I have read that the law provides that any person may take up one section, and no more, of this land by paying 25 cents per acre, filing fees, and doing sufficient work any time within three years to amount to $3 per acre and by paying to the receiver $1 per acre on the land by him filed upon. He has three years within which to do the work, but he may do the $3 worth of work per acre within one or two years, and when the $3 worth of work per acre is done and proof of it made and $1 per acre paid he can secure his patent.

Following this act in 1902, Congress passed the national reclamation act, part of which I will read:

That upon the determination by the Secretary of the Interior that any irrigation project is practicable, he may cause to be let contracts for the construction of the same, * * * *and thereupon he shall give public notice of the lands irrigable* under such project and limit of area per entry, which limit shall represent the acreage which, in the opinion of the Secretary, may be reasonably required for the support of a family upon the lands in question; *also of the charges which shall be made per acre upon the said entries and upon lands in private ownership* which may be irrigated by the waters of the said irrigation project, *and the number of annual installments,* not exceeding 10, in which such charges shall be paid and *the time when such payments shall commence.* The *said charges shall be determined with a view of returning* to the reclamation fund THE ESTIMATED COST *of construction* of the project. * * * No right to the use of water for land in private ownership shall be sold for a tract exceeding 160 acres to any one landowner, and no such sale shall be made to any landowner unless he be an actual bona fide resident on such land, or occupant thereof residing in the neighborhood of said land, and no such right shall permanently attach until all payments therefor are made. * * * All moneys received from the above sources shall be paid into the reclamation fund. * * * *Provided,* That *when the payments required by this act are made for the major portion* of the lands irrigated from the waters of any of the works herein provided for, *then the management and operation of such irrigation works shall pass to the owners* of the lands irrigated thereby, *to be maintained at their expense* under such form of organization and under such rules and regulations as may be acceptable to the Secretary of the Interior.

The object of this act was to build reservoirs for the storing of flood water in desert-land country, and from these Government-built reservoirs to irrigate land not otherwise arable and to carry on this work in conformity with the laws of the State or Territory in which it was being done. The terms of the law required the Reclamation Service, through its engineers, to determine first *the feasibility of the project, the area* to be recovered or irrigated by the project and *the estimated cost* of completing the project and the *division of that cost into annual payments not exceeding 10.* One provision of the law is that *when the project is completed* and the payments, required by the act, are made for the major portion, *then the management and operation shall pass to the owners* to be maintained *at their expense* in such form of organization and such rules and regulations as may be acceptable to the Secretary of the Interior.

The Reclamation Department was organized from what had theretofore been the Geological Department of the Government, and Mr. F. H. Newell, now at the head of the Reclamation Service, was taken from the place of chief hydrographer in the Geological Department and put into this department.

My information is that one of the arguments used to get this reclamation act passed, which enabled the Government to build water-storage reservoirs, was the project theretofore investigated and recommended by the Army Engineers under the direction of the Geological Department, known as the San Carlos Reservoir, on the Gila River, in Arizona. The pressing reason for the examination of the Gila River site was the complaints from the Pima Indians, four or five thousand of whom lived along the Gila River, below the San Carlos dam site, where they had been irrigating land for something like 200 years. The water in the Gila River had ceased to be sufficient to answer their demands because of settlers on the river above them diverting it.

The question of supplying these Indians with water to which they had unquestioned right and to care for the Government's wards was the issue at that time pressing. The site was examined by the Government engineers, declared feasible, and estimated to cost $1,038,926. The drainage area of that reservoir was stated in that estimate to be between thirteen and fourteen thousand square miles. The investigators who made this estimate spent $40,000 in the examination of various projects in the desert country with the purpose of locating one great reservoir as an experiment at the most practicable place. San Carlos was determined on as that place, as shown by Water Paper No. 33.

A number of other places were investigated at the same time, among which was the Tonto dam site, which later became known as the Roosevelt site. It was estimated to cost $1,908,387, and the drainage area was estimated to be between five and six thousand square miles. The dam in this estimate of the Roosevelt site was to be 247 feet above the foundation, 190 feet available storage, and water capacity 840,000 acre-feet. This estimate also included a cement plant, power plant, power house, and canal, and river diversion and roads, and estimated the cost per acre-foot at $2.27. (See Storage Salt River No. 73, by Arthur P. Davis, p. 52.)

The San Carlos site was on the Indian reservation and the land to be submerged by the reservoir was Indian reservation or public lands, and the land under the dam-site irrigable by it was on the Pima Indian Reservation or public lands. This site was within 6 miles of the railroad. The Tonto site was 80 miles from the railroad, was in private ownership, and the land to be submerged by the impounded water was in private ownership, and nearly the entire area to be irrigated was in private ownership, the bulk of which had been irrigated and farmed for years.

Following the reclamation act and the organization of the Reclamation Service there was much discussion of the different sites and a determined effort on the part of proponents of each different site to get the Government to locate the first project with them. The Arizona project was switched from the San Carlos, which had theretofore been the preferred site, on account of the pressing needs of the Indians, the necessity of the Government to take care of its wards, and the other superior advantages to the Tonto or Roosevelt site.

We made an effort to find the reasons—not the pretended reasons, but the real reasons—why the switch was made, but we have been unable to satisfactorily get the facts.

Mr. Weedon, who was then and is now a citizen and newspaper man of the Gila River Valley, stated before our committee that when the question was asked Mr. Newell how the project could be switched from the San Carlos site to the Tonto or Roosevelt site he said, "Go to my friend, George H. Maxwell. He can likely point the way." George H. Maxwell was at that time in the employ of the railways of the Southwest, advertising for them and stimulating immigration and business in that country for them.

There was then made an estimate of the cost of the Roosevelt Dam and published in the first annual report of the Reclamation Service, on page 102, increasing the estimate to $1,909,387. This report was made by F. H. Newell, chief engineer. There was another discussion of the Salt River project in the second annual report of the Reclamation Service in which it was stated that the various operations were under the direction of Arthur P. Davis, supervising engineer, who was acting, also, as district engineer. The estimate was not itemized, but at the bottom of page 49, of that report, there is a statement that about 200,000 barrels of Portland cement would be needed in the work and the total cost was placed at $3,000,000. This estimate placed the top of the dam at 270 feet above the foundation and 240 feet above the channel of the stream. There is a general discussion of the Salt River project in the third annual report, but no itemized estimate made, nor any general summary of the cost. The power plant is, however, discussed relative to the pumping of underground water in the Salt River Valley in order to increase the amount of water for irrigation purposes. Statements are made in the reports from the third to the eleventh of what the cost has been, but I have found no estimate of what the final cost would be. It is proper to state, however, that the Granite Reef Diversion Dam below the mouth of the Verdi River on the Salt River was not in the original estimates, neither were the distributing canals.

The people of the Salt River Valley had some diversion dams that were answering their purpose up to 1905, and they owned the distributing system to the uttermost laterals, as stated in the second annual report of the Reclamation Service, page 46. In 1905 there were some unusual rains that washed out the diversion dams and made it necessary to put in a new system of diversion works. It was at this time that the Granite Reef Dam was determined on and negotiations begun between the Government and those owning the canal system for the Government to take over the canals on the north side of the river. Granite Reef Dam cost $622,784.04. The canal system cost about $700,000. It was proper and necessary to put in the Granite Reef Dam. It was a legitimate additional expenditure. The taking over of the canal system was, in my judgment, not proper, nor was the way in which it was taken over defendable.

The Salt River Valley Water Users' Association in their organization and incorporation got the idea from somewhere, I have not been able to locate where, that the estimated cost of the Salt River project was $3,850,000. They organized on that basis with the understanding that the reservoir would accommodate 250,000 acres of land, and divided their stock into 250,000 shares, one share for each acre, and valued them at $15 per share.

The eleventh annual report shows an expenditure of $10,851,327. This woeful discrepancy, when called to the attention of the committee, led us to believe that there was something that should be explained, and because of these discrepancies and because of the complaints from the water users on Salt River Valley, we went out there as a subcommittee to make an investigation.

Our investigation of the law and of the manner of operating the project led us to believe there was a serious question as to whether or not the Government could recover more than the original estimated cost of the project. Our judgment was that under the law those who had accepted under the original estimate could not be made to pay more than they understood at the time they accepted. I think an examination of the law will readily convince any reasonable man that there is serious question whether or not more can be collected on any acre than was estimated. The laws says: "Upon the determination by the Secretary of the Interior that a project is practicable he may cause to be let contracts, and thereupon he shall give notice of the land irrigable under such project, *also the charges which shall be made per acre upon* the said entries *and upon lands in private ownership and the number of annual installments* in which such charges shall be paid *and the time when such payment shall commence*." I think a clear reading of the law shows that the Secretary is to determine the practicability of the project, the number of acres to be included, and the cost per acre, and the number of payments into which that cost shall be divided and the time when the payments shall be made. This does not appear to me to need any construction or interpretation. It is clear language. The law says further: "*All moneys received from the above source shall be paid into the reclamation fund.*" It does not say that maintenance charges shall be charged and those operating the project may use the funds in furthering the project, but it says the moneys received from the above source shall be paid into the reclamation fund. And it further says in section 6 that the Secretary of the Interior is hereby authorized and directed to use *the funds for the operation and maintenance* of all reservoirs and reclamation works constructed under this act.

It occurs to me that this is clear, and it means that the moneys derived from the installments *shall go into the fund*, and that the moneys derived from the installments are all that the operators of the project can collect. After the above statement in section 6, the law goes on further to say that when the payments required under this act are made for the major portion of the land irrigated *then the management and operation* of such irrigation works *shall pass to the owners to be maintained at their expense.* If this does not mean that the project is to be maintained at the Government's expense until it is turned over to the owners, then I can not understand the meaning of plain English.

My view of this law is borne out by the holdings of the court in the case of Baker against Swigart, No. 2125, United States Circuit Court of Appeals for the Eastern District of Washington, northern division, Gilbert, Ross, and Hunt, circuit judges. Baker was the owner of certain land in Yakima, Wash. He made application for a water right under the Sunnyside unit of the Yakima project. His application was accepted by the Secretary of the Interior, and he was to receive water out of a ditch called the Sunnyside ditch, for which he was to pay $52 per acre in 10 annual installments. The officers of the Reclamation Service made an assessment against Baker to the extent of 95 cents per acre for the use of the water and demanded payment. He refused to pay the charges assessed, and the officers of the Reclamation Service shut off the water and threatened to continue to refuse to supply water unless the applicant paid the charges demanded from time to time, as assessed as a maintenance charge for the said ditch. He claimed that the charge was without authority of law, and the court

held that in that case, in which they cited a great number of authorities, *the Government could not collect maintenance charges*, but was confined to the original estimate divided into 10 payments. I understand that that case has been appealed to the Supreme Court. If the case is there affirmed, the Government will lose, in the Arizona project, the difference between the original estimated cost and the amount that has been expended, which has now run up to something over $12,000,000.

Mr. RUCKER of Colorado. Will the gentleman yield?

Mr. CALLAWAY. Certainly.

Mr. RUCKER of Colorado. Is it not true in reference to the matter that the gentleman speaks of that the additional amount of money to be expended was on account of an increased storing of the water and the increased cost of the dam, an consequeutly an increased area to be irrigated?

Mr. CALLAWAY. No, sir; the original area estimated to be irrigated was 250,000 acres, and the area that they now state they can irrigate is 170,000.

Mr. KINKAID of Nebraska. Will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. KINKAID of Nebraska. Did the committee ascertain whether, when the additional expenditures were made over and above the original estimate, new contracts were made with the water users binding them to accept all the new conditions and thus obligate themselves to pay the additional cost?

Mr. CALLAWAY. Yes; we did. But we found that the Government never made a contract with the people under the project at any time and had never promulgated their estimate as to what the project would cost as is required by law, but had orignally made an estimate and have gone on increasing expenditures without any consultation with the farmers under the project, with Congress, or anybody else.

Mr. KINKAID of Nebraska. Will the gentleman yield for another question?

Mr. CALLAWAY. Yes.

Mr. KINKAID of Nebraska. Was there an estimate in the first instance of the cost?

Mr. CALLAWAY. Yes; there was an estimate made, as shown by the reports of the Secretary of the Interior for 1905. I can give the gentleman the page of that. It is on page 81.

Mr. KINKAID of Nebraska. That is, an estimate is made of the cost, and the entryman is informed of that estimate?

Mr. CALLAWAY. The entrymen were informed of that; and the people in the valley organized on that basis and divided the stock into the number of shares that the estimate gave as the number of acres that could be irrigated—250,000 shares at $15 a share.

Mr. KINKAID of Nebraska. I will take the reference and look that up.

Mr. CALLAWAY. Mr. Chairman, I want to say that there were some things done that were not included in the original estimate. One of them was the building of a diversion dam at the point where they wished to turn water into the canals, and this diversion dam cost $622,784. I do not know whether or not the cost of the diversion dam was included in the estimate made by the Secretary of the Interior in his report of 1905. I have never seen an itemized estimate that reached the $3,850,000 given as the total in the report of the Secretary of the Interior for 1905. The original itemized estimates, as I have heretofore stated, are found in "Water storage on the Salt River," by Arthur Powell Davis, No. 73, page 52, and in the First Annual Report of the Reclamation Service, on page 102, and in the Second Annual Report of the Reclamation Service, page 49. None of these itemized estimates include the diversion dam or the canal system, but none of them reach $3,850,000.

The canal system was owned by the people of the valley, and they had been using it for years prior to the Government beginning this project and were irrigating something like 135,000 acres of land. It seems that it was not the original purpose of the Reclamation Service to have anything to do with the canal system, but when the diversion dams were washed out of the river by the 1905 floods and it became necessary to build new diversion dams the reclamation people then got it into their heads to take over the canal system also. This is one of the unqualified outrages perpetrated on the small landholders in the valley by the Government officials and in the interest of a few men who owned the stock of these canals.

Mr. L. C. Hill, the supervising engineer, testified that he made an investigation and paid what it would cost to parallel the canals owned by the corporations. This money went to the stockholders and the bondholders of the canals, and the people of the valley, who had paid $12.50 per acre for what they called indefeasible water rights—that is, the right to have water conveyed through these canals to their land—were ignored and their indefeasible water rights scaled off, and what they had theretofore regarded as an appurtenance to their lands confiscated, and these canals charged up anew to the whole people against their lands as part of the project.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. CALLAWAY. Certainly.

Mr. GREEN of Iowa. Is it not a fact that in addition to that they did in fact parallel some of those canals with a canal just practically the same size?

Mr. CALLAWAY. Yes; and I am going to come to that a little later. If I do not, I wish the gentleman would call my attention to it.

Mr. HILL. Mr. Chairman, before the gentleman leaves that I would like to ask him a question. Did I understand the gentleman correctly that the cost of maintenance was not a proper charge to the users of the water?

Mr. CALLAWAY. Here is a decision rendered by the United States Circuit Court of Appeals for the Ninth Circuit, Baker *v.* Swigart, No. 2125, State of Washington, holding that the maintenance charge is not a thing that can be assessed and collected by the Government from the users, unless included in the estimate and parceled in the 10 payments.

Mr. HILL. And the gentleman understands that in all these irrigation projects in the future the Government has to maintain the dam and water supply without any recourse to anybody for the cost of maintenance?

Mr. CALLAWAY. This court holds that the whole thing should be estimated and must be estimated according to the law, and put in the original estimates, and must be divided into equal payments not exceeding 10, to be collected from the water users within the project.

Mr. GARNER. Mr. Chairman, will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. GARNER. In other words, the essence of that decision is that where the original estimate is made and landowners are taxed for maintenance on that basis the Government can not collect anything in excess of that estimate?

Mr. CALLAWAY. That is it exactly.

Mr. MANN. That is not what the gentleman said it holds. Let us really understand the decision. The gentleman stated that the whole maintenance charges had to be included in the original estimate and collected in 10 installments.

Mr. CALLAWAY. That is what I said.

Mr. MANN. That would mean, perhaps, for a thousand years of maintenance charges. That can not be the decision.

Mr. CALLAWAY. No; the gentleman has mistaken what I said.

Mr. MANN. I might mistake what the gentleman means.

Mr. CALLAWAY. That is the installing of the project, and until it is finally turned over to the settlers. Then they take hold of it and maintain it themselves under the direction of the Secretary. This project has never yet been turned over.

I was discussing the question of the purchase of the canals and the fact that new people taking up land, who never owned any water rights, who had no interest whatever in the canals, and who had never paid a cent for water rights but had taken up land on the desert, or owned land in the valley after the water had all been appropriated, came in exactly on the same footing as farmers who had water rights and had been cultivating for years. A Dr. A. J. Chandler, who had on the south side of the river dummy entried 18,000 acres of land, defrauded the Government out of it, and had dug a canal for the purpose of conveying water to the land, but who had never had any water because of there being none, came into this project on exactly the same footing as the old farmers in the valley and the Indians. I can not understand why the Government agents would advise or be a party to such a deal, unless they were influenced by interest, prejudice, or favor. Such an injustice was committed by this deal that my suspicions were aroused. But that was not all. Mr. Murphy, an old settler in the valley and a man who understood the canal system and the irrigation business, testified, at page 324 of hearings, that two canals run at the proper place would have better served the purposes of the entire valley on the south side of the river than did the five that the Government purchased. Were our engineers competent? Were they honest to the interest of the farmers in the valley? According to Mr. Murphy's testimony, neither can be true. We purchased five canals and paid the amount of money it would take to parallel all five when we could have dug two canals which, according to Mr. Murphy, would have better answered our purposes.

That is not all of this canal proposition. When we purchased the canals and paid what it would take to parallel them we did not get them. The canal company, prior to the time they sold us the canals, sold the power rights on them to the Pacific Gas & Electric Co. We then proceeded to make a

contract to get all the rights on these canals. This company immediately capitalized the contract giving them the exclusive right to dispense light and power in the city of Phoenix for $515,000. This was $15,000 more than we paid originally for the canals. This contract gave the Pacific Gas & Electric Co. exclusive right to dispense power in the city of Phoenix for a term of 10 years. The power rights on the canals is simply the right to build power plants wherever a sufficient fall on the canals can be found to generate power.

Mr. KENT. If the gentleman will permit me, I would like to ask the gentleman how long that contract has to run?

Mr. CALLAWAY. Ten years.

Mr. KENT. The contract is now expired, is it not?

Mr. CALLAWAY. I think that it was made in 1907.

Mr. KENT. As I understand it, the contract has now only about three or four years to run.

Mr. CALLAWAY. I can not tell definitely about that. I think it began to run from the time they commenced to receive power. I do not know just when they began to receive the power. I will turn to the contract, page 381 of the hearings, and see if I am not correct. The contract is dated June 22, 1907, and here is the part referred to:

The party of the first part undertakes and agrees to furnish and serve electric power and continue so to do for the term of 10 years from and after the date of beginning to serve power in accordance with the provision hereinafter mentioned. The first party further agrees to furnish and deliver at all times 1,500 kilowatts at the rate of 1½ cents per kilowatt-hour.

This contract took away from the people of the valley, who built the power plant, the benefits to be derived from it and gave them over to the tender mercies of the Pacific Gas & Electric Co. Those who had bound their land to get cheap power were subjected to the avarice of a combination in the city of Phoenix into whose hands the Interior Department had delivered them.

Mr. Hill says, in an Associated Press dispatch, dated Los Angeles, February 10:

It is not true that the Pacific Gas & Electric Co. has a monopoly on the power developed by the Salt River project.

I want to test the accuracy of Mr. Hill's statement by quoting from article 11 of the contract:

ART. 11. The party of the first part further agrees, while serving power to second party under the terms of this contract, to refrain from entering into a general retailing of power to customers in the city of Phoenix, Ariz., or from furnishing power to anyone in said city to be again sold or retailed.

This contract was signed by L. C. Hill, party of the first part, and the Pacific Gas & Electric Co., by F. H. Ensign, manager, and by W. L. Percy, secretary, and approved by George W. Woodruff, Acting Secretary of the Interior.

That looks like an exclusive contract to me. It looks like it to the people of Phoenix, who are paying from 15 to 20 cents per kilowatt-hour for electricity.

Mr. Hill said, in this same interview, that the plant at the dam generates 9,000 kilowatts and the combined plants in the irrigation project develop 18,000 kilowatts. Where are any other plants than that one at the dam? Mr. Hill testified before our committee (hearings, p. 535):

We have a contract which obligates us to retain for the Pacific Gas & Electric Co. 1,500 kilowatts and more.

Q. How much more?—A. They have to have 2,200 kilowatts. The contract that we have for the creamery calls for 500 kilowatts; the ice plant, 100 kilowatts. We have that contract in existence with the Alfalfa Mill, which, I understand, is to be rebuilt; that takes 100 kilowatts. The pumps connecting up take 350 kilowatts; a total of about 3,500 kilowatts.

Q. You said you could generate 8,000 when you got the next units in.—A. That is correct. We have one company that wants 10,000 kilowatts.

Q. That is more than you can furnish?—A. Yes.

Q. You have only 8,000 kilowatts when the units are all in?—A. Oh, yes.

This was in May, 1912. Mr. Hill was testifying under oath before our committee. He said when all the units were in and the plant complete at the Roosevelt Dam it would generate 8,000 kilowatts, but now states, in this interview, that the combined plants develop 18,000 kilowatts. This accords fairly with the character of statements different members of this Reclamation Service have been making from its beginning. My judgment is that there is something wrong in the head or the heart of the Government agents in this Reclamation Service. I can not understand how sensible and honest men acting for the Government in the interest of the people could advise a contract like the one with the Pacific Gas & Electric Co., which deprives the people—who have bound their land to pay for it—of the benefits of the plant, and then, when cornered, make a statement like this one. That company gets its power at 1½ cents per kilowatt-hour. This man Hill, in his Associated Press dispatch from Los Angeles, says that is a good price. Testifying before our committee under oath in Phoenix, Ariz., last May, he said:

At the present time during the construction period we have charged them—

The Indians—

for the power used for operation at the same price it cost us to generate it.

Q. What is that?—A. It runs from 6 to 8 cents per kilowatt hour.

He was at that time furnishing the Pacific Gas & Electric Co. electricity under this contract at 1½ cents per kilowatt-hour. This company was retailing it to the people of Phoenix at from 12½ to 20 cents per kilowatt-hour.

The Government Indian school in the city of Phoenix had at that time to deal with the Pacific Gas & Electric Co. in order to get from the Government project light and power. The Government sells it at 1½ cents and buys it back at from 12½ to 20 cents. This is the fruit of a contract engineered by L. C. Hill, supervising engineer, and approved by F. H. Newell, the head of the Reclamation Service, and indorsed by James R. Garfield, then Secretary of the Interior, and defended by the present Secretary of the Interior, Walter L. Fisher.

That is not all. Just above the city of Phoenix, in the Salt River Valley, there is an Indian reservation. Those Indians have been irrigating land there from time immemorial. When the Arizona Canal was dug their water rights were recognized, and the company, in order to get the right of way across this reservation for the Arizona Canal, agreed to turn to these Indians 700 miners' inches of water, what the court decided them entitled to, in exchange for this right of way. This water came out of the canal before it reached any of the settlers in the valley, and the consequence was the Indians always had water when there was any carried by this canal. The Government agents, when they took over the canal, entered these Indians into the project by contract approved by the Secretary of the Interior, Mr. Garfield, which bound their lands for the same amount per acre as the land of Mr. A. J. Chandler, which had not one drop of water prior to the time the flood waters were impounded. They were bound to pay as much under this arrangement for water, a thing that they had already, as any new settler within the project, though he had never had any water rights, had never had any farm, had never been out 1 cent for water privileges. The Indians were taken in by these Government agents on an exact footing with the small farmers in the valley, who had already paid from three to seven times over for their water privileges.

Mr. MONDELL. Will the gentleman yield?

Mr. CALLAWAY. I will.

Mr. MONDELL. To what Indians does the gentleman refer?

Mr. CALLAWAY. The Pima Indians.

Mr. MONDELL. On the Verde?

Mr. CALLAWAY. Not on the Verde, but on the Salt River, below the mouth of the Verde, just above Phoenix.

That is not all. On the other side of the river there is this man Chandler, who had 18,000 acres that he picked out, and dummy entried in such a way that he could irrigate it with one canal. For the benefit of those who might not understand what I mean by dummy entry, I will say that under the desert-land act an individual can only file on 640 acres of land. He is to swear in his application that he is not acting in collusion with anyone else, but is applying for the land for his own use with the intention of reclaiming it from the desert by irrigating it. When he has done $3 worth of work per acre and cultivated and irrigated one-eighth of the tract, provided he does that within the term of three years from the date of his filing, he is entitled to patent. Chandler got different individuals to make these affidavts—some men, some women. He then employed W. H. Code as engineer to lay out and construct an irrigation canal so as to convey water to this land. When this was done, each of the individuals made his proof based on this canal that $3 worth of work per acre had been done and that one-eighth of the land had been cultivated, and secured his patent which he then conveyed to Mr. Chandler.

The truth about it is that this canal and these 18,000 acres had no water. The water in Salt River had been appropriated prior to the time Mr. Chandler went into the valley. He stated before our committee, under oath, that he had no water for this land. The supervising engineer for the Reclamation Service, and acting agent for the Government, Mr. L. C. Hill, entered this land, of which the Government had been defrauded, into the project, and purchased Mr. Chandler's dry canal, and paid him for it what it would cost to parallel it. Mr. Hill testified that that was the price he paid for it. The consequence of this deal was that this land, theretofore worthless, was then

worth from $100 to $150 per acre, and Mr. Chandler, for a worthless dry ditch, put into his exchequer $187,000.

That is not all yet. A little later this same supervising engineer, L. C. Hill, found it necessary to parallel this ditch after he had bought it from Chandler with what is known as the highland canal, taking in some more land adjoining Chandler's 18,000 acres. This highland canal, according to the testimony before our committee, will serve every acre of land that the Chandler canal will serve.

That still is not all. Though Mr. Hill paid Chandler what it would cost to parallel this consolidated canal, he did not get the canal. Mr. Chandler retained the power rights on it. If the power rights on this canal are as valuable as the Pacific Gas & Electric Co. found the power rights on the north side to be, we may infer that Mr. Chandler has a right on this canal that is worth more than the canal itself. So long as he retains the power rights on this canal we perforce must allow water to pass through that canal to furnish the power, though it would be to our advantage to put all that water through the highland or some other canal. We said in our report that we found nothing culpable, but many things questionable. In connection with the things I have mentioned that to me look questionable, we found that Mr. Hill came from Detroit, Mich., the domicile of D. M. Ferry and C. C. Bowen, of the D. M. Ferry Seed Co.; that Mr. Chandler came from Detroit, Mich.; that Mr. C. S. Witbeck, the attorney for the Reclamation Service in Phoenix, who advised with reference to these contracts, came from Detroit, Mich.; that Mr. W. H. Code, Mr. Chandler's private engineer,' who laid out this canal, was chief engineer for the Indian Bureau while all these contracts were being made, and that he was also vice president of the Chandler Bank in Mesa, of which bank Mr. Chandler is president. There may be nothing legally criminal in these transactions, but, according to my standard, moral crimes innumerable have been committed and justice has been outraged.

F. H. Newell, head of the Reclamation Service, and Secretary Fisher came out in a statement on February 11, printed in the Evening Star, of this city, in which they say that Adams and Newell have been criticized without notice and without hearing, and that many of the charges made can have no creditable foundation whatever to support them. I want to say that they had a representative before the committee who knew every detail of that project and advised with reference to the contracts that were made and has supervised not only the engineering works in the Salt River project and on the Gila River project, but has been in control of the details of each and every thing criticized—L. C. Hill. He sat in the room during the whole time this examination was going on. He heard every witness testify and had the privilege of asking questions, making explanations, or entering his denials and of defending himself and the Reclamation Service and its work in the valley. I want to say, further, that he is as wary and wily a gentleman as I have ever come in contact with. He is tough fibered, physically and mentally. He has a good many of the elements of the cat in him and always strikes feet down. It would be interesting to examine Mr. Hill's evidence in the hearings had before our committee.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. GREEN of Iowa. I will say, in addition to what the gentleman has spoken of, that when I was down there several years ago I saw another ditch running parallel to one of the original ditches that was put in there before they had a drop of water to turn into any ditch.

Mr. CALLAWAY. I will say to the gentleman that by nosing around down there he could find almost anything. He would only need sufficient time.

Mr. GREEN of Iowa. I think the gentleman is right.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CALLAWAY. I wish the gentleman from Georgia [Mr. BARTLETT] would give me 10 minutes more.

Mr. BARTLETT. I yield to the gentleman 10 minutes more.

The CHAIRMAN. The gentleman from Texas [Mr. CALLAWAY] is recognized for 10 minutes more.

Mr. CALLAWAY. That is not all. These men—Code, Hill, and Newell—designed a project on the Gila River for the purpose of taking in the Pima Indians or the Federal Treasury. They were going to supply them with water carried from wells in a canal system, one end of which was on the north bank of the Gila River and the other end within 4 miles of Chandler's 18,000 acres. These parties planned this Gila River irrigation project for the Pima Indians, though the Pima Indians were protesting against it, stating that they would not accept pumped water. According to the plan water was to be pumped from deep wells into these canals and supplemented with flood water when the river was up high enough that water would enter the mouth of the canal on the north bank of the river. This trio got an appropriation for this project of $540,000, $100,000 of which they used in constructing a transmission line from a point a mile above Mesa, directly south 15 miles, to the north line of the Gila River Indian Reservation. This transmission line strikes the main transmission line from Phoenix to the Roosevelt Dam at a switch station and runs south. At a point directly opposite a town laid off by Chandler on his land there is a switch put in that runs to Chandler's town site, where a substation is located for the diffusion of power. At this point there are two different branches of transmission lines, furnishing power for seven irrigating wells on this dummy-entered land. The Indians under this project have continuously refused to accept water pumped from the wells, and there has never been any flood waters from the rivers passed through this canal system. It stands there on the desert, a beautiful system to look upon, but it has never carried any water to Indian lands nor been a dollar's benefit, unless it be to those who worked their official positions to bilk the Federal Treasury. The reports of the said code on this project and the justifications offered to the Committee on Indian Affairs for these appropriations, that amounted in the aggregate to $540,000, called it a reimbursable appropriation.

Mr. Hill states in his Associated Press dispatch of February 19 that "this transaction has been so advantageous from the Indians' standpoint that they will profit enough by the arrangement to pay back that $100,000 within two or three years." Of course, Mr. Hill is talking to the public that know nothing at all about that project. He did not mean this statement for any man who had ever seen it or knew anything about it. The Indians up to the present time have refused to accept water under it, claiming that this well water would kill their lands, and claiming further that the burden on them, if the $540,000 was to be reimbursable, was more than they could bear. They are further bound under this contract with the water users' association of Phoenix, if they accept power, to bind their lands for the same amount per acre as the people within the Salt River project who actually get water. That expense has, by this time, run up to more than $60 per acre. Mr. Hill evidently made his statement for the benefit of the people of California and other States than Arizona. Any man who understands the Pima Indians, their condition on the Gila River, and their mode of farming, and who is not a blank idiot, knows that the Indians could never pay any such price as that for any kind of water, much less alkali water. I say any man but a fool would know that, and Hill is no fool.

I stood with Hill at the mouth of this canal on the bank of the Gila River, and gazed out across the channel of that river half a mile to where there was a stream of water, and asked him how he thought water could be brought from that channel to the mouth of the canal. He said it could be done by putting in a diversion dam at that point. The diversion dam on the Salt cost $620,000.

The Indians at this place have a little brush dam which runs out part of the way into the river channel and turns some water into the mouth of a ditch from which they irrigate lowlands along next the river, a system of irrigation they have had for 200 years. Their diversion brush dam washes out with each rain, and when the river goes down they rebuild it and continue their crude system of irrigation, while Government officials bilk the Federal treasury.

The Indian Department made a report to the Committee on Indian Affairs in December last, offering a justification for an appropriation of $20,000 for the purpose of maintenance, care, and protection of the machinery and irrigation wells of this project, and for the irrigation of Pima Indian lands, including the purchase of electricity for wells and the completion of lateral ditches on the Gila River Indian Reservation, and claimed as a part of that justification that they were now irrigating on the reservation 12,000 acres of land.

Abbott and Merritt, of the Indian Department, were before the Committee on Indian Affairs with this justification for the $20,000 appropriation, and it happened that the chairman of the committee had been down to Arizona and had seen this project, and he made Abbott and Merritt admit, before his committee, that there was not an acre of land being irrigated there.

Hill, in a report on the Gila River Indian Reservation to the Director of the United States Reclamation Service, on March 9, 1911, stated that nearly parallel to the main and western branches is a line of wells 10 in number connecting with a large lateral which is fed both from the wells and from the main ditch, thus enabling the farmers to obtain river water when that is available or pumped water when it is not.

Leaving the canal at a point a little over a mile below the intake is a branch which now serves part of the land between the river and the new canal. Would not you get the idea from

reading the justification from the Indian Department and from Mr. Hill's letter to the Director of the Reclamation Service that there was irrigation going on down there? Do not you think that is the impression which all of them meant to convey? Would you not get the impression from Mr. Hill's statement in his Associated Press dispatch that all was going well with the Indians for whom he had been instrumental in spending $540,000 and binding up their lands to the amount of $60 per acre? Well, such is not the fact. They are literally starving to death because they have no water with which to irrigate their lands, notwithstanding all these outlays and all the statements from the Reclamation Service.

Mr. GRAHAM. And the machinery at the wells will rot out in 10 years.

Mr. CALLAWAY. How much time have I, Mr. Chairman?

The CHAIRMAN. The gentleman has four minutes remaining.

Mr. CALLAWAY. I want to refer to a few other newspaper statements by Mr. Hill, and some articles and statements by Mr. Newell before I quit.

Mr. Hill states, in his Associated Press dispatch of February 10:

> Now, in a general way I may state the contract with the Pacific Gas & Electric Co. was given the widest and most prominent publicity before being signed.

Mr. Hill makes this statement to an Associated Press reporter in Los Angeles, a long way from the scene of that contract and domicile of the parties affected by it. Our committee had some testimony on this point while sitting in the city of Phoenix. The witness giving it was under oath and in the presence of Mr. L. C. Hill and Mr. Stannard. The witness was F. A. Jones, one of the corporation commissioners of the State of Arizona. He said:

> In April of 1908 I was told that there were some negotiations on or something pending whereby there might be a contract entered into between the Reclamation Department and the Pacific Gas & Electric Light Co. As manager of the commercial club I went to the reclamation offices and made a direct inquiry as to the status of the situation, and got an evasive reply, except that it was stated by Mr. Stannard, who was then in charge of the office, that there were negotiations pending. * * * The directors of the Maricopa County Commercial Club then called for a meeting of the officers and directors of the board of trade. The matter was discussed and a committee of 14 from the commercial club and the board of trade was appointed, and this committee went over to the reclamation office, I think on the 16th or 17th day of April, 1908, and demanded to see the contract or information concerning it. * * * He (Stannard) told this committee of 14, being 7 from the Maricopa County Commercial Club and 7 from the board of trade, that an agreement had been entered into, but that it would be two or three months before the contract was closed and that we would be in no danger of losing out. On the strength of that the committee reconvened at the commercial club and sent a telegram to the Secretary of the Interior. * * * A telegram came back from the Secretary of the Interior that the contract had actually been made a year prior to that time.
>
> Q. Did the committee again go over to Stannard?—A. Yes.
>
> Q. What did he say?—A. He said he was working under instructions from Hill not to divulge the contents of the contract or let the facts be known that a contract existed.

I do not care to offer any comments on Mr. Jones's testimony other than to say he looked to me like he was trying to tell the truth. Mr. Hill and Mr. Stannard heard this testimony and did not offer to refute it.

Mr. Hill again, in the same interview, said that "the charge that the cottage built on the reservation and the pump houses were charged up for several times their cost is untrue." I can not tell what the cottage cost, neither does any member of the committee undertake to say in the report what the cottage cost, but I can say we members of the committee made a personal examination of it, went in it and all around it. It is an ordinary concrete-block building, one story high, with four rooms and a portico. A picture of it is in the report. After we had looked at it we concluded that it ought to have cost about $2,000. It is put down as costing $7,396.73. We looked at the well shed inside and out. It is an ordinary concrete building, 10 or 12 feet square, and when we had examined it we concluded that it ought to cost $500 or $600. It is put down at $3,380.36. I do not pretend to say what it did cost under the beneficent care of Government engineers. I am stating what would have been a reasonable cost had they been built by an ordinary business man.

Mr. Hill said further that Mr. Code resigned in 1911, and the committee was not appointed until 1912. The fact is that it was well understood, in the summer of 1911, that the Committee on Expenditures in the Interior Department was going to make an investigation of that Arizona situation as soon as they could get to it.

In this same dispatch Hill was asked what, in his opinion, had inspired the charges. He said, "The disgruntled farmers of the Salt River project, not being able to secure favoritism and imagining grievances that did not exist, petitioned for an investigation." Mr. Hill said also that "two or three members of the committee are Democrats and it is not unlikely that politics have entered into their motives." Mr. Hill wants to hide himself behind some protector because he can not face the facts; and so he states that partisanship possibly brought about the investigation. If partisanship had anything to do with the investigation, it certainly can have nothing to do with the facts as developed in contracts and shown in cold type. It can certainly have nothing to do with the testimony of the witnesses who appeared before the committee, in the presence of Mr. Hill and Mr. Stannard, and detailed the facts, none of which were denied by these men who knew the details and had been on the ground as agents of the Government from the beginning.

Now, a few references to the Right Hon. F. H. Newell, who evidently imagines that he is so high up that no pole is long enough to reach him. There are many who think when they get high up in office they have a license, and when men question their doings they refer to them as incompetent, disgruntled, partisan, or irresponsible, and try to divert the public's mind from the cold detailed facts. Mr. Newell in a statement, which appeared in the Washington Post of February 10, said:

> As for the charges against the Reclamation Service, any man mentioned will welcome an investigation *by honest and competent men*. It looks like another adroit *attack on conservation*. The report is a jumble of half truths and *whole misstatements*.

Mr. Newell did not refer to the charge that the original estimate of the cost of that project was about one-fourth of what had been expended; he did not refer to the charge that the canals were taken over by the Government and the farmers bilked to the advantage of stockholders in the canals and land speculators; he did not refer to the charge that the Pacific Gas & Electric Co. had been given an exclusive contract to sell electric power to the people who paid for the making of it; he did not refer to the charge that Chandler had dummy entried 18,000 acres of land and had been taken under the protecting wing of the Government that his worthless property might be made valuable; he did not refer to the charge that they had engineered a deal by which the consolidated canal had been purchased for $187,000 and then paralled, showing its worthlessness for the real purpose of irrigation; he did not refer to the charge that even after they had bought the canals they did not own them, but had left the power rights in the hands of the original owners; he did not refer to the charge that the Pima Indian irrigation system had been built on the desert, with $540,000, and had never conveyed a drop of water, and under present conditions could never convey a drop of water; he did not refer to the charges that conditions there had been covered up by false reports, statements, and justifications to appropriation committees; he broadly states that not one charge has been made in this report but can be absolutely refuted; that no bureau has been investigated oftener; that its structures are among the great works of our time; that its efficiency and economy of administration receive the praise of its investigators.

These reclamation people are not much hampered by truth and they deal little with facts, but they are a champion set of advertisers. For instance, World's Work for February, 1913, carries, jammed in among pictures of Col. Goethals, Admiral Dewey, Alfred Noyes, and W. R. Mead, a full-page cut of the Right Hon. Frederick Haynes Newell, who is, according to his statement, "wresting a new agricultural empire from the deserts of the West." And then, among the articles of President Woodrow Wilson, we find from the pen of this astute advertiser, on page 396, an article headed "What I am trying to do," and in this article, on page 397, under the subhead "Tasks accomplished in 10 years," he says, as the result of the Reclamation Service's work, water is available for 1,159,334 acres on 14,200 farms.

Unfortunately for him, this statement is refuted by his own figures in the Eleventh Annual Report of the Reclamation Service, on page 292, where the project is itemized, and under the heading "Area irrigated" I find two items—under water-rights applications, 270,459 acres, and under rental contracts, etc., 294,222 acres.

It can be clearly seen from this statement that the Government has water-rental contracts for only 294,222 acres and applications for only 270,459 acres, aggregating 564,681 acres. One hundred and fifteen thousand five hundred and fourteen acres of this land, nearly one-half of the whole amount for which they have rental contracts, is in the Salt River Valley. He did not reclaim 115,000 acres of land here. There were 135,000 acres irrigated and cultivated in the Salt River Valley before the Roosevelt Dam was built and before Newell had anything to do with these people. There are only 145,000 acres now cultivated in the Salt River Valley, so the work of this Reclamation Service has increased the acreage only 10,000 acres. In justice it should be said that their irrigation is more uniform and regu-

lar now than it was before, because then it depended on the irregular flow of the Verde and Salt Rivers, while now they have the backing of the Roosevelt Reservoir to insure water at all times.

But this gives you an idea of the extravagant claims of this self-promoter. Mr. Newell stated, in the Washington Evening Star of February 11:

> They (speaking of the committee) evidently did not have good stenographers down there, not the official stenographers, at any rate, and when they got back here it was necessary to fix up the stenographers' notes, and a good many of the things that were said at the hearing did not get in and a good many things that did get in were never said.

He refers to the committee as incompetent in his interview on the 10th, and to the stenographers as incompetent in his interview on the 11th. Yet in the same statement he says he was not given an opportunity to appear before the committee. The remarkable thing is how this wise man, who states in the same interview that he has never seen the committee's report, and never appeared before the committee, can make the bold, cocksure statement *that the stenographers were incompetent, and many things that were said in the hearing before the committee never got in and many things that got in were never said.* This is additional evidence of his absolute carelessness in dealing with facts and his perfect unconcern for the truth.

There is one other gentleman in this service with whom I wish to deal before I close. It is Samuel Adams, First Assistant Secretary of the Interior. He says, according to the Chicago Record-Herald of February 10:

> I want to know the identity of the persons responsible for these unwarranted charges.

Mr. Adams had a long conference with me on Monday about the charges in the report. I had a copy of the report in my hand at the time. I asked him about a number of things stated in the report, and he said with reference to each that he, of course, knew nothing at all about the details of them. I told him the report only charged him with two things. One was a ruling that fixed the limit of residence in the neighborhood at a maximum of 50 miles. That ruling appears in Land Decisions of the Department of the Interior, volume 40, page 664, paragraph 54.

Another was a contract that he had prepared for the water users in Salt River Valley, which fixed the minimum amount of water to be used at 2 acre-feet and makes any additional amount assessable at 40 cents for the first foot, 50 cents for the second, and 60 cents for the third, making almost twice as much as the landowners theretofore understood they would have to pay for the necessary water for their lands. In the case of Hurley *v.* Abbott, decided in the territorial court of Arizona, 5½ acre-feet were adjudged to be the amount of water necessary for the ordinary crops of the valley. Mr. Adams complains that this report does him an injustice, because these rulings had been made before he went into office, and he simply followed the precedent and promulgated it. In my judgment he is as reprehensible for following a bad precedent as he would be for setting one, and it is clear to any legal mind, and I understand he is a lawyer, that that ruling in connection with the former ruling that a corporation may purchase water rights under the reclamation act will permit corporations to absorb the entire land under any project, defeating the prime purpose of the reclamation act, which was to give homes to actual settlers and actual farmers.

I expect the committee that made this investigation and report to be deluged with dirty dish water. That is in keeping with the character of defense started in these newspaper reports. That is the kind of defense always put up by those who have none other. The effort is to becloud the issue, to reflect on the investigators, to belittle the work done, to muddy the water. Then this department has as a part of its equipment a press bureau. Mr. Hill testified before the committee that they had an official photographer, who takes pictures for newspapers and magazines, the expense of which had been to the Salt River project alone up to December 30, 1911, $9,089.30. There are between 25 and 30 different projects within this department. If they spent as much money proportionately in each project advertising themselves, it runs up to an enormous amount when extended over all of the projects.

We said in our report that in our judgment all of these projects ought to be investigated, not because we knew anything at all about the ones we have not investigated, but because of the glaring outrages found in the ones we did investigate. I am concluded that that department should have a complete and thorough investigation made of every project. I wish the Members of the House would look to the report and see the pictures of the houses and buildings, and see what you think a reasonable cost if such buildings would have been and then look what has been charged for them. [Applause.]

Mr. GOOD. I yield 10 minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Chairman, is there any way in which my time can be extended at this time? I had no idea that the gentleman from Texas [Mr. CALLAWAY] was going to discuss the report that he has referred to, and it is impossible to reply to what has been stated in 10 minutes. I should like to say something in relation to it now, and it would take 30 minutes.

The CHAIRMAN. The time for general debate was fixed by the House and placed in the control of the gentleman from Georgia [Mr. BARTLETT] and the gentleman from Iowa [Mr. GOOD]. It is not in order for the Committee of the Whole to change that order.

Mr. BARTLETT. Mr. Chairman, may I interrupt the gentleman?

Mr. MONDELL. Certainly.

Mr. BARTLETT. Mr. Chairman, the gentleman from Iowa [Mr. GOOD] was kind enough to yield five minutes to a gentleman on this side, and he also yielded to me all the time he had except 30 minutes. I therefore take great pleasure in giving my friend from Wyoming five minutes of my time.

Mr. MONDELL. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The gentleman from Wyoming is recognized for 15 minutes.

Mr. MONDELL. Mr. Chairman, last summer a subcommittee of the Committee on Expenditures in the Interior Department was authorized to visit the Pima Indian Reservation on the Gila River, Ariz., and make some inquiries with regard to the condition of those Indians. The subcommittee consisted of the gentleman from Texas [Mr. CALLAWAY], who has just taken his seat, the gentleman from Missouri [Mr. HENSLEY], and the gentleman from North Dakota [Mr. Hanna]. They had a series of meetings on and in the vicinity of the reservation, and recently made a report. The gentleman from Texas [Mr. CALLAWAY] seems surprised that the Chief of the Reclamation Service has had difficulty in securing a copy of the report. That is not surprising at all. You could not any one of you get a copy of the report if you wanted to. I tried to get one a few moments ago and was unable to. Members of the committee did not see the report until one day last week, when we were called in and asked to pass on it, and we were expected in a very brief period to make a minority report, if we desired to do so. We did not have time to go over the evidence, but from the information in our possession the gentleman from South Dakota [Mr. BURKE] and myself made such a report as could be made in that time. However, before the report had been made to the House, before it had been placed in the basket, before the minority had had an opportunity to draft their views, the substance of the report was given to the newspapers. Extracts from the report were published in both the morning and evening papers of this city, and I have no doubt but that the Director of the Reclamation Service saw those extracts and judged of what was contained in the report by what he saw in the newspapers. As the gentleman from Missouri [Mr. HENSLEY] knows, an evening paper in this city contained a synopsis of the report before it was presented to the House.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. HENSLEY. Will the gentleman be candid enough to explain why the report was not filed here?

Mr. MONDELL. The gentleman was kind enough to grant us one—no; two days in which to draft our views. He stated that we could have two days in which to present our views. One of those days was, I think, Sunday; later he was good enough to give us another day. I was exceedingly busy, as was the gentleman from South Dakota, and we could only present our views briefly.

Mr. HENSLEY. Is it not true that two days before we had the committee meeting Mr. McCairn, the clerk to that committee, furnished the gentleman with a copy of this report?

Mr. MONDELL. He did.

Mr. HENSLEY. And I came here and told the gentleman about it on the following day.

Mr. MONDELL. Yes.

Mr. HENSLEY. And two days later we met there, and we passed this report out.

Mr. MONDELL. The report was laid on my table two days before the committee met. I think that was true. I was very busy here in the House and did not have time to even look at the report.

Mr. HENSLEY. And on Monday the committee's report was to be filed, and the gentleman requested me to hold it up until he had an opportunity to write the minority views.

Mr. MONDELL. Yes; one day.

Mr. HENSLEY. And I did so hold it up.

Mr. MONDELL. Yes; I think that is what I said. If I was not exactly accurate in my statement I beg the gentleman's pardon. The fact remains, however, that the newspapers contained a statement of what was in the report the evening of the day before the report was to have been filed.

Mr. MANN. Mr. Chairman, how is it possible for a newspaper to get a report made to the House before it is put in the basket? I never heard of such a thing before.

Mr. MONDELL. The gentleman will have to answer that question for himself, for I do not know.

Mr. MANN. It is highly improper.

Mr. MONDELL. I know the fact, and I have no idea that Mr. Newell has seen a copy of that report; he certainly did not see the copy I had, for it remained in my desk in my office. I doubt if any Member of the House has seen it, as you can not get a copy of it now, because there are no copies in print, unless there are some in the committee room.

Mr. MARTIN of South Dakota. I suppose the letting out of the report was probably one of the irregularities of the Reclamation Service. [Laughter.]

Mr. GRAHAM. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. GRAHAM. Is it not true that the delay the gentleman speaks of is due to the fact that there are photographs to be published in the report, and the Printing Office is holding it up in order to insert those photographs in the report?

Mr. MONDELL. I think that is true; but that does not alter the fact that the newspapers had the contents of the report before it was presented to the House.

Mr. GRAHAM. But it does explain what the gentleman is complaining about.

Mr. MONDELL. I am not complaining; I am stating a fact. Before the report was delivered to the House extracts from it, sensational in character, were printed in the newspapers, and the gentleman from Texas is complaining because Mr. Newell said he had not seen the report.

Now, Mr. Chairman, whether or no the report was improperly given to the papers before it was delivered to the House has nothing to do with what is contained in it. I hold no brief for the Reclamation Service. I have not agreed with the service in all things. I have not approved, personally, all that has been done under the irrigation law. I have had some very sharp differences with the gentlemen in charge of the service. I did not entirely approve of taking up the Salt River project as about the first project taken up. I have not followed in detail all that has been done on the Salt River, but I do know that down there are some of the greatest engineering works ever constructed by man.

There is a great empire containing some of the richest and most productive land on earth now permanently irrigated by works that will stand as long as the earth stands, and that great and rich valley will be permanently productive, due to the splendid works erected there by the Reclamation Service. It is my opinion those works and that project will stand as a monument to the men who planned and executed them long after all the differences of opinion as to the wisdom of every detail of plan or execution are forgotten. I do not know what the gentleman from North Dakota, who was a member of the subcommittee, thinks about what they learned down there. He ceased to be a Member of Congress before the report was prepared. The other gentlemen of the subcommittee do not claim to have been familiar with what had preceded in that region in the matter of Indian irrigation and private irrigation. They do not, I think, claim to have been familiar with the reclamation law in its enactment and in its development. The matters were all new to them. They went down to investigate the condition of the Pimas, and they saw fit to widen the scope of their inquiry and include the entire Salt River irrigation project, and then in their report they referred in very emphatic language to other projects never investigated by them.

Mr. CALLAWAY. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. CALLAWAY. Their reference to the other projects is that there are 28 other projects, and the revelations disclosed by the investigation of this project justifies the House in making an investigation of the other projects.

Mr. MONDELL. Now, Mr. Chairman, this is the state of facts; the briefness of the investigation, the lack of previous information or knowledge on the part of the gentleman who made it naturally lead them into curious errors of judgment and curious inaccuracies of statement. The speech of the gentleman from Texas [Mr. CALLAWAY] bristles with those curious inaccuracies. He fails to understand the nature of the desert-land law, for instance, and says that it requires residence upon the land, which it does not. That is not material, as his entire reference to desert entries long before the reclamation act passed is not material, except to indicate his lack of knowledge and information. He states that the pumping plant—and I never had any great amount of enthusiasm over that pumping plant. I did not entirely approve the appropriation in the Indian appropriation bill at the time it was made for the pumping plant, but I think the gentleman is not accurate when he says that the pumping plant has never been operated, and that there has never been any water through the pumps or in the ditches, because the Indians refused to use the plant because they claimed that the water from the pumps contained some alkali and they were afraid it would injure their land. The gentleman says that we passed the reclamation law largely or partly because it had been suggested we might build a great project down on the Gila for the irrigation of the Pimas' land. As a matter of fact the Gila River project and the San Carlos Dam and the other dam that had been suggested on the Gila were practically abandoned on engineers' reports before the reclamation law passed, because it developed that the Gila carries more silt than perhaps any other river in America, and the engineers declared that the San Carlos Dam would fill completely with silt in from 25 to 40 years. That is the situation down there——

Mr. CALLAWAY. May I ask the gentleman a question?

The CHAIRMAN. Does the gentleman yield?

Mr. CALLAWAY. Did not you appropriate $10,000 last year, were not you instrumental in helping to appropriate $10,000 for Army engineers to go down and make an investigation of the Gila River?

Mr. MONDELL. I had nothing to do with that one way or another; I did not object to it, because I had no objection to a further investigation there, because there was some difference of opinion.

Mr. BURKE of South Dakota. Will the gentleman yield?

Mr. MONDELL. I will.

Mr. BURKE of South Dakota. I want to call the gentleman's attention to the fact that he has only about four minutes and he can not cover this question in the time he has, but I would like for him to bring to the attention of the House the fact that this report which censures seriously some of the very high officials in the public service did not give those officials any opportunity to be heard and they were not examined by this committee, which sought to make a finding concerning them.

Mr. MONDELL. It is very true. I thank the gentleman for emphasizing that fact.

Mr. CALLAWAY. May I answer that? I just want to state that Mr. L. C. Hill was at the whole hearing, and he knows more about the details of that Salt River project than all the rest of the Reclamation Service together.

Mr. MONDELL. Mr. Hill is a project engineer; he had no authority to make an appearance for the service in regard to every question which the interested parties appearing before the committee might bring up; and, furthermore, he was not invited to do so. This is the situation there: There are a large number of people who desire to be released from the payment of water rights and they poured into the ears of willing listeners all kinds of strange and curious stories which they hoped would in the end relieve them and place upon the Government the cost of irrigating their lands.

Second, there are a large number of people who are occupying lands, or desire to, on the Gila River who are anxious to have the Federal Government construct the San Carlos Dam and irrigate their lands and make them valuable. I sympathize with those who see no immediate prospect of having lands they desire to secure irrigated, but I do not think they hasten the day of the fulfillment of their desires by criticizing the Salt River project. On the contrary, I fear they make that day more distant and uncertain.

Now, the part of the report and the gentleman's statement I most regret is that in regard to the return of payments. There never has been an estimate made, unless it is very recent, of the total cost of the Salt River project as a basis of payments. The Reclamation Service, whatever faults it may have or whatever errors it may have fallen into, has not fallen into the error of fixing a contract price per acre on the Salt River lands. So, whatever the fact may be as to whether or not the price, once fixed, must remain unaltered, the fact is that the price per acre has never been fixed on that particular project. Now, the gentleman quotes in defense of his theory that there has been a price fixed, and that the Government can not charge more than that price, a decision of a court, which, according to the gentleman's own statement, does not relate and has no reference whatever to construction charges, but refers entirely to maintenance charges. Whatever may be the fact as to changes in building charges, there is no question in my mind

as to what the courts will decide as to proper and legitimate maintenance charges. The Federal Government is not exercising its sovereignty under the reclamation law. It is conducting irrigation enterprises until they are turned over to the people; and it can, just as any private enterprise, in building a reclamation project make a charge for maintenance based on the actual and necessary cost of keeping the plant in repair.

The Reclamation Service has been carrying on a great work; many of the problems they have encountered are new. The works they have built are monumental in character, the territory over which they have operated is imperial in extent. I have not always agreed with their views either of the law or its execution, and I have not hesitated to express my disagreement, but I do believe they have made an honest effort to perform a great service in the spirit of the statute providing for it. Their engineering works have been approved by a board appointed by Congress and are vast and enduring. It is easy to criticize, particularly with limited information, but the criticisms of the report and of the gentleman from Texas is, in my opinion, largely unfair, and clearly it is not constructive or likely to assist us in meeting and solving the real problems presented, which are many.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BARTLETT. Mr. Chairman, how much time is there remaining on this side?

The CHAIRMAN. The gentleman from Georgia has 30 minutes remaining. The time of the gentleman from Iowa [Mr. GOOD] has been exhausted.

Mr. BARTLETT. I yield 20 minutes to my colleague, the gentleman from Georgia [Mr. TRIBBLE].

Mr. TRIBBLE. Mr. Chairman, I desire to make a few remarks on the proposed naval appropriation for the present year.

The appropriation submitted by the Naval Committee carries $128,000,000, without a battleship, for expenses of the Navy. In addition to this, two battleships have been reported by the committee, making the total amount of the bill $148,000,000. Mr. Chairman, the complaint I make to this bill is this: In 1911 the appropriation in total carried $126,000,000, which included two battleships. The appropriation this year, two years later, carries an appropriation of $22,000,000 more than the 1911 appropriation.

Now, Mr. Chairman, this is a proposition I can not understand; that is to say, in 1911 two battleships were carried in the $126,000,000, and this committee, pledged to an economical administration, appropriates $128,000,000 before it reaches the battleship program.

If the Navy Department will economize and the Naval Committee will join me and cut out the gross extravagances that are recommended and carried by the Navy Department, then I shall gladly support battleship construction. I am in favor of a good Navy and I am in favor of building such battleships as are needed for our country's defense. One battleship costs about $10,000,000. About one-half this amount is carried on the bill providing for battleships and the accessories to such battleships. The first appropriation does not provide the full amount for construction of the battleships. I claim, sir, that this bill can be so reduced in extravagant expenditures that this Congress can build two battleships without any material increase in the previous bills, especially so in view of the fact that the last session only authorized one battleship.

Mr. Chairman, there is one argument I conceive to be unanswerable, and no man can come on the floor of this House and answer it, and I challenge any man to do it, either from the Committee on Naval Affairs or elsewhere. Here is the proposition: Since 1896 this House has built 31 battleships and 3 armored cruisers. These armored cruisers cost anywhere from five to ten million dollars more than a battleship. Then I can say to this House that this House has built 34 battleships since 1896. That has been in 16 years. That is on an average of more than 2 battleships each year. Since 1896 these appropriations have grown, it is true, but I call the attention of this House to the fact that the appropriations have increased approximately $6,000,000 annually, carrying 2 battleships, as stated. The annual increase on an average being $6,000,000, then explain to me why the Naval Committee should call on this House for an increase of $25,000,000 in order to construct 2 battleships? It is true that 2 battleships have been carried with $6,000,000 increase since 1896, then why not in 1913? Why, Mr. Chairman, we propose to appropriate more money without battleships for the expenses of the Navy than the Republican side of the House appropriated in 1911 for expenses and 2 battleships. I call for the Naval Committee or its friends to come on the floor of this House and defend the extravagance of this Navy. If you are here, rise and speak. It is no child's play to spend $25,000,000. That is $9,000,000 more than was appropriated this session for agriculture in all the various departments. Sixteen million dollars was appropriated for agricultural departments in the year 1912.

Why, Mr. Chairman, it would startle you or me or anyone else to quote my friend Capt. HOBSON as an economist when it comes to the Navy. He is in favor of six battleships or more annually. He sits before me to-day, and he will corroborate what I say when I make the statement that the expenses of the Navy are more than one-third what they ought to be. If it is not true, he is an expert and should know. He has been in the Navy, and he is on the Naval Committee. I pause that the captain may speak if he desires.

Mr. HOBSON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. TRIBBLE. Yes; I yield.

Mr. HOBSON. Mr. Chairman, I desire not to be misunderstood in this matter. My statement is that if we had the machinery, the power, to reorganize the Navy from the bottom, to reorganize the whole personnel, and not grind out rear admirals like you would wheat or corn in the mill——

Mr. TRIBBLE. I will ask the gentleman not to take up too much of my time, as I am limited.

Mr. HOBSON. And if we had a chance to reorganize the navy yards and readjust the naval stations in the whole Navy, I do not hesitate to say that, in my judgment, we could save one-third of the general expense and, per thousand tons of the ships, one-third of what they are costing us now. But that is contingent upon our being able to reorganize.

Mr. O'SHAUNESSY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. TRIBBLE. I decline to yield for the present.

The CHAIRMAN. The gentleman from Georgia declines to yield.

Mr. TRIBBLE. I am a member of the Committee on Naval Affairs, and I challenge any Member of the House to stand up and refute the statements I am making.

Now, Mr. Chairman, what is the matter with this bill? I can not take up and consider all the items in this bill, but I will take up the first item, which carries an increase in the appropriation over that of last year of more than $2,000,000. Over $1,000,000 of this is increase of officers and increase of pay of retired officers. Why, sir, included in that item are retired officers on the pay roll of the Government. The pay of retired officers is $3,319,000. These retired officers do nothing for the Government and are out of the Navy drawing salaries all their life of $5,000 each, more or less.

Mr. HOBSON. Mr. Chairman, if the gentleman will permit me to interrupt him, I will say that the retired list——

The CHAIRMAN. Does the gentleman yield?

Mr. TRIBBLE. Yes; I will yield for a question.

Mr. HOBSON. I am very glad to tell my friend that the retired list of rear admirals alone costs a million dollars a year. There are 150 rear admirals on the retired list, and about 18 on the active list.

Mr. TRIBBLE. Mr. Chairman, that is one of the things I am complaining about.

Mr. HOBSON. It is the law.

Mr. TRIBBLE. Yes; but have I not stood there in the Naval Committee for two years and begged the gentleman from Alabama and others on the Naval Committee to revise these laws, and the gentleman from Alabama would not do it?

Mr. HOBSON. Have I not asked my friend to help me in passing the national counsel of defense bill, so that we could pass a new law and straighten out all those things?

Mr. TRIBBLE. Yes; but, Mr. Chairman, if you will look at the retired list you will find 148 retired admirals, and then look at the number of admirals on the active list you will find there are only 24. Now is not that a nice situation? Nearly all the admirals on the retired list; they receive about $8,500 per annum.

Mr. HOBSON. And six of those are extra numbers.

Mr. TRIBBLE. Yes. I am here, Mr. Chairman, to say that I stood on this floor last year when this bill was up for consideration, when the gentleman from Alabama [Mr. HOBSON] was here too, and I appealed to him and to every man on the floor of this House, and I appealed to this House to stand by me and abolish that "plucking board," which puts these officers on the retired list when they should be left on the active list; and the gentleman from Alabama would not do it, and the Committee on Naval Affairs would not do it, and there was only one man who was outspoken at the time to repeal the "plucking board," and that was the gentleman from Illinois [Mr. MANN], the minority leader on the Republican side. I know

there were many others, but they wanted action by the Naval Committee.

Is the Naval Committee, created by the Democratic party, in favor of economy? On that retired list, which is created by what is called "the plucking board," I had last year the names of all those men, and one of them was retired under the age of 30. I want to read what the Secretary of the Navy says. I have his letter before me. I wrote him and challenged him to point out any objection or any defect in any of these men, whereby they should be retired, and he gave me the names of the men retired and stated as follows:

None of these officers selected for retirement on June 30 last were unfit to perform their duties.

I quote the exact language from his letter.

The chairman of the Naval Committee was here when I made that fight before, and the chairman stood up and said, "No; we can not abolish the plucking board, because we have to retire low-grade officers and make places for others." When I challenged his statement on the question of incompetency, he said, "We have to make places for others and encourage the officers by promotion." No one denies that men are retired to create vacancies so that officers may be promoted to larger salaries. Retired officers go into retired life on large salaries and secure the very best positions in navy yards, with construction, engineering work, and so forth, because they are well qualified, having been educated by the United States Government, and get large salaries. I protest in the name of my constituents against paying salaries out of their pockets to men educated out of their money, doing them no service, and making large salaries for themselves.

Mr. CLINE. If the gentleman will allow me to interrupt him, how many men have we on the retired list now drawing pay under the three-fourths ratio?

Mr. TRIBBLE. I am glad to answer that question. We had on the retired list last year 920 men, and to that number have been added, I think, 179. There are over 1,000 men on the retired list. One hundred and seventy-seven of these were plucked, and every one of them is capable of service.

Mr. HOBSON. Will the gentleman allow me to interrupt him?

Mr. TRIBBLE. I prefer not to be interrupted now. Take the case of the man Walker, retired at 30 years of age. He went to the Naval Academy and stayed there at the expense of the Government for six years, and the Government educated him at an expense of $18,000. He then remained seven years longer in the service and drew a salary during that time. Now he has gone into public service in competition with other people, and I want to tell you the Government is now paying that man over $3,000 per annum for the remainder of his life.

From now until the end of his life, according to the insurance tables of expectation of life, he will draw out of the Government of the United States about $225,000, for which he will not do a day's work. The Secretary of the Navy says that man is a competent man.

Mr. SISSON and Mr. HOBSON rose.

The CHAIRMAN. Does the gentleman from Georgia yield?

Mr. TRIBBLE. Yes; I yield to the gentleman from Mississippi.

Mr. SISSON. The gentleman from Georgia states that the incompetent officers are the ones who are plucked.

Mr. TRIBBLE. No; I did not state that. I say the department pretend that they are plucking incompetent officers, but I did not make that statement. I say they are competent.

Mr. SISSON. If the incompetent ones are the ones who are being plucked, then they are adopting a system of pensioning men for incompetency, are they?

Mr. HOBSON. It is worse than that.

Mr. TRIBBLE. I say it is a terrible arraignment of the Navy of this country and the officers of the Navy if 177 men have been retired for incompetency or something else; and still there are deadheads in the Navy yet who should be plucked for retirement, and you continue to retire them year after year. It is a terrible arraignment on the whole system as well as the men. What is the matter with them? The Secretary of the Navy says there is nothing the matter. Ah, yes; they want to promote officers to better pay.

Mr. HOBSON. The gentleman's arraignment is not as strong as he can make it, if he will allow me. I simply want him to lay all the facts before the Members, and to state that those who are plucked are promoted a whole grade in being plucked.

Mr. BEALL of Texas. Why are they promoted?

Mr. HOBSON. In order to retire them in the next higher grade.

Mr. TRIBBLE. Yes; I thank the gentleman; when they are retired they are promoted to another grade in order that their life salary may be increased—rewarded by promotion for so-called incompetency.

Mr. SISSON. Can the gentleman tell the committee why the Committee on Naval Affairs has not changed that law and prevented them being retired?

Mr. TRIBBLE. Yes; I can tell you that. I say to you that there has been a bill before that Naval Committee all this year, a bill which I introduced, to abolish the plucking board. That bill has not been acted upon. I can not get a favorable report. The Naval Committee can deny this statement by reporting the bill to this House.

Mr. SISSON. Will the gentleman yield once more?

Mr. TRIBBLE. Yes.

Mr. SISSON. The Naval Committee, then, are solidly in favor of retaining the plucking board, are they?

Mr. TRIBBLE. I say there is no action being taken. If there is anybody here who will join me, let him stand up and say if he is with me in the fight. I undertook to cut out pay of this class of officers last term on the floor of the House, and then stated that the committee would not report with favor a bill to repeal the plucking board.

Mr. HENSLEY. I think the gentleman is entirely unwarranted in making a statement of that kind. If you have ever made that proposition, I have never heard you discuss it. I will join you.

Mr. TRIBBLE. I discussed it on the floor of the House last year. I suppose the gentleman was not present. I called for action on my bill last week in full committee. No action was taken.

Mr. HENSLEY. I have supported you on several propositions before the House.

Mr. TRIBBLE. Yes; that is true. We have fought together for economy. I think the gentleman from Missouri [Mr. HENSLEY] is nearly always right. There are few, if any, better men in this House than he, and he has the bravery and courage to speak his convictions and fight for what he thinks will benefit the people. I did not intend to discuss the retired list, but was drawn into it. One of the men named here on this list, retired last year, if you will notice, is Admiral Rust. Now, I want to read what is said of this man. I will put this in the RECORD and let the naval officials deny the charges I am making.

For the 25 years that Admiral Rust was commissioned in the Navy—from July 1, 1887, to July 1, 1912—he never received an unfavorable report from any commanding officer. Now, these gentlemen can find spokesmen among the Members of this House. Let them come here and speak through the mouths of members of the committee or Members on the floor of the House who will speak for them. I should like to read a little further what is said here. This man was a commander. At the time he was commander there were 116 commanders; 33 had never seen service at sea; 66 had been at sea six months, and the average length of service of those going to sea was seven months. This commander headed the list in length of service in his grade two years and eight months.

He never at any time received an unfavorable mark, but his entire record from one end to the other was "excellent."

Gentlemen, the trouble with this bill is this: It is gross extravagance—inexcusable extravagance. There are men on the Republican side who will not stand for this bill carrying $148,000,000. Their constituents will not approve a vote for this extravagance on the ground that Democrats alone are responsible for it. Sirs, your constituents will not applaud your act in voting for a $25,000,000 increase just because it is a Democratic bill. This is not a party measure, and I hope to see you vote for reduction. You can not defend a vote for extravagance because it is a Democratic bill. Your friends back home will say, "Why did you not stand up and expose it on the floor of the House, if the Democrats were extravagant, and not come here and talk to us about what was done by the Democrats while you stood by with folded hands"?

Mr. DIES. Will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. DIES. Has the gentleman forgotten here the direful prophecy of the gentleman from Alabama [Mr. HOBSON], who prognosticated that this country would be in war with Japan before the present time?

Mr. TRIBBLE. Yes; I heard the prophecy. He scents danger afar off. As I said the other day, I like my friend HOBSON; there is good in him. [Laughter.] Now, Mr. Chairman, my friend HOBSON says he joins with me on the proposition that the whole thing ought to be reorganized. I hold in my hand a pamphlet, on the back of which is marked "Naval Register." It shows where these officers are.

But before I forget it I want to say that I have in my hand another letter from the Secretary of the Navy, in which he

says that there are 1,157 officers here on shore duty. And yet the Navy is calling for more officers for the ships. The chairman of the committee stated that the Navy was calling for and claimed to need 3,000 more officers, and yet 1,157 of these men are on shore.

Where are they? Let me show you were they are. Down here at the Naval Academy is a good place for a man to retire from active naval service and have a good time. The social side of naval life has been discussed by my colleague [Mr. RODDENBERY] thoroughly, and I will not refer to the social side of land service and the land fighting Navy. At the Naval Academy, right here at your door, are stationed 160 naval officers. There are also in addition to these naval officers 28 civilian teachers, making a total of 188 of these gentlemen right down here on shore duty, supposed to be engaged in teaching the students. There are 720 students there. I would like for some one to defend the policy of placing all these officers and civilian teachers at Annapolis. There are five places—the navy yard at Norfolk, Philadelphia, Boston, New York, and Annapolis—where there are 656 officers located.

You go to the heads of departments, and the clerks are handicapped frequently with their work, because there are so many naval officers walking around in the way. What do the naval officers do? They have an assignment. Why, Mr. Chairman, I have nothing against the naval officers. The most of them are loyal, courageous, and patriotic. I am not attacking the naval officers. I am attacking a system that gives them a life of ease and luxury when, as a matter of truth, they would be better men and better satisfied engaged in profitable service at all times for the Government that pays their salary. I want them to fill the vacancies at sea and elsewhere, so that this Congress will not be called on for 3,000 more officers to fill the complement on vessels.

I hold in my hand a letter of Secretary Meyer, in which he says—now listen:

> It will take 1,714 officers to put in commission the ships we now have and the ships that are being constructed.

And yet there are over a thousand of these officers on shore duty on assignments from place to place throughout the country.

Mr. BEALL of Texas. Mr. Chairman, will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. BEALL of Texas. Does the gentleman remember the little couplet from Pinafore that goes this way:

> Just stick to your desk and never go to sea,
> If you want to be an admiral in the King's navee.

[Laughter.]

Mr. TRIBBLE. Mr. Chairman, how much more time have I?

The CHAIRMAN. The time of the gentleman from Georgia has expired. [Applause.]

Mr. TRIBBLE. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BARTLETT. Mr. Chairman, to digress a little from the subject of this bill, even though it does carry one hundred and eighty millions of dollars, I desire to call attention to, and place in the RECORD, something that may be of interest to the House and the country. I was a member of the committee that investigated the Steel Trust, and there came before that committee the chief officer of that corporation, then its president and now the chairman of its finance committee, and also the gentleman who is now its president and was at that time the president of its export company, a branch of the Steel Corporation. I made it my particular duty with each witness and officer of that company, and especially with Judge Gary and Mr. Farrell, to ask a set question, and that was whether there existed an agreement between the Steel Corporation and the manufacturers of this country and the foreign manufacturers of like products an agreement, international in its scope, which fixed the price of steel products, and which kept the foreign manufacturer from our own territory and divided the foreign territory with the foreigners and kept our independent manufacturers from foreign territory, it appearing in that investigation that steel rails and steel products were sold more cheaply to the foreigner than to the home consumer. Every time that question was asked of Judge Gary and Mr. Farrell, who testified under oath before that investigating committee, and of every officer of the corporation, they denied that any such agreement existed between the Steel Corporation and the foreign manufacturers, and they denied that there was at any time an agreement international in its scope that in any way affected the prices fixed or the territory in which both foreign corporations and the Steel Trust were to sell their products.

I have in my office the testimony of an ex-president of the Steel Corporation, Mr. Corey, given in the case now pending in the State of New Jersey against the Steel Corporation, in which Mr. Corey states that there was such an agreement and that Judge Gary and the officers of that corporation knew of its existence. So that we have the testimony before a congressional investigating committee of two officers of this Steel Corporation denying the existence of such a contract and the testimony of one who was the president and whom Judge Gary succeeded, saying on oath in court that there was such an agreement and that Judge Gary and the other officers knew it. I have examined Mr. Corey's testimony. It is too bulky to present to the House, but I have in my hand a statement contained in the New York World, that has placed these two statements in parallel columns, and I propose to place it in the RECORD in order that the country may see how convenient was the memory of these gentlemen when they appeared before the investigating committee or how inconvenient was the memory of Mr. Corey when he testified under oath in court the other day.

Mr. COOPER. Will the gentleman yield?

Mr. BARTLETT. Certainly.

Mr. COOPER. Were these two gentleman testifying as to the same period of time?

Mr. BARTLETT. They were, because I made it my business to find out. I was interested in undertaking to find out if this corporation, which was selling its product more cheaply abroad than to our own people, especially steel rails, had an agreement international in its scope between it and the foreign manufacturer, and I pressed it home to every witness, and especially to Judge Gary and to Mr. Farrell. They both denied that any such agreement at any time existed, and the testimony of Mr. Corey not only gives the agreement and states when it existed and when it ceased to exist, but that Judge Gary was informed of it and stated the time when he concluded that it could no longer be carried out.

Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting these parallel columns.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

The matter referred to is as follows:

GARY AND COREY DISAGREE.

On the witness stand Judge E. H. Gary, chairman of the executive committee of the Steel Trust, and William E. Corey, former president of the Steel Trust, have given radically different testimony as to price-fixing pools.

GARY.

During the Stanley committee hearings Judge Gary said that he ordered the Steel Trust's subsidiaries to abolish price-fixing pools.

"I do not know of any international agreement," he said. "I would not countenance an agreement that would divide up territory."

Again he said:

"We have occasionally read public criticism of our movements on the ground that there was a combination or an agreement in restraint of trade to maintain prices, to restrict output, or to divide territory. We have never intended to antagonize the laws of the country."

June 2, 1911, he said that one of the principal things at the meetings of the American Institute of Iron and Steel Manufacturers was to discuss the welfare of their employees. "It is the intention," he added, "to organize an international institute unless something comes up to make it appear that we ought not to do it from a legal as well as a moral standpoint."

COREY.

As a witness in the Government's suit to dissolve the Steel Trust, within a few days, former President Corey, of the Steel Trust, said in answer to counsel's questions:

"Did you mean when you said that Judge Gary knew of these pools that he knew about them before they were abolished in 1904?"

"He knew about all the pools all the time, because he attended some of the meetings."

"Which meetings?"

"The rail pool and the plate and structural pool meetings."

On the day before Corey said:

"An understanding existed between the United States Steel Corporation and manufacturers abroad not to attempt to sell in each other's territory."

Mr. AUSTIN. Mr. Chairman, I will ask the gentleman from Georgia if Mr. Farrell's statement was not that during his administration of the office of the Steel Corporation there was no such agreement in existence.

Mr. BARTLETT. He was not only the officer of the corporation, but he was the man who was in charge of the exporting of the products of the company, and he was produced before that committee as being the man of all others who had grown up from a lad in its service and who was more familiar with the details of its business than any other.

Mr. AUSTIN. But I think the gentleman misunderstands my question because he has evidently not attempted to answer it.

The CHAIRMAN. The time of the gentleman has expired; all time has expired.

Mr. BARTLETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARRETT, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 28730, the pension appropriation bill, and had directed him to report that it had come to no resolution thereon.

RECESS.

The SPEAKER. The House automatically goes into recess until 8 o'clock this evening and the gentleman from Missouri [Mr. LLOYD] will occupy the chair.

Accordingly (at 5 o'clock p. m.) the House, under its previous order, stood in recess until 8 o'clock p. m.

EVENING SESSION.

The recess having expired, the House was called to order at 8 o'clock p. m. by the Speaker pro tempore [Mr. LLOYD].

The SPEAKER pro tempore. The Clerk will read the special order.

The Clerk read as follows:

On motion of Mr. POU, by unanimous consent.

Ordered, That on Friday next, February 14, 1913, the House shall stand in recess from the hour of 5 o'clock p. m. until the hour of 8 o'clock p. m., at which time it shall be in order to consider, by unanimous consent only, in the House as in the Committee of the Whole, bills on the Private Calendar which were not considered or objected to on Monday, February 10, 1913, after which it shall be in order to consider the remainder of said calendar.

YNCHAUSTI & CO.

The first business on the Calendar for Unanimous Consent was H. Res. 643, referring the bill (H. R. 20677) for the relief of Ynchausti & Co. to the Court of Claims.

The SPEAKER. Is there objection to the consideration of the resolution.

Mr. GOLDFOGLE. Reserving the right to object, I would like some explanation of this bill.

Mr. POU. What is it the gentleman from New York [Mr. GOLDFOGLE] would like to know?

Mr. GOLDFOGLE. I would like to know something about the pending bill.

Mr. POU. The gentleman from Delaware [Mr. HEALD], who reported it, can answer the question of the gentleman from New York.

Mr. GOLDFOGLE. A parliamentary inquiry, Mr. Speaker. Before any explanation is made, may not the resolution be read?

The SPEAKER pro tempore. Without objection, the resolution will be read.

The Clerk read as follows:

House resolution 643.

Resolved, That the bill (H. R. 20377) for the relief of Ynchausti & Co., together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims for a finding of the facts and the amount due, if any, and that the same be reported to Congress.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. COOPER. Mr. Speaker, reserving the right to object, I take this opportunity to say that the procedure on this Private Calendar works a very great injustice to many of the Members of the House who have had meritorious claims favorably reported. Last Monday night, when claims on this calendar were taken up, objection after objection was made to bill after bill without even so much as the slightest reason being assigned for the objection, and, excepting in one or two instances, without even the slightest inquiry being made as to the merits of the claims. Then suddenly, after two pages or more of the calendar had been reported, and all claims rejected, the chairman of the Committee on Claims arose, remarked that there were many just claims on the calendar, and expressed the hope that there would be no objection made to considering them. That had not occurred to the chairman until 30 or 40 just as meritorious claims as any that remained to be considered had been denied a hearing and killed. Then he remembered that there were worthy claims on the calendar, and thereupon a filibuster was begun, and after two or three roll calls the House adjourned.

I shall not seek to retaliate because a claim in which I was interested met with objection—a claim which has once heretofore passed the House and failed in the Senate for want of time for its consideration.

Mr. POU. Will the gentleman permit me just a word?

Mr. COOPER. I wish to finish what I have to say, and then I will yield.

I shall not attempt to prevent the proper consideration tonight of the remaining bills on the Private Calendar, because on last Monday night consideration was unjustly refused a meritorious bill, a bill the claimant in which was an unfortunate old man, upward of 80 years of age, whom experience had taught to know too well all that Robert Burns meant in the sad line, "Age and Want, oh, ill-matched pair." I wish only to suggest that if any Members of the House had conspired to have certain claims acted upon that had a late position on the calendar, and which they feared would not be reached, the procedure which has been adopted is exactly the one that these gentleman would have agreed upon in advance—that is, to kill 30 or 40 claims and thus get within striking distance of the claims in which they were interested, then have a resolution adopted providing that the call shall begin where it ended at the previous session and proceed, in the hope that hereafter there would be no objection. But I do not say that anything of this kind was intended, for I would not make an imputation of improper motives.

Mr. POU. I hope the gentleman will permit me to say in his own time, in reply to a suggestion that he made——

Mr. MOORE of Pennsylvania. Will the gentleman reply to a question by me?

Mr. POU. I will, if I can.

Mr. MOORE of Pennsylvania. I want to know if it was not the understanding under the rule that was passed—the rule that brings us here to-night—that we might revert by unanimous consent for a fair consideration of the bills that were objected to the other night?

Mr. POU. I will say to the gentleman that the order is self-explanatory. The calendar will be taken up at the point where we left off on Monday night. We will take it up in the regular order, and if there is any time left we can then go back to the preceding bills.

Mr. MOORE of Pennsylvania. If there is a chance, we can revert to those that have been objected to?

Mr. POU. I understand so.

Mr. MOORE of Pennsylvania. I wanted to understand that.

Mr. COOPER. That is what I wanted to know.

Mr. HOWARD. I would like to say to the gentleman from Pennsylvania that the gentleman from Georgia is in the same fix as he is in and as a good many other folks are in.

The SPEAKER pro tempore. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, Mr. Speaker, the only difficulty here seems to be that the other night, when the House was in the tantrums, a number of bills were objected to without opportunity being given for consideration at all, and we are now about to proceed by unanimous consent to the consideration of those bills that stand preferred above those that were objected to the other night. I have no objection to going on with this proceeding, if it is the intention to call up those bills that were formerly passed over and have them considered. I shall not object.

Mr. POU. In behalf of the committee I will say to the gentleman from Wisconsin [Mr. COOPER] that every bill that has been reported from the committee is, of course, a meritorious bill in the judgment of that committee. I did not intend to draw any distinction at all between bills. I have been hoping that every gentleman would have opportunity to have his bill considered. Because, in the course of some remarks I made at a former session of the House, I alluded to certain bills as meritorious I did not, of course, mean to imply that other bills were without merit.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. Does the gentleman yield?

Mr. POU. Yes.

Mr. MOORE of Pennsylvania. Would there be any objection to a motion for unanimous consent to return to the head of the calendar and begin the consideration of the bills from that point?

Mr. POU. That could not be done, I think, under the terms of the order.

Mr. MOORE of Pennsylvania. But it could be done by unanimous consent.

Mr. MADDEN. That could not be done.

Mr. POU. I do not think the House would have authority to change the special order now.

Mr. MOORE of Pennsylvania. There were 36 bills objected to. If the gentleman would agree to a motion for unanimous consent to return to the bills on the calendar, we might reach all of them.

Mr. POU. My opinion is that if you begin at the beginning of the calendar it will result in just such another proceeding as we had the other night. On the other hand, I think if we proceed in order it will be possible for some Members at least to get their bills through.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, Mr. Speaker, I am in that position that possibly all the gentlemen on the floor do not occupy. I have no bill on the Private Calendar in

which I am in any degree interested personally. I have read every bill and the reports upon every bill upon the Private Calendar carefully, calmly, quietly, and have made notes on those reports, and in many cases secured other information. It is immaterial to me whether any of the bills pass. The proceeding last Monday night did not offend me in the slightest degree—when gentlemen objected simply because their bills had been objected to; and if they choose to do that to-night, I shall not quarrel with them about it. I thought then, owing to the length of the calendar, in those cases where I had made up my mind to object that it was to the interest of the House to object promptly, so that the time of the House would not be occupied in considering bills which in the end would not pass.

If, however, the Members of the House prefer to have bills considered, reserving the right to object and spending 10 or 15 minutes or more upon a bill which in the end would be objected to by myself or somebody else, I shall not quarrel with that. If the gentleman from Wisconsin [Mr. COOPER] or the gentleman from Pennsylvania [Mr. MOORE] prefers that course, I am perfectly willing to reserve the right to object until gentlemen exhaust themselves on the subject of a particular bill and then make the objection.

Now, it should be remembered that this is not an ordinary call of the Private Calendar. Last Monday night's was not an ordinary call of the Private Calendar. When Members allowed an order to go through by unanimous consent to fix a calendar in this way, it was done as a matter of course. Gentlemen have the right to object to that procedure, undoubtedly, at any time by making a point of no quorum, and that will end the proceedings.

The SPEAKER pro tempore. Is there objection?

Mr. GOLDFOGLE. Mr. Speaker, reserving the right to object, I want to say that no explanation has been given why this resolution should be adopted. There has been so much talk about meritorious claims that I should like to know a little about the resolution before I vote on it.

Mr. POU. I will say to the gentleman that this company had a cargo of goods which it claims was destroyed by reason of the negligence of one of the Government boats, which ran into the company's boat. They lost their cargo as a result of this collision, and all they are asking now is that the Court of Claims fix the responsibility, and also fix the amount of the damages if the Government is liable for the claim.

Mr. GOLDFOGLE. Does this resolution send the case to the Court of Claims for findings, or does it make an appropriation?

Mr. POU. Merely for findings. The Court of Claims could not make any appropriation, of course. It is merely for a finding of facts.

Mr. GOLDFOGLE. Does the claim belong to that class of cases that can be sent to the Court of Claims by the action of the Committee on Claims without the action of the House? The gentleman, I suppose, is aware of the statute——

Mr. POU. Action by the House is necessary. The findings of the Court of Claims will be merely in the nature of a recommendation. The House can pay the claim or not, as it may see fit hereafter. The Court of Claims will ascertain how the accident occurred and whether or not those in charge of the Government boat were guilty of negligence.

Mr. GOLDFOGLE. Could not the committee have ascertained the facts?

Mr. POU. It is one of those cases of damage which usually are referred to the Court of Claims, according to my information, and the committee followed what it was informed was the usual procedure in such cases.

Mr. GOLDFOGLE. I think the gentleman is mistaken about the usual course of procedure. In many of these cases in the past the committee have acted directly, to determine whether there was merit in a claim, without sending the matter to the Court of Claims and having it footballed back again, to and fro.

Mr. POU. The committee did not care to undertake to fix the damages in a case of this kind, and it was thought proper to ask the assistance of the Court of Claims. That is the only information I can give the gentleman.

Mr. GOLDFOGLE. Not having the resolution before me, I am unable at this moment to say whether the resolution sends the matter to the Court of Claims for a finding on all the facts or only to assess the damages.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. RUCKER of Colorado. Will the gentleman yield for a question?

Mr. GOLDFOGLE. I would prefer not to yield until I obtain the information which I am seeking.

Mr. MANN. If the gentleman from New York will yield, the form of the resolution is faulty, and should be cured. It should read:

Referred to the Court of Claims for findings and conclusions.

That is what the law provides. This was a case of a collision between a Government quartermaster's boat and a launch owned by the gentlemen named in the resolution. The committee did not feel that it could get at the facts as well directly as it could by reference of the matter to the Court of Claims to ascertain findings and report to Congress.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 643.

Resolved, That the bill (H. R. 20377) for the relief of Yuchausti & Co., together with all the accompanying papers, be, and the same is hereby, referred to the Court of Claims for a finding of the facts and the amount due, if any, and that the same be reported to Congress.

Mr. MANN. Mr. Speaker, I move to amend by striking out the words—

a finding of the facts and the amount due, if any, and that the same be reported to Congress—

And insert—

findings and conclusions.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, lines 4 and 5, strike out the words "a finding of the facts and the amount due, if any, and that the same be reported to Congress" and insert in lieu thereof the words "findings and conclusions."

Mr. MANN. Mr. Speaker, that conforms to the law, because the Court of Claims under this resolution is not authorized to find the amount due.

The amendment was agreed to.

The resolution as amended was agreed to.

HEIRS OF SAMUEL H. DONALDSON.

The next business on the Private Calendar was the bill (H. R. 18894) for the relief of the heirs of the late Samuel H. Donaldson.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the heirs of the late Samuel H. Donaldson, who died from injuries received in the performance of his duties under the appraiser of merchandise at the port of New York, the sum of $5,000.

With the following committee amendment:

Line 8, strike out the words "five thousand" and insert in lieu thereof the words "one thousand five hundred."

The SPEAKER pro tempore. Is there objection?

Mr. SABATH. Mr. Speaker, reserving the right to object, I would like to know what this bill is and what the claim is for, how the injury was sustained, and how the death was caused.

Mr. POU. The report shows that the deceased was a laborer employed in the United States public stores in New York City. On July 6, 1911, while engaged in his usual work, he attempted to pull a cask of merchandise onto a truck, when a hoop of the cask came off and he was thrown backward into the runway for truck, sustaining injuries from which he died in less than a week. It clearly appears that the injury was in nowise due to negligence on the part of the deceased.

Mr. COX. Will the gentleman yield?

Mr. POU. Certainly.

Mr. COX. It is proposed to pay the heirs $1,500. The report says that he is dead and that his wife is dead. I would like to know whether he left any children.

Mr. MANN. He left four children, as the report shows.

Mr. GOLDFOGLE. If the gentleman will yield to me, what evidence did the committee have before it on which they made the findings that justify the award of damages, and what evidence did the committee have before it to justify the amount?

Mr. GREEN of Iowa. If the gentleman from North Carolina will allow me, I will answer the gentleman from New York.

Mr. POU. I will yield to the gentleman from Iowa.

Mr. GREEN of Iowa. Mr. Speaker, in answer to the gentleman from New York, I will state that the facts are set forth fully in the report. The report shows the full account of the injury which he sustained. How it came about was given in the report of the police department at New York, and also was reported by the director of the girls' department of the Young Woman's Christian Association. It was also confirmed by a report received from the department. It established that the accident had happened, as was stated by the gentleman from North Carolina, by reason of a hoop on a cask which he was handling coming off and caused him to be thrown backward into a runway for trucks. The amount awarded is not $5,000, but by a committee amendment is reduced to $1,500.

Mr. GOLDFOGLE. As far as the report of the police department is concerned and the other report, the gentleman would not regard them as evidence in the case. As far as the report from the department is concerned, I would like to have that

read, so that we may know what the facts are as reported by the department.

Mr. GREEN of Iowa. The department reports are not here in full, and as regards the report of the police department, I should consider that some evidence.

Mr. GOLDFOGLE. That would establish nothing.

Mr. GREEN of Iowa. The gentleman is not very easily convinced.

Mr. GOLDFOGLE. Because a police officer makes a report and may fill it up with conclusions, and perhaps have no knowledge of the facts. It might be full of inferences, and I am sure the gentleman would not accept it; at any rate, he would not if he was a judge on the bench.

Mr. GREEN of Iowa. The gentleman knows perfectly well that the committee is not authorized to subpœna witnesses before it.

Mr. GOLDFOGLE. No; they are authorized to find out the facts. Mr. Speaker, I object.

Mr. CANTRILL. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER pro tempore. The gentleman from Kentucky moves that the House do now adjourn.

The question was taken, and the Speaker pro tempore announced that the "noes" had it.

So the House refused to adjourn.

Mr. LEVY. I hope, Mr. Speaker, that the gentleman from New York, my colleague, will withdraw his objection. This is a very harrowing and pitiful case.

Mr. GOLDFOGLE. Mr. Speaker, I can not withstand the piteous appeals that come all around me, and I withdraw the objection.

Mr. HAMLIN. Mr. Speaker, I renew the objection.

The SPEAKER pro tempore. The gentleman from Missouri objects.

LENA SCHMIEDER.

The next business on the Private Calendar was the bill (H. R. 23123) for the relief of Lena Schmieder.

The Clerk read the bill.

The SPEAKER pro tempore. Is there objection?

Mr. FOSTER. I object.

JOHN A. GAULEY.

The next business on the Private Calendar was the bill (H. R. 17140) for the relief of John A. Gauley.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, I object.

The SPEAKER pro tempore. The gentleman from Illinois objects, and the Clerk will report the next bill.

Mr. RUCKER of Colorado. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. RUCKER of Colorado. Mr. Speaker, in view of last Wednesday's performance in this House, and then of the performance at the night session when we tried to hold a session for consideration of bills of this sort, I desire to ask whether it is now in order for me to move the House for an adjournment sine die of this Congress? [Laughter.]

The SPEAKER pro tempore. That is hardly a parliamentary inquiry.

FELIX MORGAN.

The next business on the Private Calendar was the bill (H. R. 21849) for the relief of Felix Morgan.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Felix Morgan, of Wirt County, W. Va., out of any funds in the Treasury of the United States not otherwise appropriated, the sum of $10,000, to compensate him for injuries received while in the employ of the Government on the Little Kanawha River, in Wirt County, W. Va.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, I desire to say at this stage of the proceedings that we have just passed by two bills, one of which came to the House without the indorsement of the Treasury Department, and the other of which came with the indorsement of the War Department. It simply illustrates the inconsistency under which we are proceeding and the futility of attempting to have fair consideration of these bills.

Mr. MANN. Which bill came with the indorsement of the War Department?

Mr. MOORE of Pennsylvania. I will get to that in a moment. In the case of Samuel Donaldson, which bill was objected to by the gentleman from New York [Mr. GOLDFOGLE], there positively was no direct evidence from the Treasury Department that the man was employed by the Government or that the department itself approved of the passage of the bill. Therefore the objection would seem to have been well founded, because this Congress ought to have at least some word of information or approval from the department concerned as to whether the claim is authentic.

In the case of Lena Schmieder, just passed over, the report upon which I did not have the opportunity to read before objection was made, it does appear that an employee of the Government who was engaged in river and harbor work was killed under a falling embankment, and that the facts are certified to by the Chief of Engineers of the War Department; that the Secretary of War forwarded a statement certifying to the accuracy of the facts, showing that the man was killed under a falling embankment while in the performance of his duty. Yet the gentleman from Illinois [Mr. MANN] objects to that bill, just as the gentleman from New York [Mr. GOLDFOGLE] objected to a bill where we had no proof whatever. It does seem to me that we are proceeding in a very peculiar way, and it does seem to justify the objections that some gentlemen are making to this general method of procedure.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, I understood the gentleman reserved the right to object.

Mr. MOORE of Pennsylvania. Yes.

Mr. MANN. Then I desire to ask the gentleman a question. Does the gentleman know that this woman, Lena Schmieder, lost her first husband in 1895, afterwards married a second husband, lost him, and then put in a claim to the Govment for the loss of both husbands?

Mr. MOORE of Pennsylvania. I do not know that; and that apparently does not appear in the report.

Mr. MANN. It does appear in the report. The gentleman has not read the report.

Mr. MOORE of Pennsylvania. But I have a statement signed by the Judge Advocate General of the War Department saying that this man came to his death as the result of employment under the United States Government, being crushed under a falling river bank which, as foreman, he was engaged in grading to a proper slope for revetment. In the absence of proof in the bill under consideration that the department approves or certifies to the facts, I object.

Mr. MANN. The bill to which the gentleman referred provides for relief for the loss of two husbands.

Mr. POU. The bill authorizes nothing of the kind.

Mr. RAKER. Mr. Speaker, I demand the regular order.

Mr. MANN. Mr. Speaker, I hold the bill in my hand. It provides for relief because of the loss of two husbands.

The SPEAKER pro tempore. The gentleman from Pennsylvania objects, and the Clerk will report the next bill.

Mr. HEALD. May I ask the gentleman from Pennsylvania to what bill he objected?

Mr. MOORE of Pennsylvania. I objected to the bill under consideration. I was also discussing bills that have already been objected to.

LEO MÜLLER.

The next business on the Private Calendar was the bill (H. R. 22257) for the relief of Leo Müller.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys in the United States Treasury not otherwise appropriated, the sum of $5,000 to Leo Müller, in full of all claims he may have against the Government for injuries received by him while employed by the United States Reclamation Service, as carpenter, at Laguna Dam (Yuma, Cal.) project, for the loss of a leg and other physical disabilities resulting from said injuries.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, if I may, as I understand this bill—and if I am in error I will be glad to be corrected—this claimant has already been paid under the general compensation law the amount allowed by that law, which may or may not be sufficient, but that is the law that Congress passed, and this bill is to pay an additional amount to the claimant over and above what the general law provides. If that be the case, I do not see where we will stop from having the same sort of claims presented by anyone who is allowed any compensation under the general law. Is that the fact?

Mr. HEALD. Mr. Speaker, that is the fact. He received $1,080 under the general law, but the affidavits and other evidence submitted to the committee show the case was such an aggravated one that in addition to the amount allowed under the general law we did vote in the committee to authorize a report for an additional $2,500.

The SPEAKER pro tempore. Is there objection?
Mr. MANN. I object.

CHARLES A. DAVIDSON AND CHARLES M. CAMPBELL.

The next business on the Private Calendar was the bill (S. 2199) carrying into effect findings of the Court of Claims in the cases of Charles A. Davidson and Charles M. Campbell.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of this bill?

Mr. COX. I object.

Mr. GREGG of Texas. I hope the gentleman will reserve the right to object.

Mr. McGUIRE of Oklahoma. Will the gentleman reserve the right to object until I can explain this bill?

Mr. COX. Later on I will object, but I will reserve it if the gentleman desires to make a statement.

Mr. McGUIRE of Oklahoma. I will not take up the time to make a statement if the gentleman is going to object.

Mr. COX. I object.

ELIZABETH MUHLEMAN AND HEIRS AT LAW OF SAMUEL A. MUHLEMAN, DECEASED.

The next business on the Private Calendar was the bill (S. 4041) for the relief of Elizabeth Muhleman, widow, and the heirs at law of Samuel A. Muhleman, deceased.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, I object.

TO REIMBURSE CERTAIN EMPLOYEES, WASHINGTON NAVY YARD.

The next business on the Private Calendar was the bill (H. R. 16449) to reimburse certain employees of the Washington Navy Yard for the loss of mechanic's tools by fire.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. COX. Mr. Speaker, I object.

LIBBIE ARNOLD.

The next business on the Private Calendar was the bill (S. 2628) for the relief of Libbie Arnold.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. FOSTER. Mr. Speaker, I object.

CARL KRUEGER.

The next business on the Private Calendar was the bill (S. 104) for the relief of Carl Krueger.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $500 to Carl Krueger, of Denver, Colo., on account of injuries received in the United States mint in the city of Denver, State of Colorado, on February 27 1906.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, reserving the right to object, does not the gentleman think it would be safer to pass this bill at $500?

Mr. TAYLOR of Colorado. I could not hear the gentleman.

Mr. MANN. The Senate passed this bill for $500, and is not likely to increase it, and I see the committee has reported it at $1,500.

Mr. TAYLOR of Colorado. I am perfectly willing to have the committee amendment stricken out, so far as that is concerned. It is a very meritorious case. This man had an arm torn off——

Mr. MANN. I do not think it has the slightest chance of passing at this amount.

Mr. TAYLOR of Colorado. So far as I am concerned, I did not ask to have it increased. It was because of the pitiable condition that the committee saw fit to increase it, and when a man has lost an arm and is crippled for life, and purely without any fault of his own, while working in the Government mint at Denver——

Mr. MANN. And purely without any fault on the part of the Government. The man would not have recovered for working for a private corporation or individual.

Mr. TAYLOR of Colorado. Yes; I think he could have recovered.

Mr. MANN. I do not think he would.

The SPEAKER pro tempore. Is there objection?

Mr. MANN. Reserving the right to object, it is a committee amendment.

Mr. POU. Mr. Speaker——

Mr. TAYLOR of Colorado. Mr. Speaker, I move to strike out the committee amendment. I will ask the chairman of the committee, if I have not any right to do it myself, that he move to strike it out.

The SPEAKER pro tempore. The question is on striking out the committee amendment.

The motion was agreed to.

The bill was ordered to a third reading, was read the third time, and passed.

GEORGE HALLMAN.

The next business on the Private Calendar was the bill (H. R. 9125) for the relief of George Hallman.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 9125) for the relief of George Hallman.

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to George Hallman, out of any moneys in the Treasury of the United States not otherwise appropriated, the sum of $5,000 in full settlement of his claim against the Government of the United States for personal injuries received while in the employ of the Government of the United States as fireman, and when in line of duty.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, I reserve the right to object.

Mr. FOWLER. Mr. Speaker, this is a very meritorious bill. It deals with an employee in the Treasury Department in this city. He lost his right eye while in the ranks in the regular line of his duty, and also lost the use of his right leg. He was a fireman and was sent into the Cox Building for the first time to regulate the fire in that building. The furnace was placed down in a pit, and by virtue of an accumulation of rough lumber and débris no light was permitted to be kept in that part of the building. Mr. Hallman was sent for the first time into this building to look after the fire. Groping his way through the dark cellar, he fell into the pit and broke his ankle, which has never sufficiently recovered for its normal use. It is stiff now, and his physicians have informed him that it will never be right again. His injury is permanent. On another occasion, while being sent into the engine room for the purpose of looking after the fire in the regular line of his duty, in trying to regulate the furnace a lump of hot coal flew out and struck him point-blank in the right eye, from the effects of which he was compelled to have his eye enucleated. He is blind now in that eye. He has a stiff ankle, and in my opinion, Mr. Speaker, this House could do itself no greater honor than to pass this bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Reserving the right to object, I notice in the report of the Secretary of the Treasury upon this matter, and I am not sure that it is correct, the statement:

No regular fireman was required to be continually on duty, but one was sent from time to time during the day and night from the Treasury Building to attend to the fires. On one of his regular rounds at night Mr. Hallman entered the cellar, and in attempting to get to the window on the opposite side to secure more light evidently miscalculated the clear space between the boiler front and the wall of the cellar, and fell into the 4-foot pit, thereby injuring his leg.

That would seem to indicate that he was familiar with this place, and that he was making regular rounds there. Whether that is a correct statement or not I do not know.

As to the gentleman's eye——

Mr. FOWLER. Will the gentleman yield?

Mr. MANN. In just a second. As to his eye, he made no complaint of being injured in the eye, made no report of it, but says that a bit of coal flew into his eye. Well, I suppose, really, that is one of the inherent risks that any man takes who is a fireman or who handles coal. I am not sure that the Government is under any obligation to furnish him goggles or pay him if his eye is injured.

I will ask my colleague [Mr. FOWLER] whether, as a matter of fact, it sufficiently appeared to the committee that the statement of the Secretary of the Treasury was incorrect in making the report upon this bill.

Mr. FOWLER. Mr. Speaker, the evidence before our committee revealed that the statement of the Secretary of the Treasury was, unfortunately, not altogether true. The evidence of the claimant and of his coemployees all shows that it was the first time—at least he states so under oath—that he had been sent to the Cox Building, and that he was wholly unacquainted with the conditions in the pit where the furnace was located.

Mr. KENDALL. Mr. Speaker——

The SPEAKER pro tempore. Does the gentleman from Illinois [Mr. FOWLER] yield to the gentleman from Iowa [Mr. KENDALL]?

Mr. FOWLER. In a moment. All the evidence, Mr. Speaker, with the exception of the statement of the Secretary, is to the effect that the claimant was wholly unacquainted with the conditions in the room in which the injury took place, and that it was his first trip.

Now I yield to the gentleman from Iowa [Mr. KENDALL].

Mr. KENDALL. Does the report disclose the age of the claimant in this case?

Mr. FOWLER. I am not sure that it does. However, I have in mind that he was a middle-aged man.

Mr. KENDALL. I understand from the statement of the gentleman that there were two injuries here?

Mr. FOWLER. Yes.

Mr. KENDALL. Well, I understand from the statement of the gentleman that there were two injuries here.

Mr. FOWLER. Yes.

Mr. KENDALL. How much time intervened between the injuries?

Mr. FOWLER. Well, the first injury, as I recollect, was the injury, in the Cox Building, to his leg.

Mr. KENDALL. That is the injury in which he fell into the pit?

Mr. FOWLER. Yes.

Mr. KENDALL. How long was it after that that a lump of coal struck him in the eye?

Mr. FOWLER. The evidence does not disclose the length of time.

Mr. KENDALL. Was it the same furnace?

Mr. FOWLER. No; I do not understand that it was the same furnace.

The SPEAKER pro tempore. Is there objection?

Mr. HAMLIN. Was his eye injured after he had broken his ankle?

Mr. FOWLER. Mr. Speaker, I so understand.

Mr. HAMLIN. Then, he was able to go back to his work after he had broken it?

Mr. FOWLER. Yes.

Mr. MANN. What is he doing now?

Mr. FOWLER. I understand he is still in the employ of the Government.

Mr. HAMLIN. Is he in the employ of the Government now?

Mr. FOWLER. I think not.

Mr. HAMLIN. Is the gentleman sure about that?

Mr. FOWLER. No; I will not be positive about that, but that is my understanding. Other members of the committee, however, may recollect more definitely than I about his present employment.

Mr. HAMLIN. The gentleman does not know whether his injuries have affected his earning capacity, so far as his employment by the Government is concerned?

Mr. FOWLER. I think they have materially, Mr. Speaker.

Mr. HAMLIN. The gentleman does not know but that he is drawing the same salary?

Mr. FOWLER. I do not think he is employed at all by the Government. In fact, Mr. Speaker, this poor man is blind.

Mr. CAMPBELL. In one eye?

Mr. FOWLER. Yes; in one eye. [Laughter.] I did not fully understand the gentleman from Kansas [Mr. CAMPBELL].

Mr. ADAIR. Blind in one eye and one ankle? [Laughter.]

Mr. FOWLER. Yes. But the injury to his ankle, Mr. Speaker, is almost equal to the loss of the other eye. [Laughter.]

Mr. MANN. Mr. Speaker, will my colleague yield?

Mr. FOWLER. Yes; with pleasure.

Mr. MANN. Did not this claimant when he made his affidavit to the committee, upon which the committee acted, state that he had been in the employ of the Government continuously since May, 1895, first as a fireman and later as a watchman, so that he was then in the employ of the Government in a better position than he was in when he was injured?

Mr. FOWLER. I do not understand that he is in the employ of the Government now.

Mr. MANN. Has my colleague any later information than that disclosed in the report?

The SPEAKER. Is there objection?

Mr. RUCKER of Colorado. Reserving the right to object, Mr. Speaker——

Mr. LOBECK. I object. [Cries of "Regular order!"]

Mr. RUCKER of Colorado. I would like to ask the gentleman from Illinois [Mr. FOWLER] a question.

Mr. FOWLER. Yes; I will yield to the gentleman.

The SPEAKER pro tempore. The gentleman from Nebraska [Mr. LOBECK] objects. The Clerk will call the next one.

MARGARET M'QUADE.

The next business on the Private Calendar was the bill (S. 6408) for the relief of Margaret McQuade.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Margaret McQuade, widow of the late Edward McQuade, alias Edward Quade, out of any money in the Treasury not otherwise appropriated, the sum of $840 as compensation for the death of the said Edward McQuade, alias Edward Quade, caused by and in the performance of his duties as an employee in the Government service in the War Department.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. HAMLIN. Reserving the right to object, Mr. Speaker, I would like to have some explanation of this bill.

Mr. GREEN of Iowa. Mr. Speaker, will the gentleman yield?

Mr. HAMLIN. Yes; go ahead. I am asking for an explanation.

Mr. GREEN of Iowa. I am ready to give it to the gentleman. This man McQuade was in the employ of the War Department and detailed as a driver for the Secretary of War. In fact, he had been acting in that capacity for quite a number of years; I can not at this time say how long. He was out driving under directions that had been given him by some one in the department, I think taking the 3-year-old granddaughter of the Secretary out riding.

Mr. MANN. The granddaughter of Secretary Dickinson.

Mr. GREEN of Iowa. The granddaughter of Secretary Dickinson; when from some cause the horses became frightened, became entirely unmanageable, ran away, and I think the pole broke, and he was thrown out and received injuries from which he died shortly afterwards. There was no fault on his part, and probably no negligence on the part of anyone. It was just one of those accidents that will sometimes happen, without the fault of anyone.

The SPEAKER pro tempore. Is there objection?

Mr. COVINGTON. Reserving the right to object, does not the report disclose that this driver was performing a service wholly outside of the line of his governmental duties as the driver for the Secretary of War; that he was taking the young granddaughter of Secretary Dickinson out for a morning drive?

Mr. GREEN of Iowa. That is the fact; but I understand he was under the orders of the Secretary in so doing.

Mr. COVINGTON. As a matter of fact, was he taking that drive under such circumstances that he was under the orders of the Secretary of War and compelled to do it?

Mr. GREEN of Iowa. I take it such was the fact, because the claim was recommended by the War Department.

Mr. COVINGTON. I do not want to bind him down to a harsh rule if he was acting under orders. The report does not so state.

Mr. GREEN of Iowa. The War Department certified to us that he was acting in the line of his employment.

The SPEAKER pro tempore. Is there objection?

Mr. DIFENDERFER. Reserving the right to object, I should like to state that this is not one of the cases where the claimant is now in the employ of the Government. He is dead, and the claim is for $840, the equivalent of one year's salary. The man was serving the War Department at the time of his death, and when the pole of this carriage broke it broke because he ran the team into a bank in order to save these people in the carriage, at the risk of his own life.

Mr. HOWARD. What right under the law had the Secretary of War to delegate this man to drive his 3-year-old granddaughter and that child's governess around this town, when the Government of the United States was paying for his time?

Mr. DIFENDERFER. I can answer that by asking another question: What right had the Secretary to have the carriage at all?

Mr. HOWARD. Because he had the money to pay for it as a private citizen and not as Secretary of War Dickinson..

Mr. FARR. This carriage is allowed to the Secretary of War.

Mr. HOWARD. And he had the right to employ a private citizen as a driver.

Mr. FOSTER. But the Government owned the carriage and furnished the driver.

Mr. HOWARD. I do not care if the Government did own the carriage.

Mr. HAMLIN. If we furnish the Secretary a team, I think he has a right to employ a driver.

Mr. HOWARD. That is the very thing that is being abused in this town by Government officials.

Mr. DIFENDERFER. The answer to that is that this driver did not take out this carriage of his own volition. He must have received instructions from his superior, and he was carrying out those instructions at the time of his death.

Mr. BARNHART. I want to inquire of the gentleman from Pennsylvania, if the Secretary of War sent this man out on a mission for his own family and he was injured thereby, and the Secretary had no official authority to send him out, and he was not out on an official mission, would it not be entirely proper for the Secretary of War to foot the damage bill himself?

Mr. DIFENDERFER. It is quite apparent that he has not.

Mr. MANN. Mr. Speaker, I objected to this bill once on the same grounds that gentlemen have indicated. I understand the fact to be that we furnish the President and Cabinet officers conveyances which are not confined to official business at all. We have provided vehicles for many officials in the city of Washington where the law provides that they can be used for official business only; but that is not the case with the carriages of the Cabinet officers or the conveyances of the President. The President of the United States has the same authority to send his wife or his children or his guests in the conveyance furnished by the Government that he has to use it for official business, and the same is true of the Cabinet officers.

When this bill was before the House before I objected, and afterwards I made more investigation and discovered what is apparently the fact—that Cabinet officials have carriages and drivers furnished by the Government for their convenience not confined to official business at all, and that there is the same right to direct a carriage to be used for a morning drive for the granddaughter of the Secretary of War that there is to carry the Secretary of War to or from his place of official business.

The driver was under directions and could not help himself, nor was the Secretary transcending the authority he had for the use of the carriage.

The SPEAKER pro tempore. Is there objection?

Mr. SHERWOOD. I object.

ESTATE OF ALMON P. FREDERICK.

The next business on the Private Calendar was the bill (S. 2733) for the relief of the estate of Almon P. Frederick.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the estate of Almon P. Frederick, late an inspector of the Post Office Department, who was killed while in the discharge of his duties as an officer of the United States, and because of the faithful discharge of those duties, the sum of $1,600, being one year's salary.

The SPEAKER pro tempore. Is there objection?

Mr. POWERS. Mr. Speaker, reserving the right to object, I would like to have an explanation.

Mr. DICKINSON. Mr. Speaker, this is a Senate bill, and the committee adopted the report of the Senate committee. It is a bill to pay one year's salary to the estate of Almon P. Frederick, who was a post-office inspector. The bill has the favorable recommendation of the department. As a part of the Senate report there is a statement of the case made by the Postmaster General. I will read that statement, which is perhaps as brief, if not briefer, than I could make it. It is in the shape of a letter to the chairman of the Senate Committee on Claims, and is as follows:

OFFICE OF THE POSTMASTER GENERAL,
Washington, D. C., December 14, 1911.

Hon. C. I. CRAWFORD,
Chairman Committee on Claims, United States Senate.

SIR: With reference to bill S. 2733, now pending before your committee, for the relief of the estate of Almon P. Frederick, late a post-office inspector, there is transmitted herewith a copy of a report, bearing date of April 26, 1910, from the inspector in charge at Denver, Colo., to the chief inspector, reciting the circumstances incident to the injuries sustained by Mr. Frederick in an accident which resulted in his death.

It appears that the accident occurred between Bland and Mattison, Colo., while the inspector was in the performance of his official duties. He had procured livery for the purpose of visiting post offices which he could not reach by railroad. A singletree became detached from the doubletree and, dropping to the horses' heels, caused the team to run away. The wagon was overturned and Inspector Frederick thrown violently to the ground, sustaining severe bruises on his left side and breaking three ribs. After walking about a mile in recovering the horses, it was necessary to drive 12 miles to Mattison, where he remained all night. The inspector was 65 years of age and unusually strong and robust. On April 18, 1910, while apparently convalescing, he suffered a collapse and died almost instantly.

Mr. Frederick was appointed a post-office inspector in 1886 and served continuously, with the exception of about one year, until the date of his death. The inspector in charge reports that he was unusually industrious and cheerfully accepted any assignment, regardless of the inconveniences or difficulties, and that he was held in high esteem by postmasters and his associates in the postal service.

This claim appears to be meritorious, and the department is in favor of the passage of the bill, which provides for the payment of one year's salary, $1,600, to the estate of Mr. Frederick.

Respectfully,

F. H. HITCHCOCK, *Postmaster General.*

Mr. POWERS. Is that a letter from the Postmaster General?

Mr. DICKINSON. It is a letter from the Postmaster General, accompanied by a longer report from Mr. W. E. Cochran, inspector in charge.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

DRENZY A. JONES AND JOHN G. HOPPER.

The next business on the Private Calendar was the bill (S. 3452) for the relief of Drenzy A. Jones and John G. Hopper, joint contractors for surveying Yosemite Park boundary.

The Clerk read the bill, as follows:

Be it enacted, etc., That there be paid to Drenzy A. Jones and John G. Hopper, joint contractors, out of any money in the Treasury not otherwise appropriated, the sum of $2,649.37, for the surveys and resurveys of the Yosemite Park boundary, under contract 184, California, the boundaries of the park having been changed.

The SPEAKER pro tempore. Is there objection?

Mr. BUCHANAN. Mr. Speaker, reserving the right to object, I would like some explanation.

Mr. KAHN. Mr. Speaker, Drenzy A. Jones and John G. Hopper, deputy surveyors, secured a contract to survey the Yosemite National Park. The original contract was for $3,662, but it was subsequently increased to $5,762. The Yosemite National Park is in the high Sierras. The floor of the Yosemite Valley is 4,000 feet above the level of the sea, and many of the points in the park at 8,000 to 10,000 feet above the level of the sea.

In order to do the surveying one has to cross great gulches, and in many places precipitous walls of solid rock confront those engaged in the work. The surveyors completed the work and sent in their notes. The department found that there were errors.

I may say that the work of surveying in the Yosemite National Park can only be performed during three or four months in the year. There is a great fall of snow in the high Sierras, and until the snow is melted it is practically impossible to do the work. The surveyors went back to correct the errors. The Surveyor General of the United States for the State of California accepted the corrections and sent the matter back to the Land Office here in Washington with his approval. The Land Office had another officer of the Government go over their work and found that there were still some corrections to be made.

Mr. MADDEN. Will the gentleman yield?

Mr. KAHN. Certainly.

Mr. MADDEN. That was the resurvey?

Mr. KAHN. Yes.

Mr. MADDEN. Why did they have to resurvey?

Mr. KAHN. Because of errors in the first survey.

Mr. MADDEN. They did not do their work well?

Mr. KAHN. Well, I suppose they omitted some necessary markings.

Mr. MADDEN. This bill provides for the payment of both surveys?

Mr. KAHN. No; but for the work that they really did.

Mr. MADDEN. Both times?

Mr. KAHN. Both times. I want to say that on one occasion, when they went into the valley to do the work, the Interior Department had failed to notify the soldiers who were on guard. Through this failure the party were arrested and lost that entire season, although it cost them hundreds of dollars to equip the expedition into the valley. They went back next year and tried to do the work.

Mr. MADDEN. The gentleman thinks they are entitled to pay for all the time they put in for the survey work?

Mr. KAHN. Yes; and I believe the department has no objection to paying it.

Mr. HOWARD. Mr. Speaker, will the gentleman from California permit me to call his attention to what appears in about the third or fourth line from the bottom of the report, on page 2? The department says:

In view of the fact that the survey would now be of little if any value to the Government because of the change in boundary by act of Congress, the department will not oppose payment of the said sum of $2,649.37 on the contract, notwithstanding the unsatisfactory condition of the survey.

This report says that the department will not oppose it, but they do not say that they approve it, and in the next paragraph it will be seen that the report shows that the surveyors made so many errors in making the survey of this park that the survey was of absolutely no value to the Government.

Mr. KAHN. Mr. Chairman, if the gentleman will permit——

The SPEAKER pro tempore. Is there objection?

Mr. HOWARD. Mr. Speaker, I object.

JOHN G. CAMPBELL.

The next business on the Private Calendar was the bill (H. R. 24942) for the relief of the administrator and heirs of John G. Campbell, to permit the prosecution of Indian depredation claims.

The Clerk read the bill, as follows:

Be it enacted, etc., That the estate of John G. Campbell, deceased, who was a Delegate to the House of Representatives from Arizona in the Forty-sixth Congress, and who became a resident of the United States at a very early age and supposed himself to have become a citi-

zen by the naturalization of his father, be, and is hereby, relieved from any disability under the laws of the United States and from any defect of naturalization, and the administrator of said estate is hereby authorized to prosecute Indian depredation claim No. 2925, now pending in the United States Court of Claims, and to receive judgment therein the same as if the said John G. Campbell had been naturalized under the laws of the United States at the date of the loss alleged; and for this purpose the said Court of Claims is vested with full jurisdiction.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, reserving the right to object, the bill possibly might confer jurisdiction upon other matters. Would the gentleman have any objection to an amendment adding at the end of the bill the words:

So far as the citizenship of said Campbell is concerned.

The bill would then read:

And for this purpose the said Court of Claims is vested with full jurisdiction, so far as the citizenship of said Campbell is concerned.

Mr. HAYDEN. That is the only question.

Mr. MANN. That is what the gentleman wants to get at?

Mr. HAYDEN. That is what I want to get at.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. MANN. Mr. Speaker, I offer as an amendment at the end of the bill the following, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 2, line 5, after the word "jurisdiction," insert the words "so far as the citizenship of said Campbell is concerned."

The SPEAKER pro tempore. The question is on the amendment.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

MARIA M'MURDIE.

The next business on the Private Calendar was the bill (H. R. 1567) for the relief of Maria McMurdie.

The Clerk read the bill, as follows:

Whereas on August 2, 1887, John McMurdie, an employee of the customhouse at Chicago, Ill., while in the discharge of his duties, was instantly killed by the sudden moving of an elevator cable while the deceased was in the act of stepping over same: Therefore

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $5,000 to Maria McMurdie, widow, and the heirs at law of the said John McMurdie.

The SPEAKER pro tempore. Is there objection to the consideration of the bill?

Mr. ANTHONY. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Illinois [Mr. MADDEN] a question. This bill, I believe, carries $5,000?

Mr. MADDEN. The committee recommends the payment of $720, one year's compensation, and amends the bill so that it carries $720.

Mr. ANTHONY. Then the bill really carries only one year's compensation?

Mr. MADDEN. Yes.

Mr. HOWARD. Mr. Speaker, reserving the right to object, I would like to ask the gentleman if he can tell the House why this claim has been delayed from 1887 until now?

Mr. MADDEN. Yes. There has been attempt after attempt made to get action upon the part of the Committee on Claims, and this is the first time we have ever been able to do it.

Mr. HOWARD. Does not the gentleman think that the claimant was guilty of gross contributory negligence in stepping over a thing that he knew was dangerous?

Mr. MADDEN. I am sorry to say that I can not agree with my friend from Georgia. The machinery was unprotected.

Mr. HOWARD. Mr. Speaker, the gentleman from Illinois is always right, and I will not object.

Mr. BUCHANAN. Mr. Speaker, I want to ask the gentleman if he does not think this allowance is quite liberal, in the face of the fact that we have sat here this evening and men have objected to claims that were just and did not carry an amount up to what should have been carried for the injury received. It does not seem to be consistent. I am not going to object to this.

Mr. DIFENDERFER. Mr. Speaker, I am.

The SPEAKER. The gentleman from Pennsylvania objects.

Mr. MADDEN. Mr. Speaker, I hope the gentleman from Pennsylvania will reserve his objection.

Mr. DIFENDERFER. Mr. Speaker, I will withhold the objection for a moment.

Mr. MADDEN. Mr. Speaker, I desire to make a statement in connection with the case. I hope the gentleman will pay attention to what I say in this connection. The man McMurdie, for whose widow this bill is proposed to be passed, was a fireman in the employ of the Government of the United States in the customhouse at Chicago. While in the performance of his duty in the attic of the building, he was required to pass over the cables that were used in connection with the operation of the elevators. These cables were not in any way protected, and he was caught in the sleeve of a machine as a result of this unprotected cable and killed almost instantly. His widow is an old woman. She is living on the charity of her only daughter, whose husband is barely able to make a living for his wife and children. This woman has not very much longer to live.

It would be a great mistake, in my judgment, for any person to object to the passage of a bill so meritorious, and I hope my friend from Pennsylvania will withdraw his objection.

Mr. DIFENDERFER. Mr. Speaker, I object.

ROBERT T. MARTIN.

The next business on the Private Calendar was the bill (H. R. 25318) for the relief of Robert T. Martin.

The bill was read.

Mr. POU. Mr. Speaker, I ask that that bill be passed over. I will object to it myself. My reason for making the objection is that since the bill was introduced, as I understand, the department has changed its ruling and the claimant has been paid.

MARY J. WEBSTER.

The next business on the Private Calendar was the bill (S. 4839) for the relief of Mary J. Webster.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BUCHANAN. Mr. Speaker, I will reserve the right to object.

Mr. FRENCH. Mr. Speaker, the bill is practically a bill for the quieting of title to 80 acres of land that was entered by Mary J. Webster in 1904 under the desert-land law. After she expended, according to the evidence here, some $2,000 in trying to bring water by means of digging a ditch to this land she found that the water percolated through the ditch to such an extent that after six years she gave up that attempt. In the meantime it was discovered the entryman could develop the land fairly well and farm it by the method of dry farming, and she continued to cultivate the land, attempting in 1910 to acquire it by scrip.

It developed later that the scrip that she had purchased was not based upon valid service, and the department, on appeal so decided, and gave her 60 days in which she might appeal. Prior to this an order had been issued by the department that in such cases the right of appeal should be limited to 30 days. Now, the local land office sent her the notice, giving her 60 days' right of appeal. She took her appeal within the 60 days plus the customary 10 days, but in the meantime a claimant by the name of Vier P. Peterson had offered a homestead filing upon the land and acquired certain equities.

The House committee has offered an amendment requiring that the Secretary of the Interior shall adjudicate the amount of damages due Vier P. Peterson and that Mary J. Webster shall pay this to the said Peterson and that he shall retain his homestead right intact. The bill then provides that patent shall be issued to Mary J. Webster. I will also say that for several years the land has been cultivated.

Mr. BUCHANAN. Mr. Speaker, reserving the right to object, I want to say this may be a just claim and——

Mr. HOWARD. Mr. Speaker——

Mr. BUCHANAN. And if I may be permitted——

Mr. HOWARD. Mr. Speaker, a parliamentary inquiry. Who has the floor?

Mr. BUCHANAN. I have the floor. I ask for the regular order.

The SPEAKER pro tempore. The gentleman from Illinois objects.

Mr. FRENCH. I hope the gentleman will withhold his objection for a moment.

Mr. RAKER. Mr. Speaker, I think the gentleman will withhold his objection. [Cries of "Regular order!"]

The SPEAKER pro tempore. The regular order is demanded.

JOSEPH HUNTER.

The next business on the Private Calendar was the bill (H. R. 5221) granting a pension claim to Joseph Hunter.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. COX. I object.

Mr. GRAHAM. Will the gentleman withhold his objection?

Mr. COX. I will reserve it if the gentleman wants to make a statement, but I will object later on.

The SPEAKER pro tempore. The Chair is desirous to state that in order to transact the business if gentlemen are going to make objections they should make them——

Mr. COX. I object, Mr. Speaker.

Mr. GRAHAM. Mr. Speaker, the House might as well adjourn. There will be no more business done to-night.

Mr. DIFENDERFER. Mr. Speaker, I move that the House do now adjourn.

The question was taken, and the motion was rejected.

WARREN E. DAY.

The next business on the Private Calendar was the bill (S. 4033) for the relief of Warren E. Day.

The bill was read, as follows:

An act (S. 4033) for the relief of Warren E. Day.

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Warren E. Day, out of any moneys in the Treasury not otherwise appropriated, the sum of $1,200, being for professional services rendered and medicine furnished the Hualapai Indians in Arizona Territory, under the orders and approval of the Commissioner of Indian Affairs, during the years 1883 and 1884.

Mr. MANN and Mr. GRAHAM rose.

Mr. GRAHAM. Mr. Speaker, I reserve the right to object.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MANN] is recognized.

Mr. MANN. I am waiting for my colleague [Mr. GRAHAM].

Mr. GRAHAM. Mr. Speaker, this sort of hit-and-miss legislation is unworthy of this House. Claims have been refused to-night that are overflowing with merit. Other claims, less meritorious, have been passed. We may as well send a committee of three out to throw dice to see what claims shall pass and what claims shall not pass. No more bills will pass to-night if I have the power to speak.

Mr. MANN. Mr. Speaker, reserving the right to object, my colleague had a bill that was just objected to. It was the case where a man had a pension, and his name was stricken off the roll by the Pension Bureau. He obtained a pension nine years afterwards, and this bill presented here is to pay him a pension during those nine years. If my colleague's bill should pass the House, we might just as well make up our minds that every time we pass a special pension bill, we must date it back to the date of disability. I do not think when he desires to break a precedent of that sort, he ought to take offense for not being able to pass a bill by unanimous consent, and without discussion.

Mr. GRAHAM. Mr. Speaker, the report on this bill shows that the name of the soldier was improperly stricken from the pension roll. The committee which afterwards recommended the passage of a private bill said that they thought the passage of that bill restored to him the pension which had lapsed during the nine and odd years that he was off the roll. The report in this case says:

On consideration the committee thinks that the name of the soldier should not have been dropped from the pension roll, and, therefore, recommends the passage of this bill.

Mr. MANN. But it is true, is it not, that the Pension Office would not restore the man to the pension roll until he got a special act of Congress? The committee may now say, but that does not carry much weight, that he ought not to have been stricken from the roll, but the Pension Office would not restore him.

Mr. GRAHAM. But it further appears that he was improperly stricken off, and the report here shows how. He was stricken off in 1880 by some sort of star-chamber process then in effect. He was unjustly stricken from the roll. He is an old man, suffering from stomach trouble incurred in the service, from which has grown something like epileptic fits. He is impoverished. He lives off his relatives now, part of whom live in my district and a part of whom live in the district of my friend from Missouri [Mr. DICKINSON]. I say, Mr. Speaker, it is utterly useless for us to sit here and throw dice as to which bill shall pass and which shall not.

Mr. MANN. I think it is unwarrantable for the gentleman to make that charge against the House because he can not get an unworthy proposition passed through the House.

Mr. GRAHAM. I would like to know in advance who is going to get the lucky dice.

Mr. MACON. Regular order, Mr. Speaker.

Mr. POWERS. Will the gentleman yield to me for a question?

Mr. HAMILTON of Michigan. I hope to get some lucky dice myself.

Mr. COOPER. Regular order, Mr. Speaker.

The SPEAKER pro tempore. All of this debate is by unanimous consent.

Mr. COVINGTON. I demand the regular order.

The SPEAKER pro tempore. The regular order is demanded. The Clerk will report the next bill.

Mr. COX. I ask unanimous consent, Mr. Speaker——

Mr. GRAHAM. The regular order.

Mr. HAYDEN. I hope the gentleman will not object. This is my bill, and I desire to explain it to the House.

The SPEAKER pro tempore. The demand for the regular order is equivalent to an objection. The Clerk will report the next bill.

LIEUT. SYDNEY SMITH.

The next business on the Private Calendar was the bill (H. R. 25623) to authorize the transfer of Lieut. Sydney Smith from the retired to the active list of the Army.

The bill was read as follows:

A bill (H. R. 25623) to authorize the transfer of Lieut. Sydney Smith from the retired to the active list of the Army.

Be it enacted etc., That First Lieut. Sydney Smith, who was retired in June, 1908, be transferred from the retired list of the United States Army to the active list, to take rank as though he had not been retired, when there shall be a vacancy in that grade; but nothing herein contained shall be construed to increase the total authorized commissioned strength of the Army.

The SPEAKER pro tempore. Is there objection?

Mr. GRAHAM. Reserving the right to object——

The SPEAKER pro tempore. Does the gentleman from Illinois [Mr. GRAHAM] object?

Mr. GRAHAM. Yes.

The SPEAKER pro tempore. The Clerk will read the next bill.

Mr. WATKINS. I hope the gentleman will not object.

The SPEAKER pro tempore. May the Chair inquire whether the gentleman from Illinois [Mr. GRAHAM] intends to object?

Mr. GRAHAM. The gentleman does.

The SPEAKER pro tempore. The Clerk will report the next bill.

Mr. KAHN. Mr. Speaker, I move that the House adjourn.

The SPEAKER pro tempore. The gentleman from California [Mr. KAHN] moves that the House adjourn. The question is on agreeing to that motion.

The question was taken, and the motion was rejected.

The SPEAKER pro tempore. The Clerk will report the next one.

HEIRS OF NICHOLAS CHANO.

The next business on the Private Calendar was the resolution (H. Res. 734) referring the bill (H. R. 16737) for the relief of the heirs of Nicholas Chano, deceased, to the Court of Claims.

The resolution was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. GRAHAM. I reserve the right to object.

Mr. MANN. Mr. Speaker, I ask for the regular order.

The SPEAKER pro tempore. Regular order is demanded. The Clerk will report the next one.

Mr. KAHN. Mr. Speaker, I make the point that there is no quorum present.

Mr. MANN. Mr. Speaker, what became of the resolution? No objection was made to the resolution.

The SPEAKER pro tempore. A demand for the regular order is equivalent to an objection. The Clerk will report the next bill.

Mr. MANN. But no objection was made to the resolution.

Mr. KAHN. Mr. Speaker, I withdraw the point of no quorum.

Mr. MANN. My colleague reserved the right to object, and I asked for the regular order.

Mr. GRAHAM. I object.

The SPEAKER pro tempore. The Clerk will report the next bill.

GEORGE W. CARY.

The next business on the Private Calendar was the bill (H. R. 25527) for the relief of George W. Cary.

The bill was read.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. GRAHAM. I object.

Mr. RAKER. Will not the gentleman withhold his objection for a moment?

Mr. KENDALL. The regular order, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the next bill.

Mr. HAMLIN. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER pro tempore. The gentleman from Missouri [Mr. HAMLIN] moves that the House adjourn. The question is on agreeing to that motion.

The question was taken, and the Speaker pro tempore announced that the noes seemed to have it.

Mr. HAMLIN. A division, Mr. Speaker.

Mr. GOLDFOGLE. Mr. Speaker, I raise the point that there is no quorum present.

The SPEAKER pro tempore. The gentleman from Missouri [Mr. HAMLIN] demands a division.

The House divided; and there were—ayes 18, noes 66.

So the House refused to adjourn.

The SPEAKER pro tempore. The Clerk will report the next bill.

Mr. GRAHAM. Mr. Speaker, we could not hear the announcement of the Chair at this point.

The SPEAKER pro tempore. The ayes were 18 and the noes were 66, and the House refused to adjourn.

Mr. GRAHAM. Mr. Speaker, it is evident that there is not a quorum present.

The SPEAKER pro tempore. The Chair will count. [After counting.] There are 138 gentleman present—not a quorum.

Mr. CLARK of Florida and Mr. MANN moved a call of the House.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MANN] and the gentleman from Florida [Mr. CLARK] move a call of the House. The question is on agreeing to that motion.

The question was taken, and the Speaker pro tempore announced that the noes seemed to have it.

Mr. MANN. I ask for a division on a call of the House. I make the point of order that the motion to adjourn is dilatory. We have just voted it down two or three times.

The SPEAKER pro tempore. A division is called for.

The House divided; and there were—ayes 62, noes 30.

The SPEAKER pro tempore. A call of the House is ordered. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk proceeded to call the roll, when the following Members failed to answer to their names:

Adair	Evans	Kindred	Peters
Aiken, S. C.	Fairchild	Kinkaid, Nebr.	Plumley
Alexander	Fergusson	Knowland	Porter
Allen	Ferris	Konig	Prince
Ames	Finley	Konop	Prouty

			Young, Tex.

The SPEAKER pro tempore. One hundred and thirty-seven Members, not a quorum, have answered to their names.

ADJOURNMENT.

Mr. POU. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 6 minutes p. m.) the House adjourned until Saturday, February 15, 1913, at 11.30 o'clock a. m.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Mahoning River, Ohio, with a view to snagging that portion between Warren and Levittsburg and 5 miles farther toward its source (H. Doc. No. 1396); to the Committee on Rivers and Harbors and ordered to be printed.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of St. Johns River, Fla., from outlet of Lake Harney to Lake Washington, including removal of bars in Lakes Harney and Puzzle (H. Doc. No. 1397); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

3. A letter from the Acting Secretary of the Treasury, submitting estimate of appropriation for the construction or purchase of gasoline motor boat for service in the customs collection district of Corpus Christi, Tex. (H. Doc. No. 1398); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Secretary of the Treasury, submitting draft of legislation and recommending construction of new assay office building, New York City (H. Doc. No. 1399); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. PROUTY, from the Committee on the District of Columbia, to which was referred the bill (S. 5861) to enjoin and abate houses of lewdness, assignation, and prostitution; to declare the same to be nuisances; to enjoin the person or persons who conduct or maintain the same and the owner or agent of any building used for such purposes; and to assess a tax against the person maintaining said nuisance and against the building and owner thereof, reported the same without amendment, accompanied by a report (No. 1517), which said bill and report were referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. GREEN of Iowa, from the Committee on Claims, to which was referred the bill (H. R. 5352) for the relief of the estate of Moses M. Bane, reported the same with amendment, accompanied by a report (No. 1516), which said bill and report were referred to the Private Calendar.

Mr. PEPPER, from the Committee on Military Affairs, to which was referred the bill (S. 2953) for the relief of George P. Chandler, reported the same without amendment, accompanied by a report (No. 1518), which said bill and report were referred to the Private Calendar.

Mr. ESTOPINAL, from the Committee on Naval Affairs, to which was referred the bill (S. 8348) waiving the age limit for admission to the Pay Corps of the United States Navy in the case of Minor Meriwether, jr., reported the same with amendment, accompanied by a report (No. 1520), which said bill and report were referred to the Private Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CANTRILL: A bill (H. R. 28759) to regulate the speed of common carriers of passengers by railroads in certain cases, and to provide a punishment for a violation of the act; to the Committee on Interstate and Foreign Commerce.

By Mr. MADDEN: A bill (H. R. 28760) for the establishment of a bureau of public highways; to the Committee on Agriculture.

By Mr. O'SHAUNESSY: A bill (H. R. 28761) for the purchase of additional land and for repairing the Federal building at Bristol, R. I.; to the Committee on Public Buildings and Grounds.

By Mr. CLAYTON: A bill (H. R. 28764) to amend section 2 of an act entitled "An act regulating fees and costs, and for other purposes," approved February 22, 1875; to the Committee on the Judiciary.

Also, a bill (H. R. 28765) to amend section 44 of an act approved March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States"; to the Committee on the Judiciary.

By Mr. GARDNER of Massachusetts: Resolution (H. Res. 836) amending the rules of the House of Representatives; to the Committee on Rules.

Also, resolution (H. Res. 837) directing the Secretary of the Treasury to furnish the House of Representatives with certain information; to the Committee on Ways and Means.

By Mr. HUMPHREYS of Mississippi: Resolution (H. Res. 838) to provide for reprinting House Document No. 1346; to the Committee on Printing.

By Mr. FRENCH: Memorial from the Legislature of the State of Idaho, protesting against the House amendment to the Senate bill known as the three-year homestead bill; to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. McCALL: A bill (H. R. 28762) for the relief of Patrick Conley; to the Committee on Military Affairs.

By Mr. PETERS: A bill (H. R. 28763) granting a pension to Celestia Watkins; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ANSBERRY: Petition of 7 citizens of the fifth congressional district of Ohio, favoring the passage of legislation to provide a suitable reward for Arlington A. Robinson as a testimonial for services rendered to the United States in discovering the true northern axis of the earth, etc.; to the Committee on Appropriations.

By Mr. BATES: Petition of the Erie County Bird Club, of Pennsylvania, favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. BURKE of South Dakota: Petition of sundry citizens of Brown County, S. Dak., favoring the passage of legislation for an investigation of the persecution by the Government of the editors of the Appeal to Reason; to the Committee on Expenditures in the Post Office Department.

Also, petition of the Webster Commercial Club, of Webster, S. Dak., favoring the passage of the Weeks bill (H. R. 27567) for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

By Mr. CALDER: Petition of members of the Bird Lover Club of Brooklyn, N. Y., favoring the passage of the McLean bill for granting Federal protection to migratory birds; to the Committee on Agriculture.

By Mr. CAMPBELL: Petition of Local Columbus of Socialist Party of Kansas, favoring the passage of legislation for an investigation of the persecution of the editors of the Appeal to Reason by the Government; to the Committee on Expenditures in the Post Office Department.

By Mr. DYER: Papers to accompany bill (H. R. 22741) granting a pension to Thomas Paine; to the Committee on Pensions.

Also, petition of the St. Louis Screw Co., St. Louis, Mo., favoring the passage of Senate bill 7782, for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

Also, petition of Ernest Thompson Seton, Greenwich, N. J., favoring the passage of the McLean bill granting Federal protection to all migratory birds; to the Committee on Agriculture.

Also, petition of the Downtown Taxpayers' Association, Brooklyn, N. Y., favoring insertion of a clause in the naval appropriation bill providing for the building of one of the new battleships in a Government navy yard; to the Committee on Naval Affairs.

Also, papers to accompany bill (H. R. 27803) granting a pension to John G. Hunt; to the Committee on Invalid Pensions.

Also, petition of Edward Schnurr, O. H. Kurtz, J. Welch, Conrad Peterson, Louis Kettmann, John N. Chadeaym, J. E. Baker, and J. C. Ramsay, of St. Louis, Mo., favoring the passage of House bill 25685, providing for the labeling and tagging of all fabrics and articles of clothing intended for sale which enter into interstate and foreign commerce, and providing penalties for misbranding; to the Committee on Interstate and Foreign Commerce.

By Mr. FULLER: Petition of Harry M. Pollard, of Mendota, Ill., favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

Also, petition of the American Protective Tariff League, New York, for the repeal of section 2 of the Canadian reciprocity act and for protection for the paper and pulp industry; to the Committee on Ways and Means.

Also, petition of the Illinois legislative board of the Brotherhood of Locomotive Engineers, Charleston, Ill., favoring the passage of the workman's compensation bill as amended by the Judiciary Committee of the House of Representatives; to the Committee on the Judiciary.

By Mr. GOULD: Petition of doctors of Bucksport, Me., protesting against the passage of House bill 28277, providing a special tax on the sale of opium or coca in any form; to the Committee on Ways and Means.

Also, petition of the Woman's Club, of Skowhegan, Me., protesting against the passage of any legislation tending to destroy the present national system of forest preservation; to the Committee on Agriculture.

By Mr. HIGGINS: Petition of Little River Grange, No. 36, Hampton, Conn., favoring the passage of the agricultural extension bill for the advancement of the interests of agriculture; to the Committee on Agriculture.

By Mr. LAFFERTY: Petition of the Friends Quarterly Meeting, of Portland, Oreg., protesting against the passage of House bill 8141, for enlarging the Army and Navy; to the Committee on Military Affairs.

By Mr. LEVY: Petition of American Protective Tariff League of New York, for the repeal of section 2 of the Canadian reciprocity act and for protection for the paper and pulp industry; to the Committee on Ways and Means.

By Mr. LINDSAY: Petition of American Protective Tariff League of New York, for the repeal of section 2 of the Canadian reciprocity act, and for protection for the paper and pulp industry; to the Committee on Ways and Means.

By Mr. MANN: Petition of the League of Cook County (Ill.) Clubs, Chicago, Ill., favoring the passage of legislation for reduction of the tax on oleomargarine; to the Committee on Agriculture.

By Mr. MARTIN of South Dakota: Petition of the Webster Commercial Club, of Webster, S. Dak., favoring the passage of the Weeks bill (H. R. 27567) for a 1-cent letter-postage rate; to the Committee on the Post Office and Post Roads.

By Mr. MATTHEWS: Petition of the Woman's Christian Temperance Union of Monongahela, Pa., favoring the passage of the Kenyon-Sheppard bill for preventing the shipment of liquors into dry territory; to the Committee on Interstate and Foreign Commerce.

By Mr. O'SHAUNESSY: Petition of Howard I. Gardner, Providence, R. I.; Maud L. Stevens, Newport, R. I.; Judith B. Hopkins, East Providence, R. I.; and the Rhode Island Horticultural Society, favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

Also, petition of M. Vervena, Providence, R. I., protesting against the passage of Senate bill 3175, for the restriction of immigration; to the Committee on Immigration and Naturalization.

By Mr. REILLY: Petition of the Downtown Taxpayers' Association, Brooklyn, N. Y., favoring the insertion of a clause in the naval appropriation bill providing for the building of one of the new battleships in a Government navy yard; to the Committee on Naval Affairs.

Also, petition of the system Federation of Harriman Lines, favoring the passage of legislation for investigation of the present condition of equipments of the railways and for improvement of the condition of the American railway employee; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Indiana State Sealers' Association, Indianapolis, Ind., favoring the passage of legislation providing for a standard barrel for fruits, vegetables, and other dry commodities; to the Committee on Interstate and Foreign Commerce.

By Mr. SMALL: Petition of the Board of Trade of Winston-Salem, N. C., favoring the passage of legislation for amending the banking laws of the United States; to the Committee on Banking and Currency.

By Mr. SPARKMAN: Petition of No. 1765, United Brotherhood of Carpenters and Joiners of America, Orlando, Fla., favoring the passage of the Clayton limitation bill relative to amending certain laws of the judiciary; to the Committee on the Judiciary.

By Mr. WILLIS: Petition of Fremont Brown and other citizens of Urbana, Ohio, favoring the passage of legislation asking for an investigation of the Federal prison at Fort Leavenworth, Kans.; to the Committee on the Judiciary.

By Mr. WILSON of New York: Petition of the Sailors' Union of the Atlantic, New York, relative to the payment of the crews of the Panama Steamship Line and the special privileges granted to said company which is controlled and owned by the United States Government; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Unity Republican Club, of the twentieth assembly district, New York, favoring the passage of House bill 25685, providing for the labeling and tagging of all fabrics and articles of clothing intended for sale which enter into interstate and foreign commerce, and providing penalties for misbranding; to the Committee on Interstate and Foreign Commerce.

SENATE.

SATURDAY, *February 15, 1913.*

(*Legislative day of Tuesday, February 11, 1913.*)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

EXERCISES FOR THE DAY.

The PRESIDENT pro tempore (AUGUSTUS O. BACON) called the Senate to order and directed the Secretary to read the resolution of the Senate adopted on the 28th of January last.

The Secretary (Charles G. Bennett) read the resolution, as follows:

Resolved, That Saturday, the 15th day of February, be set apart for appropriate exercises in commemoration of the life, character, and public service of the late JAMES S. SHERMAN, Vice President of the United States and President of the Senate of the United States.

The PRESIDENT pro tempore. The Senate is now in session for the purposes of this resolution.

GUESTS OF THE SENATE.

At 12 o'clock and 3 minutes p. m. the Sergeant at Arms (E. L. Cornelius) announced the Speaker and Members of the House of Representatives of the United States.

The Speaker was escorted to a seat on the left of the President pro tempore, and the Members of the House of Representatives, the Clerk, Sergeant at Arms, and Chaplain of the House occupied the seats assigned them.

At 12 o'clock and 6 minutes p. m. the Sergeant at Arms announced the Chief Justice of the United States and the Associate Justices of the Supreme Court of the United States, who were conducted to the seats provided for them in the area in front of the Secretary's desk.

At 12 o'clock and 8 minutes p. m. the Sergeant at Arms announced the ambassadors and ministers plenipotentiaries from foreign countries to the United States, and they were conducted to the seats assigned them.

At 12 o'clock and 10 minutes p. m. the Sergeant at Arms announced the President of the United States and the members of his Cabinet, who were escorted to the seats provided for them in the space in front of the Secretary's desk.

The other invited guests, the judges of the Commerce Court, the judges of the Court of Customs Appeals, the judges of the courts of the District of Columbia, the officers of the Army and Navy stationed in Washington, the members of the Interstate Commerce Commission, and the members of the Civil Service Commission, occupied seats on the floor of the Senate.

The PRESIDENT pro tempore. Prayer will now be offered by the Chaplain of the Senate.

PRAYER.

The Chaplain of the Senate, Rev. Ulysses G. B. Pierce, D. D., offered the following prayer:

Almighty God, our heavenly Father, Thou hast been our dwelling place in all generations. Before the mountains were brought forth, or ever Thou hadst formed the earth and the world, even from everlasting to everlasting, Thou art God. We thank Thee, O Holy One, that in a world of fleeting change and where naught abides we can take refuge in Thee who inhabitest eternity. Because Thou art so great, and for that Thy years have no end, therefore canst Thou stoop even to us who seem but children of a day. Bend over us now, we beseech Thee, and for our weakness give Thou us of Thy strength, and in the darkness of our sorrow bid the light of Thy Holy Spirit to shine upon us.

Thou knowest all, our Father, and because Thou knowest Thou canst help. Thou knowest how weak and frail we are. Therefore look we unto Thee, who art Lord alike of life and of death. To Thine unfailing compassion we turn, even to Thee, who dost note Thy children's pain and sorrow. We bring to Thee our empty hearts, our loneliness, our pain, and lay them at Thy feet. If we drop a tear, it is not because we doubt Thee or because we murmur at Thy will, but because of the great love we bear to him whom Thou hast called from our visible presence and whom we this day mourn. In Thy name we consecrate this day to him.

Thou hast taken from us, our Father, the Vice President of this Nation and the President of this Senate. As we record the greatness of our loss and faintly utter our tributes of love and honor, aid Thou us. Touch Thou our lips, we pray Thee, that the measure of our hearts' affection may find utterance this day. Inspire our minds, and by Thy Holy Spirit quicken our remembrance, that the life which Thou hast taken from us may live before us as he lives before Thee.

O Thou who art the Giver of every good and perfect gift, sincere and fervent thanks we render unto Thee for the life, the character, and the public service of Thy servant, the Vice President of the United States. For the fruitage of his labors, for the blessed and unfading memory of his life, for these, our Father, we thank Thee more than our lips can say. And now, that Thou hast called Thy servant to Thy nearer presence and to Thy higher service, we yield him to Thy love and keeping. May his soul rest in peace!

We commend to Thee, most merciful Father, the hearts made desolate by this loss. Let the light of Thy countenance dispel the grief and gloom of the home where Thy servant was wont to dwell. Comfort, we pray Thee, the wife and family as we, alas, can not do. Touch their hearts with Thy love and heal their wounds. Though Thou leadest them through the valley of the shadow of death, may they fear no evil. Let the rod of Thy faithfulness and the staff of Thy loving kindness comfort them. Give unto them beauty for ashes, the oil of joy for mourning, and the garment of praise for the spirit of heaviness. Graciously grant that neither life with its burdens nor death with its sorrows may be able to separate them from the love of God which is in Christ Jesus our Lord.

And now may God our Father, who hast loved us with an everlasting love and called us into His eternal kingdom in Christ, comfort our hearts and stablish them in every good word and in every good work. Unto Him be glory and honor, dominion and power, now and forevermore. Amen.

MEMORIAL ADDRESSES ON THE LATE VICE PRESIDENT SHERMAN.

The PRESIDENT pro tempore. For the purposes of this commemoration a certain order of exercises has been adopted, in pursuance of which there will be addresses made by Senators and some of the guests on this occasion. The Chair now recognizes the senior Senator from New York [Mr. ROOT].

ADDRESS OF SENATOR ROOT.

Mr. ROOT. Mr. President, Vice President SHERMAN was born in the city of Utica, on the banks of the Mohawk, on the 24th of October, 1855. He came of English stock. His father, Richard U. Sherman, was a native of the same county and was one of its well-known and esteemed citizens. His grandfather, Willett Sherman, was one of the early settlers upon the lands relinquished by the Oneida Indians toward the close of the eighteenth century, and he was one of the first manufacturers of central New York. The grandson was graduated from Hamilton College in the class of 1878. He was admitted to the bar in 1880 and became a successful lawyer. In 1884 he was made mayor of his native city. In 1886 he was chosen by the people of the great manufacturing region of the upper Mohawk to represent them in the Fiftieth Congress; and for more than 20 years he continued to represent them with but one break in his continuous service through reelection to the Fifty-first, Fifty-third, Fifty-fourth, Fifty-fifth, Fifty-sixth, Fifty-seventh, Fifty-eighth, Fifty-ninth, and Sixtieth Congresses. He became a potent factor in the House of Representatives. He was an active member of the Committee on Interstate and Foreign Commerce; he was chairman of the Committee on Indian Affairs; and he was long a member of the Committee on Rules, one of that little group of three constituting a majority of the committee, who, under the former rules of the House, guided the course of legislation and accomplished the nearest approach to responsible parliamentary government which this country has ever seen. Through frequent designation as Chairman to preside over the House sitting in Committee of the Whole, where so great a part of the business of the House is done, he gradually rose to general recognition as a parliamentarian of the first order and a presiding officer of the highest effectiveness. In his own city, as the years passed, evidences accumulated of the respect and confidence in which

a community so rarely errs while it renders unpremeditated judgment upon the character of one known through the contact and observation of daily life. He was made treasurer of his church, the Dutch Reformed Church, of Utica, and chairman of its board of trustees. He was chosen to be president of the Utica Trust & Deposit Co. He was made a trustee of his alma mater and a member of the executive committee of its board of trust. Children grew up about him and the wife of his youth, in a home where virtue, family affection, cheerfulness, honor, and obedience ruled. It was one of those homes which, indefinitely multiplied among a people, are the safe foundations of just and free self-government, and sure guaranties of the future in a republic. From near and far throughout that region the unfortunate and struggling learned to come to him, their Representative, and his kindness and ready sympathy never failed them. No trouble of another was ever too great or too small to command his attention. His patience under such demands was never worn out. His willingness to take trouble for others was never overtaxed. In the feelings of his people grateful appreciation of the poor and humble for his kindly service was mingled with general pride in the honor of his representation and of his citizenship.

The long and distinguished career as a Representative in Congress was brought to a close by Mr. SHERMAN'S election to the Vice Presidency in November, 1908. He was renominated by his party for the same high office in 1912, but a fatal malady already had been established, and before the election, at his home in Utica, on the 30th of October, 1912, his earthly course came to its end.

Senators know, but few outside of the Senate fully appreciate, how great a service he rendered as presiding officer in this Chamber during the three and one-half years which followed the inauguration of March, 1909. Only experience can give a full understanding of the difficulties of legislation, the obstacles to progress in legislative business presented by the persistent advocacy of a multitude of varying opinions, and the impossibility of wise and judicious consideration when feelings are exasperated and personal prejudices and antipathies are excited. Only through experience can one learn how much the success of legislative consideration depends upon the spirit which pervades the legislative chamber, and how much depends upon the firm and intelligent application of those rules of procedure which the experience of centuries has shown to be necessary in the conduct of legislation. During all the years in which Vice President SHERMAN presided over the Senate we felt the calming and steadying effect of a serene and potent presence in the chair. The justice of his rulings was the product not merely of intellectual integrity, but also of essential kindliness of feeling and consideration. Not only the rulings were fair, but the man was fair. He was strong and self-possessed and untroubled, with a gentle and delicate sense of humor subdued to the proprieties of the place, with swift certainty of conclusion, founded upon knowledge and accurate thinking, carrying conviction and making acquiescence natural. He expedited business by always doing promptly the right thing without vacillation or delay. In the rare instances when he found himself mistaken, prompt acknowledgment and reparation were accorded with such frank sincerity that the sufferer by the mistake felt himself the gainer. He was positive without dogmatism; certain without personal overconfidence. He controlled procedure under the rules without making them the instruments of irritation or oppression, and without sacrificing the spirit to the letter. Senators of all parties became his friends. All lamented his untimely death, and all join here in doing honor to his memory.

All associated action among men exhibits an inevitable conflict between the idea of combined efficiency and the idea of individual freedom. Neither can prevail without some sacrifice of the other. The difference is temperamental, and the two types of character are hard to reconcile and are prone to misjudgment, each of the other.

Mr. SHERMAN was of the type which seeks efficiency by the law of its nature. His instincts were for order, discipline, intelligent direction, voluntary subordination to a common purpose, definite conclusions, achievement. So in politics, from first to last, he was always for party organization and party responsibility. In the House he was always for the most effective rules of procedure, and as a parliamentary presiding officer he naturally made the application of parliamentary rules a means of progress rather than an obstacle. His character exhibited in high degree the virtues of his type. He had the capacity for sympathetic appreciation of the feelings and motives of others which makes associated action easy. He had a genius for friendship which conciliated affection and disarmed enmity. He thought much of the common cause in which he was enlisted, and little of his own advantage; much of general success and little of personal advancement. He was modest and unassuming—never vaunted himself or pressed himself forward. He never sought the spotlight on the public stage. He was free from the exaggerated egoism which has wrecked so many fair causes. He had the unselfishness and self-control to obey where others rightly led, and he had the clearness of intelligence, the force of personality, and the decision of character to lead, so that others might follow. He was simple and direct in thought and action. He was frank and truthful and entirely free from that cowardice which breeds deception. He had naturally an unconscious courage which needed no screwing up to the sticking point. Among all the multitude who have known him, in boyhood and in manhood, in private and in public, not one can recall a mean or ignoble or cruel or deceitful word or act on his part. He was sincere in his beliefs, he was faithful to his word, he was steadfast in his friendships, he was loyal to every cause that he espoused. His life made men happier; his example is making men better. His service will endure in the fabric of our institutions.

In this Republic, unlike many nations which enjoy constitutional government, we grant no titles of nobility and no decorations for honor. As public servants complete their work and pass from the stage of action, the judgment of their contemporaries finds no such definite means of expression, and so we have come here to-day to render in this ceremony the verdict of our generation upon the private virtues and the public service of JAMES SCHOOLCRAFT SHERMAN. The Senate and the House of Representatives, the Chief Justice and the Associate Justices of the Supreme Court, the ambassadors and ministers of foreign powers, the President and his Cabinet, the civil and military and naval officers of the Nation, a multitude of friends who knew him and of countrymen who knew him not, join here to set in the archives of our Government a record of honor which will remain so long as the Nation he served so well endures.

ADDRESS OF SENATOR MARTIN OF VIRGINIA.

Mr. MARTIN of Virginia. Mr. President, to an orator or an essayist the aspirations, achievements, and character of the late Vice President SHERMAN would furnish a theme big enough and broad enough to invite and justify an effort of the most philosophic and ambitious proportions. My time, opportunity, and humble abilities have not tempted me to undertake to offer to the Senate to-day anything on that plane. My only desire is very briefly and in plain and simple words to pay some tribute to the memory of a personal friend, a patriotic citizen, and an able and upright public officer.

I knew Vice President SHERMAN chiefly in his relations to the Senate as its presiding officer and in his relations with Senators in his daily contact and association with them. He was elected Vice President of the United States on the 3d day of November, 1908. He took the oath of office and entered upon the discharge of his duties on the 4th day of March, 1909. On that day he first presided over the Senate. The last day on which he presided over the Senate was the 12th day of June, 1912, at which time a serious illness, which on the 30th day of October, 1912, terminated fatally, compelled him to discontinue his active work and go to his home at Utica, N. Y., where on the 30th day of October, 1912, he departed this life.

Between the 4th day of March, 1909, and the 12th day of June, 1912, a period of three years and more than three months, he was rarely absent from his post of duty in the Senate. During that period I can say with perfect safety that no one heard from him, either from the chair as the presiding officer of the Senate or in his association with Senators, a harsh, unkind, unjust, or unpleasant word.

The Senate during my 18 years of service in the body has been fortunate in its presiding officers, but in no instance, either of a Vice President or a President pro tempore, has the body been honored with an abler, more courteous, or more impartial presiding officer than Vice President SHERMAN. He was as just and as fair to one side of the Chamber as to the other. He was as courteous, considerate, and as just to the Democrats as he was to the most conspicuous and able Republicans in the body. He was by training and conviction a Republican in politics; he was always loyal to his party. He was by nature a partisan. I have no doubt I am as intense a partisan as he was, and I trust I am as devoted to the Democratic Party as he was to the Republican Party; but, Mr. President, in the Senate there is much less of politics than is generally supposed to exist.

In respect to questions essentially political in their nature Senators divide on political lines, but questions of that character constitute only a very small per cent of the questions which come before the Senate; and in defining questions essentially and properly political I would limit them to questions in

respect to which Senators form their opinions in accordance with their convictions as to the policies in their judgment most promotive of the public welfare. In the Senate rarely, if ever, are questions treated as political questions with a view to gaining political advantages for the one party or the other. From my experience and observation in the Senate I can say I have found very little disposition on either side of the Chamber to deal with public questions with a view to party advantage rather than with a view to the public welfare. From this broad and patriotic point of view the late Vice President SHERMAN was a partisan in respect to questions essentially and properly of a political nature. So long as men adhere to this patriotic and honorable line of division on political questions politics does not and can not interfere with cordial personal relations or lead to unjust, unfair, or partial rulings from the Chair. A partisan only in this higher and nobler sense, and actuated only by patriotic motives, it was inevitable that the official rulings of Vice President SHERMAN from the chair would always bear the impress of honest conviction and intelligent consideration and command the respect of Senators on both sides of the Chamber.

As his rulings were impartial as between the two political parties in the Senate, so his personal friendships were not confined to the members of either one of the political parties. He was my personal friend. My associations with him constitute one of the most pleasing features of my public life. He enjoyed to the fullest extent the confidence and esteem of the Democrats as well as of the Republicans of the Senate, and with many of them he was on terms of the closest friendship. Democrats consulted and advised with him as freely as the Republicans did. There was no sham or hypocrisy in his character. In his personal association with Senators he was always frank, cordial, and courteous. In the conduct of the business of the Senate he was attentive, vigilant, just, and able. He was a careful student of parliamentary law, and in his rulings rarely, if ever, erred; but whether he erred or not, there was never an occasion during his official life in the Senate when any Senator questioned his fidelity of purpose or his careful consideration of any question presented to him or his earnest desire to dispose of it correctly and justly.

His death brought the deepest sorrow to every Member of this body. In the official business of the Senate he has been missed more than words can reasonably express. The country at large has lost one of its noblest citizens and a public officer of the highest ideals, devoted to the faithful discharge of every duty devolved upon him.

ADDRESS OF SENATOR GALLINGER.

Mr. GALLINGER. Mr. President, when on a certain occasion the late Vice President called me to the desk, saying that he felt ill, and asked me to take the chair for the remainder of the day, he added, with pathos in his voice, "I am not at all sure how long I shall be able to continue to preside over the Senate." He then told me something of his fears, and as he left the Chamber my heart sank, and what followed a little later was not a matter of complete surprise to me. As was his custom in emergencies, Mr. SHERMAN made a brave fight against the disease that had fastened itself upon him, and only surrendered when poor, weak human nature succumbed to the inevitable.

JAMES SCHOOLCRAFT SHERMAN was a strong type of the best in our public life. He was an intelligent legislator, an ideal presiding officer, a powerful debater, and an orator of acknowledged ability. He was a good friend, a charming companion, and a loving husband and father, whose popularity was nation-wide. His death was a shock not only to his countrymen, but beyond our borders it was felt as a calamity. He died as serenely and bravely as he lived.

Mr. President, the predominant note in Mr. SHERMAN'S life was geniality and good nature. From him radiated a sweetness and tenderness that were contagious. No one came in contact with him without feeling the influence of a pure, generous, lovable soul. He was kind to animals, fond of sports, and a lover of nature. In good literature he found great pleasure, and in the study of economic questions he took special delight.

In both Houses of Congress Mr. SHERMAN was universally liked, and in every relation of life he was honored and respected. We sadly miss him from this Chamber, where he was held in highest esteem by the entire membership. While a strong party man, he was free from narrow partisanship. He was in the truest sense a patriot, loving his country and its institutions, and devoted to the happiness and welfare of all classes of its people. He was broad-minded and large-hearted, incapable of a meanness, and filled with sympathy and love for his fellows. Such a life surely did not end when death came. Rather let us believe that it was the beginning of a higher and better existence, and that the earthly activities of our friend were but the prelude to a life of greater beauty, of grander aspirations, and of nobler achievements. In the contemplation of the great mystery that surrounds death and immortality, which no one, however wise, can fully interpret, we may well exclaim:

Shall I say that what heaven gave
Earth has taken?
Or that sleepers in the grave
Reawaken?
One sole sentence can I know,
Can I say:
You, my comrade, had to go,
I to stay.

And so, Mr. President, to this brief and inadequate tribute to a dear friend, whose memory will always be lovingly treasured in my heart of hearts, I can but add the simple word "adieu."

ADDRESS OF SENATOR THORNTON.

Mr. THORNTON. Mr. President, it is to me a source of mingled sorrow and pleasure to have been asked to speak on this occasion.

Of sorrow, because it brings freshly to my mind the thought of the loss of him whose memory we are assembled to honor, and of pleasure because of the opportunity given me to add my short tribute of respect and affection to the fuller tributes placed on the altar of his memory this day.

It was not my good fortune to know him as long as did others who have preceded or will follow me, but I shall ever esteem it fortunate for me that I knew him at all.

My acquaintance with Mr. SHERMAN only dated from my entrance into the Senate in 1910, yet in the time that I knew him I learned to love him because of his sweet spirit, his gracious demeanor, his kindly consideration, coupled with the fine sense of humor that added to the charm of his personality and made his companionship so agreeable.

These were the traits of character that won my heart soon after we met and held it to the end.

And it is not on the statesman, the Congressman, the presiding officer of the Senate, or the Vice President of the United States that my mind lovingly dwells, but on the lovable man.

And I do not know how better to illustrate these winning qualities I have mentioned and the recognition by others of their exercise than by relating an incident in which he and I were the actors and the comment of a third party thereon.

He was not presiding over the Senate on the morning I was sworn in, and I did not meet him for four days thereafter. Then he came to my seat and with that pleasant smile we all so well remember, said: "Senator, I have not had the opportunity of making your acquaintance, but I wish now to introduce myself and to say that I welcome you to the Senate and hope your stay with us will be always agreeable and pleasant to you."

And after a moment of pleasant chat he left, taking a part of my heart with him.

About a day after this little incident, one of my Democratic friends from the House of Representatives, who had seen long service in that body with Mr. SHERMAN and was on intimate personal terms with him, came over to the Senate and sat down by me and said: "Have you met my friend, JIM SHERMAN, yet?" Then I told him of the incident of the previous day and of how much I had appreciated the gracious action, and his comment was: "Now is not that exactly like JIM SHERMAN."

This was the beginning of my acquaintance with him, this the first of the many acts of kindness shown me by him during the two years that followed until death stayed the hand always so ready to be uplifted for the help of others.

And so it was that I learned to love him while he was here, and so it is that I shall love his memory since he has gone.

And I am sure that my experience with him is that of all with whom he came in contact, for he was filled with the spirit of kindness toward others and many there are besides myself who loved him living and mourn him dead. And if the beautiful dream of the poet be true, that on the roll of the book of gold hereafter the names of those who loved their fellow men shall be first inscribed, then will his name be found high up on the list.

We will no more see the winning smile, no more feel the cordial hand grasp, no more receive the acts of kindly sympathy, but the memory of it all will remain with us and make us feel thankful that we knew one whose impulses through life prompted his conduct toward others to the end that he might contribute to their happiness.

ADDRESS OF SENATOR LODGE.

Mr. LODGE. Mr. President, the tie which binds those who have been long together in the public service is apt to grow very close as

the years glide by. Mr. SHERMAN and I, as it chanced, began our congressional life at the same time, in the Fiftieth Congress, 26 years ago. Except for two years, when he was out of the House for one term, we have been together ever since. He remained in the House, was one of its most trusted leaders and most efficient Members. During all those years I saw him constantly, and it was with peculiar pleasure that, as the president of the convention, I declared his nomination as the Republican candidate for the Vice Presidency in 1908. His service here in the high office to which he was chosen is so recent that it is as fresh in our minds as the grief we have all felt for his untimely death. I say "untimely," for he was still far from the chilling precincts of old age, and any death is premature which strikes a man down when he is in the prime of his abilities, when he is ripened by long training and wide experience, and when his life is still valuable to his country, still ample in promise for a yet larger service in the future.

Of his long and successful career as a legislator I shall not attempt to speak. Others who saw him at work year after year in the House can alone do him sufficient justice in this respect. But there is one phase of his public work of which I wish to say a few words, because he there attained to an excellence not often reached in what is always an exacting and sometimes an ungrateful duty. During his long service in the House he gradually came to be recognized as the best Chairman of the Committee of the Whole whom that great body had known in many years.

To preside not merely well but effectively in the House Committee of the Whole is a severe test of a man's qualities, both moral and mental. He must have strength of character as well as ability, quickness in decision must go hand in hand with knowledge, and firmness must always be accompanied by good temper.

Many if not most persons seem to regard parliamentary law as a collection of haphazard and arbitrary rules. No view could be more erroneous. General parliamentary law, like all other systems of law or jurisprudence, rests upon certain underlying principles, and is designed to carry out those principles and to effect particular purposes for which the system exists. Parliamentary law aims to insure the transaction of business by legislative bodies, to eliminate disorder and confusion from the process, to make impossible the occurrence of situations where there is no thoroughfare and no way out, and to preserve the proper rights of minorities.

For the attainment of these objects, so essential to the transaction of business in any legislative assembly or any large body which debates and votes, parliamentary law has been developed by practice and perfected by long experience. A presiding officer of high and marked ability like Mr. SHERMAN must therefore possess a full knowledge of the principles upon which parliamentary law is based and also understand the philosophy of the system so that he can apply it at will to any given question. Besides this familiarity with general parliamentary law and in addition to a firm grasp of its principles, a presiding officer must know thoroughly the rules of the particular body which he serves. In the case of our House of Representatives the rules are many and complicated and the literature to which they have given rise in discussions, decisions, and precedents is voluminous in the extreme. In the Senate, on the other hand, the rules are simple and their burden is light, but they are administered in conformity with habits and customs which have slowly grown up during a century and which, for that very reason, can be understood and appreciated only by the exercise of patient and observant care. Mr. SHERMAN, as Chairman of the Committee of the Whole in the House and as President of the Senate, met the exacting and very difficult requirements of both positions with a success as complete as it is rare. He was equally master of general parliamentary practice and its principles and of the various systems peculiar to the two branches of Congress. Always alert, prompt, and clear in decision, rapid in the conduct of business, he was courtesy and kindness itself to all the Members of the House and Senate. A strong party man, of deep convictions as to political principles, when in the chair he recognized no party divisions on the floor. To him in that high and responsible place each Member of this body was simply a Senator with rights and obligations equal to those of every other Member of the body. He understood thoroughly also that most essential fact, that the first duty of a presiding officer is to preside, and, when questions of order are raised, to decide. He realized fully that it was far better to run the risk of an occasional error, against which his knowledge and experience protected him, than, like Lord Eldon, to say continually "I doubt." He knew that the presiding officer who hesitates is, if not always lost, quite sure to find control of the helm slipping from him, to see the public business drift off on the baffling waves of debate, ground on the shoals of delay, or sink, a helpless wreck, even when in sight of land. Therefore he ruled, as he conducted the general business, clearly and without doubt or hesitation.

He exhibited also in a high degree, whenever occasion demanded, the steady courage which is at all times so important, but which is not always associated in the minds of most people with the qualifications of a presiding officer. Correct rulings may readily be as unpopular as a righteous vote or an honest speech, and it is very easy to create a doubt under cover of which the unpopular ruling can be escaped. This Mr. SHERMAN never did. He was as incapable of making a wrong ruling through fear as he was of ruling wrongly to advance a personal or party interest. I remember well one occasion when a very popular and much-desired amendment was offered to an appropriation bill where it was plainly out of order. Under the Senate rules the Chair may submit a question of order to the Senate. It was not necessary in this instance that Mr. SHERMAN should rule wrongly; it was only necessary to stand back and allow the Senate to set the rule aside. Mr. SHERMAN was urged to submit the question of order to the Senate. He declined to do so. He refused to evade his duty. The point of order was made, and he sustained it. It was not popular to do this, but it was right, and the act showed not only courage but a high conception of public duty.

I have dwelt upon this single phase of Mr. SHERMAN's public service, because time forbids that I should do more and because the high excellence which he achieved as a presiding officer, both in the House and Senate, is in itself at once an exhibition and a proof both of his ability, his intellectual keenness, and of his force of character. But I can not end these most inadequate words without speaking of him for an instant as a friend and wholly apart from his public service. He was one of the best and most loyal of friends. Indeed, his loyalty to a friend was so strong that he more than once bore troubles not his own and endured censure when he had no fault, rather than desert one to whom his friendship had been given. He was one of the pleasantest and most agreeable of companions, full of fun and humor, and with a sympathetic interest which ranged over many subjects and touched many men. By those who knew him well he is greatly missed. Not a day goes by that I do not think of him here and of our talks together, that I do not wish I could hear once again that hearty laugh and cheery voice, that I could see him as he was, now serious, now mirthful, but always strong and kind and full of sympathy with those for whom he cared. He died in the highest office but one of the Republic. The office will be filled, but the place which he had made for himself in the affection of those who knew him will remain vacant and unoccupied.

ADDRESS OF SENATOR KERN.

Mr. KERN. Mr. President, it was during the presidential campaign of 1908, and in the city of Chicago, that I first met JAMES S. SHERMAN. We were opposing candidates for Vice President, and at that particular time and place the political situation was the subject of well-nigh universal discussion. Both of us were in the midst of the contest. I have never forgotten the genial warmth of Mr. SHERMAN's greeting and the ease with which he captured my friendship.

Before that meeting I had him in mind as a formidable political adversary—a foeman worthy the steel of any man, but none the less a foeman. After looking into his genial face, which reflected that gentle spirit, and hearing his words of kindly greeting which so clearly proceeded from a heart full of affection for his fellow men I was never able to regard him otherwise than as my friend.

Some weeks later as the campaign proceeded I was about to be introduced to a very large political assemblage in his home city of Utica, when a telegram was handed me. It was from Mr. SHERMAN, who was in a distant part of the country, bidding me welcome to his city, expressing his hearty good will, and urging me to call upon his family while in Utica.

A few days later, when the word came to me that a member of my family had been suddenly stricken by disease, I had scarcely turned my face toward home, abandoning the compaign for a time, when from my opponent, this great-hearted man, came a message full of sympathy, expressing in tenderest phrase his hopes that my worst fears might not be realized.

Within a week of the election, when a foul libel assailing my reputation had been published in a single eastern newspaper, the first knowledge I had of the article came from Mr. SHERMAN, deprecating the publication and reassuring me of his high personal regard.

When I came to the Senate two years ago he was so anxious to show his good will and emphasize his personal friendship that within five minutes after the oath had been administered to me he invited me to take the gavel and preside over the Senate. I protested that I was a stranger, not only to this

body but its procedure, but he insisted, saying, "It will be only for a few minutes and it is for my own pleasure and gratification that I ask you to do me this personal favor."

And from that time on until the last he never lost an opportunity to make me feel that however wide our political differences—and they were irreconcilable—I had in him a friend on whose fidelity I might always rely.

Such incidents may be tiresome, in so far as they refer to my personal connection with them, but it seemed to me that the recital of these bare facts would serve to illustrate the kindness of heart and nobility of spirit of this man whose untimely death we mourn, with far greater force than I could possibly portray them in any combination of words, however ingeniously arranged or eloquently expressed.

While the election of 1908 brought to me defeat, disastrous as such things are counted or measured amongst men, the campaign brought to me in the nature of recompense the friendship of this man, which during his life I treasured as one of my dearest possessions, and now that he has "gone forever and ever by," the memory of that friendship will bless and inspire me to my latest day.

There are men here who knew him intimately throughout his long and honorable public career, covering a period of nearly a quarter of a century, and who, therefore, must have loved him well, but I doubt if any of such men had greater reason than I for yielding to him a full measure of affectionate regard or who felt a deeper sense of personal loss when death took from me such a friend.

It is not my purpose to speak of this man's official life, nor of the distinction gained by him during his years of service as a Representative in Congress of a rich and populous district, or those other years of service here as the Vice President of the United States.

The people of the Utica district honored and trusted him, and he was altogether faithful to their interests. They loved him, and he gave them his personal affection in return. He won their continued support by his fidelity to duty, but he won their hearts by his unfailing kindness and gentle bearing to everyone.

And so in this body. As a presiding officer he was able and impartial, and because of the ability with which he discharged the duties of his high office he was honored by the Senators from every State. And yet when he died and a deep sense of personal loss and bereavement oppressed us, it was not of his great ability as a presiding officer, or the loss that the Nation had sustained in the loss of its Vice President, that we thought first, but rather of the great heart of the man, of his genial manners, his gentle ways, and his never-failing love for his fellow man.

His public record is one of which his family and friends may be justly proud. He will be doubtless remembered as a commanding figure in the councils of the Nation in that period during which he served the people. But beyond and above all this, the memories of his cheery smile, his kindly deeds, his generous conduct toward political friend and foe alike, which made men love him, will find their way into the history of the times in which he lived, and in the homes of the people at least will add luster to his name.

It is better that a man should have the personal affection of the hundreds who know him well and love him for the sweetness of his life and character than that he should have the applause of the millions because of great public achievements, while hungering for the joys of personal friendship of which he knows nothing.

The Divine Master when on earth, being called upon for a solution of the problem as to what was necessary in the conduct of man to insure the inheritance of eternal life, declared that he who loved God and who also loved his neighbor as himself should surely live, and in further exemplification of the law of love which glorified the new dispensation declared: "A new commandment I give unto you, that ye love one another."

What a true disciple of this Christian doctrine, what a consistent follower of these divine teachings was the late Vice President of the United States!

And if we may rely upon the teachings and promises of the Man of Galilee, as with confidence we do, then is the future of our friend assured, for he has come into that inheritance of eternal life which has been promised to all who, keeping God's commands, have loved their fellow men.

ADDRESS OF SENATOR LA FOLLETTE.

Mr. LA FOLLETTE. Mr. President, in the brief time assigned me I can offer but the simplest tribute to a personal friend.

I first met the late Vice President 25 years ago, when he became a Member of the Fiftieth Congress. I had entered the House of Representatives two years before. We were of the same age. We were both Republicans. We became friends. We served together four years. We were both retired from the public service on the 4th of March, 1891. We did not meet again for 15 years.

In those intervening years he had been returned to the House of Representatives, where he had risen to position and to power. I had gone back to my State, to find another call to service.

When we again met in this Chamber, a decade and a half had wrought great changes in political parties and in the country. We were both Republicans, but he was of one school, I of another. He believed that the interests of business and the interests of the country were at all times identical. I believed otherwise. But while we disagreed on many if not most matters of legislation, our friendly personal relations remained unbroken to the end.

Looking back upon the years in which he laid the foundations of his career, I can well understand its influence upon his conception of the obligations of public service. The strongest men are, in some degree at least, the product of their environment. But whatever may have been the influences directing the course of Mr. SHERMAN'S thinking, that course was a steadfast and consistent one throughout his life. His convictions were strong and were strongly maintained. He never skulked or evaded, but with resolution and courage fought out every issue openly, to victory or to defeat.

From the House of Representatives he was chosen to be Vice President of the United States. But in the hour of his greatest triumph, when life and hope were strongest within, the hand of death was laid upon him. At the very threshold of his new career the grim messenger met him. From the first its shadow went with him in and out of this Chamber, stood over him at his desk, followed him down the corridors, pursued him to his home. Month after month, waking or sleeping, in social cheer or the still hours of the night, it was his constant companion. Before all others he was the first to know what threatened him. His ear first caught the mandate that chills the heart and slows the pulse: "Be ye ready, the summons cometh quickly."

He indulged in no delusions touching the final issue. His clear vision saw straight to the open tomb. To go down in defeat and to rise again and fight on demands courage of a high order. To face death when it breaks life off in the middle and to make no sign is the supreme test.

He understood. But he took care that those who were nearest and dearest to him should not know. He bore an outward geniality and spirit that dispelled fear from all his friends, while caring for every detail, and making the final preparation.

Mr. President, the longest span of life is but a day—a day of sunshine and shadow between the impenetrable darkness of two eternities. The mystery of our coming and going we can not solve; but—

> We believe that God is overhead;
> And as life is to the living,
> So death is to the dead.

ADDRESS OF SENATOR WILLIAMS.

Mr. WILLIAMS. Mr. President, Mr. JAMES S. SHERMAN, Vice President of the United States, was cut down in the high tide of physical and mental virility and maturity.

Shakespeare pictures life as a one-act play with seven scenes, and of the seventh he says:

> Last scene of all,
> That ends this strange eventful history,
> Is second childishness and mere oblivion,
> Sans teeth, sans eyes, sans taste, sans everything.

The man whose personality we recall to-day least of all men would have desired to live that long. Rather was his temperament that of one who would heed the admonition:

> Gather ye rosebuds while ye may,
> Old Time is still a-flying,
> And this same flower that smiles to-day
> To-morrow will be dying.

For that reason was he called "Sunny Jim." He was sunny in appearance, in speech, in thought, in feeling. But it was not the rippling sunniness of short, breaking wavelets on the surface of a shallow brook; the stream of his thought was deep and strong and steady.

I first met him in 1893, when both of us were Members of the Fifty-third Congress. We were of totally opposite schools of political thought, opposite heredities and environments, but we soon became warm personal friends of that type who are said to be "hale fellows well met," extending one to the other every possible personal courtesy, and in legislative work every possible favor consistent with our respective partisan obligations. He was experienced, I not; and so it came to pass that he showed me how to do things in a parliamentary way.

In 20 years' acquaintance I never saw a frown on his face, nor did I ever see a shadow or a cloud. He must have had his sorrows and troubles, as all of us have, but whatever they were he never afflicted others with them. He shared his enjoyments, not his worries, with his friends.

He had been when I first met him already a Member of two Congresses—the Fiftieth and the Fifty-first—though defeated for the Fifty-second. He was after the Fifty-third a Member successively of seven more Congresses, and then for nearly four years Vice President of the United States. "He wore his honors meekly." Pride of office was as alien to him as taking himself too seriously in any other way would have been. Among his fellows he did his work patiently, vigilantly, intelligently, genially, and, above all, equably—never seeking the first place for glory nor the last to shirk labor or responsibility, but meeting with marked ability whatever fell to him as his share in his country's or his party's tasks in that great arena of struggling and often excited gladiators—the House of Representatives. The favorite of three Speakers—Reed, Henderson, and CANNON—all of whom, when forced to leave the chair at critical moments demanding a quick, decisive, self-possessed, and able parliamentarian in their stead, delighted to call him to it, he yet never held a committee assignment in the House higher than that of Judiciary at one time and Interstate and Foreign Commerce at another. For years he could have had a place on Ways and Means or Appropriations—the two leading committees there—for the asking. But there were always friends who wanted preferment, and he always subordinated himself to them, thereby making the task of the Speaker, who was in those days always the party leader, easier and the pathway of his friends pleasanter.

He proved himself easily equal, if not superior, wherever he was placed. He fell below the demands of no responsibility or task laid upon him. His action was decisive; his speech facile, lucid, and terse, though unpretentious. I used to think in the House that he was the ablest and the readiest presiding officer we ever had after Reed died, and that he handled bills of which he had charge on the floor more rapidly, more easily, and with clearer explanations to Members not on the committee and seeking information than any other Member.

Above all, he did all with irresistible pleasantness of demeanor and appealing modesty. When with a point of order he took a Member off his feet and the floor, he did it with a smile, which was itself an apology, as much as to say, "I hate to trouble you, old fellow, but really the business of the House must go on in an orderly and prescribed way"; or, "I hate to disturb you of all men, but this is my only way of meeting an exigency of party management." Of nearly all men I ever met, he knew best that no man has a right to take himself or his share of human work and human honors too seriously. Men are too many, the earth is too small, and other planets and solar systems are too numerous and large and earthly life is too short for that.

> Oh, why should the spirit of mortal be proud?
> Like a fast-flitting meteor, a fast-flying cloud,
> A flash of the lightning, a break of the wave,
> He passes from life to his rest in the grave.
> * * * * * * *
> And the fever called living
> Is conquered at last.

After his death his friends may say that he was—

> A man that Fortune's buffets and rewards
> Has ta'en with equal thanks.

I am not an old man yet, as life is measured here in Washington, and yet there are perhaps more of the men who were in public life when Mr. SHERMAN and I first entered it who are now waiting to shake our hands on the other shore than there are on this.

> Friend after friend departs:
> Who hath not lost a friend?
> There is no union here of hearts
> That finds not here an end.
> * * * * * * *
> Over the river they beckon to us—
> Loved ones who've crossed to the farther shore.

Perhaps the best thing we can do here is to so deal with men and women, too, that we shall be neither ashamed nor afraid to meet them hereafter. This I believe this man did. I have met him by the funeral bier; in the political struggle, where we crossed swords in earnest and fateful conflict; around the banquet board. He was always the same and always a gentleman, in manners, speech, and conduct. He carried sunshine with him in this life. Why can we not hope that he carries it with him over there?

Of course none of us know with certainty what death is, nor can we know except with the eye of faith. How can we, when we do not even know what life is or whence it is?

> Life! I know not what thou art,
> But know that thou and I must part;
> And when or where or how we met,
> I own to me's a secret yet.

Or, as another sweet singer expresses it:

> Like to the grass that's newly sprung,
> Or, like a tale that's new begun,
> Or, like the bird that's here to-day,
> Or, like the pearl'd dew of May,
> Or, like an hour, or, like a span,
> Or, like the singing of a swan—
> E'en such is man, who lives by breath;
> Is here, now there—in life and death.

But if, as I fervently believe, existence is one duration, of which what we call life is one part on this side of the dividing portal which we call death and of which what we call eternity is the part on the other side—if, as Longfellow says:

> There is no Death! What seems so is transition;
> This life of mortal breath
> Is but a suburb of the life elysian,
> Whose portal we call Death.

Or if, as another sings—

> The living are the only dead;
> The dead live never more to die—

then, why in sweet Heaven's name can we not go through life as JAMES S. SHERMAN did, with smiles upon our faces, meeting our tasks earnestly and honestly, but cheerfully, not sadly—doing our best and leaving the sad faults and sins of us, like little children, to the pity of the All Father whose mysteriously weak and strong and unfathomable creatures we are?

The body of him has been laid away in "God's acre"—I like that ancient Saxon phrase which calls the burial ground God's acre; it is just—and though a Nation here, through us, its representatives, is met with fit observance to do him ceremonious honor—all deserved by faithful, long, honest, intelligent public service, deserved by courteous, kind-hearted human serviceableness and cleanness in private life—I do not think he wants us to be sad or to make others sad in his death, except in so far as we can not help it because of the mutual missing of him. It is for the living who have been left by the loving and beloved dead and not for the dead themselves that we are called to sorrow, because, as to him who has passed the portal where this "mortal coil," the flesh, is "shuffled off," a freer and a broader life, untrammeled by flesh limitations and undeflected by flesh temptations, begins.

> The soul, immortal as its Sire,
> Shall never die.

ADDRESS OF SENATOR CURTIS.

Mr. CURTIS. Mr. President, no one outside his family circle felt more than did I the death of JAMES S. SHERMAN, the Vice President of the United States. For years I was associated with him in the House of Representatives, and early learned not only to respect him but to love him. His qualities not alone as a man, as a legislator, as a parliamentarian, but as a friend, impressed themselves upon me and quickly endeared him to me in many ways, and that endearment deepened as time went by. Mr. SHERMAN was more than a friendly acquaintance to those with whom he frequently came in contact. He was a fatherly man. He was at once interested in the things in which you were interested, and immediately took upon himself the cloak of helper and adviser. He was thus particularly useful and congenial to new Members, and commanded for himself respect and support in everything he undertook. In fact, I believe, and make bold at this time to assert, that JAMES S. SHERMAN enjoyed the real loving friendship and affection of more men throughout the country than any other one American living. He had traveled extensively in the United States, and there was scarcely a town in this broad Nation in which he might appear, whether or not his coming had been heralded, that some man would not step to his side, and, throwing his arm about his neck, accost him in terms of pleasure and of attachment.

Long and close association with Mr. SHERMAN in the House gave me keen appreciation of his talents as a legislator, while all of you here to-day are aware of his exceptional abilities as a presiding officer and as an exponent of parliamentary law. While seeking no recognition as an orator, he was ready in debate, and, though kindly and considerate to his opponents on the floor, drove home arguments with such conciseness and good effect that defeat in a contest on legislative matters rarely overtook him. His readiness under all circumstances to gauge a situation in its true light, his quickness to take advantage of opportunities made him, to my mind, one of the most successful and best Representatives, and he was valued and complimented as such not only by the people of his district but of the United States. His efforts were not centralized or localized. As chair-

man of the Committee on Indian Affairs and as a leading member of the great Committee on Interstate and Foreign Commerce his field of labor was broad and varied, and in nothing did he shirk his responsibilities, but was constantly working for the enactment of legislation of a character which would inure to the benefit of the public and of those whose interests were at stake. A large number of the most important statutes born in these committees bear witness to-day to his ability and able judgment.

Mr. SHERMAN was a partisan, open and unequivocal. He made plain his position on public policies and public questions at every opportunity, and rather, I always thought, enjoyed such declarations. There was never any misunderstanding as to where he stood on any question, and he would lose with grace, upholding his ideals, rather than yield to those beneath whose veneering was a desire to either please or advantage his opponent. He disliked pretense and detested dishonesty. While easy of approach and ready to listen to those who sought him, he was quick to detect and resent imposition or insincere motives. On such occasions his indignation would assert itself by vigorous expression and prompt refusal, and the discovery would rarely be forgotten.

Some of Mr. SHERMAN'S warmest friends were numbered among those who did not always agree with him either in politics or in policy. He was democratic, unostentatious, genial. His sympathy was deep and easily stirred. He saw the right in all that he did, but finding himself mistaken in any situation or degree, his acknowledgment of the fact was quick, earnest, and sincere. In fact, in private and public life Mr. SHERMAN met, as fully as it is possible to meet, every demand upon him as a citizen, a neighbor, a friend, and a statesman.

In his family relations he was particularly blessed. His enjoyment and contentment reached its height when his family was gathered about him, and its members, more than any others, will miss him as a devoted husband, loving, gentle father, and jealous protector.

It is difficult, indeed, to realize that JAMES S. SHERMAN has gone never to return. Had he been spared there were other heights which he might have reached, but after traveling well the road of service to his people, his party, and his Nation, he was stricken down in the prime of life and left us lonely and sorrowful at his demise. We miss his cordial greeting, his heartfelt hand grasp, his tender solicitude. His memory will live always and we are better for having known him. His career will ever be a shining example before the youth of our country and the tributes paid him heretofore and to-day, which, though they do not add to his worth or his greatness, are confessions of love, respect, and esteem on the part of those who not only knew him but who enjoyed in his presence and at his side those delightful characteristics and that personal charm which endeared him to young and old and which remained with him to the end.

He has gone. He has trod the path we shall tread when the summons comes. Let us be as well prepared in all things as was he, for the good he did lives after him. Our struggle here may be longer, yet for whatever time it be we will go on as "weary ships to their haven under the hill."

> But O! for the touch of a vanish'd hand,
> And the sound of a voice that is still!

ADDRESS OF SENATOR CUMMINS.

Mr. CUMMINS. Mr. President, it seems to be the way of this turbulent, fighting world of ours that in life the people, and especially the public people, are chiefly concerned with their never-ending disagreements; but in the presence of death, with its majestic and solemn harmonies, we no longer hear the noise of the conflict and we lay aside the weapons of our warfare. We are conscious then, as at no other time, of the immensity of that limitless region in which the peace of common purpose always reigns.

In his lifetime there were some things upon which the late Vice President and myself were not in accord, but now that he has joined the immortals upon the other shore my memory refuses to perform its accustomed office, and just now I am wondering what these differences were. In the stead of a recollection of controversy there comes trooping into my mind the remembrance of his noble manhood, his lofty character, his strong, keen intellect, his unsurpassed candor, his perfect fairness, and his tender heart. Into every political contest he carried not only the flawless courage but the sensitive honor of the knights in the olden time. He hit hard, but only when he was face to face with his adversary. The body of his enemy felt his blows; but the wounds he inflicted were always found on the breast, never on the back. The American people had a name for him, and they will cherish it so long as humanity holds the affection which lightens and sweetens mortal existence.

To be loved by close associates and immediate followers is a joy that many men experience, but to be loved by the whole number of one's acquaintance is a distinction that but few men have attained, and our lamented friend was one of these rare, choice spirits of the world.

For nearly four years JAMES S. SHERMAN, as Vice President of the United States was the presiding officer of the Senate. Others have spoken, and spoken well, of his service elsewhere. My purpose is to record my high appreciation of his service here. The qualities which fit a man to guide the deliberations of a body like ours, to administer the rules which govern it and to render quick justice to all its members, are rarely united in a single man. High above every other quality is the power to be fair and impartial. Most men, I think, want to be fair, but there are only a few men who, in the moments of stress and storm, have the capacity to be fair. Vice President SHERMAN had this quality in as high degree as any man I ever knew. During all the time he directed our deliberations he was eminently just. So successful was he that throughout all the days of fierce debate, days in which feeling ran strong, there never arose the least suspicion of his perfect impartiality.

He was a skilled parliamentarian. He was not only master of the general subject, but, what is more wonderful, he was master of the mysterious rules which we have adopted for our own government. His decisions were quickly made and were delivered with precision and emphasis. The operations of his mind were not only accurate, but they were lightninglike in their rapidity. He was courteous, but his firmness was as striking as his courtesy. Many illustrious men have occupied the chair to which he so worthily succeeded, but I venture to say that no one of them discharged its duties more faithfully or more efficiently than did he.

All in all, I have never known a presiding officer who combined all the qualities of mind and conscience demanded by such an office more completely than they were united in him; and when the Master called him he laid down the authority of his commanding position among us with the love, the respect, the confidence, and the admiration not only of every Senator but of all his fellow men.

With hearts full of sorrow we say of him the best that can be said of any man—the world is better because he lived in it.

ADDRESS OF SENATOR OLIVER.

Mr. OLIVER. Mr. President, few men have lived and died who were better loved than JAMES SCHOOLCRAFT SHERMAN. I leave it to those who knew him from his earlier years to tell the story of his public life, and will content myself with saying a very few words about SHERMAN the man—for it was as man to man that we knew each other best. I never met him until after he was Vice President and I was a Senator, not quite four years ago; but we were thrown into close companionship during the long extra session of 1909, and from that association there grew a friendship which, on my part, was at least as strong as I ever felt for any man, and I believe that on his part it was just as strong. No man could be with him long without becoming his friend. His very presence compelled friendship. The sunny smile which dominated his face, and about which so much has been said and written, was not the mere mask of the hail fellow well met, but the outward manifestation of an inborn and ingrained kindly nature, filled to the full with the joy of living and the delight of mingling with his fellow men. What most endeared him to men was his intense humanity. He was human all through, and he loved human kind; and those of us who were admitted to the inner cloisters of his intimacy feel that in losing him we lost a part of our own selves, and that life for us will never again be as complete a thing as it was before he was taken away.

Hypocrisy was a thing abhorrent to him, and political hypocrisy he could tolerate least of all. Not once but often have I heard him in unsparing terms denounce men in public life who, to please the passing whim of the people, advocated or supported measures or policies in which he knew they did not believe.

He was first and last a partisan, and an intense one at that; but his partisanship was in no way tainted with bitterness of spirit. It arose from the very intensity of his convictions. He believed from his heart that his country's welfare depended on the continued supremacy of his party, and he saw no path to progress but by way of its success; and with zeal unflagging and spirit undaunted, in and out of season he labored for that success. I know, for he told me more than once, that with waning health and growing years he longed to withdraw from

the conflict, and spend the days that might remain to him in the companionship of the wife and sons who were the objects of his tenderest affection; but with his rare political insight he well knew that last year's fight was to be a losing one; and he would not—constituted as he was, he could not—be recreant in its adversity to the party which had honored him in the days of its triumphant prosperity. So, like the true soldier that he was, he died with his face to the foe, under the standard of the party he had served so well, and in whose principles he so implicitly believed.

He was a man, take him for all in all;
We shall not look upon his like again.

ADDRESS OF SENATOR O'GORMAN.

Mr. O'GORMAN. Mr. President, I join in the estimate of the late Vice President, which has been so eloquently pronounced by my distinguished colleague, and I share in the general grief caused by the premature closing of a career which only a few months since was rich in achievement and full of promise for the future. It is no small achievement to serve as a political leader in city, county, and State; to represent an important constituency in the National House of Representatives for 18 years, and at the end of so long a period of exacting public service to be elevated to within one step of the highest office within the gift of a free people. In public life such was the record of JAMES SCHOOLCRAFT SHERMAN. Its mere recital is an eloquent eulogy on the character and attainments of the citizen in whose memory we now pause to pay a last tribute of affectionate respect. It is no mere ceremonial that the Senate, over whose counsels he presided for four years, should bestow that homage which friendship and patriotism ever offer to the true man, the faithful public servant, the enlightened statesman. During his active and useful career Mr. SHERMAN witnessed the mightiest strides in material development the world has ever seen. He saw the Republic grow from the chaos of Civil War to its present commanding place among the nations of the earth. He saw the Empire State, of which he was a native son, leap forward with giant bounds, valiantly maintaining her place at the head of the mighty procession of the States of our majestic Union. His pride in the forward strides of the State and Nation was justified, for in the upbuilding of both he played the part of an active, earnest, and public-spirited citizen.

Neither a laggard nor a drone, for more than 25 years he was in the thick of the conflict which accompanies and stimulates progress. Throughout his life Mr. SHERMAN was a popular type of the American optimist, and imparted confidence and enthusiasm to all within the influence of his delightful personality. Industrious and successful in private enterprise, he was alert and influential in public affairs, and ably contributed to that ceaseless mental combat and attrition of thought whose constant flashes light the guiding torch of civilization which illumines the pathway of liberty and law. His impulses were generous, his sympathies broad, his intellect keen. He was a patriot. He loved his country and its institutions. For many years, at great personal and domestic sacrifice, he gave loyal, generous, and disinterested service to advance the public weal and uphold his country's honor. He had unbounded faith in the Republic; he had unwavering confidence in his countrymen and in their attachment to the principles of liberty and their capacity to right wrongs and uproot evils. In their active, watchful, and vigilant patriotism he saw the best security against the evils that beset all governments. His best tribute was the repeated expression of confidence and approbation that came to him from his fellow citizens in central New York, who knew him so well and valued his character and attainments so highly.

After years of industry and earnest effort in party council and public arena the citizen whose deeds we now commemorate was raised to the exalted station of Vice President of the United States, from which he passed with honor to the grave.

As President of the Senate he measured up to the best traditions of that high office. No Member of this body can forget the charm of his bearing or the ability, scrupulous impartiality, and fine courtesy with which he presided over the deliberations of this Chamber. The promptness and fairness of his rulings were no small contribution to the expedition of public business, and the lucidity with which he revealed his exceptional knowledge of parliamentary law was a constant source of pleasure and gratification.

Laying no claim to the gifts of genius, he won a high place in the Nation's councils by that persistency of effort and strength of character which constitute the genius of success. Above all, he was the true American and ideal citizen in his domestic life, and by his devotion to home and family commanded the deep respect of a moral and chivalrous people. As a stream can rise no higher than its source, so a Nation can be no better than its homes. In the family circle are found those spiritual agencies which save society from corrosion and decay. Unless a nation grows morally as well as materially, spiritually as well as intellectually, its future is dark and its days are numbered. For Mr. SHERMAN'S success in life we commended him; for the enviable places that he won among his fellow men we praised him; for the public honors that he earned we admired him; yet in this solemn hour, sanctified by the liberated spirit of the comrade whom we mourn, I would pay tribute to those traits of character which made the loving husband, the devoted father, the faithful friend, the good citizen. These were the titles that he won; they were the flowers of love and duty and friendship that blossomed along his pathway through life. They constitute the fairest garland that can be placed upon his tomb.

Mr. President, our departed friend gave his best to the service of the people. Who can do more? The State of New York has given many of her sons to the service of the Nation, and high upon her roll of fame posterity will inscribe the high character and unblemished record of JAMES SCHOOLCRAFT SHERMAN.

ADDRESS OF THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

The PRESIDENT pro tempore. The Chair now recognizes the Speaker of the House of Representatives.

Speaker CLARK. Mr. President, of all the wise and salutary things done by the fathers of the Republic, one of the wisest and most salutary was dividing Congress into two bodies.

There is a House habit and a Senate habit, differing widely. This difference grows out of the difference in numbers, the difference in average age, and the difference in the length of tenure. Some Representatives never learn the House habit; some Senators never learn the Senate habit; a few observant men learn both habits. That Mr. Vice President SHERMAN learned both habits thoroughly and well is sufficiently attested by the fact that he presided with eminent success over the large and tumultuous assembly of the House of Representatives and over the smaller and more sedate assembly of the Senate.

I hope that it will not be taken as an ungracious word for me to suggest to Senators that JAMES SCHOOLCRAFT SHERMAN was a House product. We trained him: we gave him his promotion; we sent him to the service of the Nation in his capacity of Vice President.

There is no finer school under the sun than the House of Representatives for mental pugilistics. Personally we are courteous to each other, but there is no such thing as House courtesy that influences the course of legislation.

It might be well to state for a moment how reputations are made in the House. They are made in two ways—one by a brilliant oratorical performance and the other by assiduous industry in the committees and on the floor of the House. I used to divide the membership with reference to rising in the House into two classes—the quick climbers and the steady climbers.

A few men make a national reputation in that House by one great oration. I saw Lafe Pence, of Colorado, in the Fifty-third Congress, make a national reputation the second day after he was sworn in, and I saw Charles E. Littlefield, of Maine, make a national reputation by one great oration within about three months of the time when he was sworn in; but these are exceptional cases. As a rule, the men who achieve high position in the House do so by slow and steady climbing. Vice President SHERMAN went up and up in the House gradually until he got into the front rank. One day, in a hot political debate there, I dubbed the small coterie to which he belonged as the "Big Five," a name which stuck.

There is much truth in Longfellow's lines:

The heights by great men reached and kept
Were not attained by sudden flight,
But they while their companions slept
Were toiling upward in the night.

That was the case with Mr. SHERMAN. He presided in the House and also in the Senate with grace, firmness, fairness, unfailing courtesy, rare good sense, and to the entire satisfaction of Representatives and of Senators. Though he was never elected Speaker, he was frequently assigned by three Speakers to preside temporarily over the House proper as well as over the Committee of the Whole.

While not an orator, he was a strong debater and illumined every subject which he discussed; because he never spoke on any subject on which he was not well informed—an example which all public speakers would do excellently well to follow.

A fine stage presence, graceful gestures, most gracious manners, a musical, well-modulated voice of good carrying power,

exquisite taste in the selection and arrangement of words, enabled him to please the House of Representatives, the most critical and at the same time the fairest and justest audience in the wide, wide world. Though he killed the pet bills of many Members, he had not an enemy in the membership of the House. He seemed to have taken for the basis of his action the saying of Thackeray that "the world is like a looking-glass. Smile at it, and it smiles back; scowl at it, and it scowls back; hit at it, and it hits back."

He was a most successful pilot of measures through the House, the chief reason being that he moved on lines of least resistance. Adhering to his opinions with tenacity, fidelity, and courage, he antagonized no one unnecessarily. To use a common and expressive sentence, he took things by the smooth handle, and thereby accomplished much.

Amiability was the chief characteristic of the man, and, after all, Tennyson was right when he said:

Kind hearts are more than coronets,
And simple faith than Norman blood.

Whether in committee or on the floor or in the chair, like charity, as described by St. Paul in his splendid rhapsody in the thirteenth chapter of First Corinthians, he suffered long and was kind; envied not; vaunted not himself; was not puffed up; behaved himself not unseemly; was not easily provoked. In fact, he had himself so well in hand that he could not be baited into an exhibition of bad temper. He gave sharp blows, and received them with perfect equanimity. In victory he was not offensively jubilant; in defeat he was not utterly cast down. He appeared equal to both extremes of fortune, clearly realizing, with his optimistic philosophy, the astounding swiftness with which political situations change in this rapid age.

In the House he was a prime favorite on both sides of the big aisle, which constitutes the line of demarcation in politics, but not in personal friendships or robust Americanism. When he was translated from that energetic and boisterous body to the dignity and quietude of the Vice Presidency his fellow members, while sincerely rejoicing at his promotion, just as sincerely regretted his departure from their midst.

The House most heartily joins the Senate and the President of the United States in doing honor to this typical American. His fitting epitaph would be:

Mens aequa in ardals.

ADDRESS OF THE PRESIDENT OF THE UNITED STATES.

The PRESIDENT pro tempore. As a fitting close to these ceremonies, the Chair now recognizes the President of the United States.

President TAFT. Mr. President, after the eloquent tributes that have been paid to the memory of the late Vice President SHERMAN by his associates, who knew him well, it is not for me to add anything new to that which has been said, and well said.

Mr. SHERMAN was a man with whom no one could come in contact without feeling better for the meeting and with a more kindly disposition toward his fellow men and the world at large.

Life, on the whole, is made up of a series of what appear to many to be insignificant incidents, and there are those who in their own thoughts, in their own affairs, and in what they regard as the large issues of society recognize no necessity for attention to the daily encounters and the hourly exchanges of thought and of treatment between individuals. To them life is apparently a series of grand stage plays, which are to mark the character of the players permanently, and that which intervenes between these plays is of no importance. This view is accentuated as men grow in self-absorption and lose the sense of proportion with respect to their own importance—a weakness to which most men in greater or less degree are prone. A character that is the antithesis of such tendencies makes for himself a place among all with whom he has personal association that is durable and fragrant. This was one of the lovable and most marked traits of Mr. SHERMAN. Everyone, high or low, intimate or distant, who met him, felt the influence of his good will, of his earnest desire to accord to each one the courtesy and recognition of his right as a member of society to which he was entitled. Any painful feeling that he had to cause by what duty required him to say was as painful to him as it was to the person to whom he felt called upon in this way to speak.

He never exaggerated his own importance. He deprecated the personal equation. He was always for helping a cause or some other person, and he had truly that charity and love of his fellow men which, as the poem has it, is really the love of God, and made the name of Abou Ben Adhem lead all the rest.

Educated at one of those truly American small colleges, with high patriotic ideals, derived from the history of the struggle for liberty regulated by law as embodied in our Constitution, Mr. SHERMAN came to manhood to the study and successful practice of law, but in a few years drifted, as so many country lawyers do, into politics. He loved politics; he correctly thought that he could be engaged in nothing more useful to his country, and he became a partisan on principle. As might be expected from one of his generous self-deprecatory attitude of mind, he minimized the personal and exalted his party cause. He came to believe thoroughly and, in my judgment, rightly that the only possible means of securing effective, permanent, and just popular government, truly representative of the people, is through parties, and therefore he was willing to give up much of his personal judgment to reconcile the views of himself and his associates upon a few great principles.

His personal popularity carried him into the mayoralty of the city of his birth, in which he lived his life long. Then he came to Congress, and for 20 years he was a Member, and a prominent member of the Republican Party, in the great popular House of Representatives. There he exhibited great ability as a debater and legislator, which his fellows fully recognized. But in contemporary history Mr. SHERMAN suffers in comparison with others less deserving, because the work that he wrought, the influence that he exerted, the progress and reforms that he helped to bring about, were not recorded in the headlines of newspapers, or, indeed, in the news columns or editorials, for he was content to work quietly to achieve an object, and made no conditions that should attach his name to the success of the work in hand.

He was an influential and leading Member of that body during the controversies that took place over the question whether the House of Representatives should be permitted to do business or should be at the mercy of the minority, and he stood with one of the great Speakers of that body for progress, and it was achieved.

He was at the head of the Indian Committee in the House, and no problems in our Government are more difficult than those within the jurisdiction of that committee. They involve the proper, businesslike consideration and disposition of questions of the management of trust property into which the discretion of the particular official having control can be very little restricted by law. Conditions in and near the Indian country are such that neighboring public opinion can not be trusted to do justice to the Indians or to carry out the charitable purposes of the Government. The situation is prolific of schemes to defraud the wards of the Nation.

No one will know, except those most intimate with the course of legislation and with the details of appropriation bills, the work JAMES S. SHERMAN and a few of his associates did in the elimination of fraud and the maintenance of the honor of the Nation in preserving to the Indians what was theirs. And thus we may say truly that the great work that the man whose early death we deplore did for his fellow men was done as an adviser, as a quiet but active worker in the shadow of some more conspicuous person, all arising from the disinterested patriotism, the high-minded party spirit, and the inherent modesty of the man.

I need not recite to those who had so much better opportunity than I to observe it and feel it the clear and rapid thought and the equally clear and rapid expression of decision which in the administration of the parliamentary law that Mr. SHERMAN displayed frequently as the presiding officer of the House of Representatives and continuously during his term as Vice President as President of the Senate. He was a model presiding officer. Preserving his temper under all conditions, and some of them most difficult, he ruled with firmness and with a courtesy that disarmed the sometime heat of those whose views he was overruling.

And now there is but one more word to speak, and that one utters in the tenderest tone and makes most brief. What might be expected from a man of his heart and his constant appreciation of the feelings of others, from one of nature's gentlemen, his domestic life, his love of wife and children and fellow townsmen, made a circle so sweet, a home so bright, a neighborhood so full of love for him that even in the few hours that we were permitted to spend in the city where he lived and died the overwhelming evidences of affection for him were most impressive on every hand; and his great qualities were revealed in a most remarkable tribute which his memory called out from his beloved pastor, the president of Hamilton College.

We have celebrated the memorial of a modest American, a distinguished patriot, an able statesman, a noble man!

RECESS.

Mr. ROOT. I now move that, after the guests of the Senate shall have retired, the Senate, as a further mark of respect to the memory of the late Vice President, stand in recess until 12 o'clock noon, on Monday, the 17th of February.

The PRESIDENT pro tempore. Before submitting the motion, the Chair will give opportunity, as indicated by the Senator from New York, for the guests of the Senate to retire. The Sergeant at Arms will announce the order in which they will retire, so that they may do so without confusion.

The President of the United States and the members of his Cabinet, the ambassadors and ministers plenipotentiary to the United States, the Chief Justice and Associate Justices of the Supreme Court of the United States, the Speaker and Members of the House of Representatives, and the other guests of the Senate thereupon retired from the Chamber.

The PRESIDENT pro tempore. The Senator from New York [Mr. ROOT] moves that, as a further mark of respect, the Senate now stand in recess until 12 o'clock on Monday.

The motion was unanimously agreed to; and (at 2 o'clock and 30 minutes p. m., Saturday, February 15) the Senate took a recess until Monday, February 17, 1913, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

SATURDAY, *February 15, 1913.*

The House met at 11.30 a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in heaven, we thank Thee that our Republic is not ungrateful, but holds in sacred memory the men who laid her foundations deep and strong and wide. The brave men who have fought her battles, the statesmen who have breathed their spirits into her sacred institutions and kept them inviolate, as evinced by the special order of the day in memory of a noble son, who proved himself worthy of the confidence reposed in him by his fellow countrymen. May his life be an incentive to faithful service and nobility of soul to those who survive him.

Be Thou solace to those who knew and loved him, and let the everlasting arms be about the bereaved wife and children, that they may look forward with confidence to the unchanging love of a heavenly Father who doeth all things well. Amen.

The Journal of the proceedings of yesterday was read and approved.

PENSIONS OF SOLDIERS OF INDIAN WARS.

Mr. RICHARDSON. Mr. Speaker, I call up the conference report on the bill (H. R. 14053) to increase the pensions of surviving soldiers of Indian wars in certain cases.

The SPEAKER. The gentleman from Alabama calls up the conference report on the bill H. R. 14053, which the Clerk will read.

The Clerk read as follows:

CONFERENCE REPORT (NO. 1519).

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 14053) to increase the pensions of surviving soldiers of Indian wars in certain cases, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter stricken out and inserted by the Senate, insert "twenty"; and the Senate agree to the same.

WILLIAM RICHARDSON,
IRA W. WOOD,
W. A. DICKSON,
Managers on the part of the House.

P. J. MCCUMBER,
MILES POINDEXTER,
Managers on the part of the Senate.

STATEMENT.

This bill as it passed the House proposed to increase the pensions of soldiers of the Indian wars to $30 per month. The Senate reduced the amount to $12 per month. The conferees recommend that the amount be $20 per month.

WILLIAM RICHARDSON,
IRA W. WOOD,
W. A. DICKSON,
Managers on the part of the House.

The conference report was agreed to.

SPEAKER PRO TEMPORE FOR TO-MORROW.

The SPEAKER. The Chair announces the designation of the gentleman from Michigan [Mr. DOREMUS] to preside as Speaker pro tempore at the eulogies to-morrow.

CONTESTED-ELECTION CASE—HAWKINS AGAINST M'CREARY.

Mr. GOLDFOGLE. Mr. Speaker, by direction of the Committee on Elections No. 3, I present a privileged report in the contested-election case of Frank H. Hawkins against George D. McCreary, from the sixth district of Pennsylvania.

The SPEAKER. Is it a unanimous report?

Mr. GOLDFOGLE. It is a unanimous report.

The Clerk read as follows:

REPORT.

This contest comes from the sixth congressional district of Pennsylvania, and was brought by Frank H. Hawkins against the Hon. George D. McCreary, the sitting Member.

The contestant delayed the filing of the testimony in the case until some time during the second session of the Sixty-second Congress. The contestant's brief was not filed or submitted until after the third session began. Acceding to the request of the counsel for the contestant, a hearing of the case was not held until the third session. In view of the serious charges of fraud and corruption and of illegal registration and illegal voting at the congressional election in said congressional district in 1910, your committee, notwithstanding the delay referred to, concluded to hear the case.

The testimony of numerous witnesses was carefully considered, and counsel for both sides fully heard.

Allowing the contestant the votes which he claims should have been counted for him and deducting them from the number credited on the returns to the contestee, and entirely eliminating from the returns the votes in the districts wherein it was shown irregularities either in registration or voting occurred, it would still appear that the contestee, Mr. McCreary, had a majority of the remaining votes.

While it was charged and from the evidence it appeared that at the time of the election in 1910 and for years prior to that time gross evasion of the law, illegal registration, fraudulent voting, and corrupt conduct had occurred in Philadelphia, yet legal proof was lacking to establish the fact that the fraud and corruption and illegal methods complained of entered into the election in the congressional district under consideration such as would justify a finding that the election of the Member from the sixth congressional district of Pennsylvania was vitiated, and that in consequence his seat in this House ought to be declared vacant. Upon the hearing before this committee the contestant declared that if the committee could not find in his favor, so that the seat could be awarded to him, he did not desire to have the seat held by Mr. McCreary declared vacant.

It was conceded by the parties to this contest that in the city of Philadelphia a committee of seventy, composed of highly prominent, influential, and distinguished citizens, was formed for the purpose of taking steps to purify the elections in that city. That committee had charged itself with the duty of discovering and exposing fraud and corruption at elections, improper and illegal conduct of election officials, and prosecuting and bringing to justice violators of the election laws.

It was testified on the hearing that however assiduous that committee of seventy might have been in their efforts to purify the elections in Philadelphia and to remedy the evils that sprang out of the vicious and criminal practices that obtained for many years in that city, yet such committee would not, though it might have it in their power, lend their aid toward developing or securing testimony of such illegal, fraudulent, or criminal acts if it tended to aid a contestant seeking a seat in the House of Representatives who might, were he seated, vote for a revision of the tariff.

That any committee composed of men of the high standing and character which the committee of seventy possessed should fail to extend its aid or lend such support as may have been within its power to render to any man who had been the victim of improper practices at elections, or fraudulent or corrupt conduct at the polls, or of violations of election laws because of such assistance they might aid one who was at variance with them in their opinion on the tariff is something which, to say the very least, is highly regrettable.

The evidence in this case falls short of showing that Frank H. Hawkins received a majority of the lawful votes cast at the election. The evidence adduced does not establish the existence of such a state of affairs as would justify the House in declaring the seat of Mr. McCreary, who for years has borne an honorable record in this body, vacant.

Your committee unanimously recommend for adoption the following resolutions:

House resolution 839 (H. Rept. 1525).

Resolved, That Frank H. Hawkins, the contestant, was not elected a Member of the House of Representatives in the Sixty-second Congress, and is not entitled to a seat therein.

Resolved, That the Hon. George D. McCreary was duly elected a Member of the House of Representatives in the Sixty-second Congress, and is entitled to a seat therein.

The resolutions were agreed to.

ADDITIONAL HELP IN ENROLLING ROOM.

Mr. LLOYD. Mr. Speaker, I present from the Committee on Accounts a privileged resolution.

The Clerk read as follows:

House resolution 812 (H. Rept. 1524).

Resolved, That the Clerk of the House be, and he is hereby, authorized, during the remainder of the present session, to employ such additional clerical help as may be needed in the enrolling room, to be paid out of the contingent fund: *Provided*, That not more than $150 shall be so expended, and no person shall be employed at a rate exceeding $6 per day.

The resolution was agreed to.

ORDER OF PROCEDURE.

The SPEAKER. Under the special order adopted a few days ago, at 10 minutes of 12 to-day the House, without adjournment and without taking a recess, will proceed to the Senate Chamber, and, after the ceremonies are concluded, will return to this Chamber and will immediately resume the session where we left off. The Chair makes that announcement in order that Members may know that the session is to be resumed.

CONTESTED-ELECTION CASE OF EUGENE C. BONNIWELL AGAINST THOMAS S. BUTLER.

Mr. COVINGTON. Mr. Speaker, by direction of the Committee on Elections No. 1, I submit the following privileged report in the contested-election case of Eugene C. Bonniwell against Thomas S. Butler in the seventh congressional district of Pennsylvania.

The SPEAKER. The report will be printed, under the rule, and referred to the House Calendar.

Mr. OLMSTED. Mr. Speaker, I ask unanimous consent that the report may be printed in the RECORD also.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that the report be printed in the RECORD. Is there objection?

There was no objection.

The report (H. Rept. 1523) is as follows:

EUGENE C. BONNIWELL AGAINST THOMAS S. BUTLER.

Mr. COVINGTON, from the Committee on Elections No. 1, submitted the following report (to accompany memorial of Eugene C. Bonniwell to Speaker and House of Representatives, December 14, 1912):

On the 14th day of December, 1912, Mr. Eugene C. Bonniwell, who, at the election of 1912, was the Democratic candidate for the House of Representatives in the seventh congressional district of Pennsylvania, transmitted to the Speaker of this House a paper, as follows:

PAPER OF MR. BONNIWELL.

WAYNE, PA., *December 14, 1912.*

Hon. Champ Clark, Speaker of the House of Representatives, and Members of the House of Representatives, Washington, D. C.

GENTLEMEN: I hereby file notice of objection to the right of Thomas S. Butler to represent the seventh congressional district of Pennsylvania in the Sixty-third Congress and assign the following reasons:

First. The seventh congressional district of Pennsylvania is composed of Chester and Delaware Counties. To procure a majority upon the face of the election returns at the election held November 5, 1912, certain agents of the Republican organization of this district, in the service of and on behalf of Thomas S. Butler, the nominee herein, and certain other nominees did, by fraud and perjury, falsely preempt upon the official ballot of the State of Pennsylvania two titles, one being "Bull Moose" and the other "Roosevelt Progressive." Each title was intended and designed to deceive and mislead the voter whose intention was to vote the ticket upon which Theodore Roosevelt was a candidate, to wit, the Washington Party of Pennsylvania. To accomplish these ends these men forged alleged preemptors' names to the certificates of preemption. They forged hundreds of names in order to place the names of Thomas S. Butler for Congress and William C. Sproul for State senator and the Republican candidates for the State legislature upon these two false and pretended Progressive tickets. They forged these names alphabetically, without even the feeble pretense of disguising the handwriting. They forged signers to the affidavits required at the ends of these nomination papers. They impersonated the affiants before the justice of the peace. These facts were known to Thomas S. Butler. Objections, under the ballot laws, were filed to the right of these fraudulent pretenders to masquerade as supporters of Roosevelt by the real Washington Party nominees. Copies of the objections were served upon Thomas S. Butler and the other candidates. Thomas S. Butler and the other candidates appeared in the Dauphin County court answering such summons and maintained their right to remain upon the perjured and forged tickets. The objections were dismissed upon a technicality, and Mr. Butler continued thereon in the face of the glaring frauds. Thereafter and prior to the election, seven men, active in the councils of the organization supporting Thomas S. Butler, were arrested upon the charges of forgery and perjury and held in bail for court. Despite the convincing evidence, Thomas S. Butler willingly shut his eyes to the nauseous scandal. Funds were supplied by the men interested to the fraudulent committees masquerading as Progressives. The seventh congressional district was circularized by letter falsely asserting that the Bull Moose ticket was the only genuine Roosevelt ticket in the seventh district, and thereby upward of 4,332 voters were deceived and misled into voting for Thomas S. Butler for Congress.

It is submitted that the perjury and corruption herein averred was the result of a deliberate conspiracy on behalf of the organization leaders whose candidate Thomas S. Butler was. He was cognizant of its details long before election. He approved of the forgery and perjury by remaining a candidate upon the said tickets after public notice. That these acts of themselves disqualify him from membership in the House of Representatives of the United States.

If further reason be deemed essential that this conspiracy went to the vitals of this election, let the pollution of the grand jury of Delaware County at this December session of court speak for itself. The bills of indictment charging the seven men with perjury and forgery were to be submitted to this December grand jury. The sheriff of Delaware County is S. Everett Sproul, brother of State Senator William C. Sproul, the Republican leader of Delaware County, and, with Thomas S. Butler, most concerned in these nominations. The grand jury, always the bulwark of the people's liberties, was prostituted by politicians to save their tools from conviction. Twelve false jurors, not drawn or entitled to serve, 6 of them members of the Republican county committee, 2 more relatives of Republican officials, were secretly added to the 11 bona fide jurors, and this corrupted jury sought to destroy justice in its very temple by ignoring the indictments against the forgers and perjurers, and so make a mockery of the law. This treacherous body, not content with dismissing every indictment laid against the corruptionists, to terrorize future men temerarious enough to assail their vicious acts, imposed over $700 in costs upon J. Watts Mercur, the fearless citizen who brought these prosecutions, Washington Party nominee for State senator, against William C. Sproul. That 12 jurors were illegal Mr. Mercur discovered. Upon the fact being presented to the court of common pleas of Delaware County the dishonest grand jury was summarily dismissed, all indictments recalled, and a sweeping investigation set upon foot. It was public knowledge that this contest was to be instituted, based upon these frauds. It can not be doubted that one of the chief aims of the men most concerned was to destroy this ground for contest. This pollution of justice merits the expulsion of this Representative from the Halls of Congress.

Second. That the expense accounts filed in this district are false and fraudulent; that money, thousands of dollars unaccounted for by any candidate or committee, were expended in the seventh district on behalf of the Republican candidates, Butler and Sproul in particular, as will be shown upon the hearing of this contest.

Third. That a committee especially organized by personal friends of Thomas S. Butler, styled the Butler League, composed and caused to be published false and libelous articles concerning the contestant.

Fourth. The West Chester Village Record is a local newspaper largely owned and controlled by T. L. Eyre, Republican boss of Chester County, and personal representative of Thomas S. Butler.

The Chester Republican is a local paper largely owned and controlled by Senator William C. Sproul, a Republican boss, and personal representative of Thomas S. Butler in Delaware County. On August 15, 1912, the West Chester Village Record published the following editorial:

The Hon. Thomas S. Butler, the Republican nominee for Congress, was born and reared in the Society of Friends, and is proud of his Quaker ancestry. His opponent, Eugene C. Bonniwell, is a Roman Catholic.

On August 28, 1912, the Chester Republican reprinted this editorial. Coincident with the two said editorials messengers in the employ of supporters of Thomas S. Butler traversed the district, having in their possession and circulating a blasphemous and infamous libel, a copy of which is hereto attached, pretended to be an oath of the Knights of Columbus, of which body the contestant is a member. So revolting are the terms of this document and so nauseating its pledges that the injury it did not merely to the contestant but also to the Knights of Columbus and to Catholics in general can hardly be measured in terms.

I charge that the circulation of this oath and the publication of the two editorials herein referred to were part of a conspiracy, precisely as was the forgery and perjury referred to in paragraph 1—a conspiracy by the same people for the purpose of arousing religious rancor and of defeating the Democratic nominee. The Constitution of the United States prohibits any religious test for office. The organization supporting Thomas S. Butler created such a test, blazed bigotry in the hearts and minds of the ignorant, and slandered and vilified a great body of honorable men.

I file no complaint because of adverse election returns. The Democracy of Pennsylvania is inured to adversity. Nor is this complaint registered because of defeat resultant upon faith or race. In these things I own a just pride and do not protest if, because of either, political honors are to be denied me. But when a calumnious, viperish attack upon either faith or race is launched, injecting religious bigotry into the political affairs of this Nation, then this protest is made in the certain confidence that all patriotic men, mindful of the religious as well as the political liberty that the forefathers designed should be our heritage, will rise and strike down the beneficiary of such a treacherous and dastardly movement.

For myself I make no appeal to your honorable body that I may be seated. That a plurality of the legal votes cast in that district were cast for me no one pretends to deny, but representations is the least of my concerns. This I do maintain, that this man, receiving his election under these circumstances, adding the felonies of forged papers, perjured acknowledgments, and violated grand jury to the more wicked crime of religious slander, ought not to be tolerated in the House of Representatives.

Respectfully submitted.

EUGENE C. BONNIWELL.

KNIGHTS OF COLUMBUS OATH.

I, ——— ———, now in the presence of Almighty God, the blessed Virgin Mary, the blessed St. John the Baptist, the Holy Apostles, St. Peter and St. Paul, and all the saints, sacred host of Heaven, and to you, my Ghostly Father, the superior general of the Society of Jesus, founded by St. Ignatius Loyola, in the pontification of Paul the III, and continued to the present, do by the womb of the Virgin, the matrix of God, and the rod of Jesus Christ, declare and swear that His Holiness, the Pope, is Christ's vice regent and is the true and only head of the Catholic or Universal Church throughout the earth; and that by virtue of the keys of binding and loosing given His Holiness by my Savior, Jesus Christ, he hath power to depose heretical kings, princes, States, Commonwealths, and Governments and they may be safely destroyed. Therefore to the utmost of my power I will defend this doctrine and His Holiness's right and custom against all usurpers of the heretical or Protestant authority whatever, especially the Lutheran Church of Germany, Holland, Denmark, Sweden, and Norway and the now pretended authority and Churches of England and Scotland, and the branches of same now established in Ireland and on the Continent of America and elsewhere, and all adherents in regard that they may be usurped and heretical, opposing the sacred Mother Church of Rome.

I do now denounce and disown any allegiance as due to any heretical king, prince, or State, named Protestant or Liberals, or obedience to any of their laws, magistrates, or officers.

I do further declare that the doctrine of the Churches of England and Scotland, of the Calvinists, Huguenots, and others of the name of Protestants or Masons to be damnable, and they themselves to be damned who will not forsake the same.

I do further declare that I will help, assist, and advise all or any of His Holiness's agents, in any place where I should be, in Switzerland, Germany, Holland, Ireland, or America, or in any other kingdom or territory I shall come to, and do my utmost to extirpate the heretical Protestant or Masonic doctrines and to destroy all their pretended powers, legal or otherwise.

I do further promise and declare that, notwithstanding I am dispensed with to assume any religion heretical for the propagation of the Mother Church's interest, to keep secret and private all her agents' counsels from time to time, as they intrust me, and not divulge, directly or indirectly, by word, writing, or circumstances whatever, but to execute all that should be proposed, given in charge, or discovered unto me by you, my Ghostly Father, or any of this sacred order.

I do further promise and declare that I will have no opinion or will of my own or any mental reservation whatsoever, even as a corpse or cadaver (perinde ac cadaver), but will unhesitatingly obey each and every command that I may receive from my superiors in the militia of the Pope and of Jesus Christ.

That I will go to any part of the world whithersoever I may be sent, to the frozen regions north, jungles of India, to the centers of civilization of Europe, or to the wild haunts of the barbarous savages of America without murmuring or repining, and will be submissive in all things whatsoever is communicated to me.

I do further promise and declare that I will, when opportunity presents, make and wage relentless war, secretly and openly, against all heretics, Protestants and Masons, as I am directed to do, to extirpate them from the face of the whole earth; and that I will spare neither age, sex, or condition, and that will hang, burn, waste, boil, flay, strangle, and bury alive these infamous heretics; rip up the stomachs and wombs of their women, and crush their infants' heads against the walls in order to annihilate their execrable race. That when the same can not be done openly, I will secretly use the poisonous cup, the strangulation cord, the steel of the poniard, or the leaden bullet, regardless of the honor, rank, dignity, or authority of the persons, whatever may be their condition in life, either public or private, as I at any time may be directed so to do by any agents of the Pope or superior of the Brotherhood of the Holy Father of the Society of Jesus.

In confirmation of which I hereby dedicate my life, soul, and all corporal powers, and with the dagger which I now receive I will subscribe my name written in my blood in testimony thereof; and should I prove false or weaken in my determination, may my brethren and fellow soldiers of the militia of the Pope cut off my hands and feet and my throat from ear to ear, my belly opened and sulphur burned therein with all the punishment that can be inflicted upon me on earth and my soul shall be tortured by demons in eternal hell forever.

That I will in voting always vote for a K. of C. in preference to a Protestant, especially a Mason, and that I will leave my party so to do; that if two Catholics are on the ticket I will satisfy myself which is the better supporter of Mother Church and vote accordingly.

That I will not deal with or employ a Protestant if in my power to deal with or employ a Catholic. That I will place Catholic girls in Protestant families that a weekly report may be made of the inner movements of the heretics.

That I will provide myself with arms and ammunition that I may be in readiness when the word is passed, or I am commanded to defend the church either as an individual or with the militia of the Pope.

All of which I, ——— ———, do swear by the blessed Trinity and blessed sacrament which I am now to receive to perform and on part to keep this, my oath.

In testimony hereof, I take this most holy and blessed Sacrament of the Eucharist and witness the same further with my name written with the point of this dagger dipped in my own blood and seal in the face of this holy sacrament.

The Hon. Thomas S. Butler, the Representative in this House from the seventh congressional district of Pennsylvania, and who was a candidate for election to the Sixty-third Congress from said district at the election of 1912, has filed a paper in the nature of an exception and answer to the paper of the said Eugene C. Bonniwell, as follows:

EXCEPTION AND ANSWER OF REPRESENTATIVE BUTLER.

To EUGENE C. BONNIWELL:

You will please take notice that I hereby except to your notice "of objection to my right to represent the seventh congressional district of Pennsylvania in the Sixty-third Congress," having been elected thereto at an election held on the 5th day of November, 1912, a copy of which notice was delivered at my residence in the borough of West Chester on the 16th day of December, 1912. I except to your notice of objection for the reason that said notice is so vague, indefinite, and general in its terms and allegations that I can not tell what I am called upon to answer, and for the further reason that the said notice does not meet the requirements of the statutes and laws of the United States relating to objections to qualifications for the office of Representative in Congress. At the proper time I shall urge a committee of the House of Representatives, or the House of Representatives itself, to dismiss your notice for the reason stated above. I shall particularly insist before said committee or the House of Representatives itself that your notice on its face admits that I was regularly elected a Member of Congress to represent the seventh congressional district of Pennsylvania in the Sixty-third Congress, and that the result of said election would not be changed if all you allege in your notice were true.

Not waiving my right to except to your objection because of its informality and because of its time of service, as well as its manner of service, nor for the reasons stated above, nor for any other legal reason or reasons, I hereby make such answer as the general vague allegations of your notice of objection enable me to make.

You concede my election and you do not contest my right to a seat in the Sixty-third Congress on the ground that I was not legally elected thereto, but you object to my membership in such Congress because of disqualifications alleged by you. I quote from your notice of objection addressed to the Speaker and Members of the House of Representatives:

GENTLEMEN: I herewith file notice of objection to the right of Thomas S. Butler to represent the seventh congressional district of Pennsylvania in the Sixty-third Congress. (Objection, p. 1.)

That these acts of themselves disqualify him from membership in the House of Representatives of the United States. (Objection, p. 2.) This pollution of justice merits the expulsion of this Representative from the halls of Congress. (Objection, p. 5.) I file no complaint because of adverse election returns. (Objection, p. 5.) For myself I make no appeal to your honorable body that I may be seated. * * * This I do maintain: That this man receiving his election under these circumstances, adding the felonies of forged papers, perjured acknowledgments, and violated grand jury, to the more wicked crime of religious slander, ought not to be tolerated in the House of Representatives. (Objection, p. 5.)

First. It is true, as alleged in your notice, that the seventh congressional district of Pennsylvania is composed of Chester and Delaware Counties. I live at West Chester, in Chester County. I deny that "to procure a majority upon the face of

the election returns at the election held November 5, 1912, certain agents of the Republican organization of the seventh congressional district, in my service and on my behalf, did by fraud and perjury, falsely preempt upon the official ballot of the State of Pennsylvania, two titles, one being 'Bull Moose' and the other 'Roosevelt Progressive.'" I had nothing whatever to do with the preemption of these titles on the official ballot of Pennsylvania. I was not consulted by the preemptors and did not know at the time the names of the preemptors residing in Delaware County. I did not know at the time the nomination papers were circulated for signatures who circulated them, who signed them, or who procured others to sign them. I had nothing whatever to do with procuring signatures to these nomination papers. I asked no one to sign them. I was told by some of the advocates of the election of Theodore Roosevelt, residing in Chester County, that they were in favor of the local tickets named in this congressional district and that they proposed to preempt the title of "Bull Moose" and form a ticket, with the names of Roosevelt electors and the candidates for State offices named at the Republican State convention at the head, to be followed with the names of all the local candidates selected by the Republican voters at the uniform primaries held April 13, 1912. I was asked whether or not I would permit my name to remain on such ticket; I answered that I would, provided all of the Republicans named in our congressional district at the same primaries were given a similar privilege. I have no knowledge of either the preemption or formation of the "Bull Moose" ticket in the seventh congressional district beyond that stated herein. There was no "Roosevelt Progressive" ticket in Chester County. I know nothing whatever of the preemption of the title "Roosevelt Progressive" in Delaware County and of the formation of its ticket there beyond that stated in this answer. I aver that certain of the Roosevelt leaders in the State of Pennsylvania were in sympathy with the State and local nominations of the Republican Party, where such nominations were effected without any suspicion or taint of fraud, as was the case in the seventh congressional district; that in pursuance of authority conferred by the statutes of the State of Pennsylvania, these Roosevelt leaders preempted these two titles, "Bull Moose" and "Roosevelt Progressive," for Roosevelt presidential electors and the Republican State ticket. They afterwards obtained signatures at large throughout the State of Pennsylvania to nomination papers for Roosevelt electors and the candidates named at the Republican State convention. Their purpose was to enable the voter to cast a ballot with a single mark for the Roosevelt electors, the Republican State candidates for Congressman at large, for auditor general, and for State treasurer, and for the local Republican candidates selected at the aforesaid uniform primaries.

I deny that the titles "Bull Moose" and "Roosevelt Progressive" were intended and designed to deceive and mislead the voter whose intention was to vote the ticket upon which Theodore Roosevelt was a candidate, to wit, the Washington Party of Pennsylvania. I aver that the use of these titles did not in fact deceive and mislead any voters. This allegation of intent and design to deceive and mislead the voter was raised on objections filed against the "Bull Moose" and "Roosevelt Progressive" tickets by Frederick A. Howard, the Washington Party candidate for Congress in the seventh congressional district, in the court of common pleas of Dauphin County, Pa., and dismissed, after full hearing thereon, in the following decree:

> And now, October 9, 1912, after hearing, the within objections are overruled and dismissed and the prothonotary is directed to certify this action to the secretary of the Commonwealth. An exception to this order is sealed for the objector.
>
> By the court:
>
> SAM'L J. M. MCCARRELL, J.

It was not alleged in the objections filed in Dauphin County that I acted with the preemptors of the Bull Moose and Roosevelt Progressive Parties for any fraudulent or improper purpose. Copies of these objections are attached to this answer, marked "Exhibit A."

It was at this hearing in Dauphin County, on October 9, 1912, that I first learned that the genuineness of some of the names of the signers (living in Delaware County) to the nomination papers of the Bull Moose and Roosevelt Progressive Parties was challenged. I did not have the opportunity to examine these nomination papers exhibited in said court. I deny that I had any knowledge prior to this hearing in the Dauphin County court "that hundreds of names were forged in order to place my name for Congress and William C. Sproul for State senator and the Republican candidates for the State legislature upon these tickets." I further deny that I had any knowledge prior to the hearing aforesaid "that names were forged alphabetically without even the feeble pretense of disguising the handwriting," and that they "forged siguers to the affidavits required at the ends of these nomination papers, and that they impersonated the affiants before the justice of the peace," nor have I any such knowledge now further than that obtained by common report. I do know that the statute of Pennsylvania requires objections to nomination papers to be filed in the Dauphin County court, sitting at Harrisburg. I believe that J. Watts Mercur, the candidate for State senator on the Washington Party ticket, prepared the objections to said nomination papers, and the single ground of objection alleged was the intent and design to mislead and deceive, and that no forgeries of signatures were alleged. The alleged forgeries, if any were committed, must have been known to the said J. Watts Mercur, because he had in attendance at said hearing four or five of the alleged signers from Delaware County as witnesses to prove that they had not signed their names to the nomination papers, and counsel for objector insisted that they should be heard. Counsel for the nominees objected upon the ground that the notice served exhibited no notice of such ground of contest. The court sustained the objection; counsel for objecter then requested the court to permit objections to be filed nunc pro tunc; the court doubted its authority to extend the time limited by the act of assembly, and counsel for objector, Mr. Robinson, concurred with that view of the court. I deny that the one objection filed was dismissed upon a technicality and aver that it was dismissed after a hearing in which it was fully considered. During the hearing in court Mr. Gilbert, of counsel for the nominee, stated that I was ready and wished to state under oath my knowledge concerning the preparation of these nomination papers. The court stated that it could not hear testimony that did not relate to any objection presented to it, and permission to testify was not given me. Immediately upon the disposition of the question raised and considered by the court, I made inquiry of several citizens of Delaware County about the charges made that some of the signatures attached to the nomination papers prepared in Delaware County were not genuine. I was assured by them that they believed that all the persons whose names were attached to these nomination papers had either signed them or had authorized them to be signed. During the hearing in Dauphin County one of the sitting judges asked of counsel, in my presence, whether a sufficient number of unchallenged and unimpeachable names appeared upon these petitions to satisfy the requirements of the statute and to which no exception could be taken. The answer of counsel was that it required under the statute but 327 names to make the nomination for Congress and that there were 30 more than that number of unquestioned signatures. Immediately following this disposition of the objections by the Dauphin County court photographs were made of these alleged forgeries and exhibited at public meetings held in this congressional district prior to the election, and the questions of dishonesty practiced in procuring some of these signatures to these nomination papers became one of the issues of the campaign.

I admit that a few days prior to the election I learned through the public press and from the comments thereon that certain men in Delaware County had been arrested, charged with having forged some signatures of Delaware County residents to certain nomination papers. I knew personally but two of these men charged with these offenses. I do not know to what organization you refer when you state that these men were "active in the councils of the organization supporting Thomas S. Butler." I deny that I willingly shut my eyes to the "nauseous scandal." I immediately inquired of those I thought well informed, and learned that the men who were charged with these crimes dehied their guilt and insisted that they would be able to prove their innocence in courts of justice. In one prosecution the preliminary hearing was waived; in three other prosecutions evidence was taken before the committing magistrate; two of the men charged were discharged and the third was held for court. I was credibly informed that all the accused men insisted upon their innocence and declared their ability to establish it when the chance should be given them in court. I did not believe them guilty, and they have not at the time of the filing of this answer been pronounced guilty by a court of justice. With more than enough unchallenged names on the petitions, with the knowledge that many more signatures could have been had for the mere asking, it seemed to me unbelievable that the fraud alleged could have been practiced. It was said by those accused and by others that these prosecutions were brought by the political enemies of the accused for political effect upon the campaign in the hope that the voters of the district might thereby be induced to cast their votes against Republican candidates whose names were found upon the Bull Moose and Roosevelt Progressive tickets and in favor of the Washington ticket, upon which J. Watts Mercur, the prosecutor, was a candidate for the State senate in Delaware County.

I have no knowledge of funds supplied to any persons or committees except as hereinafter fully set out in answer to the second paragraph of your objection.

I have no knowledge that the seventh congressional district was circularized by letter falsely asserting that the Bull Moose ticket was the only genuine Roosevelt ticket in the district. I never saw or heard of such a circular. I deny that 4,332 voters were deceived and misled into voting for me for Congress. I aver that had all these 4,332 votes—cast for me on the "Bull Moose" and "Roosevelt Progressive" tickets—been cast for the Washington Party ticket, which you allege in your objection was the real intention of the voters, such a vote would not have elected the Washington Party candidate, and would not have increased or affected your vote and would not have prevented my election. There were at least 30 Republican meetings held in this congressional district. There were many held by the Washington Party and there were many held by the Democratic Party. At these meetings issues were discussed, all the tickets in the field were talked about. The formation of the Bull Moose ticket and the Roosevelt Progressive ticket was condemned by speakers at public meetings held by the Washington Party and discussed in the public press by the members of the same party. The attention of the voters was called to the appearance of these tickets and advertisements were inserted in the newspapers by the Washington Party managers, warning the people against voting the Bull Moose or the Roosevelt Progressive tickets, upon the ground that they were not real Roosevelt tickets; which ticket was the genuine Roosevelt ticket was disputed among the Roosevelt people in this district. I attach copies of their advertisements appearing daily during the campaign in the Daily Local News, of West Chester, showing the contentions on this account which existed during the campaign, marked "Exhibit B."

While I had nothing to do with the origin or formation of the Bull Moose and Roosevelt Progressive tickets, I aver that, so far as I have any knowledge, they were made for the legitimate object of permitting Republicans who desired to vote for Theodore Roosevelt and the Republican State and local tickets an opportunity to do so by making one mark.

I deny that "the perjury and corruption averred on your objection were the result of a deliberate conspiracy on behalf of the organization leaders, whose candidate I was." I knew nothing of any such conspiracy. I deny "that I had any knowledge of its details long before election." I deny that "by remaining a candidate upon these tickets I thereby approved of the forgery and perjury," if any there were.

I have learned through the public press that there was a crime committed in Delaware County by some person or persons in the corruption of its jury lists. For the commission of this crime I am in no way responsible and in it I am no way involved. Who committed this crime courts and investigators have failed as yet to expose. I have no knowledge of either the offense or the offenders except that which has been published in the public press. This crime affected in no way the free will of the people expressed at the polls. It was committed subsequently to the election and in no way affects its legality. While I hereby denounce the perpetration of this offense, and its perpetrators as well, I care not to which party they belong or with whom they may have been formerly affiliated, I insist with all the positiveness at my command that I did not know that such an offense was to be committed and that I do not know who committed it, but I do know that whoever did commit it was not acting as an agent or ally of mine, nor had I any association with them for such purpose. I admit that you have made public declarations of your purpose to make an objection or contest to my seat in Congress, but I deny that this crime was committed to destroy one of your grounds for contest; the ignoring of these bills of indictment in Delaware County would present no obstacle to a consideration by Congress of the forgeries and perjuries alleged by you to have been made upon these nomination papers.

You state that "this pollution of justice merits the expulsion of this Representative from the Halls of Congress." I agree with you that anyone who aided, abetted, encouraged, or knowingly permitted such a crime, or failed to make public any knowledge that such a crime was to be committed, or, having knowledge of those who committed it, now conceals it, is not only unfitted to sit in Congress, but is unfitted to be a citizen of any law-abiding community; but, as hereinbefore stated, I positively deny any connection with, knowledge of, or responsibility for the crime.

Second. I deny "that the expense accounts filed in this district, so far as they relate to me, are fraudulent and false and that money, thousands of dollars unaccounted for by any candidate or committee, was expended by me or on my behalf." The election expenses incurred by me, or by those who acted for me with my knowledge, are contained in the statements filed by me and are absolutely correct and accurate. I contributed $500 to each of the two regularly organized Republican executive committees of Chester and Delaware Counties, which money was spent by the two committees in the conduct of the campaign for the whole Republican ticket on which I was a candidate. Aside from these two contributions, all the election expenses incurred to secure my election to the Sixty-third Congress, of which I have any knowledge, excepting that which was expended by the Thomas S. Butler League, referred to in your objection, are stated in my account on file with the Clerk of the House of Representatives at Washington and with the clerks of the courts of Chester and Delaware Counties, Pa. This account shows that I spent $1,401.10, including the contribution of $500 to each of the two Republican executive committees, as above stated. The account of the Thomas S. Butler League, filed with the clerk of the court of Chester County, as provided by law, shows that there was spent by it on my behalf and in order to secure my election the sum of $408. Excepting the expenditures above stated, I did not pay, give, or lend, or agree to pay, give, or lend, either directly or indirectly, any money or valuable thing for election expenses whatever. I authorized no one to expend any money for election purposes for me or on my behalf, and no one with my knowledge or with my consent incurred any expense whatever for that purpose beyond the amounts above stated. An examination of these accounts will show for what purpose these expenditures were made. They are all lawful, reasonable in size, and entirely within the statutes.

Third. I admit that a number of citizens of Chester County formed an association styled the Thomas S. Butler League. It was composed not of professional politicians, but of citizens of Chester County who desired my return to Congress. I had nothing whatever to do with the formation of this league or the conduct of its campaign. I contributed nothing toward its expenses, either directly or indirectly. You do not particularize in your objection the false and libelous articles which were composed and published by said league. I know of none, and I aver that the conduct of the Thomas S. Butler League was fair, and that all their efforts to secure my election were honorable.

Fourth. I admit that there is published at West Chester a paper known as the Village Record. I admit that T. L. Eyre owns it. Whether he is the Republican boss of Chester County, as you style him, is an open question. There are other men who claim the same distinction. He is my personal and political friend of many years, but I deny that he is my personal representative. I never had one. I admit that William C. Sproul is one of the three editors and proprietors of the newspaper published at Chester, Delaware County, known as the Morning Republican. I do not know whether he is the Republican boss of Delaware County, as alleged by you. Among Republicans whom I know he is not known as a boss. I never recognized either one of these men as my boss; indeed, they never assumed such ownership. I do know, however, that Senator Sproul is not and was not my personal representative in Delaware County, but I admit that he is my personal and political friend. You state in this paragraph of your objection that an editorial publication was made in these papers as follows:

> The Hon. Thomas S. Butler, the Republican nominee for Congress, was born and reared in the Society of Friends, and is proud of his Quaker ancestry. His opponent, Eugene C. Bonniwell, is a Roman Catholic (p. 4).

While I never saw or heard of it until I read the paragraph of your objection, I admit the truthfulness of it with pleasure, so far as it relates to me. I did not in any manner inspire it. Since your notice served on me, Mr. Eyre informs me that he had not seen or heard of the article of which you complain, although it appeared in his own newspaper. I have no knowledge of "any man, set of men, political organization, or its representative, employing or procuring messengers to traverse this congressional district and to circulate on my account or on any account the publication which you characterize as a blasphemous and infamous libel, known as Knights of Columbus oath." That this paper was circulated through this congressional district during this campaign I both admit and regret. I deny that I had anything whatever to do, directly or indirectly, with either its publication or its circulation. It came into this district through the mails, I am informed, and as fast as it appeared those who took my advice destroyed it. I am advised by those who know, that the same article was circulated and distributed in other parts of Pennsylvania than this congressional district during the last campaign, and I am further informed that this same article has been circulated not only in Pennsylvania, but in other States during political cam-

paigns for many years. I had no knowledge whatever of it until it appeared here during the last campaign, and from a source I know nothing about. Two or three of my political advocates showed me copies of this paper, which they had received through the mails. I requested them to ascertain where other copies of it had been received and to have all of them destroyed. I apprehended with alarm the use of such a document in a political campaign, or at any other time.

I did not believe in its truthfulness, and so stated my judgment concerning it on November 4, 1912 (as soon as complaint was made to me of its general circulation), through the columns of the West Chester Daily Local News, a paper with 17,000 circulation in this congressional district, a copy of which notice is herewith attached and marked "Exhibit C." Inasmuch as I did not wish to give this document, which I judged to be spurious, any notoriety whatsoever, I refrained from its public condemnation until the time when a general complaint was made to me, and I thought it my duty to publicly condemn it. In an interview with you, reported in the Daily Local News, of West Chester, December 2, 1912, you exonerated me from the responsibility for the publication or circulation of this paper by stating that it was not my work. A copy of this interview I attach to this answer, marked "Exhibit D." I never had a copy of the paper known as the "Knights of Columbus oath" in my possession, and I never heard the whole of it read until you furnished me with a copy of it, on the 16th day of December, 1912, by attaching it to your notice of objection. In no way am I guilty, either directly or indirectly, of having inspired or encouraged the circulation of this paper, and I am in no way, directly or indirectly, responsible for its appearance during this campaign or at any other time. I do not know who published it and sent it into this district, and I do not know who circulated it, except by common report. I deny that "the circulation of this oath and the publication of the two editorials were part of a conspiracy for the purpose of arousing religious rancor and of defeating the Democratic nominee." I have no knowledge of any conspiracy on the part of any persons for the purpose of arousing, or of any attempt being made during the campaign to arouse, a religious rancor. I have no knowledge of anyone having voted against you because of your religious views. They were spoken of in my presence but two or three times during the whole campaign, and upon each occasion I deplored a reference to such a subject. I know that the organization which supported me made no attempt to create a religious test and to "blaze bigotry" into the campaign, and, moreover, I know that these organizations had members of the Roman Catholic Church connected with them. I know, further, that active members of this church were my friends in the campaign, not only voting for me, but actively assisting me. I believe the circulation of this paper known as the "Knights of Columbus oath," notwithstanding my sincere efforts to suppress it, and spurious as I believed it to be, was of disadvantage to me and lost rather than gained votes for me.

I deny that there was any organized attack or any movement made upon you or upon your religious creed, or upon the ancient and honorable church of which you are a member. I deny "that there is nobody but believes that you received a plurality of the legal votes cast at the last election for Congressman in this district." Indeed, I never heard the suggestion from anyone but yourself. At the last election there were cast for Congressman in this district 40,137 votes. Of these, you received on the Keystone ticket 1,049 votes and on the Democratic ticket 11,176 votes, making in all 12,225 votes. Of the whole vote cast at this election, I received on the Republican ticket 14,944 votes, on the Bull Moose ticket 3,081 votes, on the Roosevelt Progressive ticket 1,251 votes, making a total of 19,276 votes. My majority over you was 7,051.

You make no criticism of the vote which I received on the Republican ticket, which exceeds that received by you on the Keystone and Democratic combined by 2,719 votes. You in no way challenge the correctness or the legality of the vote cast upon any ticket. You do not suggest that the will of the people was in any way overcome or interfered with or that any voter was deprived of his right secured him by law. You indicate no vote cast at this election that should be excluded for any reason whatever. You indicate none that should be counted that were not counted. You allege no fraud practiced at either the polls or elsewhere. You only ask Congress to unseat me because of misconduct (alleged by you) of persons and organizations, not named, whom you state voted for and supported me at the last election in the seventh congressional district, this misconduct in no way affecting the legality of the election or the size of my majority over you. You have in no way shown my connection with, nor my responsibility for, "the felonies of forged papers, perjured acknowledgments, violated grand jury, and the crime of religious slander." Your allegations of these offenses, committed by persons and organizations unnamed by you, you do not even sustain by oath or affirmation.

You are hereby notified that I will file a copy of these exceptions, answer, and counter notice with the Clerk of the House of Representatives within the time and in the manner required by law, so that the House of Representatives may make such disposition of your notice of objection and these exceptions, answer, and counter notice as it may see fit.

THOMAS S. BUTLER.

STATE OF PENNSYLVANIA, *County of Chester, ss:*

Before me, the undersigned, personally appeared Thomas S. Butler, whose name is signed to the above exceptions, answer, and counter notice, and being by me first duly affirmed, declares and says that he verily believes that the matters and things therein set forth are true.

THOMAS S. BUTLER.

Affirmed and subscribed before me this 2d day of January, 1913.

[SEAL.] MARY B. DARLINGTON, *Notary Public.*

My commission expires February 21, 1915.

EXHIBIT A.

In the court of common pleas of Dauphin County, Pa. No. 158, January term, 1913.

In re nomination of Thomas S. Butler for Congress for the seventh congressional district of Pennsylvania, under the name of "Roosevelt-Progressive."

To the honorable the judges of said court:

Frederick A. Howard, a resident of Chester, Pa., and a qualified elector of the aforesaid congressional district, objects to the nomination papers filed for Thomas S. Butler for the office of Congress for the seventh congressional district of Pennsylvania under the party name of "Roosevelt-Progressive" for the following reasons, viz:

Neither the electors signing the same, or the candidate named therein, are followers of Theodore Roosevelt or Progressives, as the name implies, but on the contrary are exerting all their power to defeat Theodore Roosevelt for the office of President of the United States, and therefore as such are not entitled to file any such nomination papers under such a party name.

That the said Thomas S. Butler is the Republican nominee for the office of Congressman in the aforesaid district.

That the said nomination papers were fraudulently filed, with the intent of deceiving the electors, by inducing them to believe from reason of said Butler's name appearing under said party name, as above, that he is a follower and supporter of Theodore Roosevelt, thus hoping to secure the votes of electors who are favorable to Roosevelt and who believe in his principles for the said Butler, while if they knew his true position they would vote against said Butler.

FREDERICK A. HOWARD.

Frederick A. Howard, the above objector, being duly sworn according to law, deposes and says that the facts set forth in the foregoing objections are true to the best of his knowledge and belief.

FREDERICK A. HOWARD.

By the court:

SAM'L J. M. MCCARRELL, *J.*

In the Court of Common Pleas of Dauphin County, Pa. No. 159, January term, 1913.

In re nomination of Thomas S. Butler for Congress for the seventh congressional district of Pennsylvania, under the name of "Bull Moose."

To the honorable the judges of the said court:

Frederick A. Howard, a resident of Chester, Pa., and a qualified elector of the aforesaid congressional district, objects to the nomination papers filed for Thomas S. Butler for the office of Congress for the seventh congressional district of Pennsylvania, under the party name of "Bull Moose" for the following reasons: The name of "Bull Moose" is commonly applied to the party now supporting Col. Theodore Roosevelt for the office of President of the United States, and his supporters and followers are commonly called "Bull Moosers."

Neither the electors signing the aforesaid papers nor the candidate named therein are followers or supporters of Theodore Roosevelt, but, on the contrary, are exerting all their powers to defeat Theodore Roosevelt for the office of President of the United States, and therefore are not such electors as are entitled to file any such nomination papers under such a party name.

That the said Thomas S. Butler is the Republican nominee for the office of Congressman in the aforesaid district.

That the said nomination papers were fraudulently filed, with the intent of deceiving the electors, by inducing them to believe from reason of said Butler's name appearing under said party name, as above, that he is a follower and supporter of Theodore Roosevelt, thus hoping to secure the votes of electors who are favorable to Roosevelt, and who believe in his principles, for the said Butler; while if they knew his true position they would vote against said Butler.

EXHIBIT B.

[Political.]

By making an X in the circle of the Bull Moose ticket you will vote for Theodore Roosevelt and Hiram W. Johnson, the two greatest American citizens living, and at the same time you will be casting a vote for the State ticket and Congress, Hon. Thos. S. Butler; State senate, Thos. R. McDowell; legislature, Jacob V. Pennegar, Theo. Pennock, Samuel A. Whittaker. Remember, this is the popular ticket and one which appeals to every honest Republican. Roosevelt and Johnson. The only genuine Progressive Roosevelt and Johnson ticket is the Washington ticket. Vote it straight by [X] in square opposite the word "Washington" at foot of ballot.

JOHN J. GHEEN,
Washington Party Chairman.

EXHIBIT C.

[Political.]

To the voters of Chester County:

I understand there is an anonymous circular being distributed to-day calculated to injure my opponent on the Democratic ticket.

I want to emphatically disavow my knowledge or sanction of this plan of campaign; and I want to further emphatically state that this circulation is without the knowledge and consent of the Republican county committees of Chester and Delaware Counties.

THOMAS S. BUTLER.

EXHIBIT D.

MR. BONNIWELL TO FILE PROTEST TO CONGRESSMAN BUTLER TAKING HIS SEAT IN NEXT CONGRESS—HE WILL FILE HIS PAPERS WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES NOT LATER THAN DECEMBER 16.

On December 16 Eugene C. Bonniwell, of Wayne, the defeated candidate for Congress in the recent election, will file with the Clerk of the House, at Washington, D. C., his formal charges of alleged irregularity used by the Butler forces in securing the election of Mr. Butler.

On this date the 30 days allowed by the law for the filing of charges of this nature expires, and as soon as the Clerk of the House receives the papers from Mr. Bonniwell he will at once send a copy to Congressman Butler, who has 30 days for filing his reply. Then the matter is referred to the Election Committee on Contests, and a day for the hearing of evidence is set, so the matter will not come up for real action until the last of March.

To-day Mr. Bonniwell is in Washington to take up before the Election Committee on Contested Elections the case of Hawkins *v.* McCreary, he representing Mr. Hawkins. Last evening before he left his home at Wayne he made the following statement to a reporter of the News:

"No; I will not file my charges to-morrow," said Mr. Bonniwell after query had been made on this point. "You see," he continued, "I have 30 days after the official count is made, and that time does not expire until December 16, but I will most certainly have it in the hands of the Clerk of the House by that time. The purport of my charges will be the illegal use of money, especially in Delaware County, by the Butler forces, also the methods used to preempt the Bull Moose Party, and then I will send a copy of the circular that was put out which was said to be the oath of the Knights of Columbus, and of which order I am a member. That was done for no other purpose than to injure me. While this can not be said to be the work of Mr. Butler, he was a beneficiary of the fraud practiced, which is, in the eyes of the law, the same thing as being one of the parties. I have collected a great deal of evidence, and it will all be brought before the committee at the hearing which will be held in Washington. I will practically represent myself in the matter, although one of the addresses will be made by City Solicitor Michael Ryan, but I will conduct the case, as I have had experience in similar cases, I being the representative of Mr. Hawkins, of Philadelphia, in his contest over the election, two years ago, of Mr. McCreary, of Philadelphia. I will make my appeal to-morrow in Washington, so you see I will have the experience of this case to become acquainted with the methods necessary. I feel that when the disclosures I have in my possession are made before the committee that they will see the irregular methods used to defeat me and that some action will be taken. I can not say more at this time other than the matter ought all to be thrashed out by April 1 of the coming year."

From different sources word has come that Mr. Bonniwell has been most active in collecting evidence for his proposed fight, and representatives of him have been both in Chester and Delaware Counties interviewing different leaders as well as voters to secure certain information. In the meantime Hon. Thomas S. Butler sits on the "lid" and says nothing, he refusing to discuss the prospects of his seat being contested, saying: "There is nothing in it in any shape or form, and I have no fear." Mr. Butler left West Chester yesterday for Washington, where he will close up the matters that are to be done in this the last session of Congress under President Taft.

These two documents were referred to this committee on the 7th day of January, 1913, by the Speaker with this statement:

The SPEAKER. The Chair has in his possession two communications. One of them purports to be a notice of contest by Eugene C. Bonniwell against Mr. Butler, of the seventh Pennsylvania district. On examination of the document, however, it turns out not to be a notice of contest, but to be something more in the nature of a memorial to this House, setting forth that the gentleman from Pennsylvania [Mr. Butler] ought to be expelled from the House. The Chair also has a copy of the reply of the gentleman from Pennsylvania [Mr. Butler], and without consuming any more time the Chair refers both papers to the Committee on Elections No. 1. (CONG. RECORD, p. 1688.)

On the 20th day of January, 1913, this committee addressed to Mr. Bonniwell and Representative Butler notices to appear before the committee on the 24th day of January, at 9 o'clock a. m. These notices were in the form of letters as follows:

LETTER TO MR. BONNIWELL.

WASHINGTON, D. C., *January 20, 1913.*

Mr. EUGENE C. BONNIWELL,
Wayne, Pa.

DEAR SIR: There has been referred to the Committee on Elections No. 1 of the House of Representatives of the Sixty-second Congress a proceeding filed by you against Hon. Thomas S. Butler, a Representative from Pennsylvania. Upon that proceeding the Speaker of the House ruled on January 17, as follows:

"The SPEAKER. The Chair has in his possession two communications. One of them purports to be a notice of contest by Eugene C. Bonniwell against Mr. Butler, of the seventh Pennsylvania district. On examination of the document, however, it turns out not to be a notice of contest, but to be something more in the nature of a memorial to this House, setting forth that the gentleman from Pennsylvania [Mr. Butler] ought to be expelled from the House. The Chair also has a copy of the reply of the gentleman from Pennsylvania [Mr. Butler], and without consuming any more time the Chair refers both papers to the Committee on Elections No. 1."

Your memorial is directed to the Hon. CHAMP CLARK, Speaker of the House of Representatives, and is consequently directed to the present Congress. The paper alleges that you object to the Hon. Thomas S. Butler holding a seat in the Sixty-third Congress.

It also alleges conduct which, you assert, should cause Hon. Thomas S. Butler to be expelled from the House.

This committee, or the House of Representatives of the Sixty-second Congress, has no jurisdiction to determine any matters affecting the seat of any Member elect in the Sixty-third Congress, and in view of the equivocal character of your paper you are notified to appear before this committee at 9 o'clock a. m. on Friday, January 24, 1913, to show what cause, if any, you have for this committee to determine the right of Hon. Thomas S. Butler to continue to hold a seat in the Sixty-second Congress.

Yours, truly,

FRANK MILLER, *Clerk.*

LETTER TO MR. BUTLER.

WASHINGTON, D. C., *January 20, 1913.*

Hon. THOMAS S. BUTLER,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: I herewith inclose copy of a letter which the committee, at a meeting this morning, instructed me to forward to Mr. Eugene C. Bonniwell relative to his memorial to the House of Representatives concerning your right to a seat in the House.

The committee also instructed me to forward a copy of the letter to Mr. Bonniwell to you, with the instruction that you be notified to appear before the Committee on Elections No. 1 on Friday, January 24, 1913, at 9 o'clock a. m.

Yours, truly,

FRANK MILLER, *Clerk.*

Mr. Bonniwell did not appear before the committee on the day of the hearing, but sent to the chairman the following letter:

LETTER FROM MR. BONNIWELL.

PHILADELPHIA, *January 21, 1913.*

Hon. TIMOTHY ANSBERRY,
Chairman Committee on Elections No. 1,
House of Representatives, Washington, D. C.

MY DEAR SIR: Your favor of the 20th instant at hand, and I fully concur in your judgment that this Congress has no jurisdiction. I wish to put formally of record, in reply to your notice addressed to me of the above date and signed "Frank Miller, clerk," to appear before your committee at 9 a. m. Friday, January 24, 1913, that I do not consider that I have any status under this notice to present a case against Mr. Butler at this time. I might direct your attention to the fact that technically—and this point has actually been made by counsel for the Hon. George D. McCreary in the pending contest of Frank H. Hawkins *v.* George D. McCreary—that there are no rules and no body legally constituted to provide for an election contest of an incoming Congress until that Congress has actually met; or, in other words, that the regulations of the Sixty-first Congress concerning contests, notices thereof, etc., need not bind the Sixty-second Congress, nor those of the Sixty-second the Sixty-third.

The rules of the Committee on Elections of the House of Representatives contain no specified form for a notice of contest beyond that it shall be "in writing" and "in such notice shall specify particularly the grounds upon which he relies upon a contest." The rules do not even require that a copy of said notice shall be sent to the officers of the House. This notice of contest was served upon Thomas S. Butler "within 30 days after the result of such election had been determined by the board of canvassers." It could hardly be more explicit in its language:

"I hereby file notice of objection to the right of Thomas S. Butler to represent the seventh congressional district of Pennsylvania in the Sixty-third Congress, and assign the following reasons:

"First. Fraud and perjury.

"Second. Illegal expenses.

"Third. Libel.

"Fourth. Religious attack upon the Knights of Columbus, in violation of the constitutional right of citizenship."

Each of the foregoing grounds, if proven, being conclusive reasons for refusing to permit the contestee to hold his seat.

Inasmuch as there can not be a Speaker of the House or Clerk of the House of the Sixty-third Congress until December or, in the event of a special session, at the pleasure of the President, and as this Congress has provided certain rules for the regulations of contested-election cases, it was deemed by me advisable to also file copies of said objection with the present Speaker of the House, in order that the same might in form comply with the present regulations. I might add that the pleasant certainty that the present distinguished Speaker will, in all likelihood, preside over the next Congress persuaded me to address him by name in future, rather than in blank as the Speaker or Clerk.

We are about to begin to take testimony in support of the various allegations named in this notice of contest. This testimony, under the rules, can not be completed for 75 days, nor printed, I take it, for a period of a month following that.

Therefore, while thanking your committee for its unusual courtesy and the opportunity of developing before this Congress the vicious and infamous conduct of the representatives of the Republican organization supporting Mr. Butler, I feel that in due justice to myself, as well as to the citizens of Delaware County, whose ballot rights were violated and whose grand-jury wheel was padded, that I should proceed in an orderly fashion in setting forth this evidence, so that Congress may act with due judgment and discretion.

I would therefore pray your honorable committee that your judgment indicated in your letter of the 20th, to wit, that this committee and this Congress are without jurisdiction in this matter, and that it is a subject matter for the incoming Congress, be made the text of your report, if any be needed.

I am, with much respect,

Yours, very sincerely, EUGENE C. BONNIWELL.

Representative Butler appeared at the hearing, was examined by the committee, and made a full denial of all the charges contained in the memorial of the said Eugene C. Bonniwell, so far as they in any manner affected him.

This committee, of course, has no jurisdiction to determine any matters affecting the right of any person to a seat in the House of Representatives in the Sixty-third Congress. It does not, therefore, attempt to pass upon any question involved in any valid contest which may have been instituted against the said Thomas S. Butler by the said Eugene C. Bonniwell or anyone else, alleging that he and not the said Thomas S. Butler is the duly elected Representative from the seventh congressional district of Pennsylvania in the Sixty-third Congress.

However, from a careful examination of the document filed by Mr. Bonniwell, it appears that the Speaker was entirely correct in declaring that it is a paper in the nature of a memorial to this House alleging certain acts and conduct by persons for which Representative Butler, it is asserted, should be expelled.

The paper, or memorial, is addressed to "Hon. CHAMP CLARK, Speaker of the House of Representatives, and Members of the House of Representatives, Washington, D. C."

The only Congress in which Mr. CLARK is or ever has been Speaker of the House of Representatives is the present, or Sixty-second Congress, and the only "Members of the House of Representatives" in being are the Members of this House.

It is true that the paper of Mr. Bonniwell begins with the statement:

I hereby file notice of objection to the right of Thomas S. Butler to represent the seventh congressional district of Pennsylvania in the Sixty-third Congress.

But in the said paper Mr. Bonniwell distinctly states:

I file no complaint because of adverse election returns—

And—

For myself I make no appeal to your honorable body that I may be seated.

The paper of Mr. Bonniwell being filed with this House and the author disclaiming that it is filed as a notice of contest, in which he intends to claim the seat of Representative BUTLER in the Sixty-third Congress, and it containing such allegations against Representative Thomas S. Butler, the sitting Member from the seventh congressional district of Pennsylvania, as follows:

This pollution of justice merits the expulsion of this Representative from the Halls of Congress—

And—

This man receiving his election under these circumstances, adding the felonies of forged papers, perjured acknowledgments, and violated grand jury to the more wicked crime of religious slander, ought not to be tolerated in the House of Representatives.

The committee has felt it to be its duty to examine with some care the document to ascertain whether there are any charges made against Representative Butler which warrant reporting to this House a resolution recommending his expulsion.

The paper of Mr. Bonniwell is adroitly drawn, but when analyzed it is found to be one of innuendo and not of direct charge. It refers to perjury and forgery in connection with the nominations of Representative Thomas S. Butler and candidates for local offices in Chester and Delaware Counties, Pa., and asserts that these crimes of perjury and forgery were committed through a conspiracy. But there is no charge that Representative Butler committed or furthered the perjury or forgery or took part in the alleged criminal conspiracy.

The paper of Mr. Bonniwell further refers to an alleged pollution of the grand jury of Delaware County, Pa., after the election of 1912, and at a time when certain election officials were about to be indicted for alleged offenses at that election, but there is no actual charge that Representative Butler participated in, furthered, or was even cognizant of the alleged conspiracy to pollute the grand jury.

The paper of Mr. Bonniwell asserts that Representative Butler has filed a false and fraudulent expense account under the State law as a candidate for election as a Representative in the Sixty-third Congress. This, if true, charges a crime against Representative Butler, but we find that there is provided ample machinery under the laws of Pennsylvania to try that charge. It has been the uniform practice of this House not to investigate a charge of crime against a Member where it has been denied by him and where he can be legally prosecuted in the courts. If Representative Butler shall be prosecuted under the corrupt-practices act of Pennsylvania and shall be found guilty, then an entirely different proposition may arise upon which to memorialize either this House or the House of the Sixty-third Congress.

The paper of Mr. Bonniwell alleges that a committee especially organized by the friends of Thomas S. Butler, styled the Butler League, composed and caused to be published false and libelous articles concerning Mr. Bonniwell. It will be noted that it is not charged that said false and libelous articles were either prepared or published by Representatives Butler or that he even had knowledge of their publication. It merely charges that these publications were made by the personal friends of Hon. Thomas S. Butler. This allegation, if true, might make "the personal friends" of Representative Butler guilty of a crime, but it certainly could not make Representative Butler himself guilty of a crime.

The paper of Mr. Bonniwell further alleges that—

The West Chester Village Record is a local newspaper, largely owned and controlled by T. L. Eyre, Republican boss of Chester County and personal representative of Thomas S. Butler.

and that this newspaper published an editorial calling attention to the religion of the said Eugene C. Bonniwell, and that this editorial was republished in the Chester Republican for the purpose of arousing religious rancor and defeating the Democratic nominee, Mr. Bonniwell.

This committee can not condemn too strongly the publication of the false and libelous article referred to in the paper of Mr. Bonniwell, and which was the spurious Knights of Columbus oath, a copy of which is appended to the paper. It also condemns the publication of editorials to excite religious prejudice in a political campaign. No man should be prosecuted for his religion, whether he be Catholic or Protestant. However, it is not alleged in the paper that Representative Butler published or caused the publication of either the false oath or the prejudiced editorials.

This committee does not intend either to inculpate or to exculpate those who conducted the campaign and election in the counties of Chester and Delaware, in Pennsylvania, in 1912. The campaign and the election in general are not proper subjects for investigation by the House of Representatives of the United States. The jurisdiction of the House of Representatives in such matters is based solely upon Article I, section 5, of the Constitution of the United States providing:

Each House shall be the judge of the elections, returns, and qualifications of its own Members, punish its Members for disorderly behavior, and with the concurrence of two-thirds expel a Member.

Under that power the House considers contests against the seat of a Member holding a certificate of election and memorials against a sitting Member or a Member about to take his seat under his certificate of election charging him with offenses which, if true, justify his expulsion from the House. The committee has already stated that it has no jurisdiction over any contest filed by anyone claiming the seat from the seventh congressional district of Pennsylvania in the Sixty-third Congress. Upon a careful consideration of the paper in the nature of a memorial filed by Mr. Bonniwell and other papers and evidence therewith the committee report that there is nothing shown or alleged against Thomas S. Butler which disqualifies him from holding his seat in the Sixty-second Congress.

The committee therefore recommends the adoption of the following resolution:

Resolved, That the memorial of Eugene C. Bonniwell against Thomas S. Butler, dated December 14, 1912, and addressed to and filed with the Speaker of this House, be laid upon the table.

MEMORIAL SERVICE IN THE SENATE.

The SPEAKER. The hour of 10 minutes of 12 having arrived, the House will proceed to the Senate Chamber.

Thereupon the Members of the House, preceded by the Sergeant at Arms and the Speaker, proceeded to the Senate Chamber.

At 2 o'clock and 35 minutes p. m. the Members returned, and the House was called to order by the Speaker.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. J. M. C. SMITH, for 10 days, on account of important business.

ADJOURNMENT.

Mr. FITZGERALD. Mr. Speaker, as a further mark of respect to the memory of the late Vice President SHERMAN, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 2 o'clock and 36 minutes p. m.) the House adjourned until to-morrow, Sunday, February 16, 1913, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV a letter from the Secretary of War, transmitting with a letter from the Chief of Engineers report of examination on the water supply of the District of Columbia and the availability of the water power at Great Falls, Potomac River, for supplying light and power for the use of the United States and the District of Columbia (H. Doc. No. 1400), was taken from the Speaker's table, referred to the Committee on Appropriations, and ordered to be printed with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk and referred to the several calendars therein named, as follows:

Mr. STEENERSON, from the Committee on the Post Office and Post Roads, to which was refered the bill of the House (H. Res. 869) requesting information of the President as to practicability of extending a 2-cent letter postage rate similar to that in force with Great Britain and Germany to other European countries desiring same, reported the same without amendment, accompanied by a report (No. 1521), which said bill and report were referred to the House Calendar.

Mr. BURNETT, from the Committee on Public Buildings and Grounds, to which was referred sundry bills of the House, reported in lieu thereof the bill (H. R. 28766) to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings; and for other purposes, accompanied by a report (No. 1522), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BURNETT: A bill (H. R. 28766) to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings; and for other purposes; to the Committee of the Whole House on the state of the Union.

Mr. STEPHENS of Texas: A bill (H. R. 28767) to provide for the purchase of a site and the erection of a public building thereon at Bowie, State of Texas; to the Committee on Public Buildings and Grounds.

By Mr. HARRIS: A bill (H. R. 28768) for the relief of the State of Massachusetts; to the Committee on Claims.

By Mr. BERGER: Joint resolution (H. J. Res. 401) to acquire railroads on the ground of great public emergency and by the right of eminent domain; to the Committee on Labor.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUSTIN: A bill (H. R. 28769) for the relief of Joseph Black; to the Committee on Claims.

By Mr. BYRNS of Tennessee: A bill (H. R. 28770) to compensate the Nashville Trust Co., of Nashville, Tenn., trustee under the will of E. W. Cole, deceased, for damages to a building situated on the corner of Union Street and Fourth Avenue north, in Nashville, Tenn., and known as the Cole Building, as the result of a blast in improving the channel of the Cumberland River by a United States Government boat on Monday, August 13, 1912; to the Committee on Claims.

By Mr. CARY: A bill (H. R. 28771) granting a pension to Kate Lynch; to the Committee on Invalid Pensions.

By Mr. CLINE: A bill (H. R. 28772) granting an increase of pension to Oliver Blystone; to the Committee on Invalid Pensions.

By Mr. SMITH of New York: A bill (H. R. 28773) granting an increase of pension to Albert Lacy; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BYRNS of Tennessee: Papers to accompany bill to compensate the Nashville Trust Co., Nashville, Tenn.; to the Committee on Claims.

By Mr. CARY: Petition of Isaac Prooty & Co., Spencer, Mass., protesting against any reduction of the present tariff on leather and shoes; to the Committee on Ways and Means.

Also, petition of David L. Williams, Hot Springs, S. Dak., favoring the passage of legislation for raising the salaries of the assistant surgeons of the Army; to the Committee on Military Affairs.

Also, petition of the Consumers' League of Wisconsin, Milwaukee, Wis., favoring the passage of House bill 27281, for limiting the hours of labor for the women in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of D. J. Mackedon, Milwaukee, Wis., protesting against the passage of the income-tax bill as reported before the House; to the Committee on Ways and Means.

Also, petition of Arthur Commission Co., Milwaukee, Wis., favoring the passage of legislation striking out the clause exempting from inspection meat slaughtered by a farmer on the farm for transportation in interstate commerce; to the Committee on Interstate and Foreign Commerce.

Also, petition of Crop Improvement Committee, Chicago, Ill., relative to the Page and Lever bills for improving the agricultural industry, and suggesting improvements on same; to the Committee on Agriculture.

By Mr. CLARK of Florida: Petition of H. B. Alban and various other citizens of Orlando, Fla., favoring the passage of House bill 22591, known as the Clayton limitation bill; to the Committee on the Judiciary.

By Mr. DICKINSON: Paper to accompany the bill H. R. 28749, granting a pension to James W. Scott; to the Committee on Invalid Pensions.

By Mr. FORNES: Petition of the American Tariff Protective League, New York, N. Y., favoring the repeal of section 2 of the Canadian reciprocity act and for protection of the paper and pulp industry; to the Committee on Ways and Means.

Also, petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, to prevent discrimination in Panama tolls; to the Committee on Interstate and Foreign Commerce.

By Mr. FULLER: Petition of Thomas Gelbert Ridgway, New York, N. Y., favoring the passage of House bill 1339, to increase the pension of veterans of the Civil War who lost an arm or leg; to the Committee on Invalid Pensions.

Also, petition of the Illinois Manufacturing Association, Chicago, Ill., favoring the passage of legislation for the establishment of a tariff commision to aid Congress in tariff legislation; to the Committee on Ways and Means.

Also, petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, to prevent discrimination in the Panama tolls; to the Committee on Interstate and Foreign Commerce.

By Mr. GRIEST: Petition of the patriotic orders of Lancaster, Pa., favoring the passage of bill (H. R. 26537) to authorize the donation of a condemned cannon to the city of Lancaster, Pa., for a memorial in honor of the Spanish War veterans of Lancaster; to the Committee on Military Affairs.

Also, petition of Lieut. D. H. Nissley Camp, No. 74, Sons of Veterans, Mount Joy, Pa., and Lieut. David H. Nissley Post, No. 478, Grand Army of the Republic, favoring the passage of bill (H. R. 26674) to donate two condemned cannon to Post No. 478, Mount Joy, Pa.; to the Committee on Military Affairs.

By Mr. MANN: Petition of the Illinois Manufacturing Association, Chicago, Ill., favoring the passage of legislation to establish a tariff commission to aid Congress in tariff legislation; to the Committee on Ways and Means.

Also, petition of the Illinois Manufacturing Association, Chicago, Ill., favoring the passage of legislation for the establishment of a national drainage commission; to the Committee on Irrigation of Arid Lands.

By Mr. MOTT: Petition of the Chamber of Commerce of the State of New York, favoring the passage of Senate bill 8114, to prevent discrimination in Panama Canal tolls; to the Committee on Interstate and Foreign Commerce.

Also, petition of American Tariff Protective League, New York, N. Y., favoring the repeal of section 2 of the Canadian reciprocity act and for protection of the paper and pulp industry; to the Committee on Ways and Means.

HOUSE OF REPRESENTATIVES.

SUNDAY, *February 16, 1913.*

The House met at 12 o'clock noon, and was called to order by Mr. DOREMUS as Speaker pro tempore.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our God and our Father, our life and our hope, for in Thy keeping is the destiny of men, we gather here to-day in memory of men who by dint of industry and faithful service proved themselves worthy of the confidence reposed in them, and have passed on to the reward of the faithful. It is well thus to commemorate their service and record their history as an ensample to those who shall follow them. Strengthen our faith, encourage our hope, and inspire us to noble endeavors, that we may merit the confidence of our fellow men and Thy loving kindness. Help us and their dear ones to say in all faith, Thy will be done.

So long Thy power has blest us, sure it still
Will lead us on
O'er moor and fen, o'er crag and torrent, till
The night is gone,
And with the morn those angel faces smile
Which we have loved long since, and lost awhile.

In the spirit of Him who brought to light life and immortality. Amen.

The Clerk began the reading of the Journal of the proceedings of yesterday.

Mr. HAMILTON of Michigan. Mr. Speaker, I ask unanimous consent that the reading of the Journal be dispensed with.

The SPEAKER pro tempore. Is there objection?

There was no objection.

THE LATE REPRESENTATIVE WEDEMEYER.

The SPEAKER pro tempore. The Clerk will report the first special order of the day.

The Clerk read as follows:

On motion of Mr. HAMILTON of Michigan, by unanimous consent,
Ordered, That Sunday, February 16, 1913, at 12 o'clock m., be set apart for addresses upon the life, character, and public services of Hon. WILLIAM W. WEDEMEYER, late a Representative from the State of Michigan.

Mr. HAMILTON of Michigan. Mr. Speaker, I offer the following resolution.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 840.

Resolved, That the business of the House be now suspended, that opportunity may be given for tributes to the memory of Hon. WILLIAM W. WEDEMEYER, late a Member of the House from the State of Michigan.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was agreed to.

Mr. DODDS. Mr. Speaker, we are here at this time to pay a last tribute of respect to our late friend and colleague, WILLIAM WALTER WEDEMEYER. It is a sad and solemn duty for us all, but for those of us who are from Michigan, his home State, it is especially so. We knew him so well and were so thoroughly interested in him and in his future that his untimely death means much to us indeed. Had we been asked, when we assembled here at the beginning of the present session, to prophesy as to the one of us who would be first called upon to lay down the burdens of earthly life and pass over to the great beyond, I am sure that none would have named or had in mind the brother who has actually been taken from us. The youngest of us all; a giant in strength and, seemingly, in power to endure; with conditions about him apparently the most pleasing and self-satisfying, surely "WEDIE," as we were wont to call him, would have been the last one in our thoughts. But half of his life—as lives do go—was gone; and we were of a mind that years and years were yet to come to him in which, as in the past, his life would tell for good. But what we least expect most often comes; and now he is no more. "The bubble which seemed to have so much solidity has burst, and we again see that all below the sun is vanity."

Mr. WEDEMEYER obtained his education in the University of Michigan, where he completed both the literary and the law courses, being well equipped when he left it for the vocation in life in which he was to engage—the practice of the law.

My acquaintance with him began some 16 years ago, when he was but 23 years of age. This was during the first McKinley campaign, in the results of which he was much interested, and always after we were earnest friends. To know him was to become interested in him. It could easily be seen that he was one of those to whom the many talents had been given, and consequently much was expected of him in return. He seemed to know this, and "expecting no indulgence from others, he showed none to himself." There was, therefore, much of realization as well as promise in the life so unexpectedly ended. Deputy railroad commissioner of his State before reaching the age of 25 years, consul to Georgetown, British Guiana, soon afterwards, and a Member of this great legislative body before reaching the age of 38 years mark him as a man in whom the people had much confidence. Also, besides his other professional work at the time of his death, and besides his work as a Member of Congress, he was national counselor for the American Insurance Union, a position of much responsibility.

Those who really knew the esteemed brother whose loss we mourn know that he was no ordinary man. In all that goes to make the manly man—intelligence, morality, kindliness of heart—he was the peer of any.

In politics he was a stanch Republican. Though always for progression, he was for progression within his party.

He never pretended to be what he was not, but was always sincere, true, and natural.

He was an honest man in thought, in purpose, and in deed, and sham and falsehood were by him abhorred.

He was of a cheerful disposition and in a remarkable degree possessed the power to impart that cheerfulness to others.

His work as a speaker in the McKinley campaign, before referred to, first brought him into prominence as a State orator and ranked him as such among our very best. Wherever he spoke he was admired both for what he said and how he said it, and he invariably left his hearers with a desire to hear more. Well informed, clear in speech, logical and eloquent, and with a most attractive personality, he had a singular power over the minds of men, and thus he grew in favor.

He was a candidate for Congress in his district in the year 1898 and again in the year 1902, and each time lacked but a few votes of the number necessary to secure for him the desired nomination, the election after nomination being regarded as certain.

At the primary election held in 1910 he secured this nomination, and his election followed. That his service here was for so brief a period is greatly to be regretted. His fitness for the work was exceptional, and his life here would have continued to be a life of usefulness and one that would have brought him high distinction. But—

Again a prince has fallen in the fight—
The val'rous champion of the truth and right;
Determined, honest, level-headed, just,
Who broke no promise nor betrayed a trust!
His genial face with courtly kindness beamed—
By friends beloved, by all mankind esteemed.
Peace to his manly soul and sweetest rest
With that glad throng whom love of God has blest!

Mr. WILLIS. Mr. Speaker, I can scarcely make it seem possible that our friend has gone away. I suppose I was associated with Mr. WEDEMEYER as intimately as any Member of this House. Not a day passed but what he was in my office or I was in his office. Not many votes were cast by either of us while he was here without our consulting together, and we have all become so accustomed to his presence amongst us that we can scarcely realize that he has gone away.

In the few minutes that I speak I shall undertake something that perhaps is unsual, perhaps out of place, but it seems to me there is no better way of judging of a man than by knowing something of his thoughts and something of the books that he reads. It has been written, "As a man thinketh, so is he." Some one has said, "If you will show me what you read I will tell you what you are."

It will be forever a fond recollection to me that many hours were spent by me with this strong, heroic soul in the reading of things that he liked and that I liked; and I am reminded just now of a little poem that he recited to me many and many a time, from the pen of James Whitcomb Riley, an old familiar poem, perhaps, which yet expresses the thought I have in mind just now. I can hear Mr. WEDEMEYER's voice as he read this to me the first time:

I can not say and I will not say
That he is dead. He is just away!
With a cheery smile and a wave of the hand
He has wandered into an unknown land,
And left us dreaming how very fair
It needs must be, since he lingers there.

And you—oh, you, who the wildest yearn
For the old-time step and the glad return—
Think of him faring on, as dear
In the love of there as the love of here;
* * * * *
Think of him still as the same, I say;
He is not dead—he is just away!

He read and recited that to me many times. It expresses the thought I have at this moment. I think I shall never be able to realize that Mr. WEDEMEYER has done other than simply "gone away." His life became so mingled with my life that the fond recollection of it shall remain with me through time and eternity.

My acquaintance with Mr. WEDEMEYER did not extend over so many years. I met him first, I think, in the winter of 1908, although before that time he was well known in our State as a campaign orator and as a lecturer. I think it was in the winter of 1908 that he came to Kenton, the county seat of Hardin County, in which I live, to address a great banquet of the Young Men's Republican Club. I became intimately acquainted with him from the beginning. I remember, after the banquet was over and the crowd had dispersed, that I went up to his room, and the great, big, jolly fellow sat down and we talked of our families, talked of politics, talked of our hopes, ambitions, and disappointments, and talked somewhat of literature.

I remember that he inquired of me if I had ever read a little selection which he proceeded to recite with tremendous effect and deep pathos. I read it now because it expresses Mr. WEDEMEYER'S philosophy of life. He would not have us wrapped in deep sorrow; that was not his way of looking at things. He believed in taking things as they are and making the best of them and doing what we can for people while they are on earth. I remember in our interchange of thought upon this subject I recited to him this little stanza, which seemed to meet with his approval, and which I have since heard him recite many times:

A rose to the living is more
Than sumptuous wreaths to the dead;
In filling love's infinite store,
A rose to the living is more
If graciously given before
The hungering spirit has fled—
A rose to the living is more
Than sumptuous wreaths to the dead.

It expresses less beautifully and completely the same thought as is expressed in the selection he quoted:

Closed eyes can't see the white roses;
Cold hands can't hold them, you know;
Breath that is stilled can not gather
The odors that sweet from them blow.
Death with a peace beyond dreaming
Its children of earth doth endow,
Life is the time we can help them,
So give them the flowers now!

Here are the struggles and striving,
Here are the cares and the tears;
Now is the time to be smoothing
The frowns and the furrows and fears.
What to closed eyes are kind sayings?
What to hushed heart is deep vow?
Naught can avail after parting.
So give them the flowers now!

Just a kind word or a greeting;
Just a warm grasp or a smile—
These are the flowers that will lighten
The burdens for many a mile.
After the journey is over
What is the use of them; how
Can they carry them who must be carried?
Oh, give them the flowers now!

That was Mr. WEDEMEYER'S philosophy of life—to do good every day, to make somebody happy, to lift a burden here, to cheer some one with a glad jest or a happy smile or a generous deed.

I may not speak at length of his services here in this body, and yet what little I shall say comes from the heart, because I think I knew pretty nearly what his positions were upon public questions, because, as I have said, we talked over most of the things that we would have occasion to act upon. I simply refer, in passing, to one or two of his speeches which I think were great speeches.

Mr. Speaker, I have heard many splendid orators, but I have heard few men that had more power with a great audience than WILLIAM W. WEDEMEYER. There was a magnetism of personality, there was a charm of persuasion of voice, there was a cogency of reasoning, of sound logic that marked the great orator. As I have suggested before, in Ohio he was well known, and whenever it was announced that WEDEMEYER, of Michigan, was to address a meeting, the crowd was limited only by the capacity of the hall.

That reputation which he had made as an orator, almost nation-wide in its extent, was fully sustained by his services here. As I recall the first speech that he made in the House, it was a speech relative to the investigations that had been had concerning matters in the State Department. I know that Mr. WEDEMEYER with his accustomed energy and attention to detail had spent days and nights and weeks in going into every detail of that case, and his heart was in it. While there was difference of opinion here in the House relative to the merits of the controversy, Mr. WEDEMEYER felt that certain officials of the State Department had been wrongly accused. He threw all the weight of his mighty soul into the fight and made a great speech, which all will remember who were fortunate enough to hear it.

He was very active in the discussion that resulted ultimately in the admission of Arizona and New Mexico as States into the Union, and I think I violate no rules as to secrecy relative to the proceedings in the committee when I say that no man on the Committee on the Territories, with the possible exception of the chairman, did as much to bring Arizona and New Mexico into the Union as did Mr. WEDEMEYER. Constant in his attendance upon the sessions of the committee, studying all the details, familiarizing himself with the arguments, he was a power in favor of the admission of those two new States. But the thing in which he took the greatest delight was that group of questions that we call the Alaska questions. Mr. WEDEMEYER was thoroughly familiar with the situation in Alaska. He had visited the place, had talked with the people, face to face; he had studied the question at first hand, and he was enthusiastic in his belief as to the possibilities for the future in that great undeveloped empire. If Members were not fortunate enough to be in the House the day he made his speech on the Alaska government bill, I dare say they would be well repaid if they would hunt out the speech and read it now. It was a mighty effort, and it shows Mr. WEDEMEYER'S breadth of view, his strong grasp of public questions.

It is not necessary to call the attention of Members here to the fact, because we all know it. But one thing that I wish to call particular attention to and make a part of this solemn record that we are making up as to his services is his devotion to his duties. I have never seen in any legislative body a man who gave more careful, constant attention to the public business than did Mr. WEDEMEYER, even when he was called away, as he was very infrequently. When he had to be out of the city, through his capable and efficient secretary, or through some of his friends in the House, he kept in constant touch with the public business. He knew exactly what was going on, and always left instructions that if anything important came up to wire him and he would be here, no matter what the cost. He gave constant attention to his work. We have seen him sitting at his desk here, through the long day, always at work—always at work in the interest of the people, in the interest of his constituents. I have left my office many a time at 10 or 11 o'clock at night, and going by Mr. WEDEMEYER'S office would find him at work, studying some public question. I dare say, Mr. Speaker, there has never been a man who served in this House who gave his life more completely to the services of the people who elected him than did Mr. WEDEMEYER.

I have a little memento here to which I shall only refer. I have shown it to some of the Members of the Michigan delegation. It is just a little note illustrative of Mr. WEDEMEYER'S intense devotion to his people and of his extreme care as to details. He gave it to me on the eve of his departure from this city forever, saying, as he went away, that it was possible a certain bill in which his people were vitally interested might come up while he would be away. He did not think it would. He thought he would be back before the bill would be considered, but he handed me this written memorandum, requesting me to attend to the matter if the bill came up. I shall keep this memorandum until his son is old enough to understand what it means, and then I shall give it to George as a token of the attention of his father to the public business, his absolutely unflagging devotion to the interests of the people who elected him.

Another thing to which I wish to refer in passing is the profound interest which Mr. WEDEMEYER had in the Latin American countries. Those of you who were fortunate in having an intimate acquaintance with him know that he had studied that situation and that great question thoroughly. As you are aware, for a time he was United States consul to a South American country, and was entirely familiar with that group of questions connected with the Latin American situation.

Not only that, but Mr. WEDEMEYER studied and understood world politics. As you know, he was of German descent. He spoke the German language as fluently as he spoke English,

He had traveled a great deal. He was perfectly familiar with Germany, with Austria, with France, as I have stated before, with Alaska, with Central America, with Mexico, and with South America. He understood the great problems of world politics, and he had a grasp of those problems not possessed by many men of his time.

I should like to speak a word of his personal characteristics. The one I think of first was his intense, unyielding, absolutely profound patriotism, in the widest and deepest and best sense. As his colleague, the gentleman from Michigan [Mr. DOBBS], has said, Mr. WEDEMEYER was truly progressive in every thought, in every act. His sympathy was with humanity. He was for the things that benefited the great mass of the people, and it was perfectly natural that it should be so, because he came from the ranks of the common people. By his illustrious living he has given an example to the youth of his State of the possibilities of citizenship in this great Republic.

Mr. WEDEMEYER made himself what he was. He worked his own way through high school, college, and university. His sympathies were with the common people. How often have I discussed with him, how often have I heard his eloquent voice ring out in behalf of the folks back on the farm, the folks who live in the little villages. He neither knew nor cared much about the requirements of high society or about the blandishments of wealth; but that great, strong, patriotic soul did know to its depths the life of the common people, and there never was a thought, there never was an act, while he was a Member of this House that was not in the interest of true progress in absolutely the best sense.

I have said he was patriotic. Perhaps, carrying out the thought I suggested at the beginning, I can best illustrate that by reading another selection, from the pen of Moses Owen, which he frequently read to me from this very book. It is one from which we frequently read. Here are a couple of stanzas that I have heard him recite with tremendous, soul-stirring power. They tell the story of the battle flags in the State capitol at Augusta, Me.:

Nothing but flags, but simple flags,
Tattered and torn and hanging in rags;
And we walk beneath them with careless tread,
Nor think of the hosts of the mighty dead
That have marched beneath them in days gone by,
With a burning cheek and a kindling eye,
And have bathed their folds with their life's young tide,
And dying, blessed them, and blessing, died.

Nothing but flags; yet, methinks, at night
They tell each other their tale of fight;
And dim specters come, and their thin arms twine
Round each standard torn, as they stand in line,
As the word is given—they charge, they form,
And the dim hall rings with the battle's storm;
And once again, through smoke and strife,
These colors lend to a nation's life.

Mr. WEDEMEYER was intensely patriotic, and he was never happier than when he was doing something for an old soldier—getting some adjustment made in his pension papers or something of that kind. He was the true friend of him who bore the burden of battle and of his widow and his orphans. Another characteristic was his love for home, for wife and children—his firm grounding in those things which in the life of this Republic or in the life of any nation are absolutely fundamental. This man proudly wore the stainless flower of his unsullied manhood. There was never a word nor a thought nor an act but what was in harmony with the highest devotion to the responsibilities and sacredness of his home.

How often have we seen him coming here, or into our offices, all aglow, his face wreathed in smiles; he would pull out of his pocket a letter scrawled in those unintelligible lines that only the baby fingers know how to make; unintelligible to others, and yet he seemed to understand them all. Here was an undecipherable message from little Josephine, or here was a loving note from Mary, or here was a letter from George, telling of some of his experiences in school. Mr. WEDEMEYER carried those letters around, doted upon them, read them to his friends. He believed, I say, in those things that are finest and sweetest and most permanent and enduring in this life.

He was a man that thought an almost infinite amount of wife and children. His devotion to them was without flaw or blemish. Perhaps that quality of his character could be illustrated again by something in literature. I remember well the circumstance under which he called my attention to this that I am about to read. I had never seen it before. He had invited me to dinner at his hotel, and after dinner he invited me up to his room to read me something. I went with him, and he read this from McCanis. It was the way Mr. WEDEMEYER spent the odd moments, in reading things like this. I am reading these paragraphs, Mr. Speaker, because I think they show the character of the man in whose honor we have met to-day. A man who puts in his time reading this kind of literature and thinking this kind of thoughts is not likely to go far wrong. "WEDIE," as we loved to call him, was tender and sympathetic and home-loving. He understood that the family life was the enduring foundation of the Nation. Sad, sweet paragraphs like these I am about to read appealed to him, and as he read them to me in voice eloquently rich, I was deeply moved:

A little, winding railway in a southern county connects two widely parallel systems known as the C. & G. The trains are small and meek when compared with the long aggregations of cars with which they connect at G.

But to the old man who sat to-day in one of the cramped, uncomfortable coaches defects were not apparent. For 40 years little cars like these had passed his door. Along this same road he and Mary had taken their wedding trip. How proud he was of her when they returned, and he had taken her home, where his father and his father's father had lived before him. There they had lived and labored together, going on Saturdays to the village and on Sundays to the little church; and there Tom had been born.

It seemed hard to realize that all this was long ago, for so much had happened since then. No lusty boy would come rushing to meet him to-day; the rocking chair where she used to sit would be very still. The old man choked a little and wiped his eyes with his cotton handkerchief.

He had not known what all this meant to him until he had left it. He had been lonely, and Tom had persuaded him to go live with him. But it was all so strange in this new place, so little like he had pictured it. He said nothing. They were kind to him and he must not seem ungrateful. He would not admit, even to himself, that he wished to go back, but he grew so silent, white, and still that his son watching his wistful face was touched.

"Father," said he, "am I not your son? Tell me." And the old man answered humbly, "Tom, I am old and getting childish, but I want to go back. I've never lived anywhere else before and—and she's there, Tom."

So to-day he was going home; back to the hills and trees; back to his old house and graves; back where she had left him to wait until she had called him; and the journey was almost done.

The sunshine crept across the car and the noise of voices grew lower and lower. Somehow it was evening and he was coming home down the long lanes between the fields. Over the hills came the tinkle of bells as the cattle came home to the milking; here, running to meet him, was little Tom, the red stains of berries still marking his face and fingers; and there by the gate, the lovelight as strong in her eyes as on the day they were married, stood Mary, the wife of his youth.

"I am late," he said, "and tired."

"Come," she said, "you can rest now; it is only a step more." And a long, quavering sigh of relief—and—he was at home. The little rough train went jolting along and reached his station at last. But when the conductor shook him he did not answer.

On another occasion when I was with Mr. WEDEMEYER in his room he read these fugitive lines from some author whose name I have forgotten:

The poem was Eugene Field's Little Boy Blue, and at the very first lines of it the old lady became all attention:

"The little toy dog is covered with dust,
But sturdy and stanch it stands;
And the little tin soldier is covered with rust,
And his musket molds in his hands."

Very slowly, as she read on, the tears came into her eyes and dimmed the spectacles so that she could scarcely see the lines of the second verse:

"'Now, don't you go till I come,' he said,
'And don't you make any noise!'
Then, toddling off to his trundle bed,
He dreamed of his pretty toys.
And as he was dreaming, an angel song
Awakened our little boy.
Oh, the years are many"—

Yes; they were many! It was more than half a century ago now. The paper dropped from the old lady's hand and rustled to the floor. There was no use in trying to read any more, for her thought had flown away now to the time when she had had just such a Little Boy Blue as that. Since then she had had lots of other children. Even now, as she sat there in the twilight, she could hear the shouts of her grandchildren at play not far away, but little Geordie had been her first-born, and somehow the others were different, and nobody knew just how but herself. She had daughters to console her in her widowhood, and when her married daughter had died her children had been left. But with little Geordie it was different. They only knew of him by the little headstone in the graveyard; but to her—why, after reading that little poem it seemed as though it were only yesterday that he was toddling along beside here, rosy and bright and full of fun. And he used to say just those things—she remembered.

"Why, mother," said her daughter as she came in, "you've been crying! What's the matter?"

"It was nothing, dear," answered the old lady as she wiped her eyes. "I was reading, you know, and it upset me a little. It was only a bit of newspaper verse."

Mr. Speaker, I believe what I said in the beginning, that if you know what a man reads and thinks you know what he is. This man in this great city, with all its attractions, amusements, entertainments, allurements, and blandishments, in the odd moments of his time read this kind of literature. He believed in the home and the things associated with it that are the finest and tenderest and fairest.

Another thing I should call attention to was his unfailing friendliness and sympathy. Mr. WEDEMEYER knew every Member in this House before he had been here two weeks. He made friends; he could not help it. The expression of his countenance was a benediction; you all knew him, and you knew him before he had been here many days. He was friendly with everybody,

and he took an interest in the things in which his friends were interested. I can bear testimony to that through the many conversations that we had. The contest in which I was engaged, my chances for reelection, appeared to interest him even more than his own affairs. WILLIAM W. WEDEMEYER was one of the most unselfish men I have known in public life.

Another characteristic was his unfailing good humor, his ability to see the funny side of things. It was like a burst of sunshine when he came to my room, always with a smile, and he could tell a funny story, not a vulgar story. I knew the man intimately for more than four years—and I think I was close to him; I am sure he was close to me—and in all the hours of our conversation here and elsewhere I never heard him tell a story that could not be told in the most polite company.

But, as I say, he saw the funny side, and he was a splendid story-teller. One moment he would have an audience convulsed with laughter; the next sobered with his sound logic and beautiful diction. That was one of the qualities of his character that it seemed to me stood out prominently.

Another was his courage. There come occasions in this House, Mr. Speaker, as we perfectly well know, there come votes which it would be convenient to avoid. These same things came to him, but there was nothing of the shirk about him; he always stayed here and did his duty; he never dodged a vote; he never evaded a responsibility. He was a man of courage, a man of the highest moral character, a man of the most abstemious habits, never under any circumstances using intoxicating liquors or tobacco in any form, and a man of absolutely unflinching honesty; honest with himself, honest with his fellow man, honest with his country, he typified all that is best in American life.

On another occasion Mr. WEDEMEYER invited me to come to his room. I accompanied him, as I had done many times before. He said, "I have found something else I want to read to you. It expresses a profound philosophy and my own belief." Then he read these words. It is a statement made by Victor Hugo on the question as to whether we shall live again. Here is what Mr. WEDEMEYER read to me:

I feel in myself the future life. I am like a forest once cut down; the new shoots are stronger and livelier than ever. I am rising, I know, toward the sky. The sunshine is on my head. The earth gives me its generous sap, but heaven lights me with the reflection of unknown worlds.

You say the soul is nothing but the resultant of the bodily powers. Why, then, is my soul more luminous when my bodily powers begin to fail? Winter is on my head, but eternal spring is in my heart. I breathe at this hour the fragrance of the lilacs, the violets, and the roses as at 20 years. The nearer I approach the end the plainer I hear around me the immortal symphonies of the worlds which invite me. It is marvelous, yet simple. It is a fairy tale and it is history. For half a century I have been writing my thoughts in prose and in verse; history, philosophy, drama, romance, tradition, satire, ode, and song, I have tried all. But I feel I have not said the thousandth part of what is in me. When I go down to the grave I can say like many others, "I have finished my day's work." But I can not say, "I have finished by life." My day's work will begin again the next morning. The tomb is not a blind alley; it is a thoroughfare. It closes on the twilight; it opens on the dawn.

That was Mr. WEDEMEYER'S belief. There is one other selection that he read to me or rather recited, because he was familiar with it, that expresses the same thought. He recited these verses with great depth of feeling:

Sunset and evening star,
And one clear call for me!
And may there be no moaning of the bar,
When I put out to sea,

But such a tide as moving seems asleep,
Too full for sound and foam,
When that which drew from out the boundless deep
Turns again home.

Twilight and evening bell,
And after that the dark!
And may there be no sadness of farewell,
When I embark;

For tho' from out our bourne of Time and Place
The flood may bear me far,
I hope to see my Pilot face to face
When I have crost the bar.

I last saw Mr. WEDEMEYER the night he left this city, just before the holidays. We ate the evening meal together, and the conversation was cheerful and pleasant. He was happy in the thought that he was soon to be at home with wife and children, and the main topic of conversation as we sat together was the family, the wife, the little children. There was somewhat of conversation concerning the trip that he was proposing to make to the Isthmus. He was collecting some information for an address he expected to make in the House on the Latin American situation and the Isthmian Canal. We had a very pleasant hour together, and I bade him good-by yonder at the gate at the Union Station. With a wave of his hand he went away. That was the last time I saw my friend.

Worn with the worry and trial of a fierce political contest, he sought a season of rest in the Latin American countries he loved so well. But it was not so to be. The strong bow had been bent to breaking. He was given every attention at the hands of loving colleagues with him, but the spirit was broken and the body weak. As at the eventide he paced the deck and gazed upon the tropic seas and looked up into the beautiful, mysterious, starlit southern skies, the fugitive thoughts of his fevered brain were of home and wife and children and how they might best be provided for. Let us believe that as he looked into the skies he read in the unspoken language of the stars a mystic meaning which only the parting soul ready to meet its Maker may know. Then in a moment the weary soul was at rest, and our friend, ready and without a tremor, met his Pilot face to face—that same good Pilot who said:

I am the resurrection and the life. He that believeth in Me, though he were dead, yet shall he live, and whosoever liveth and believeth in Me shall never die.

Mr. FOSTER. Mr. Speaker, when the word came that Mr. WEDEMEYER was dead every Member of the House was shocked. The people of the district he represented were appalled at the sad ending of this distinguished man. His service here was not of long duration, but short as it was he proved himself to be a valuable Member. He was always attentive to his public duties, endeavoring always to so act that he might give that honest service to the people he so well represented and to the country at large. His speeches in the House showed that he thoroughly studied the questions he discussed, and were always of a high order, giving real information to the Members on this floor. His beginning in life was an humble one. His parents were of that honest, industrious German nationality. When young he learned that in this life what was worth having must be gotten only by hard work, and he did not desire anything unless it came to him in an honest way. As a young man he set out to secure an education that he might be fitted in life so as to have an equal chance with others. He studied law, and began the practice of his chosen profession in his native city, and always kept in mind the lesson taught by the law that justice should be accorded to all men, whatever their station in life might be, and advocated the principle of equal justice to all. His actions were always open and fair. He detested deceit, and had no patience with those who would practice it. Kind and courteous at all times and tolerant of the difference in opinion with those with whom he came in contact, he tried in a kindly way to show by argument that his views were right. He did not frequently take part in debate, but his speeches on the admission of the Territories of Arizona and New Mexico into the Union as States and the bill to give a Territorial form of government to Alaska showed that he was master of his subject and that he was a firm believer in the right of the people to rule and govern themselves, and not that a few should say how the great majority should be controlled. It was my fortune to attend the memorial exercises held at Ann Arbor on the 26th day of last January, and it seemed to me there was universal mourning over the death of this good man, and those in all walks in life came out to the service to do honor to his memory. It is unfortunate that one so young and who could be so useful in life should be taken away so early, yet to Him above must we look for a reason of it all, which we can not now understand. To his bereaved wife and children we can offer but little in the way of consolation, but can only point to the life beyond the grave, which we have faith that he now enjoys.

If we believed that death ends all, then, indeed, would the going away of one of our friends be sad; but we believe that "in our Father's house are many mansions and that He goeth to prepare a place for us." This life at best is not long, yet there are those who accomplish much in the short time they stay here. Our departed colleague performed his part well. God in His fullness of love, I have no doubt, has taken his spirit to Himself and he is now at rest in that place where neither sorrow or death ever come. Let us remember it is not always the best to say of those who are gone that they lived long in the world, but better to say they lived well. We think of our friends when they die that they are gone forever, but they have only gone a little while before us and we will soon follow. May it be said of us we lived faithful to the duty imposed on us. We kept the faith and made a good fight. It does not matter so much to us how we die, but it is of great concern to us all how we live. Sometimes we are apt to wonder why it is that our friends should be taken away when it seems they have so much to live for and there seems to be so much for them to do. But God moves in a mysterious way—and yet let us not forget we live in a natural world, subject to all the trials and troubles of mind and body. Of all the monuments in the beautiful Arlington there are none more fully signifying service and what one can do and how little it matters to our bodies after we are gone than the one erected to those whose bones were gathered on the battle field and were unidentified. Yet they performed their part in the world and went down to

death for the cause in which they believed. Though their names are unknown here, yet I have no doubt their good deeds are recorded above. This should teach us the lesson that it matters but little to us after we are gone whether we have the finest of marble shafts erected to our memory or are buried in an unknown grave, but that our friends may have the consolation that we did our part in the world while we lived. Our colleague lived a good, honorable, and useful life. His private life was clean and above reproach. In his family he was a kind husband and a loving father. WILLIAM W. WEDEMEYER is not dead—he has just gone before. He is waiting on the other side of the river of death. Some day in the bright sunshine of the morning we shall see him.

Mr. McMORRAN. Mr. Speaker, one of the sad events of my 10 years in public life occurs to-day, when I feel called upon to pay tribute to one of the youngest Members of our Michigan delegation, WILLIAM W. WEDEMEYER, who succeeded our Hon. CHARLES E. TOWNSEND on his election to the Senate, and I think the sentiment of the entire Michigan delegation was that Mr. WEDEMEYER was a worthy successor of Mr. TOWNSEND and that the second district of Michigan had every reason to be proud of him as his successor.

When he came upon the floor of the House, with his splendid physique, his commanding position, and his genial manner, he won laurels with all those with whom he came in contact, and every Member in speaking of WEDEMEYER spoke of him in the highest terms and as a young man who would make his mark in the House. He was appointed on some of the most important committees in the House, especially the Committee on Territories, and to him and his associates of that committee were committed the duty of perfecting legislation for Alaska, and his report upon that subject was of a brilliant character and demonstrated to his colleagues that he had made his mark as a legislator. His arguments were forcible and clear in behalf of legislation for that Territory.

WILLIAM W. WEDEMEYER was a fair illustration of the opportunities offered to young men with perseverance and ability in this great Republic. In his early manhood it is said of him that he worked his own way through the high school and also through the University of Michigan. In Michigan he was looked upon as one of the coming men of our State.

He had a great reputation as a public speaker and was in great demand. As a campaigner he was not excelled by any of the Michigan men. He also had a great ambition to represent his district in Congress, and when he was elected with a large majority, I think no young man ever felt more proud of his promotion than did WEDEMEYER.

In talking with him just before the last campaign of 1912 I saw that he felt somewhat uneasy and was quite nervous over the possible results of the election. He said to me on different occasions that he felt that his district was largely "progressive," and just what the outcome would be he was unable to say. He felt ambitious to be returned, and after the campaign was over and defeat faced him, on his arrival at Washington I met him on different occasions and he seemed to be very much depressed, especially so just before he started for Panama. At that time he came to me and began deploring his defeat and could not understand it after all the hard work he had put in, and I saw that he was uneasy and in a moody condition. I endeavored to cheer him up by saying to him that if I had his ability, his wonderful physique, his ambition, and his profession, I should feel grateful to my district that they had relegated me to private life, but I saw I had made no impression upon him, and when I saw the account of his trip to Panama it seemed to me that he must have been out of his mind at times, as he had every reason to look forward with pleasure to his future life. He had a wife and three little children, who I know were very dear to him; his wife especially was all wrapped up in the future of their three children. He had a nice little home at Ann Arbor, was respected by his community, and that he should have thought it necessary to end his life in the way he did, leaving the responsibility upon his wife for the bringing up of that little family, leads me to think that he could not have been in his right mind.

I had hoped that our Michigan delegation during my career might not be broken by death, and when WEDEMEYER came amongst us I think the delegation felt proud of his association and little thought that his life was to end at so early a period, and we can only hope in crossing that great river to the great beyond that he has gone to a more fitting scene than we have to-day on earth.

Mr. HAMMOND. Mr. Speaker, WILLIAM W. WEDEMEYER was born near the city of Ann Arbor, Mich., of humble parentage. He went to school in the neighborhood of his home. He attended the great university in the city of Ann Arbor and worked his way through. He began the practice of his profession in the same city, and became a respected and eminent citizen of that community. He represented the district in which that city is located in the United States Congress. In childhood, youth, and later life he was identified with that part of his State.

It was my fortune to attend the memorial services held in the city of Ann Arbor. Never have I seen a greater genuine tribute paid to any man than was paid to our colleague on that day. Not only were the most distinguished men of the State present, but a great concourse of people, made up of those who knew the boy and knew the man.

I have heard it very often said by young men starting out in life, "I feel that I can not do quite so well here at home. I would like to go to some other place to make my way." Not so with WEDEMEYER. He stayed with those who knew him from his infancy, and no word of mine, and no other word that may be spoken, can tell a better story of the worth of the man than the simple statement that those who knew him best loved and admired him most.

I was on the boat going to Panama that carried Mr. WEDEMEYER there. I did not know him very well prior to that trip. I had met him perhaps half a dozen times. Of course, his mind was then affected, but apparently there are no two cases of mental disease that are just alike. He could speak of his delusions logically and reasonably. That he had delusions there is no doubt, but much of the time his mind was clear. During the trip to the Isthmus I learned much of the man. I should say that Mr. WEDEMEYER was one of the most ambitious men I have ever met. He was anxious to retain his seat in Congress. The loss of it was a great disappointment. He was anxious to play a part in public life, but he desired to make a record embellished by valuable service to the people he represented. He wanted to make a good record. He was ambitious to serve his country well. Ambition is too often allied with selfishness; but when a really ambitious man is unselfish and desires to serve others and be of use to them, the possibilities of his public service are almost infinite.

Shortly after we left New York Harbor I went to Mr. WEDEMEYER's room with him, and he showed me there a photograph of his wife and his children, and he spoke of them in words of pride and love. It seemed that his thoughts were centered upon two things: First, his family and what might come to them in case anything should happen to him; second, the blow to his prospects in having his public career checked. He brooded upon what he deemed his misfortune. Indeed, his greatest delusion was, as my friend [Mr. McMORRAN] has said, the belief that he could not be a great man, an able man, and a strong man out of public life. He felt that too much had been taken from him. He desired to stay in public life, because he knew that he could be of service to his country, because he knew he could bring honor upon himself and happiness to his family. In all things the family seemed to come first. He knew that his mind was diseased. He believed that it was irreparably injured. He thought he would never be a well and strong man again. Cherished ambitions gone, his mental strength failing, he feared he would be a burden to his loved ones instead of a help to them. Disappointed, grieving, sorrowing, another great quality of the man exhibited itself. I said he was ambitious. He was unselfish as well. He cared not what became of him if no others suffered. He could not bear to live to do no good for others and to be of no help to his family.

In the twilight of an early evening these thoughts came upon him. He looked at the bright stars above, at the black waters below, and, like a brave and courageous soldier, he went to a soldier's death.

Mr. HAMILTON of Michigan. On the night of January 2, 1913, word was flashed back to land from the steamship *Panama*, bound northward from Colon, of the death of WILLIAM W. WEDEMEYER by drowning.

The tangled thread of life which his troubled mind had been picking at for many feverish days and nights was ended and the problem "to be or not to be" was solved.

At the meridian of his physical and mental powers some lesion somewhere, some rift in the thin partition between the normal and the abnormal, had let in strange, insistent voices, urging him out into the unknown.

Then night settled down upon the sea and the ship with its little company of passengers and crew, with their little artificial social distinctions and their little plans for permanence, went on its way; but the soul of WEDEMEYER had gone out into the illimitable spaces of eternity, on its way to the God who gave

it, in the region where "there shall be no night" and where "they need no candle, neither light of sun, for the Lord God giveth them light."

From time immemorial life has been compared to a voyage on which all set out with high hopes of treasure and renown, and some drop anchor in the lotus eaters' changeless land of rest and nothingness, and some are wrecked upon uncharted rocks, and some are lured to death by false lights; and some, gray with experience, battered by storms and disciplined by danger, with furled sails, come at last into the final port, where, whether only a faithful light in a cottage window awaits them or the boom of welcoming cannon greets them, the voyage is over and the cargo, whether of gold or "sand for Nero's circuses," is discharged.

WEDEMEYER, though young, had fared well and fared far, and early in life had learned to be his own pilot.

Without money and without backing he had gained a collegiate education and graduated from both the literary and law departments of the University of Michigan by dint of sheer hard work.

He spoke English and German with equal fluency and had read deeply in the literature of both languages.

His mind had been disciplined by scholastic training and by a postgraduate course in the practice of law and the school of politics.

He had been in turn commissioner of schools for his home county, deputy railroad commissioner of Michigan, consul at Georgetown, British Guiana, for a short time, Member of Congress for one term, and had been defeated by a narrow majority in the election of 1912.

His father and mother had come from Germany to the better opportunities of America, and their son illustrated in his own career what an American boy, endowed with energy and high ideals, can accomplish here, and his career gave his name significance.

Names are useful to identify us as items in the census list, but a name means little except as some one has given it character.

If you pick out a man in a crowd and ask who he is you are told his name, but that means little more than a means of arbitrary identification, except as the man himself has made his name mean something, and it means less when he is labeled by inheritance with a name of which he is unworthy.

Whether he realizes it or not, every man is giving his name a meaning every day by what he does and by what he says, confused though the meaning may be between what others take him for and what he himself guesses he may be. So names pass into history and become synonyms of patriotism, heroism, war, or craft.

The name WEDEMEYER stands to us who know him for 6 feet of physical manhood, illuminated by a character for honesty, courage, perseverance, steadiness, and sobriety, trained by study and research, warmed by a genial humor, and inspired by love for his family.

But, in a deeper sense, like Schopenhauer, we question in vain who we are; and after all the arguments for centuries of "doctors and saints" and scientists and philosophers "about it and about," we "come out by the same door wherein we went," and the conclusion of Paul condenses it all into a sentence, "If Christ be not risen from the dead, then is your faith vain."

Andrew D. White quotes Bismarck as saying of his early life:

> Many an hour did I spend in hopeless despondency, believing that my own and other people's existence was aimless and useless, perhaps only an accidental emanation of creation, arising and disappearing as dust from rolling wheels.

But if we gain courage by believing that we are not here by accident—that creation is not all a curious coincidence—if we gain courage and self-respect by believing that we are here by design of some supreme intelligence which cares, then the ancient questions come back to generation after generation—

Why must tragedies like this come upon us?

Why should fears and sorrows and temptations and criminal impulses crouch and lie in ambush like beasts of prey, not only in the human brain but all along the way of life?

Why the prodigality and the waste of life?

Why the brevity of life—the swift, short interval between our coming and departure—between the beginning of aspiration and the oblivion that closes over it?

Why, in this brief interval, do some, like motes, dance in the sunlight and others strive always in the shadows?

And why are talents, wealth, and power distributed unequally?

And the wisdom of the ages, speculating about things the knowledge of which is denied us, answers that eternity is long, without beginning and without end; that all is not ended here; that each is held accountable for what is given to him; that if this world were a garden of plenty, where there was no evil and therefore no choice between good and evil, then there would be no merit in resisting evil.

That, in our daily choice between good and evil, in our buffetings with circumstances, in our fights "with beasts at Ephesus," within us and without, we make character; that without character we would be nothing, and that by what we are we shall be known in eternity.

We say in sorrow it is not fair that one man should have to go through life with hunger, disappointment, suffering, and failure tracking his sinking footsteps, while another keeps step with laughter, plenty, and success; but somehow, as time ticks on, some of us come to understand dimly—to see through eyes "red with the rust of unshed tears" that perhaps success is not all of life and that fame and wealth and power are not the best things in life, nor suffering and failure the worst things in life.

But if the hope of conscious existence after the death of the body were to fade out of human life all this would be meaningless—the logic of existence would be utterly gone; the consolation of the weary and the oppressed would be turned to ashes, and the cries of human anguish, the prayers of human aspiration, would echo backward upon a hopeless world from a black, impenetrable wall, and the highest aspiration to nobler manhood would be gone.

If the belief that there is another stage of existence, where the day shall break and "the shadows flee away"; where the logic of life shall stand revealed; if the belief that there is an existence beyond this visible, tangible universe, where even man, sitting in judgment on himself, shall be obliged to recognize that he can not gather what he has not sown; if the belief that there is an existence beyond what our senses tell us of, where what we shall be shall have just relation to what we have been here—if all this shall fade out of human belief, then the very foundations upon which this huge yet delicate fabric of laws, government, and social institutions is built would slip from under us.

We say in sorrow it is unjust that a man in his prime, at the beginning of a career, should be cut down; that the hope men set their hearts upon should turn to ashes.

But shall the entity evolved out of yesterday and to disappear to-morrow querulously argue why and wherefore, with the power that made it, as it goes on its way?

Besides, who knows that a career has been cut short?

Tenacity of life is strong within us. We are seldom ready to lay down our tools and go out and shut the door forever; we always think we might have done more and better work, that the revolving wheel of life might have stopped at some lucky number, or that failure might have been transmuted into success.

George Frederick Watts spoke of his paintings as "only studies of the picture that might have been"; but who knows?

Who knows when the years would have begun to tarnish the golden age of cooperating talent and power of execution into the dimness of age, senility, and incompetency?

Time and again we see evidences that even experience is no safeguard against mistakes; that if life were patriarchal in its length each day would still bring new problems, and that the longest life ends where it began—in a dream of happiness never realized.

Old Jacob lived an hundred and thirty years. He had seen the angels of God ascending and descending. He had seen God face to face and still lived, and yet he told Pharaoh that "the days of the years of his life" had been "few and evil."

It all comes back to this: If this little space in eternity which we call life is the beginning and the ending of it all, then it is an inexplicable tragedy; if it is a stage in a journey onward, then it is an opportunity.

Mr. SLOAN. Mr. Speaker, the end of the Sixty-second Congress comes on apace. The week days and nights are filled with pressing legislation, while our Sabbaths are crowded with congressional memorials. No Congress of our history can equal our necrology record. Six Senators out of 96 and 19 Representatives out of 394. A mortuary loss beyond that of the so-called hazardous occupations. Almost constant attendance at sessions, away from usual comforts of home, under the fitful and varying season and climatic conditions of our National Capital, the tribute to the final taxgatherer has been heavy indeed. Hurried home visits for strenuous primary or election campaigns have severely tested the human fiber. It is little wonder that the weaker links of muscle or nerve have so often given way. The figure presented should be at once a pathetic plea against the Executive exercising extraordinary prerogatives

and the exactions of a critical constituency. In the falling off of this term's membership extreme age has had little part. Continued and lingering illness but little more. The shock of physical accident has claimed its victim. In most cases death has been but the climax of toil and strain, resulting in mental or physical weakness, not noticed by the rest until the weakened link had snapped and a garland graces the deserted desk. Then it is admirers speak and his colleagues mourn.

Congressman WILLIAM W. WEDEMEYER was among the fallen. Among his colleagues perhaps one of the last expected to be summoned. Like many of us, he was a new Member. In meeting my colleagues I judged after the manner of new Members. Of the old and distinguished Representatives we adapt our estimate to that resultant measure of a public man made by press and platform. Because every man who enters here is subjected to that leveling process based on praise or blame of colleague, criticism or encomium of the press, and the bold utterance, favorable or unfavorable, of the platform. Our judgment, therefore, of the older Members is, in part, ready-made. But new Members judge their fellows by stature, personal appearance, and those peculiar qualities beaming from countenance and seen in movement which go to make up the individual.

I looked upon our late colleague from Michigan with interest and admiration. He came from that lake-locked State of the North where so many men preeminent of brain and brawn have not only graced the public capital, but in the activities of the world made for themselves a quality and name which might be termed "Magic of Michigan." This is true not only of mature men, but our brother's alma mater on every field of collegiate manly sport has made the name of Michigan carry with it respect of public, and often consternation, to the opposing team or crew. Tall, erect, powerful, vibrant with energy, his features gleamed with intellectual force. When later seen in his early congressional forensic efforts there was predicted for him a great career, and for his State and district a distinguished Representative. Toward the end I saw him grow in power, influence, and esteem. To him the future seemed most kind.

The exigencies of disturbed political conditions brought about the defeat of many strong men and did not spare our friend. Defeat to him was a bitter draught in an unwelcome chalice. More bitter to him than to many others. Like too many, he erred in construing temporary rejection as a reflection upon his record and ability. That is not always a true test. The sovereign will is expressed regardless of record, service, or ability. Being sovereign, it brooks neither question nor criticism. So, the rejected servant must not seek to measure too accurately the consideration he has tendered for the favor the public may extend. The public seldom makes demand for us. She owes us no certain term. Her refusal to extend should neither be criticized nor commended.

He was one of a congressional party leaving New York for Panama, the scene of the world's greatest engineering feat. It was at that point where Columbus sought to find a passage to the Far East; but four centuries have taught us that it must be made; it can not be found. Congressman WEDEMEYER knew the tropic region, having ably represented his country's interests in that vicinity before his election to Congress. It was thought that the healing breezes of the sea would give him rest and restore his health; but six days on the Main merely accentuated his malady. So, the visit of our company to the great canal and its activities were not shared by him.

On January 2 we left Colon for New York on the ship *Panama*. It was a bright, balmy day. The Caribbean, known to seamen as "that fretful mistress," was unusually calm and inviting. We rejoiced in the glad thought that we were all "coming home." It was not thought that one of our number was "going home."

We watched the receding landmarks as the sun sank toward the other ocean. The Columbus statue faded from vision. Colon under its palms fell behind the horizon, and as the night came down the signal lights of Porto Bello alone told of solid earth. I talked with our brother just before nightfall. To attempted quip and labored joke he gave reluctant ear; but when I spoke in the language of his fathers and recited verses in Teuton tongue, he brightened and responded in kind, seeming then more like the "distinguished Member from Michigan" than I had observed for many days. Another hour had not passed when the tragedy of the southern sea had been enacted.

The sea had taken on a gentle roll, but it seemed with no fretful anger wrought. It was not dark, though no moon was there. The southern cross in majesty hung pendant in its place. The guard on the hurricane deck was low. His body fell athwart its rail. There was a splash and he was gone. "A break in the wave, and he passed from this life to a rest in the grave." In vain were engines stopped; bootless the searchlight swept the neighboring sea; and without result were boats, with hardy sailors manned, sent on missions of search.

> And our stately ship went on
> To its haven under the hill,
> But O for the touch of a vanished hand
> And the sound of that voice that is still.

Sadness and gloom marked our homeward voyage. Upon our memories were impressed that tragic scene which, until the final summons comes to us, whether on land or sea, we exchange those memories for present knowledge of our brother in that—

> Land far away 'mid the stars (as) I am told,
> Where they know not the sorrows of time,
> Where the pure waters wander through the valleys of gold,
> And life is a treasure sublime.

Unlike the oral musing of the melancholy Dane, he saw no "sea of trouble"; he may have found a sea of rest. We will not vaunt the stern philosophy of Aristotle nor yet take comfort from the stoicism of Seneca. We have a philosophy more modern and more comforting. It is the philosophy of Him "who doeth all things well," and who of us will say that it has not been so?

Had we our choice we would much prefer that a bell should have tolled, a shroud provided, and the body given to the earth; that a marble monument or granite shaft should mark the place; that an acacian shrub should stand above; and that flowers should be laid by loving hands to link him with their lives. But now only upon a chart marking distance from land, with memoranda of latitude and longitude, can his tomb be designated.

When we think of this place, near the historic shores of the Spanish Main, there is an interest prompted in his resting place. We know the coral reefs are there; layers of whitest pearls are in the sunken caverns; shells of rainbow beauty gleam and gems of richest quality, by nature placed, lie in the depths profound. In that vicinity lie sunken treasure-laden galleons and rich argosies sunk by sea-swept tempest or purposely sent to bottom to escape the pirate's capture. Doubloons of rich old gold are there; sparkling jewels dropped from shrunken fingers and richest ornament by beauty worn all lie in the "hollow sounding and mysterious main." But the richest, brightest, purest of all the gems and jewels as tributes paid to that exacting and remorseless deep are the mind and life of Congressman WEDEMEYER, for whom we this day sincerely mourn.

Mr. J. M. C. SMITH. Mr. Speaker, the hand of death has rested heavily on the Sixty-second Congress. Heretofore as I have listened to kind words and loving tributes of Members of different States delivered in memory of their dead brothers, I thought that Michigan was extremely fortunate in having no such office to perform. But at a time when we were thinking least about it the hand of death visited our delegation and took the youngest member, the one whom we thought might be the last to go. I am especially pleased to hear the tributes of love, affection, and esteem delivered here to-day not only from his colleagues from Michigan but from other States. It shows the high esteem and respect in which he was held by the Members of this House.

Mr. Speaker, Hon. WILLIAM W. WEDEMEYER, Congressman from the second congressional district of Michigan, elected at the November election of 1910, was serving his first term as Representative from that district when death overtook him on his way back to Washington from Panama.

Mr. WEDEMEYER was born in Washtenaw County, Mich., and after attending the district schools of that vicinity he went with his parents to Ann Arbor, where, after graduating from the high school, he worked his way through the University of Michigan with the untiring energy which characterized all that he did, and his beloved alma mater to him was always a personal pride and the subject of his constant solicitude. Mr. WEDEMEYER was nearing the age of 40 at the time of his death. He was a lawyer by profession, and had won an enviable reputation at the bar. He was a close student, a fine orator, and a convincing speaker. Before coming to Congress he had held many positions of honor and trust. He had served as school commissioner of his county, and was appointed deputy railroad commissioner of his State under Gov. Pingree. Subsequently he became consul to British Guiana, in South America. All of these positions he filled with credit and honor. Trained in the severe school of experience, when the morning sun of life, so full of hope and promise, seemed to be rising and shining most brightly, when success seemed so certain, when the public was so expectant of his superior ability and his great intellectual powers, he laid down the burdens of his activities amid the cherished hopes of his friends that to him would be long life

and long future usefulness, and he passed to the great beyond, a loved, esteemed, and greatly admired friend, husband, and father. His life's work and duties are ended, but the many deeds of kindness and of worth performed by him will remain an inspiration to us all and to those who come after us, and especially to those who, single handed and alone, must battle for position and honor. That the world is made better by his efforts, that his pure, upright, and noble life will lead others to higher walks, let us firmly believe. Let us cherish the hope that all will be well in the future and that we may perform our full duty, face our tasks, and as citizens take up the duty of performing better our part. Emerson says:

There is no record left on earth,
Save in the tablets of the heart.

WILLIAM WEDEMEYER was a man of exemplary life and high culture, and endeared himself to all by his cheerful, jovial, buoyant nature. He was a statesman; his State, his colleagues, and his acquaintances expected much of him, and their admiration for him was akin to affection. Large of stature and of heart, everybody loved him.

Mr. WEDEMEYER was greatly interested in his congressional work and duties. He practically carried his work with him, whether at his room, his office, or on the floor of the House, and found little time for diversion or entertainment. We can almost see him now there at his desk, when debate is the most strenuous and interest the most intense, reading, writing, working—always busy. "That is WEDEMEYER, of Michigan," was pointed out in the gallery and whispered on the floor of the House, when his large, stately, manly form passed down the aisle, always with a smile and a kindly word for all.

In the discharge of his trust the public welfare was his greatest solicitude. He conversed freely with his colleagues concerning the details of the measures upon which he voted, and his actions thereon were uniformly right. Public life to him carried no secrets. He served on the important Committees on Territories and on Expenditures in the State Department. He worked hard to give home rule to Alaska, and joined with his colleague, the Delegate, Mr. WICKERSHAM, in his greeting to that far-off land:

Hail from the land of the northern light,
Whose arctic halo illumines the night.
Hail from the land of the midnight sun,
Where the mighty Yukon's waters run.

Mr. WEDEMEYER's extensive travels, scrupulous uprightness, and high sense of honor gave him particular fitness for these positions. He was not returned to Congress in the election of 1912, and while he felt the defeat keenly, he seemed in good spirits and to be reconciled to the result, but overwork, a fall, and sickness undermined even his iron constitution.

It was my privilege to be present at the memorial exercises held in his home city of Ann Arbor. There thousands of his fellow townsmen, friends, and neighbors, with many from other cities and States, met in University Hall, where formerly he had received his college degree with highest honors. They paid high respect and tributes of love and esteem to his memory, and many testified to the worth of his splendid life.

We do well to meet here to-day and in this Chamber, the place of his last activities, to give expression to our admiration of the man and do reverence to the memory of our departed colleague. It is not given us to know or to look into the future life. Possibly some of us hesitate because death seems a long way off. However that may be, it is certain to come, and as Covert said on an occasion similar to this:

To the past go more dear faces,
Every year,
As the loved leave vacant places
Every year;
Everywhere their sad eyes meet us,
In the evening's dusk they greet us
And to come to them entreat us,
Every year.

But the true life draws nigher
Every year,
And its morning star shines higher
Every year;
Earthly hold on us grows slighter,
And its heavy burdens lighter
And the dawn immortal brighter,
Every year.

Mr. SWEET. Mr. Speaker, as one of the long-time friends of WILLIAM W. WEDEMEYER and one of his companions upon the trip to Panama, I wish at this time to briefly express my affection for him as a friend, my appreciation for him as a man of extraordinary ability and promise, and my admiration for his self-sacrificing heroism.

No one who had the good fortune to know Mr. WEDEMEYER intimately could fail to recognize in his friendship a peculiar quality of loyalty and whole-hearted devotion which ignored the existence of self-interest or political or other barriers. He valued men for their intrinsic worth. If they measured up to his standard of character and devotion to duty, he took them into his great heart without reserve. Such friends he found in all parts of the State of Michigan, and such friends he found among his colleagues of the Sixty-second Congress, who uniformly reciprocated his sentiment and now mourn his untimely decease with a deep sense of personal loss.

It is not my purpose to dwell upon the extraordinary mental equipment of Mr. WEDEMEYER or the success of his brief but honorable career, which gave promise of greater victories to come. I shall confine my remarks to a single phase of his character, which was brought out in the strongest colors during the last days of his life. Those of you who knew him merely as a conscientious worker in this House could hardly have realized the existence of the qualities to which I refer. Intimate friends who were not with him at the last could not have fully understood and appreciated them.

Within a few days the whole civilized world has been shocked at the news of the death of Capt. Scott, the great English Antarctic explorer, and his brave companions. No narrow line of nationality prevents the free expression of sympathy for these martyrs to the cause of science and admiration for their courage and endurance. The newspapers tell us that Capt. Lawrence E. G. Oates, whose invincible bravery in the Boer War obtained for him the title of "No Surrender Oates," a member of this band of explorers, performed an act of heroism never surpassed in the annals of history. With hands and feet badly frozen he believed that he had become a drag upon his companions and a menace to their escape. Leaving the little hut in which the party had taken shelter, with that simplicity which is characteristic of true greatness, he remarked, "I am going outside and may be gone some time"; and so he walked forth into the night and into the storm, never to return.

Such acts of self-sacrifice are not limited to any age or country. They are an honor to human nature. They glorify mankind.

Those who were with Mr. WEDEMEYER during his last days know that one department of his mind was the victim of serious disease. They know that just as a wounded soldier may sit and contemplate and freely discuss the chance of saving a mutilated member of his body, so did our friend endeavor to diagnose his own mental derangement. They know that he was fully convinced that recovery was impossible and that the future held for him no prospect of happiness for himself or of adding to the happiness of others. More than that, they know that by his own process of reasoning, which no argument could overcome, he was convinced that from that time forth his physical existence would be an ever-increasing burden to those he loved best.

Deploring as we must the possible error of his reasoning no one doubts its sincerity. If relief for Capt. Scott and his party had without their knowledge been within easy access, it would in no way have detracted from the heroism of Capt. Oates. The all-important point is his belief. We can never know the tortuous processes of reasoning which passed through the mind of our colleague, but from what he said to me on the last day of his life and from what he said to other members of our party, as well as myself, during the days previous, I shall never have any doubt that an intention to sacrifice himself for what he believed to be the good of others inspired him, and that the impulses of a great and generous heart were substituted for the control of a brain which no one realized more clearly than himself to be diseased.

Sensitive, conscientious, modest, and unassuming to the point of self-depreciation, he would be the last one to claim credit for what he did, and if he had spoken a final word it would have been like him to simply say, "I am going outside, and may be gone some time."

Mr. SHARP. Mr. Speaker, three weeks ago to-day, with the sky overhead as beautiful and as clear as reigns outside of this Chamber at this noonday hour, there was gathered in University Hall at Ann Arbor a notable gathering of mourners. Four thousand of that college town's people, augmented by many men of prominence from all over the State of Michigan and the National Capital, had come to do reverence and express their sorrow at the loss of a distinguished citizen. In that great assemblage were men high in the State's and Nation's public life, and instructors of the university of national reputation. On the platform near the center and about whom were gathered those who were to participate in the memorial ceremonies sat the venerable Dr. Angell, for a generation the president of one of America's greatest institutions of learning. With that calm dignity and serenity of countenance, the outward manifestation

of the spirit and nobility of character within, the presence of this grand old man of learning would in itself have sufficiently attested the regard and high esteem in which he whose death we here mourn was held among his own people. At the side of the venerable Dr. Angell sat President Hutchins, the virile head of that great university. On either side of him were seated distinguished men of Michigan who had come to express their sorrow and in one common voice sound the praises of the one for whom they mourned. In front of them sat with bowed heads, first and nearest to the platform, the closer friends of the deceased, and then the townspeople, filling every chair in the pit and galleries of that great auditorium—the scene on many occasions for a half century of rare educational, musical, and festal events.

Beginning the ceremonies early in the afternoon, as one speaker after another reviewed the life and character of our departed friend and colleague, the setting sun pouring through the western windows had flooded the chamber of mourning with its mellow light before the exercises were concluded. Of the speakers, some who had known him as friend and fellow townsman, spoke of his early struggle in life to secure the means by which he might pursue his studies through the university; others, whose acquaintance began with him in his early manhood, spoke in feeling terms of appreciation of his sterling qualities as a lawyer; while others who had been his coworkers in civic and political life referred in terms of highest praise to his achievements in that broader field of activity.

Such, my colleagues, were the scenes attending the memorial ceremonies of the late WILLIAM W. WEDEMEYER, in his home town of Ann Arbor on that Sabbath afternoon in counterpart to like ceremonies which we are attending to-day. Though the cruel waves of a tropical sea, in a most fateful manner, had robbed these ceremonies of his poor body, yet to those who knew him he was just as much present in spirit as though his living person was again among them, and the memory of what he was will dwell with them as long as they shall live.

It was President Garfield who said of Mark Hopkins, the president of Williams College, where he attended, that to have been merely acquainted and associated with him was in itself a liberal education. With how much more truth may it be said of the advantages, both as to the moral and mental training of one whose whole life has been spent in the atmosphere and environment of the great men who have since its beginning guided the destinies of such an institution as the University of Michigan. It has been said that poets and authors have in many instances won their inspiration from the scenes surrounding their childhood days, and we know that this must be true to some extent with men of lesser fame. Who shall say that that love of knowledge, those qualities of sterling character, and that desire to be useful to his fellow men did not spring from the inspiration of that institution quite as much indeed as from the knowledge of books which WILLIAM WEDEMEYER imbibed from his studies at Ann Arbor? May we not see in these attributes a reflection of the influence of example which came from association with those gifted men, and may we not—and I speak as an alumnus myself of that grand old university—also find an explanation for them in no small degree, not alone in the very environment of a town upon which nature has herself lavished so many charms in its hills, dales, and charming sylvan retreats on the banks of the Huron, but also from the daily contact with the townspeople so enlightened and alive to the importance of according to their students a most kindly and sympathetic welcome? WILLIAM WEDEMEYER would have indeed been recreant to his duty and false to his whole training had he been anything else than the splendid example of American manhood by which we knew him.

Others of his colleagues who have been fortunate in knowing him for a longer time than I have to-day justly spoken in praise of his services as a Member of this body. From my acquaintance with him, I think it not unwarranted to say for him that had the fate which governs human affairs held in store for him more kindly things and given to him a longer span of life his abilities and sincerity of purpose would have placed him in the front rank in the delegation which so ably represents his native State. My first impression of him as he appeared in earnest debate upon this floor never changed. Indeed, that impression settled into a firm conviction that he was destined to play an important part in the legislation of Congress if his constituents had the wisdom to see in him the promise which all of his colleagues could see. While we mourn his loss to-day, my colleagues, not only to the State and the Nation, but as deeply personal to ourselves, yet may we not be comforted in the thought that though that great mind, full of potential capacity—that temple of reason—was tottering to a fall, yet his last act was, after all, one of heroic purpose, and as he lived so he died, his last thought one of devotion and one of conscientious duty as husband and father, as the remnant of that clouded intellect saw it to be, to those he so dearly loved?

Mr. WILLIS. Mr. Speaker, my colleague from Ohio and others who have spoken on this occasion have referred to the memorial exercises held at Ann Arbor three weeks ago to-day. Those exercises certainly were a wonderful and touching tribute to the memory of a great man. Several of the friends of our deceased brother have asked that at least one of the many notable speeches made on that occasion shall be preserved in permanent form. I therefore ask unanimous consent to insert in the RECORD the remarks of former Congressman John J. Lentz, delivered on that occasion.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent to print in the RECORD the remarks of former Congressman Lentz at the memorial services referred to. Is there objection?

There was no objection.

The matter is as follows:

Former Congressman John J. Lentz, of Columbus, Ohio, spoke at the Ann Arbor Wedemeyer memorial exercises not only as a close friend of Mr. WEDEMEYER but also in behalf of the American Insurance Union and in behalf of the Masonic bodies of the city of Ann Arbor, as follows:

"Never before and probably never again shall I occupy the same relation to any memorial service in honor of any man or woman as that which inspires me to perform a threefold duty to-day. I speak from a heart overflowing with gratitude and affection, remembering the fidelity and cordiality of Brother WEDEMEYER'S friendship from the 22d day of February, 1895, when we first met in this hall on the occasion of my delivering the Washington Birthday address on behalf of the law department of this the greatest of all the American universities.

"I speak of Brother WEDEMEYER, mindful of the eloquent and sympathetic words spoken by him in my own home on the 25th of July, 1910, in the parting hour when my best friends carried away from me forever the frail frame of her whose pure love, brilliant mind, and sympathetic heart were the greatest treasure and the brightest light that ever came into view upon the horizon of my earthly career.

"I also speak as the chosen representative of the Masonic bodies of this beautiful city of Ann Arbor, the home of his alma mater and the home of my alma mater, and as the national president of the American Insurance Union I speak of him as the national counselor of its national board, governing the fraternal and financial destiny of an institution extending its protection and fellowship to the homes of 28,000 good men and women throughout these United States, together with the tens and tens of thousands of their children who, through their parents, have learned to love the name of WEDEMEYER.

"Our departed brother became a member of the American Insurance Union on the 14th day of September, 1899, and was initiated in Golden Rule Lodge of the Masonic order of this city on the 12th day of April, 1900, and was passed and raised from degree to degree through the Blue Lodge, the Chapter, the Commandery, and reached the Shrine in the fall of 1906.

"My brothers of the Masonic order here advise me that he was always willing to help at all of their functions and that he was a strong and efficient factor in the growth of the Masonic order here. Those of us who knew him away from his home in this municipal center can appreciate how fully and how happily he served our Masonic brothers in their every purpose and their highest aims and ideals. From the beginning to the end of his Masonic career he demonstrated to each and every brother of that order, as he has always demonstrated to each and every member of every organization with which he was affiliated, that he was a man, every inch a man, free-born, of good repute, and well recommended and better and better recommended from day to day as men knew him better and better in his increasing power and influence and service.

"Our departed brother was no ordinary man. He was an example, and a leader in every walk of life. He was of heroic stature, physically, mentally, and morally. His was a personality so happy, so generous, so industrious that those who knew him best will never forget him nor will they ever realize that he has taken his departure and entered upon a career still more active in a sphere much larger than this our common mother earth. Philosophers, theologians, and scientists have for thousands of years discussed and analyzed the question of immortality. To all who knew WILLIAM W. WEDEMEYER, such discussions are vain and futile, because it is impossible to think of him without feeling and saying with one accord: 'Of course we shall meet him again.' We are as sure of his immortality and of meeting his genial companionable identity when we get into that future world ourselves as we are of our personal identity to-day in this world.

"If it be true, as Emerson has said, that to be rich in friends is to be poor in nothing, then well may we content ourselves and congratulate his good wife and children with the suggestion that WILLIAM W. WEDEMEYER was a millionaire in this world and he will be a multimillionaire by the time we join him in the world to come.

"It was Telemachus, of Athens, who said: ''Tis ever wrong to say a good man dies,' and there is no member of the national board or of the national cabinet or anywhere in the chapters of the American Insurance Union who will not agree with this old Athenian philosopher.

"It will be impossible to find anyone who knew our departed brother, WILLIAM W. WEDEMEYER, who will not agree with us that 'to know him was to love him.' His great, generous heart loved all mankind. He exemplified in his work and in his personal association with each and all of us the doctrine of 'loving his neighbor as he loved himself.' He was not only a true fraternalist but a great fraternalist—a positive, earnest, industrious soul that overlooked no opportunity and lost no opportunity to serve his fellow man.

"He was too broad and too great in his sympathies and in his generosity and in his religion to recognize class, faction, creed, or sect. He believed in a God that taught him that 'He who serves man the most loves God the best.'

"By every word and every act of our departed brother he taught us the value, the beauty, and the holiness of 'courage, honor, courtesy, and fidelity.' By every word and every act he taught us that he not only preached but practiced these great virtues, and with it all and

through it all he devoted himself to our creed of 'help in need' and 'all for one and one for all.'

"Each and every member of the national board is proud of the friendship, fellowship, and comradeship of our national counselor, the Hon. WILLIAM W. WEDEMEYER, and proud of his national distinction as a public servant, and grateful to his good wife and his three little children for the many hours, days, weeks, months, and years of his good time which they so generously permitted him to contribute to the cause and upbuilding of the American Insurance Union. We shall ever be grateful to his good mother, who gave him birth on the 22d day of March, 1873, and prepared him in his youthful years for a life and a career of honesty and fidelity so noble, so pure, and so true to his fellow man that we may justly claim for him what some distinguished Roman said of his friend: 'He was a better friend to everybody than anybody is to anybody.'

"We feel sure that we do not overestimate the great work of Brother WEDEMEYER's earthly career when we say that his untimely death, before he reached the age of 40, was largely due to the fact that ever since his boyhood he has crowded into each day of his life two or three times as much work as is ordinarily done by active and energetic men.

"In bearing testimony to his high ideals, his untiring energy, his restless anxiety to do more and more each day for all humanity, we feel justified in saying that it is not too high praise to claim for him that as a public servant, associated with Gov. Pingree and other distinguished men of the great Commonwealth of Michigan, and also associated with the great and good public men who make up the high and honorable body of our American Congress at Washington, he accomplished more within the short span of his earthly career than most men accomplish who live God's allotted years of threescore and ten.

"We are proud to have had the fellowship of such a graduate of the great University of Michigan, whose broad scholarship, brilliant oratory, and eminent statesmanship won for him and his alma mater a national distinction and prominence of more than a master's degree.

"Each member of our national board joins with the good wife and children of our departed brother in tearful sympathy in a bereavement over a loss that extends far beyond the walls of their good home and touches every one of the 28,000 members of the American Insurance Union, and touches all good men and good women in the United States who appreciate and honor the memory of Brother WEDEMEYER's generous, self-sacrificing, patriotic devotion to the betterment and advancement of his fellow men. And each and every member of our national board mourns with the members of his family and extends them the most sincere sympathy and tenders them every possible assistance in their bereavement.

"Remembering our good brother's happy personality, we can best express ourselves in the words of James Whitcomb Riley:

"'I can not say, I will not say,
That he is dead—he is just away.
With a cheery smile and a wave of the hand
He has wandered into an unknown land
And left us dreaming; how very fair
It needs must be, since he lingers there.
Think of him still the same, I say;
He is not dead—he is just away.'

"In the words of George Eliot, we are sure that he has—

"'Joined the choir invisible
Of those immortal souls who live again
In minds made better by their presence.'

"Or, in the words of Bulwer Lytton, let us say:

"'There is no death; an angel form
Walks o'er the earth with silent tread;
He bears our best loved things away,
And then we call them dead.'

"In our common grief, our utter helplessness, we cry out in the poetic thought of George Dyre Eldridge:

"'We come from the chambers of silence, the gift of the gods is breath.
We go to the chambers of silence, the gift of the gods is death.'"

LEAVE TO PRINT.

Mr. HAMILTON of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have leave to print on the life, character, and public services of the late Mr. WEDEMEYER.

The SPEAKER pro tempore. The gentleman from Michigan asks unanimous consent that all Members may have leave to print in the RECORD remarks on the life, character, and public services of the late Mr. WEDEMEYER. Is there objection?

There was no objection.

THE LATE SENATOR NIXON.

The SPEAKER pro tempore. The Clerk will read the next special order.

The Clerk read as follows:

On motion of Mr. ROBERTS of Nevada, by unanimous consent,

Ordered, That Sunday, February 16, 1913, be set apart for addresses upon the life, character, and public services of Hon. GEORGE S. NIXON, late a Senator from the State of Nevada.

Mr. ROBERTS of Nevada. Mr. Speaker, I present the following resolutions, which I send to the Clerk's desk.

The Clerk read as follows:

House resolution 841.

Resolved, That the business of the House be now suspended in order that opportunity may be given for tributes to the memory of Hon. GEORGE S. NIXON, late a Senator from the State of Nevada.

Resolved, That as a special mark of respect to the memory of the deceased and in recognition of his distinguished public career the House, at the conclusion of these memorial exercises to-day, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

The resolution was agreed to.

Mr. ROBERTS of Nevada. Mr. Speaker, we have assembled here to-day in an humble way to pay our respects to the memory and sterling character of the late Senator from Nevada, the Hon. GEORGE S. NIXON.

I knew him well. He was my friend and yours. He was cut down in the midday of life, at a time when he had become a most important factor in the upbuilding of his beloved State.

His life's work here is ended. The death angel has called him home. The friends he left behind will see him here on earth no more. The voice is hushed, and in the silent confines of a lonely tomb beside the crystal waters of the Truckee he sleeps the sleep that knows no waking—a fitting resting place for one who loved his native heath.

Warbling songsters in the trees,
Wild flowers waving in the breeze;
Sagebrush perfumes—God's behest—
A fitting place for one to rest.

His life was one worthy of emulation and shows what can be accomplished by one who starts out in the race of life under the most adverse circumstances but who carries with him a mental and a moral compass the needle of which points to the north pole of all that is fair, upright, and honorable in life. And yet he is not gone. He is among us, and in our every walk of life we feel his very presence. His life was so closely interwoven with the social, moral, political, and business fiber of our State and Nation that his death was a severe blow.

He was a plain, blunt, business man, quick, decisive, and possessed of wonderful energy. He received his early education in the stern school of adversity, and though possessed of millions at his death was ever mindful of the lowly rounds of life's ladder by which he did ascend. He was charitable, but his charity was of that healthy sort so seldom seen. What he did for others was never known. His left hand knew not what his right hand did.

His vast wealth was honestly acquired from the various industries of Nevada, and every dollar represented an honest endeavor to build up and husband the resources of an undeveloped State. His name was ever a guaranty that the many enterprises in which he was engaged were sound, stable, and legitimate; and when the panic of 1907 struck Nevada and many of the financial institutions began to close their doors, it was the Hon. GEORGE S. NIXON, directing a well-planned policy of endeavor, that saved countless millions of dollars to the people of Nevada and averted what seemed to be a death blow to Nevada and her industries. His banks, with his name and personal fortune behind them, stood as solid as the granite base of the high Sierras.

Born of humble parentage and nurtured in the wide and open fields of the western frontier, it was but natural that his pulse should beat in harmony with the common people and that he should ever be democratic in all things.

As a judge of men he had few equals. He was quick to see and quick to act. He had a wonderful grasp of national problems and was recognized as one of the safest men in the United States Senate. He was no orator and made no pretenses to being such. He was simply a plain, blunt, business man, who studied political questions and applied to them the same rules that guided him in business affairs. He faced the problems of life as he met them. He knew no such word as fail. He never whimpered or complained. He went through life an optimist, spreading sunshine along his pathway. He rejoiced with those whose fortunes brightened up their lives and sorrowed with those whose lives were veiled in sadness.

Loyal as a husband and father, true to the interests of his family, proud of his home and its surroundings, proud of the State he represented and which he did more toward advancing and developing than any other man, living or dead, he has passed on through life a respected, honored man among men, whose good works will live long after the foot of Time has trodden down his marble tombstone.

Senator NIXON was born in Placer County, Cal., in 1860. While a mere boy he took up the study of telegraphy in an office at Newcastle, near his home, and mastered it. He was soon recognized as apt, honest, and trustworthy, and was offered the position of operator at a small station on the C. & C. Railroad in Esmeralda County, Nev., which he accepted. From that time on his rise was rapid. His work was of such a character that in 1881 he was promoted to a higher position as operator at the Humboldt House, on the main line of the Southern Pacific. While in that position he made many influential friends who, recognizing his ability, offered him various positions of trust. He finally accepted a clerkship in the Washoe County Bank. He remained with that institution two years, thoroughly mastering the banking business. In 1886 he opened the First National Bank of Winnemucca, Nev., and, although he personally had but

$2,500 in cash at the time, the bank soon became known as one of the strongest financial institutions in the State.

In 1890 he was elected a member of the State legislature, and in 1905 he was elected United States Senator to succeed Hon. William M. Stewart. He was renominated without opposition and reelected in 1911. His stand upon public questions was open and aboveboard. He shrank from no duty, but met all opposition with characteristic frontier determination.

He was a State builder and a governmental mainstay. Whatever he engaged in, be it mining, farming, or politics, he applied to it the strict cardinal principles of honesty, sincerity, and determination, which crowned every effort with success.

He was a leader among men and an organizer of rare tact and constructive ability. He was practical in all things and scorned the theoretical. The true qualities and attributes of American manhood were developed in him in his early youth, and throughout an active life in private and public affairs he always took the lead. Independent, broadgauged, determined, and bent on accomplishing results, he was a potent factor in the upbuilding of the State and Nation.

Shortly after the great Tonopah mining excitement, at the solicitation of George Wingfield, he went to Tonopah, and while there associated himself with others in the establishment of a bank. He also invested in mining properties, which in a short space of time put him in the millionaire class. Subsequently he and Mr. Wingfield secured control of the Goldfield Consolidated Mines Co., of which he became president. This last investment added millions to his fortune. He afterwards disposed of all his mining interests to Mr. Wingfield and devoted himself almost exclusively to banking, farming, and stock raising.

He was ever true and loyal to his friends, which to a great extent made of him the admirable character that he was. Honest, big hearted, firm, and substantial, he commanded the respect and confidence of all who knew him. Ever at the front of the procession in all things which tended to the advancement of State and National affairs; ever bending his energies to do something worth while, he stood out preeminently as Nevada's foremost citizen.

He had in himself a continent of undiscovered character, and true to himself, true to his family, true to his constituency, true to his country, he acted the Columbus of his own soul.

The dark clouds of sorrow have hovered low over the homes of friends throughout the Nation, who realize that in his death one of the strong pillars of stable government has been removed and that those engaged in life's battle will see him on the firing line no more. Such is life. Such is death. It comes to all. It is inevitable.

And after all, what is it? A journey to an unknown land, from whose shores no traveler has ever yet returned.

A little while and those of us who now do mourn will take the selfsame journey. Season after season will come and go. Unborn mountain peaks will rear their heads above the deep blue waters of old ocean. Historic facts well known to-day will fade to dim tradition. Empires that flourish now will crumble and decay. All, all, will pass away. Naught will remain more inspiring, more enduring, than the priceless legacy of a good name. Such a heritage has the late Senator left to his family and his country.

> The memory of his good deeds will ever stay,
> A lamp to light us on the darkened way;
> A music to the ear on clamoring street,
> A cooling well amid the noonday heat;
> A scent of green boughs blown through narrow walls,
> A feel of rest when quiet evening falls.

Mr. KAHN. Mr. Speaker, practically every Sunday during the present session of Congress has been devoted to memorial services in honor of some departed Member of the Senate or the House. It has been said "Death loves a shining mark." Surely he has hurled his shafts in the Congress of the United States with terrific effect upon the membership of the two Houses during the past year.

Among those who have fallen in the good fight for the advancement of the welfare of the citizens of this Republic is GEORGE S. NIXON, a Senator from the State of Nevada. He was only 52 years old at the time of his death, and yet during the brief span of years that he was permitted to walk upon this earth he arose from poverty to affluence; from a lowly station in private life to an exalted position in the affairs of the Nation. He was able to perform these things because he had innate ability. His life fully exemplifies the latent possibilities that dwell within the frame of every American citizen.

He was born on April 2, 1860, in Placer County, Cal. His parents were pioneers who had journeyed from Tennessee to the Golden State. His early life was spent upon the hillsides that encircle the town in which he first saw the light of day. As a farmer's boy he roamed at will over the foothills of the Sierras. His opportunities for education were limited; he was taught by experience, and his knowledge was practical rather than academic. The outdoor life to which he became inured in his youth gave him a rugged constitution, and his communings with nature prepared him for those larger activities to which he was called after he had attained man's estate. He was of a most cheerful disposition. He was possessed of that quality which men call "personal magnetism," and he drew others toward himself in every walk of life into which he entered. His kindliness of manner and his readiness to extend a helping hand to those who were less fortunate than himself endeared him to all who were privileged to know him. In the Senate of the United States he was always active in advancing the interests of the far West, that section of our country which he knew so well and whose needs he endeavored most assiduously to supply. He had just been elected to a second term when the hand of death was laid upon him. The people of the State of Nevada recognized his true worth. He had contributed liberally from his store for their entertainment and their creature comforts, and when the news was flashed to them that GEORGE S. NIXON had answered his last roll call they felt that they had lost a true benefactor, a faithful public servant, and a public-spirited and kind-hearted fellow citizen. He had been faithful to them in his lifetime; they mourned his untimely death.

Mr. HAYES. Mr. Speaker, I am very glad to be present on this occasion to pay my simple tribute of respect to the memory of GEORGE S. NIXON, late a Senator from the State of Nevada. As has already been stated, Senator NIXON was born within the confines of my State and grew to manhood among the glories of the Sierra Nevada Mountains. He was a splendid example of what the youth of this land may accomplish by industry, temperance, energy, and perseverance. Coming from the smallest beginnings, a farmer's boy, he rose to be one of the great financiers of the West, and finally to fill the exalted position of Senator of the United States for his State.

I did not know Senator NIXON until I came to Washington as a Member of the Fifty-ninth Congress in 1905. I afterwards came to know him as one of the hardest working Members of the Senate, though not one of the noisy ones. He toiled as hard in the interest of his State and people as the hardest worked Member of either House and gave to the discharge of his official duties the full measure of his manly devotion. A less manly man would have chosen a life of ease and enjoyment, which his ample means would have enabled him to do, instead of cheerfuly and faithfully taking up the grinding task which we here know is the lot of the man who is chosen to represent his State in either branch of the Congress of the United States. Faithful to every duty, he merited and received the full measure of confidence of the people of his State, as he did of his colleagues and of the Members of this House. In 1910 he was nominated by the people of Nevada by an overwhelming majority, and afterwards unanimously elected by the legislature of his State to succeed himself, an honor that is given to but few men in the history of this country.

GEORGE S. NIXON was not only an honest, conscientious, and faithful legislator, he was a faithful, generous, and loyal friend, as I can testify from personal experience. His warm, generous heart prompted him to many unselfish and kindly acts that others than the recipients knew not of, but these flowers of affection will be always cherished and preserved in memory by those who knew him well as the brightest ornaments in the life of a most successful and much honored man.

Mr. Speaker, life is full of tragedies, many of them unseen, although enacted before our eyes. Few of them have the dramatic setting of the tragedy that accompanied the decease of our late colleague from Michigan, Mr. WEDEMEYER, who has been spoken of here this afternoon; but in the death of Senator NIXON one of these tragedies was enacted. The circumstances surrounding his taking off were particularly distressing. A man just in the prime of life, marvelously successful in business, happy in all his family and social relations, honored by his State as few men are honored, loved and respected by the distinguished men of the Nation, prepared by seven years of experience to render to the people of his State and his country a service in the Senate of the United States more valuable by reason of that experience, he was snatched away from it all by the hand of death and translated to other scenes and activities. To our short vision it looks as if such a result was all wrong, as though evil or chance had come in to destroy, so far as this man is concerned, the perfect and beneficent plan that an all wise and loving Creator is supposed to have for each one of his children. Our limited judgment would lead us to think that this man should have been left in his position of

honor and service until, full of years, like ripened fruit, he dropped to the earth when all men would say, "It is well; he has finished his work—now let him rest."

But a larger knowledge possibly, a more enlightened faith perhaps, has made many of us fervently believe that human life reaches not from the cradle to the grave, but from the cradle beyond the grave to the furthest stretches of eternity; that death is not the end, but only a step, an epoch in the continuous life of man, only changing the outer garments and stepping into another room, larger and more beautiful than the one we left, where the sunshine streams in brighter, where love is fuller and truer, where opportunity is broader and larger, and where, if we have here done well our part, the spurs to effort and achievement may be less selfish, and nobler and larger than here. This earth life is but the primary grade of that human school whose curriculum is not bounded by our years here, but reaches far into the great beyond. To those who have come to know this it will seem certain that, although unknown to him and to us, our brother and friend had finished the lessons of the primary school, and that therefore the Father has called him to a higher department, where larger development and wider knowledge await him, where not rest and inaction will claim him, but larger opportunity and wider usefulness will call into full activity every faculty of his manly and earnest nature. This thought should bring some consolation to those to whom he was near and dear as well as to us, his fellows, who knew him in the halls of legislation.

To most of us the death of Senator NIXON was most sudden and unexpected—probably not so to him. But in any case a man engaged in the faithful discharge of the duties that life brings to him, and who is living and doing day by day the best that is in him, needs no warning, no preparation for death. He is always ready. So was it with our friend. I am persuaded that he entered the life beyond as he lived in this—calmly, confidently, hopefully—and that all is now well with him. As we remember his generosity and manly virtues, as we think of the success and the honors to which he came from humble beginnings and an apparently unpromising environment, let us not forget that success for most men is only the result of intelligent, continuous, and earnest effort, and that the highest possible honor that can come to a man is a useful, well-spent life.

Honor and shame from no condition rise.
Act well your part; there all the honor lies.

THE LATE REPRESENTATIVE M'HENRY.

The SPEAKER pro tempore. The Clerk will report the next special order.

The Clerk read as follows:

On motion of Mr. ROTHERMEL, by unanimous consent,

Ordered, That Sunday, February 16, 1913, be set apart for addresses upon the life, character, and public services of Hon. JOHN G. MCHENRY, late a Representative from the State of Pennsylvania.

Mr. ROTHERMEL. Mr. Speaker, I offer the following resolution.

The Clerk read as follows:

House resolution 842.

Resolved, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. JOHN GEISER MCHENRY, late a Member of this House from the State of Pennsylvania.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was agreed to.

Mr. ROTHERMEL. Mr. Speaker, the death of our departed brother, the late JOHN GEISER MCHENRY, and the other Members of this House who passed away in the Sixty-second Congress casts a gloom all over this Nation.

The journey of life lies along the dark valley of the shadow of death. Death knocks alike at the hovel of the poor and the palace of the rich. There is no spot or place on its pilgrimage where its presence is unknown. There is no family that will not feel the sting of it sooner or later.

To-day there is many an eye that is weeping and many a heart that is bleeding; I might even say that the hearts of the people of a great Nation are bleeding on account of the great and good men who passed away in the House and Senate in the Sixty-second Congress. There is many a home whose light is extinguished and whose altars are draped in testimonials of sorrow. There seems to be but a step between life and death, and man is carried from time into eternity by the breath of destiny. All the wisdom of all the ages stretches no farther than the little span of life bounded by the cradle and the grave.

I became acquainted with Mr. MCHENRY in the Sixtieth Congress. I soon discovered that he was a man of the people; he was like a brother to me; he was like a brother to all who knew him; he was modest, as is evidenced by his biographical sketch, which consists of but two lines in the Congressional Directory. He had those qualities and traits of character which tended to spread the sunshine of life among his fellow men and which linked him to his contemporaries in Congress in love and friendship.

He was a careful, courteous, and painstaking Member of Congress. He had those qualifications of a business man which are so necessary in the halls of legislation in order to do the business of the Government successfully. He was patriotic in the performance of his duties, and said to me on more than one occasion that he felt that the Government should be run in the interests of the people so as to create equal opportunities for all, and that as a Nation we should conduct ourselves so as to command the respect of the other Governments of the world. He believed that in governments, as in nature, nothing is stationary, but that there is an onward movement in the course of evolution for the common good of mankind.

With him the paths of duty ran parallel. As a husband and father he was a model; as a citizen he was one of the very best; as a legislator he ranked among the foremost. In short, he was a true American, whose loss is felt in the halls of legislation of the Government.

In order that a sketch of the life of this great and good man may have an imperishable place in the RECORD I want to read an article which appeared in the National Magazine of December, 1911:

"Mr. MCHENRY was born April 26, 1868.

"Out in the sixteenth district of Pennsylvania lives GEISER MCHENRY. He was born in Benton Township, and his ancestors represent the sturdy type of pioneer which has developed the country's best brain and brawn. Mr. MCHENRY was educated in the rural public schools of Pennsylvania, and drove a lumber team in his early youth, dreaming of the time when he could hang out his shingle as a lawyer. He was a practical dreamer, and realized that the first thing to do was to get started in business and await an opportunity to study law. After a course at the Orangeville Academy, he launched into a business career. As farmer, manufacturer, banker, and politician Congressman MCHENRY is a type of Pennsylvania thrift.

"He was elected to the Sixtieth Congress by a handsome majority, which has been greatly increased in the two succeeding terms. A member of the Appropriations Committee, Congressman MCHENRY's judgment is always sought on weighty matters, and whatever MCHENRY advises goes a long way, because he does think out things. He believes thoroughly in systematic organization and rational construction of all interests as related to the best interests of the public, and as a whirlwind political-campaign organizer he has but few equals.

"On his farm home at Benton he is at his best, for if there ever was a man who loved a farm it is JOHN G. MCHENRY. His farms are under the direct personal supervision of Prof. M. E. Chubbuck, a graduate in agricultural science from the agricultural department of State College, State College, Pa. On these farms experimental and demonstrating work is being carried on not only for the benefit of his community but for the entire country. Mr. MCHENRY's belief is that the first important step toward the solution of the high cost of living must be found in an increased production of our soil. And it is his belief that in this increased production great prosperity to the farmers as well as to the consumers will ensue. His bill now pending in Congress, asking for the appointment of an argricultural scientist to be located in every congressional district where agriculture is a leading industry, is said to be a measure of perhaps greater economic importance to the country than any other measure offered or acted upon in our National Legislature in recent years.

"To hear Congressman MCHENRY talk on the subject, even on a railroad train with the deafening roar of whirring wheels, makes one realize that he has got to the root of things. He insists that if the soil of Germany and England, a thousand years older than our soil and in a less favorable climate, can produce 28 to 32 bushels of wheat per acre there is no excuse for our producing an average of 12 to 14 bushels. He has at his fingers' ends—and in his mind's eye, for use on railroad trains—the figures and statistics to prove the economic necessity of this policy of placing our scientific Agricultural Bureau at Washington in immediate touch with the farmers of the United States. This, with scientific farm management, the Congressman declares—and you just have to share in his ear-

nest enthusiasm—will in time make America first as an agricultural nation, viewed from the standpoint of acreage production.

"This would not only mean the addition of countless millions to our national wealth, but also would be a blessing to the people who are the ultimate consumers, and provide for our steadily increasing population. Farm production has been keeping pace with the increased population by the yearly increased acreage, and within the next few years it is feared that all available public lands suitable for agriculture will be exhausted.

"Congressman McHENRY is first and above all a farmer, but the economic soundness of his argument has enlisted the hearty support of officials and wage earners alike.

"A man of high ideals and purposes, relentless in his energy and enthusiasm to accomplish the things that he sets out to do, Congressman McHENRY is deservedly strong in the affections of his constituents. You will not find many people in the sixteenth Pennsylvania district who do not approve of their Congressman's agricultural bill. It is said that by stepping to the telephone he can in almost the proverbial "twinkling of an eye" organize his district for a campaign. All who know him trust him, and in this unfailing confidence is reflected the painstaking service of one who has in him the sturdy Scotch-Irish blood of the clansmen of ancient days, who made things hum when they came to town. The gentle-voiced and gracious Pennsylvania Congressman may not look the part, but the real Scotch-Irish of rough-and-ready ancestors is there."

Mr. WILSON of Pennsylvania. Mr. Speaker, we have met here to-day because the Great Ruler of the Universe, to Whom all men of all ages have bowed the knee and offered up the innermost reverence of their souls, has taken from his activities in this life our beloved friend and associate, JOHN G. McHENRY. And we feel constrained to express in words our love of the man, our appreciation of his life work, and our sorrow at parting with him. Yet how inadequate are words for such expression. No language can convey the subtle sentiment that binds the hearts of friends. No human mind can grasp the full measure of good that follows the acts of men. We are like pebbles from the shores of eternity thrown into the ocean of time. The ripple we make spreads in ever-widening and ever-weakening circles, still having an influence after our senses have ceased to observe their effect.

And so it has been with the life of JOHN G. McHENRY. His good deeds will live after him. I knew him. I loved him. He was quiet, inobtrusive, and unassuming, yet beneath the placid surface was the fighting spirit of a man. The last time I saw him the grim reaper was approaching, but he felt no fear. He was struggling to overcome the disaster that fire had brought in its wake. One could see in the firm lines of his face and the determined expression of his eyes that he was imbued with the spirit of the poet, who said:

More than half beaten, but fearless,
Facing the storm and the night;
Breathless and reeling, but tearless,
Here in the lull of the fight,
I, who bow not but before Thee,
God of the fighting clan,
Lifting my fists I implore Thee,
Give me the heart of a man!

What though I live with the winners
Or perish with those who fall,
Only the cowards are sinners—
Fighting the fight is all.
Strong is my Foe—He advances!
Snapt is my blade, O Lord!
See the proud banners and lances!
Oh, spare me this stub of a sword!

Give me no pity, nor spare me;
Calm not the wrath of my Foe.
See where he beckons to dare me!
Bleeding, half beaten—I go.
Not for the glory of winning,
Not for the fear of the night;
Shunning the battle is sinning—
Oh, spare me the heart to fight!

Red is the mist about me;
Deep is the wound in my side;
"Coward," thou criest to flout me,
O terrible Foe, thou hast lied!
Here with my battle before me,
God of the fighting clan,
Grant that the mother who bore me
Suffered to suckle a man!

LEAVE TO PRINT.

Mr. ROTHERMEL. Mr. Speaker, I ask unanimous consent that all Members may have leave to print on the life, character, and public services of Mr. McHENRY.

The SPEAKER pro tempore (Mr. GREGG of Pennsylvania). The gentleman from Pennsylvania asks unanimous consent that all Members may have leave to print on the life, character, and public services of Mr. McHENRY. Is there objection?

There was no objection.

THE LATE RICHARD E. CONNELL.

The SPEAKER pro tempore (Mr. DOREMUS). The Clerk will read the next special order.

The Clerk read as follows:

On motion of Mr. AYRES, by unanimous consent,

Ordered, That Sunday, February 16, 1913, be set apart for addresses upon the life, character, and public services of Hon. RICHARD E. CONNELL, late a Representative from the State of New York.

Mr. FITZGERALD took the chair as Speaker pro tempore.

Mr. AYRES. Mr. Speaker, I offer the following resolutions, which I send to the Clerk's desk.

The Clerk read as follows:

House resolution 843.

Resolved, That, in pursuance of the special order heretofore adopted, the House proceed to pay tribute to the memory of the Hon. RICHARD E. CONNELL, late a Representative in Congress from the State of New York.

Resolved, That as a further mark of respect to the memory of the deceased, and in recognition of his distinguished career and his great service to his country as a Representative in Congress, the House, at the conclusion of the memorial proceedings of this day, shall stand adjourned.

Resolved, That the Clerk of the House communicate these resolutions to the Senate.

Resolved, That the Clerk of the House be, and he is hereby, instructed to send a copy of these resolutions to the family of the deceased.

The resolution was agreed to.

Mr. UNDERHILL. Mr. Speaker, it is not my purpose to deliver a studied eulogy on our late colleague, Mr. RICHARD E. CONNELL, who departed this life at his home October 30 last, but, rather, to render a brief tribute to one whom I had learned to love, respect, and admire.

My acquaintance with our colleague did not begin until after the election of 1910. For years previously I had known him as an editor of rare sagacity, a Democrat who believed thoroughly in the principles of his party, who was always ready to carry the standard, no matter how inclement the political skies might be and however hopeless the outlook for success. He fought for years before achieving a personal victory at the polls, and his perseverance in presenting upon the stump and through the columns of his newspapers his views finally brought to him the success he so richly deserved.

Our brother was a thorough American. His parents came from Ireland and were very poor in this world's goods. At the age of 13 he was left fatherless and compelled to assist his mother to earn support for herself and the other children. Any man who performs this function to the best of his ability and renders that noble service to a mother is almost sure to develop into a high type of manhood, and our late brother, Mr. CONNELL, certainly typifies this situation.

He was thoroughly American; he had not had the early opportunity for education which he would so much have enjoyed. He was a graduate of the school of experience and must have been an omnivorous reader, as he was one of the best informed of the many men who have had the same alma mater. He appreciated the opportunities presented by this country and was full of patriotism. He had only to look upon the Stars and Stripes to receive an inspiration for an oration that would make the blood of every American tingle with pride. His address on the flag at the first Members' banquet of this Congress a year ago was an eloquent effort full of classical reference and was received with many plaudits of praise.

His remarks upon the occasion of the admission of the Territories of New Mexico and Arizona into this Union, when he dwelt upon the addition of two stars to the flag, will be remembered by all as one of the most eloquent addresses made during the present Congress.

His untimely death just as he was about to be reelected was a great shock. Brother CONNELL had been renominated for election to the Sixty-third Congress and had made a vigorous fight throughout his district.

He was an excellent orator, and his services were much in demand. He had returned to his home after a speaking engagement for the day and evening, and at midnight left his chauffeur at the front door, with an injunction to return early in the morning, as he had an engagement that day that would take him away from home again. The details of his returning to his home, of his retiring and never awakening again, I shall not take the time to depict.

As many of his colleagues were unable, owing to the exigencies of the campaign, to pay personal tribute to his memory by attending his funeral, I ask unanimous consent that I may append to my remarks some articles appearing in the Poughkeepsie News-Press, which he edited before coming to Congress.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The articles above referred to are as follows:

[From the Poughkeepsie News-Press, Oct. 31, 1912.]

HON. R. E. CONNELL'S SUDDEN DEMISE PLUNGES CITY INTO PROFOUND GRIEF—SAD EVENT ELICITS TRIBUTES OF RESPECT AND SYMPATHY FROM COWORKERS IN PUBLIC LIFE, STATESMEN, JURISTS, AND JOURNALISTS—SKETCH OF HIS LIFE.

RICHARD E. CONNELL, Congressman of the twenty-first district, and for 23 years editor of the News-Press, was found dead in bed by his wife yesterday morning at 7.40 o'clock. Death had claimed Mr. CONNELL while he was asleep and when his wife called him in order that he might be ready for the automobile that was to take him to Middletown at 8 o'clock, she believed that he was sleeping peacefully after a hard night of campaigning.

He had returned home at 2 o'clock in the morning, after delivering five speeches, and riding 45 miles to his home. When he entered the house he was in his usual happy frame of mind. He bid Mr. Hawkey, his chauffeur, a happy good morning, and told him to be sure to be on time. When he entered the house, his wife heard him and spoke to him. He answered cheerfully and joked about his youngest daughter, Katharine, being asleep in his bed.

"I won't disturb her," he called to his wife; "she's tired, and I'll go to the small bedroom and sleep."

"But you're tired and must have your own room," answered Mrs. Connell, whereupon she awakened the daughter, and Mr. Connell joked with her as she left his room, expressing regret that she should have been disturbed.

He fell at once into a deep sleep. About 6 o'clock Mrs. Connell heard him sneeze twice, and remarked to another of her daughters that "papa must be awake."

He had requested to be called in time that he might be ready at 8 o'clock to meet Mr. Hawkey's automobile, and when 7.30 o'clock came and there was no sign of his having awakened, Mrs. Connell went to his room and called to him.

There was no reply to her summons. Then she shook him, and still he did not reply. Then she laid her hand on his forehead, and its coldness sent a thrill of apprehension through her. Again she shook him and there came no reply. Hurriedly she threw up the shades and was struck by the pallor of his face. Again she called him, but he did not answer her. Then thoroughly frightened, she called the other members of the family, and at once they realized that in the night death had come into their midst.

Death, ever relentless and cruel, respecting not the ties of family or friends, is a sad and solemn thing, come when and in what form it may. But there are occasions when it is as startling as it is sad, because of its suddenness and the prominence of its victim. We stand appalled when one in the midst of an energetic and useful life, and for whom we expect many years of devotion to the public weal, is in a moment called from his activities by that summons which none may disobey, at a time least expected and which to human view appears to be the very meridian of existence.

The announcement that the Hon. RICHARD E. CONNELL, Representative in Congress from this district, had died at his home early Wednesday morning was received with bated breath and tremulously, sorrowfully passed from lip to lip, while some sought corroboration by renewed inquiries, as if hoping that it might not be true.

HIS SUDDEN DEATH.

Mr. CONNELL retired nearly an hour after midnight Tuesday, apparently in his usual health but feeling somewhat tired, intending to go to Middletown, Orange County, Wednesday morning. At about 7.40 o'clock a. m. his wife went to his room to call him, and found him dead in bed.

The cause of death was heart disease, according to the statement of Dr. Powell, who was hastily summoned but whose services were not needed, the straggling spirit having burst the walls of its clay tenement and winged its flight.

Mr. CONNELL, as is well known, was serving his first term in Congress, and had made a record that secured him a hearty and unanimous renomination, with full prospect of reelection. He had been very active in the present campaign, and was sent by the national Democratic committee to speak in Vermont and Maine previous to the State elections in September.

IN THE HARNESS.

During the past month he had been addressing meetings in his own congressional district, taking in several places daily and speaking at each. On Tuesday, the day preceding his death, he spoke at Lake Mahopac, Patterson, and Towners in the afternoon and at Carmel and Brewsters in the evening. He had intended to go to Middletown, Orange County, Wednesday, to meet Hon. William Sulzer and make an address there, and speak again in the evening at the opera house in this city.

EARLY DAYS.

RICHARD E. CONNELL was the son of the late Richard and Ann Phelan Connell, who came to this country from Ireland in 1846. Richard was born in Poughkeepsie, November 16, 1857. He attended St. Peter's parochial school and the public schools until he was 13 years of age, when he went to work to support his mother, who was then a widow with several small children. His employment was at labor on the old P. & E. Railroad. Later he learned carriage painting in the shop of Streit & Lockwood, and afterwards was an attendant at the Hudson River State Hospital. While at the latter place he became prominent in amateur theatricals, his talents in this direction leading to frequent demands for his services at social and public affairs. While there he began taking an active part in politics and became a forceful speaker. One of his speeches at Hyde Park attracted the attention of the late Maj. James W. Hinkley, who soon afterwards employed Mr. CONNELL as a reporter on the News-Press. His industry, intelligence, and fidelity soon won promotion and in a few years he became managing editor, which position he held until April, 1911, when he commenced his duties in Congress.

HIS JOURNALISTIC WORK.

RICHARD EDWARD CONNELL was a lucid, convincing writer and was versatile withal, frequently dashing off gems of poetry and fanciful sketches worthy of celebrated authors. His limited school education was supplemented and replenished by much reading, keeping informed on current events, and with his many duties, and none neglected, he found time for literary culture that fitted him for companionship with learned professors and talented students.

He was a Democrat as a matter of principle, and worked hard and faithfully for the advancement of the party of his choice, using all honorable means to win success, which he believed would in due time come to those worthy to have it. In 1896 he accepted a nomination for Congress against the late Hon. John H. Ketcham, when there was no hope of success, and in 1898 and 1900 was an unsuccessful candidate for member of assembly, in each case making a sacrifice for the benefit of the party he loved. In 1907 he was appointed inheritance tax appraiser and held that office two years. He was police commissioner for three years. In 1910 he was elected to Congress by a plurality of 517 over the Hon. Hamilton Fish, Republican, Mr. Slater, the Prohibition candidate, receiving 677 votes.

CHARACTERISTICS.

Mr. CONNELL was frequently called on to make orations on Fourth of July, Memorial Day, and for schools, colleges, literary societies, religious, and other organizations. He had a clear voice, spoke fluently, and without hesitation, his best efforts being entirely extemporaneous.

A strong feature of Mr. CONNELL's character was his love of and pride in his family. On his return from a journey or an absence of only a few hours, the first thing after entering the office was to take the telephone and talk to his wife and children, though he might be going home in a short time. He was the champion of the soldiers of the Civil War, and never lost an opportunity to honor them and render them any service in his power. His work in securing pensions for deserving veterans is well known and has endeared him to all the boys in blue. It was largely due to his efforts in connection with Gen. SHERWOOD that the last liberal pension bill was passed.

His record in Congress, especially his speech on the admission of the two new States of Arizona and New Mexico, was pronounced one of the best orations and arguments ever made on the floor of the House of Representatives.

DEVOTED TO FAMILY.

His family consists of his wife, who was Mary E. Miller, his daughters, Mary, Anna, and Katharine, and a son, Richard. Mary graduated from Vassar College, and Richard is in Harvard College. During the sessions of Congress the son was his father's secretary. To them heartfelt sympathy is extended in the sorrow we all share.

In religion he was a Catholic, a communicant in St. Mary's Church and faithful to his every duty. He was a member of the Royal Arcanum, Knights of Columbus, and the Order of Elks.

In disposition he was a man to win friends and to hold them. His fellow workers, who knew him probably best of all, are of only one mind in proclaiming their loyal and earnest friendship for him.

TRIBUTES POUR IN.

Tributes which have poured into the city, some addressed to the stricken family and others to the News-Press every hour since the news of Mr. CONNELL'S death became current, are almost Nation wide in their scope, and there is no mistaking their being sincere.

Foes in the political arena were among the first to come forward and acknowledge their real feelings of admiration for the man as a man. Judges of the highest tribunals in the State, municipal officers, associates in Congress—men in every walk of life—joined in the tribute of sorrow.

—

[From Edmund Platt.]

Nothing had ever occurred either in years of strenuous newspaper rivalry or in political rivalry to interrupt the course of my friendship with RICHARD E. CONNELL. That we were rival candidates for the same high office this year made no difference. He was not a man who could for a moment think of cherishing any personal feeling against an opponent. As a newspaper writer Mr. CONNELL was painstaking, just, and accurate. He early developed a faculty for writing and for getting hold of news that attracted attention, and he had no equals in Poughkeepsie in expressing human sympathy or in depicting incidents in which pathos was a leading feature. His own sympathetic, generous nature and his broad experience, which had brought him much into contact with the unfortunate, prompted him to write from his heart.

Let no one think that Mr. CONNELL'S success, that his attainment of his ambition to serve his country in high office, was the result of luck or chance. As a young man when he had to work hard he spent his spare time studying the history of his country and in other profitable reading. He learned the art of public speaking, and when opportunity came to attain a position of prominence he was ready.

There never was a more genial, companionable man, a better friend, or a more generous opponent than RICHARD E. CONNELL.

—

[From Editor Brown, editor Enterprise.]

I have always thought very highly of RICHARD E. CONNELL. He rose from the humbler walks in life by the sheer force of his character. He had ability of a high order, he was true to his convictions, and he was true to his friends. He made a good record in Congress. He was a fine Representative for the people of this district; he was entirely worthy of the high honor that came to him in his election two years ago. It is a great loss to any community when such a member of it passes away. He closed his career in the middle of life, and we must all regret that he was not spared to continue a work for which he was well equipped and well adapted.

—

[From Mark G. Du Bois.]

In preceding Mr. CONNELL a few months on the News-Press, to which he came, if I remember, in 1887, I was familiar with his work and his personality from the start of his journalistic career and with the main incidents of his advancement in politics. Mr. CONNELL was equally facile as a writer and speaker.

In him were combined the poetry, romance, wit, and sentiment of the race that rules the world. Always proud of his Irish descent, Mr. CONNELL had just reason for his pride, for in him were combined all that is best of those qualities that have brought fame to Irish statesmen, orators, poets, writers, and soldiers the world over. Out of every reverse and discouragement Mr. CONNELL always caught a gleam of humor that made all around him smile. Every success elicited a bit of philosophy that made all of us think.

At social gatherings where a song or story were needed to promote the pleasure and interests of guests Mr. CONNELL was always willing to use his talents for the pleasure of others. He gladly prepared speeches and spoke extemporaneously at hundreds of gatherings where the only reward for his time and trouble was the consciousness that he was doing the best he could to serve others.

It is very sad to realize that this brilliant man has been taken away from his family who loved him so devotedly and to whom he in turn gave his whole life to help, to comfort and protect; that he has been removed from his friends, who trusted, admired, and respected him;

and that he lived such a short time to enjoy the success which came to him after a worthy career of many years of hard work.

I join with the editor of the News-Press and others associated, like myself, with Mr. CONNELL in journalism to lay my tribute to his memory before the world. He was a good and useful citizen, a credit to his country and his friends, an honor to his family, and a fine example of the best in humanity of character, genius, and achievement. What Mr. CONNELL achieved was over obstacles that few could have faced and overcome as he did. I deeply regret his death.

—

[Arthur A. Parks.]

The sudden death of Congressman RICHARD E. CONNELL falls as a shock in this community. Occurring without any premonition in the midst of an ardent political campaign in which he had both a personal and professional interest, the sense of fitness seems disturbed and the balance of sympathies deranged.

Mr. CONNELL'S eloquence as a speaker on political subjects brought him a reputation and a demand which broadened his own scope of vision and enlarged the man.

Rising from the ranks by his own efforts he attained a success far in advance of the usual lot in both business and politics, and his loss will be felt in all of his sphere of usefulness.

We extend our sincere sympathy and condolence to the family and friends of Mr. CONNELL in this hour of their bereavement.

—

[Judge Keogh.]

NEW ROCHELLE, N. Y., *October 30.*

Hon. JOSEPH MORSCHAUSER,
Supreme Court:

I am shocked beyond expression at the terrible news contained in your telegram of the death of RICHARD E. CONNELL. May I ask you to convey to his family, on my behalf, my deepest and sincerest sympathy in this hour of greatest affliction? He was a man of sterling ability, a true friend, and a brave and honorable adversary.

MARTIN J. KEOGH.

—

[Judge Hasbrouck.]

Faithful to his beliefs, loyal to his convictions, striving to be and to do right, he pursued his straight course, until he won the high position he held as well in the esteem of all who knew him as in the Government of his country. From a boy driving a dump cart on the construction of a railroad right of way to a leading Representative of his party in the House of Congress is a far step, but that was the breach closed by "DICK" CONNELL through his natural intelligence.

He had absolutely no extraneous help, but conquered apparently insurmountable obstacles. He was wholly self-educated, but thoroughly well educated.

A filial son, a devoted husband and father, a true friend—he will be missed and mourned by many.

His memory will long be cherished and his career should long be remembered as an example and stimulus for emulation by the youth in this country of magnificent opportunity.

—

[William W. Smith.]

I could have cried this morning when I heard of Mr. CONNELL'S death. I counted him as one of my very best friends. I hardly know what to say in the way of a tribute to him. I am still stunned by the knowledge of his death.

Mr. CONNELL was, indeed, a man of rare ability. His attainments were gained wholly through his own efforts. I have watched him ever since I have known him. I know that he established in Congress a name that will not soon die.

—

[Augustus B. Gray.]

In the death of RICHARD E. CONNELL I have lost a friend of many years and one who when engaged in the necessary conflicts engendered by different political affiliations never deviated from the fine sense and high standard of clean political methods which characterized his whole public life.

—

[Edward E. Perkins.]

The sudden death of RICHARD E. CONNELL has been such a shock that I can scarcely find words to express my feelings. There has been during my time no man in public life in Dutchess County whose character, personality, and achievement have made a more lasting impression upon the community.

From humble origin he rose to be our ablest orator and a national figure. His life's ambition was to be a United States Congressman, and we of the Democratic Party may be thankful that we assisted him in accomplishing his purpose. Had he lived until November 5, I believe the people of this district would have reelected him triumphantly.

My heart goes out to his little family, who usurped and enjoyed all of the love and affection that his big heart contained. The Democracy of this district is bereft of a powerful character by the death of RICHARD E. CONNELL. His life, however, has been a beacon to light the way of American youth to the achievement of high purpose and to the accomplishment of laudable ambition.

—

[Democratic county committee.]

Whereas we have learned of the death of Hon. RICHARD E. CONNELL, Congressman from this district and the nominee of the Democratic Party for reelection, and under circumstances that make his passing away a particularly sad affliction to the members of his family and friends and a great loss to the Democratic Party, of which he was an esteemed and respected leader: Therefore be it

Resolved, That we, the members of the Democratic county committee of Dutchess County in meeting assembled, do extend to his family our sincerest sympathy in this their hour of affliction; and be it further

Resolved, That this committee pay tribute to the splendid character, sterling integrity, and magnificent purpose that have always been manifested in his work as a citizen and an official.

Resolved, That a copy of these resolutions be forwarded to the family of Mr. CONNELL, spread upon the minutes of this meeting, and published in the newspapers.

Poughkeepsie, N. Y., October 30, 1912.

WILLIAM C. ALBRO, *Poughkeepsie.*
THOMAS J. COMERFORD, *Poughkeepsie.*
WILLIAM S. KETCHAM, *Dover.*

[Chamber of Commerce.]

The following resolutions were passed by the chamber of commerce Wednesday night, upon the death of Hon. RICHARD E. CONNELL:

"The chamber of commerce is again called upon to express its profound grief and regret because of the death of one of its members, Hon. RICHARD E. CONNELL, and wishes to place on record its high estimation of his character.

"His genius and energy as a man and citizen are shown in the success that has always accompanied his private undertakings, and his work for his city and his district in the congressional body where he represented both so worthily remains as a monument to his greatness of heart and qualities of statesmanship. His fine characteristics as a friend and associate, his courtesy and charm of manner, made all who knew him his loving friends. He was most loved and respected by those who best knew him, and no better testimony of his character can be found than his ability to retain the good will, interest, and friendship of his neighbors. He has now entered upon those great rewards in the hereafter which are received by the just and the good: Be it

"*Resolved*, That in the death of Hon. RICHARD E. CONNELL not only this chamber of commerce but also the city of Poughkeepsie and the twenty-sixth congressional district of the State of New York have lost a valued and respected Member and Representative whom we shall all miss and whose passing we shall profoundly regret. Be it further

"*Resolved*, That a copy of these resolutions be delivered to the family of the late Hon. RICHARD E. CONNELL and also published in the News-Press of the city of Poughkeepsie as the expression of the profound regret of the chamber of commerce, of which body he was so valued a member.

"Dated October 30, 1912.

"E. D. GILDERSLEEVE, *President.*
"E. E. PERKINS, *Vice President.*
"C. W. H. ARNOLD, *Vice President.*
"T. R. BEAL,
"P. C. DOHERTY,
"H. S. REYNOLDS,
"D. W. WILBUR,
"*Executive Committee.*"

—

[William H. Frank.]

This is the worst blow I've had in years.

Why, we were boys together and friends all our lives. I wish to express my deepest sympathy for his dear family; they were the dearest thing in life to him.

I'll never forget his tender solicitude for Mrs. Connell and the children when we all went out in my yacht for a sail up and down the river. He knew every hill and town—the history of each—and it was a most beautiful and touching thing to witness their love for him.

No; I simply can not say the things I would like to say. We have all lost a prince among men.

—

[Prof. S. R. Shear.]

The death of Hon. RICHARD E. CONNELL comes to me as a distinct personal shock, an irreparable loss. I had learned to know him well and to esteem him highly. He was and will continue to be a splendid example to every boy in our city. He believed that life is like a road; a splendid place in which to travel, but a very poor place in which to sleep and dream.

Speaking as a schoolman, I may say that his educational creed was briefly as follows:

"Reading is important, but readiness to perceive and to perform are vastly more so. Literature is valuable, but largeness of life and loftiness of purpose are invaluable. Penmanship is good, but perseverance is better. Drawing is useful, but without diligence no one can be worth while. Science is only a supplement to sympathy, and history but lays the foundation of honesty and uprightness."

Reverence for God, faith in humanity, chivalric regard for women, respect for true manhood, sympathy for age and for helplessness, fidelity to public trust, hatred of cant and insincerity, stood forth in his every life relation and marked him as a man well calculated to stand before kings.

His was the vicarious life. He was willing to spend and be spent. His heart went out to all humanity, and in striving to lift those about him he towered immeasurably toward the lofty ideals created by himself for his own guidance.

He was an honor to our city, a true friend, a noble specimen of God's handiwork, and in his going we are left the poorer. His memory will be a constant benediction, a fragrance that neither time nor eternity can dissipate.

—

[Spencer Sladden.]

The following unique tribute is from an associate of 11 years:

DEAR OLD FRIEND OF MINE: I would not and I could not believe the prints to-day when they told me you were gone; but to-night, as I stood by your bier and held your cold hand and spoke to you and you answered me not, I knew it was all too true.

And as I stood there, dear old friend and comrade, our 11 years together hurried through my mind in a panorama of happy memories. But why should I, now that you are gone, tell those who can not appreciate that which meant so much to you and me, the things that were so dear to us in common. They would not and could not understand the things that to you and me held such a world of meaning.

Who of all the hundreds that mourn you could ever understand the joys and sorrows that were ours—the joys and defeats that we met and conquered together in those happy days gone by, never to return again? But, dear old friend, your victories meant more to me than to all those you knew so well, because we had met defeat and had been crushed by it together more times than those of to-day will ever stop to remember.

And to-night, as my mind builds bridges back over memory's playground to the happy days that have gone never to return, memory's fires burn brightly and light the path that you choose to open.

And so, dear friend of mine, I say good night and God bless you, and I know the world will be better and brighter for your having lived in it, and if there is a lovelier life to come we know that your presence there before us will help to add a gleam of sweetness and sunshine to the pathway of those who are left to follow you.

So once again, as one who knew better than all others your cherished hopes and desires, your sorrows and your joys, I say good-by, dear friend, friend of mine, and may God bless and light your way to eternal happiness.

[E. D. Gildersleeve.]

I considered Mr. CONNELL a very dear personal friend. What I liked best about him was his great love of his home. His eager pursuit of truth and knowledge made him intelligent and competent to serve his country in the several official stations in which he was placed; and he proved himself both efficient and faithful to his trust. His life was exemplary and consistent; he was wise in counsel, and his endowments of mind and heart commanded our highest esteem. We should all be thankful to our Heavenly Father for the gift of such a man, one so worthy of our love. But we should not complain, for he has finally been summoned from the field of conflict to the rewards of the conqueror, leaving to his family a legacy, not of lamentation, but that of a good name, which shall ever abide in our memory. I will close with a clipping I have kept in my Bible for many years—a poem written by Mr. CONNELL himself on the death and burial of McKinley, entitled "McKinley's Grave":

Near two little mounds at Canton,
At rest till the judgment day,
Asleep with his little children,
As if weary of work, of play;
We bid him good-by forever
As back to the strife we go;
How sweet are the years with children
None but the blessed know.
The king in his tomb of marble,
Or high in the hall of fame,
May seem to rest in grandeur
That trappings and stones proclaim;
But sweeter the grave in Canton
Where rests our beloved to-day,
At rest with his little children,
Asleep till the judgment day.

—

[First memorial service.]

The first organization to call a memorial meeting for Mr. CONNELL is the Church of the Good Shepherd, in Newburgh.

An element of pathos enters into this matter.

Mr. CONNELL was to have addressed the men of the church on Friday night, November 1, at 7.30 o'clock, at their smoker.

The meeting will be held, but it will be turned into a memorial for the late Congressman, who was well known to the members and very popular with them.

—

[Other tributes.]

Further tributes from ex-Senator Newbold, Madison R. Aldrich, John K. Sague, Louis P. Haubennestel, D. W. Wilbur, C. N. Arnold, John A. Hanna, Isaac Sherrill, and others were received.

The bereaved family received many telegrams of condolence. Among them were the following:

—

[Telegrams.]

MONROE, N. Y., *October 30.*

Mrs. RICHARD E. CONNELL:

Just learned of the death of your distinguished husband. I have lost a dear friend, and in your sad bereavement I send you and all the family my heartfelt sympathy.

WILLIAM SULZER.

—

NEW YORK, *October 30.*

Mrs. RICHARD E. CONNELL:

I am terribly shocked, and assure you that I sorrow and sympathize with you, and regret extremely that I am not well enough to leave my room.

FRANKLIN D. ROOSEVELT.

—

NEW YORK, *October 30.*

Mrs. RICHARD E. CONNELL:

Accept my sincere sympathy in your bereavement. Mr. CONNELL will be greatly missed in Congress and by his many friends.

FRANCIS BURTON HARRISON.

—

NEW YORK, *October 30.*

Mrs. RICHARD E. CONNELL:

Sincere sympathy in your sorrow. Dutchess County has lost a loyal son.

FRANCIS G. LANDON.

—

NEW YORK, *October 30.*

Mrs. RICHARD E. CONNELL:

Please accept my deepest sympathy. Your great loss is shared by all who knew your husband.

PERRY BELMONT.

—

CATSKILL, N. Y., *October 30, 1912.*

Mrs. RICHARD E. CONNELL:

I extend to you my deepest sympathy in the death of your husband. He was my valued friend, and I share with you in large measure your sorrow in this affliction.

CLARENCE E. BLOODGOOD.

—

FUNERAL SATURDAY.

The funeral arrangements were completed late Wednesday evening. Services will be held at the house at 9.45 Saturday morning and at St. Mary's Church at 10.30. Many out-of-town clergymen will be present at the church service.

Mrs. Connell is completely prostrated by the terrible blow.

Richard E. Connell, jr., who was studying in Harvard, was summoned through a telegram which stated that his father was ill. He arrived in Poughkeepsie at 8.16 p. m., and only learned the tragic news when he arrived at the family home.

—

[Editorial from Poughkeepsie News-Press.]

RICHARD E. CONNELL.

RICHARD E. CONNELL was one of the most conspicuous examples of the self-made man that this community has known in a generation. His public and private life was clean from start to finish. That is a splendid thing to be able to say of any man, but it is not sufficient to say of Mr. CONNELL. He chose early and determined to seek knowledge in order to become a factor and a force for all that is good and worthy and righteous among his fellows, and in the face of crushing odds he succeeded, and so well that his sudden taking away causes genuine sorrow and regret.

He had long ago achieved a fair measure of success in this locality as an educator, writer, and champion of what he thought was right, but his crowning success came when he was made a Congressman and was given a bigger field. There he had already made splendid progress, and those same qualities which had caused him to be respected at home had marked him for distinction abroad. It is entirely fair to say that the people of his district, irrespective of party, were proud of him, and it was a fine thing that his life of toil and endeavor was so richly rewarded. He was proud to be sent to Congress, of course, but his ambition was not political. It was to give to his children that which had been denied him; and by doing his evident duty day by day he lived to learn that sometimes people reward right purpose of mind and faithfulness to principle. Along those lines came Mr. CONNELL's success. As he himself would write of another noteworthy man, "His whole career typifies American opportunity."

"American opportunity!" How CONNELL proved those words.

He wrote many comforting words in this newspaper to those in sorrow. We wish now that we could comfort his sorrowing ones as he has ours. We can only say simply that we are sorry our friend is dead.

Mr. SISSON. Mr. Speaker, I knew Mr. CONNELL intimately. He and I lived at the same hotel. I frequently talked with him about various subjects. Mr. CONNELL was a Democrat in the broadest sense of the word. He believed absolutely in the people and their right to control. Trained and educated, as has been stated, in the school of hard experience, he sympathized with the men who toil, and during all of the conversations that I had with him I never heard him utter a selfish thought. I never heard him utter an unkind word to or of any human being. There was not enough shadow in RICHARD CONNELL'S soul and heart to hide a sinister thought.

Coming, as he did, of Irish parentage, he knew the history of the Irish struggle for liberty, and his soul always went out for any people who are striving to get the right to rule and govern themselves. He not only believed in the general right of the people to rule and control everywhere; but he had an abiding faith in our present form of Government to insure this if properly administered.

He was an intense States-rights man. He believed in the right of local self-government, and he made himself extremely close to me on account of the many expressions of tender regard for the southern people in their struggles during the dark days of reconstruction in the South. I presume the stories that he heard at the knees of his mother and father of the Irish struggle for liberty caused him to have such intense love and devotion for a people who were unfortunate and for a people who were suffering as the people were in the South during those dark days.

I would invite attention especially to one peculiar characteristic of Mr. CONNELL. I believe he had the broadest charity, not only in the sense that he relieved the unfortunate and the poor, but in his consideration for the thoughts and feelings of other people. Frequently on the street I have seen him help an unfortunate person who asked for help. He did it without a moment's hesitation, and he responded to every call, and with the gift, though small, there was a tender regard and sympathy which is always more thankfully received than the gift itself. His charity was so broad that in measuring the faults and foibles of others he was able not only in private life but in public life to overlook the selfishness, to overlook the unkindness of others. He felt that it was the duty of the people of every age to endeavor to answer in the affirmative the question asked in the early history of the world, "Am I my brother's keeper?" He felt that when a people could answer that question in the affirmative, and each and every man could say, "Yes; I am my brother's keeper," that that people would then have solved the great questions of government. I believe firmly that when we shall have reached that position in our development, when the great majority of our people can feel that they are indeed their brothers' keeper, that legislation here and in the various States will be such as will give to all of the people equal opportunity and will bring about a situation that will realize more nearly equal conditions. If we shall be able, as each day goes, to add to our stock of information and knowledge, and to do that which makes us better than we were the day before, we will gradually reach that point where each and every one of us will begin to realize that we are our brothers' keepers.

No man in this world, no man in this complicated society, if he be a true man, can fail to answer the question in the affirmative. When that time shall come in the history of this Nation that men can answer that question in the affirmative, you will find that all of the hatred existing between the rich and the poor will disappear. We will have laws that will regulate the acquisition of property, so that the shrewd cunning of man to acquire property through special privilege and special law will be at an end. RICHARD CONNELL hated with all his Irish heart

this cunning of the unrighteously rich. If we all felt as CONNELL did on this subject, we would be able to more nearly equalize conditions as well as opportunities. It has become necessary, in my humble judgment, for the legislatures of the country to begin to regulate this intellectual cunning exercised in the acquisition of property, so that all fortunes may have a moral foundation. I agree literally with Judge Coleridge, in England, that property rights find lodgment in the doctrine of the general good. When the property rights of the present age and day and generation shall not be for the general good, then property rights ought not to be respected. My departed friend believed in this doctrine. He believed in true progress and true advancement. I am an optimist, but I am not so optimistic that I can be blind to the evils that surround us.

The man who is willing to close his eyes to the weaknesses of his social and civil institutions is the man who is unable to help his day and generation.

CONNELL was more of an optimist than I am. He believed in the final triumph of good and righteousness. And in your private conversations with him he would always fill you with hope. When some legislation would pass the House that outraged me I would always find consolation in talking with my good friend, because he always felt that if a wrong was done it would only take time to right it. He believed that this great Government of ours was an example to all the world, and he believed, as he said in that beautiful speech on the flag, that it was the emblem of equality throughout all the world. The example set by American patriots was always to him an inspiration. I have often heard him talk about the early struggle for American liberty and the part the Irish took in it, and I quite agree with him that if it had not been for the Irish in the Revolutionary War there could have been no success to American arms.

American liberty was achieved largely by the strong arm of the Irish patriots who loved freedom and equality; and CONNELL'S Irish heart went out in tender love for American institutions, and no opportunity ever presented itself on this floor that he was not the first man to fill the hearts of his people with patriotism by his eloquent addresses.

He is an example to all of us, because you can always point to RICHARD CONNELL'S life, when you talk to the boys in the rural districts who are born in poverty, and say he overcame difficulties and poverty, and so can you. The street gamin in every city can find an inspiration in DICK CONNELL. Why? Because here was a man who at 14 years of age had upon his shoulders the support of a widowed mother. For 16 years after the death of his father he worked at everything that his hand could find to do until he finally became a reporter on a newspaper in Poughkeepsie, and for 23 years he labored in this one field and did his people and his party great service, and continued to labor on the same newspaper until he came to Congress.

Every boy in America born in poverty is blessed. The boy who is born in luxury and ease is the boy who is cursed. There is no necessity for the boy born with a silver spoon in his mouth to devote his time and attention to those things that make him a useful man; but the boy who is born in poverty is compelled to struggle in order that he may win, and the struggle makes him only the stronger.

So I would point to DICK CONNELL as an example for all the poor boys in America. Look at him, see what he accomplished. Any American boy with energy and enterprise can accomplish success. DICK CONNELL'S life has been a success. It has been a benediction, and may the boys of America learn to do as DICK CONNELL did, and succeed in spite of poverty and in spite of all obstacles.

Mr. SMITH of New York. Mr. Speaker, it is the rule that men come to Congress to learn the procedure and to study the principles and policies of government. Mr. CONNELL had been a student of government from his early manhood. He entered the House of Representatives two years ago fully equipped to take part in the affairs of this Nation. He came here not as a pupil but as an instructor. He had been a writer of note. He was an eloquent and forceful public speaker. He was familiar with every great question pending in Congress. From the first day he took his seat as a Member of this body he was an essential part of the House, and no Member took a more active interest in the proceedings or had a more intelligent understanding of them than did he.

By education, experience, inclination, and temperament he was prepared for the duties that devolved upon him. He did not devote himself to the selfish demands of a locality or to the partisan problems that are ever present in a national assembly. He conceived higher aims and established loftier ideals. He went into the question of admitting the Territories of Arizona and New Mexico to statehood. When the division over the admission of these Territories appeared to be hopeless, he went forward with the contest, scorning consideration of political or partisan advantage, until, largely through his activity and intelligent persistency, an agreement on the admission of the States was reached.

Few outside of his close associates knew how hard he worked or how much he had accomplished. Despite the fact that he had been in Congress but one term, he was recognized as a ready and active debater. He was ever alert to protect the principles and policies that he avowed. Independent in spirit and free from affectation, he sought in all that he did to perform the highest duty to his country, his district, and himself. He might be described as a practical altruist. He was a militant idealist. He fought for his principles, and he had faith in their ultimate triumph. The House could ill afford to lose such a man. The shock and sorrow of his death sent a pang into the heart of each one that knew him. He was brilliant in conversation, kindly in judgment, and simple, direct, and just in all his dealings. He had an individuality that had impressed itself on his colleagues. A great future seemed in store for him. Those of us who were privileged to know him will not soon cease to mourn.

Mr. MAGUIRE of Nebraska. Mr. Speaker, while we have set apart this day to pay tribute to the memory of our lamented colleague, still I can not but feel how feeble and inadequate must be the effort when we scan the life story of our late friend and colleague, RICHARD E. CONNELL.

What we say here in the world's greatest parliamentary forum becomes the written record for to-morrow in the larger story of a country's growth and a people's progress.

In the perfection of the biographical record of the Nation we must of necessity touch lightly and imperfectly upon the story of one who played a leading part. While these are inadequate attempts of colleagues who know but a portion of his life story and, therefore, feel less the intensity of his virtues, still our utterances may, in a measure, assuage and feebly compensate the loss to a beloved family weighed down under almost unbearable grief.

RICHARD E. CONNELL was born in Poughkeepsie, N. Y., November 16, 1857. He there received his schooling; but at the age of 14 years his father died and he assumed the larger responsibilities and undertook the work of assisting his mother in the support and education of the family. Through boyhood and young manhood days his time was occupied at various industrial callings, but during these years he devoted his spare time to study and the improvement of his opportunities. In 1887 he became a reporter on the Poughkeepsie News-Press and later its editor, remaining with the paper for 23 years.

He has been honored by his home people and his State in many positions—civic, political, and otherwise—and in 1910 was elected to Congress as a Democrat. In the midst of an active campaign for reelection to Congress he suddenly died at his home on October 30, 1912. Death came to him in the prime of life, apparently in the full possession of his intellectual and physical vigor. He leaves in his immediate family a wife, son, and three daughters to mourn his loss.

When Mr. CONNELL came to Congress we lived at the same hotel and it was my privilege to come more closely in touch with him as a legislator and a man. He was companionable, versatile, and cheerful of disposition. It seemed as if the candor and honesty of the man and the very music and sunshine of his soul enraptured you. Modest in manner, unassuming, and big souled, still he had a dignity and intellectual courage which commanded. Mr. CONNELL'S home life must have been a beautiful one, for his true qualities as husband and father were revealed when he was in the company of his family.

His early struggle was much the same as that of other boys of his time, but through the tragedy of events obstacles multiplied around him which intensified his sacrifice. Through the stern school of necessity and the inherent nature of the man he applied and made available a large amount of useful knowledge. In earlier years he became a great reader of high-class literature and a keen observer, who extracted something each day from the everyday incidents of life, and through the advancing years he became a scholar and an educated man in the larger sense and meaning of life's activities.

There was no duplicity or deceit in Mr. CONNELL'S nature and he extended no false sympathy and was easy to understand; he was clean of mind and pure of soul all the way through, and never wavered in his personal conduct or compromised with wrong. While his own standards of conduct were of the highest, still he did not exact from others the application of his own belief or rule of action. Tolerance of thought, he believed,

assured to every other man, the right to act and believe according to his own right standards of life. He was a devout Christian and each day seemed to bring to his soul new inspiration. Faith was an ever-commanding force in the life of our departed friend—faith in his fellow man, faith in his country, and faith in his God. To him it was a divine command and he did not arrogate to himself the right of its interpretation. Although thoroughly informed on matters of faith and religion, still he found enough in the business of human affairs to occupy his time and intellect, and accepted with childlike simplicity the faith and commands of the Divine Teacher.

Mr. CONNELL loved his country and its institutions, because he understood the structure and believed in the principles upon which it rested. Many times have I heard him express with feelings of emotion and pride the utmost confidence in the wisdom of our people and in the ultimate destiny of the American Republic. Every speech and public utterance of his breathed the lofty spirit of patriotism. He was a true American citizen and his State and the Nation will lose in his death a noble son and a man whose service will always merit the highest praise.

Mr. REILLY. Mr. Speaker, it is a singular and sad coincidence that two native-born sons of the great State of New York, one who had become the beloved Vice President of the United States, the other a distinguished Representative of one of her congressional districts, should both end their life work on the same day. On the 30th of October last RICHARD E. CONNELL, in whose memory we are here assembled to-day, passed away from the activities of this world, and on the same day Vice President SHERMAN died.

It was my good fortune to live with RICHARD CONNELL for over a year, and I had learned to love him for what he was worth, a man of the highest ideals, full of sentiment and patriotism and love for his fellow man.

His newspaper activities for 23 years caused between us a fellow feeling that led possibly more even than with others to an interchange of ideas. I believe his training fitted him particularly for the work he had to do in this House, and he came with unusual equipment.

But aside from his spirited Americanism, largely glorified by his noble ancestry, it was in the quietness of his private life that lay his sweetest charm. Devoted to his family above all things else, devoted to his friends, devoted to what he believed to be his life-work. Those of us who were fortunate enough to hear the magnificent speech upon the admission of New Mexico and Arizona to statehood will not for a moment doubt Mr. CONNELL'S Americanism. No finer tribute was ever paid to the flag than he paid on that occasion, when he pictured what the adding of two more stars to that field of blue meant. As he was patriotic in speech, so he was in action. Those of us who were with him on the occasion of the meeting of the new Members of Congress a year or so ago will never forget his recital of "The Fighting Race," Joseph I. C. Clark's beautiful poem, written upon the occasion of the destruction of the *Maine*, and depicting better than our words just what DICK CONNELL felt to be the principle that should impel men to do their duty, especially the duty they owe to their country.

We will long remember—and I wish I were gifted as he was gifted that I might recite that song of the Celt to you to-day as best typifying the fighting spirit for righteousness and for liberty that lived and throbbed continually in DICK CONNELL'S heart. His own patriotic nature was truly shown in those inspiring lines:

"Read out the names!" and Burke sat back,
And Kelly drooped his head,
While Shea—they call him Scholar Jack—
Went down the list of the dead.
Officers, seamen, gunners, marines,
The crews of the gig and yawl,
The bearded man and the lad in his teens,
Carpenters, coal passers—all.
Then, knocking the ashes from out his pipe,
Said Burke in an offhand way:
"We're all in that dead man's list, by Cripe!
Kelly and Burke and Shea."
"Well, here's to the *Maine*, and I'm sorry for Spain,"
Said Kelly and Burke and Shea.

"Wherever there's Kellys there's trouble," said Burke.
"Wherever fighting's the game,
Or a spice of danger in grown man's work,"
Said Kelly, "you'll find my name."
"And do we fall short," said Burke, getting mad,
"When it's touch and go for life?"
Said Shea, "It's thirty-odd years, bedad,
Since I charged to drum and fife
Up Marye's Heights, and my old canteen
Stopped a rebel ball on its way.
There were blossoms of blood on our sprigs of green—
Kelly and Burke and Shea—
And the dead didn't brag." "Well, here's to the flag!"
Said Kelly and Burke and Shea.

"I wish 'twas in Ireland, for there's the place,"
Said Burke, "that we'd die by right,
In the cradle of our soldier race,
After one good stand-up fight.
My grandfather fell on Vinegar Hill,
And fighting was not his trade,
But his rusty pike's in the cabin still,
With Hessian blood on the blade."
"Aye, aye," said Kelly, "the pikes were great
When the word was, 'Clear the way!'
We were thick on the roll in ninety-eight—
Kelly and Burke and Shea."
"Well, here's to the pike and the sword and the like!"
Said Kelly and Burke and Shea.

And Shea, the scholar, with rising joy,
Said, "We were at Ramillies,
We left our bones at Fontenoy
And up in the Pyrenees.
Before Dunkirk, on Landen's plain,
Cremona, Lille, and Ghent,
We're all over Austria, France, and Spain,
Wherever they pitch a tent.
We've died for England from Waterloo
To Egypt and Dargai,
And still there's enough for a corps or a crew,
Kelly and Burke and Shea."
"Well, here's to good honest fighting blood!"
Said Kelly and Burke and Shea.

"Oh, the fighting race don't die out,
If they seldom die in bed,
For love is first in their hearts, no doubt,"
Said Burke; then Kelly said:
"When Michael, the Irish Archangel, stands,
The angel with the sword,
And the battle dead from a hundred lands
Are ranged in one big horde,
Our line, that for Gabriel's trumpet waits,
Will stretch three deep that day,
From Jehoshaphat to the Golden Gates—
Kelly and Burke and Shea."
"Well, here's thank God for the race and the sod!"
Said Kelly and Burke and Shea.

And here's thank God that it has been my fortune, and the fortune of many of us, to have lived and known such a true patriot, such a true American, as DICK CONNELL.

Mr. COLLIER. Mr. Speaker, we have assembled here to-day to pay our tribute of respect to the memory of our late colleague, Hon. RICHARD E. CONNELL, of the State of New York.

Life is but a brief span; it has its sunshine and its shadows; it is characterized by an endless struggle for existence, a perpetual striving for advantage, and the way is strewn with the wrecks and monuments of those who have failed and those who have attained what the world calls success. Its uncertain course is a series of daily battles in which each of us, no matter how lowly our walk in life may be, must play our part.

In the endless strivings and struggles which mark human progress "in the unequal distribution of wealth, power, capacity, pleasure, and opportunity," there are found on every side tragedy and comedy, sorrow and joy, pathos and pleasure, happiness and despair.

In this great struggle some may wear the victor's crown of laurel, while others may go down in dust to dark defeat. For some "breasts may throb with love and lips may thrill on meeting other lips as fond, and life shall be to them a paradise, while other hearts shall bleed and break, and life for them shall be a never-ending night."

There is so much that we can and should do for each other; there are so many ways in which we can lift the burdens from other shoulders; there are so many opportunities presented for improving the conditions of our fellow man, that in the brief space allotted us here on earth of right and necessity our concern must ever be for the living and not for the dead.

But yet it is an eminently appropriate custom sanctified by long usage that on God's hallowed day we should lay aside the cares and the pleasures, the vexations and the trials of life, and reverently gather together to give expression to the debt of gratitude we owe our lamented dead, and pay a passing tribute of respect to the memory of those who have crossed over the river, and "with a countenance like the lightning and in raiment white as snow" wait upon the other shore.

Mr. CONNELL is no more. The kindly heart has ceased to beat. Cut down in the very zenith of his usefulness, suddenly and without warning, his spirit has gone to its eternal rest. He has gone, but his cordial greeting, his friendly smile, his hearty hand grasp still linger in our memories.

Our late colleague did not serve quite one term in Congress. He entered here in March, 1911, and died October 30, 1912. But for over 25 years he was an ardent and able advocate of the principles of Democracy. He was the editor of the Poughkeepsie News-Press for a number of years, beginning his connection with that journal as a reporter in 1887. He was often honored by the Democratic Party, frequently accepting a nomi-

nation at its hands when there was no hope of success, but always ready and willing to make any sacrifice for the benefit of the party he loved.

It was my good fortune to become intimately acquainted with Mr. CONNELL soon after he entered Congress. This acquaintance quickly ripened into a sincere and lasting friendship. We lived at the same hotel, and I had ample opportunity to become familiar with those sterling qualities of heart and mind which so endeared him to all who knew him.

Mr. CONNELL was a man of generous heart, of lofty ideals, and inspired at all times with a spirit of intense patriotism. He was an orator of unquestioned ability. Though his legislative career was short, yet, notwithstanding his brief service here, on several occasions he demonstrated his skill as a logician, his learning as a scholar, his profound knowledge of public affairs, and his power as an orator. His long training as a journalist gave him that experience in marshaling the salient points of his argument which is so essential here, where of necessity the time for debate is so limited.

Our departed colleague was a Jeffersonian Democrat of the old school. He had implicit faith and confidence in the wisdom, the ability, and judgment of the American people.

He believed with the great exponent of Democracy that "Independence can be trusted nowhere but with the people in mass," for "they are the only sure reliance of the preservation of our liberty."

I have never heard that confidence, that abiding trust and faith in the wisdom of the great masses of our people more beautifully and eloquently portrayed than in a speech he made on the floor of the House upon the admission of New Mexico and Arizona to statehood. His speech upon that occasion attracted nation-wide prominence and elicited much applause from those who had the good fortune to be present.

He was discussing that feature in the bill relating to the recall of the judiciary, and though opposing the recall as applied to his own State, eloquently gave expression to the confidence he had in the American people.

"I am convinced, Mr. Chairman," he said in part, "that, so far as the recall is concerned, I voice the present thought of the vast majority of those who sent me here when I oppose it as applied to members of the judiciary or to any other public servant in New York State; but when opposition to the recall involves a denial of the intelligence and patriotism of the American people sufficient to warrant confidence in them to exercise that power to the safety and honor of the courts, I protest against the doctrine plainly defined in that argument. Recall or no recall, the courts are safe in the care of the people, as are the destinies of the Republic. If this be not true, then who shall mark the limit beyond which the people shall not go in government, and who shall curtail their power?

"The gentlemen picture the judge against whom the recall has been invoked by 25 per cent of the voters as consigned to oblivion and disgrace. Pray, what would the 75 per cent of the people to whom the judge would resubmit himself be doing in the meantime?

"Suppose, sir, that by any conception of conditions it were possible to-day for the Standard Oil Co. to apply the law of recall to the judges of the Supreme Court of the United States. Surely it would not be the rabble that would be behind such a recall; but should that powerful organization, with all its millions and all the ramifications of its far-reaching power, array itself behind such a movement, do the gentlemen believe that the American people would not rally around that court and give such an approval to the judges as to dazzle the world by the emphasis of their democracy and the splendor of their power? And if those who are dissatisfied with the Standard Oil decision should invoke the recall, aimed at the court, do the gentlemen imagine that the result would be different?"

The man who gave utterance to that statement was not afraid to trust the people.

His lofty ideals of patriotism were beautifully expressed in the closing words of that same speech, when he said:

"New Mexico and Arizona, this Democratic House of Representatives bids you welcome to the Union. Forevermore be represented among the stars of the most beautiful banner that ever waved between earth and sky. It is the banner whose united stars gleam as a beacon of hope to the oppressed of every land, and under whose shadow liberty dwells and justice reigns. It is the banner for which the father of his country prayed that it might triumph over tyranny, through every danger withstand the enemies of the Republic, and vindicate the inalienable rights of mankind.

"Come, New Mexico and Arizona, enter into the Union, for whose mission heroes have sacrificed their blood on the battle fields of a Nation. Come, make still more invincible, still more beautiful, the American flag, the truest banner of freedom, the sweetest emblem of hope, since the cross cast its redeeming shadow upon a lonely hill."

Mr. Speaker, Mr. CONNELL will long be remembered by those who knew him here. He was faithful to his trust, he was devoted to his duties, he was a conscientious legislator, he was a courteous gentleman, and a consistent Christian. In his death the people of his district have lost a faithful public servant, a sincere friend, and an able advocate.

Upon an occasion of this kind it is our melancholy privilege to give to the family of our lamented colleague the assurance that though the one dear to them is no longer in our midst, yet he is not forgotten, for the tender chords of memory will bring back to us the recollection of him who, with his kindly word, his cheery smile, his gracious and sincere manner, his cordial friendship, and manly qualities, endeared himself to all who knew him.

And though his voice is hushed and silent, his familiar face is missing, and his vacant chair stands empty, yet—

I can not say and I will not say
That he is dead. He is just away.
With a cheery smile and a wave of the hand
He has wandered into an unknown land,
And left us dreaming how very fair
It needs must be, since he lingers there.
And you, oh you, who the wildest yearn
For the old-time step and the glad return,
Think of him faring on, as dear
In the love there as the love here.

Mild and gentle as he was brave,
When the sweetest love of his life he gave
To simple things; where the violets grew
Pure as the eyes they were likened to,
The touches of his hand have strayed
As reverently as his lips have prayed;
When the little brown thrush that harshly chirred
Was dear to him as the mocking bird;
And he pitied as much as man in pain
A writhing honey bee wet with rain.
Think of him still as the same; I say
He is not dead—he is just away.

For—

It is idle to talk of the future,
Of the sad might have been 'mid our tears;
God knew all about it,
Yet took him away from the oncoming years.

God knows all about those who love him,
How bitter that parting must be;
And yet through it all God is loving
And knows so much better than we.

Mr. KINDRED. Mr. Speaker, it is well that we, in life, should, in the midst of life's activities, pause to sacredly observe an occasion like this and to drop a flower and a tear in memory of our departed friends. In the exercise of this high, but sad, duty we not only confer some measure of honor upon those who have gone to "that undiscovered country, from whose bourne no traveler returns" to greet us again on this material earth, but we at the same time cultivate our own conceptions and understanding regarding the highest of things—that is, what we call life here and life hereafter. We ourselves profit in thus meditating upon the virtues and even the failings of the lives of those who have left us and in cherishing the sublime philosophy leading us to an abiding faith in immortality of the soul, which old-fashioned idea, even as a scientific theory, is borne out by much recent investigation.

It is peculiarly fitting, then, that we to-day gather here to memorialize the life and character of one of our most worthy colleagues, RICHARD E. CONNELL, the late Representative from the twenty-first congressional district of New York, who served as a Member of this House with honor and distinction from the date of his election, in November, 1910, to the time of his death.

RICHARD E. CONNELL was born of rugged Irish parents, both of whom—as I have heard him state—came to this country as poor emigrants a few years prior to his birth, which took place in Dutchess County, N. Y., November 16, 1857. He died October 30, 1912, very unexpectedly, from rupture of the aorta, after severe mental and physical strain, incident to his hotly contested campaign for reelection to the House of Representatives. He conducted this campaign as he did every other undertaking, with marked ability, fairness, judgment, and energy. His personal popularity and his force of character behind it was indicated by his election over a strong and distinguished opponent from a congressional district that had always previously been overwhelmingly opposed to his party's principles.

He grew up amid the poor surroundings of a family who had spent their all to seek their fortunes on American soil, and as a

boy and as a young man sought and performed almost any honest work he could obtain, always doing his work well and honorably. Not unlike the great Lincoln, he was ambitious even as a boy and snatched from such hours of toil every possible opportunity for study and mental improvement, going when he could to the public schools.

In his comparatively early manhood he worked his way up to the position of local news gatherer or reporter in and around Poughkeepsie, N. Y., for the only Democratic daily newspaper in that city, the News-Press, which he filled for many years so acceptably to his employers and to the community that he was made, until he entered Congress, the editor in chief of this important paper. In this capacity, as editor, Mr. CONNELL found for many years a splendid field for the development and exercise of his talents as a writer, thinker, and eloquent public speaker, and his talents were in these directions versatile and of a high order. This versatility and literary taste led him also to keenly appreciate not only general literature but also poetry and blank verse, to which he, with his usual modesty, occasionally contributed.

His course and record as a Member of the House and as an active member of the Committees on Territories and War Claims were such as to win for him the approval and friendship of his fellow members and of his constituents, whom he always faithfully and industriously represented.

We come now to consider him in his more intimate and personal relations. Like so many others of the Irish race, from which he sprang, his was a choice, lovable, and true spirit, shining out most to those who knew him best. It was my good fortune to have known him well for many years since 1890, when he did reportorial work in Poughkeepsie and while I was a physician on the staff of the Hudson River State Hospital, located there, and with which he had been honorably connected. He was always a loyal friend, always held and acted on the highest civic ideals, always sympathetic, and was one of the broadest, most liberal-minded men I ever knew. His was a helpful, hopeful life, shedding its luster of generous, cheerful helpfulness upon all with whom he came in contact. He was free from affectation; a constructive, good citizen and neighbor; a patriotic, patient, consistent worker for the upbuilding of his church, his town, his State, and his country; but above all these were those still nobler qualities as a family man, a faithful, tender, devoted husband and father. I was one of several Members of the House who attended his funeral ceremonies at St. Mary's Church, at Poughkeepsie, and was profoundly impressed by the sincere evidences of sorrow, love, and respect manifested by the vast throng who gathered there to honor him on that solemn occasion, representing, as they did, every phase of religious, political, and social life.

A man of RICHARD CONNELL'S life, character, works, and faith still lives; such men do not die, for in the words of an unknown author—

There is no death; the stars go down
To rise upon some fairer shore,
And bright in heaven's jeweled crown
They shine forevermore.

There is no death; an angel form
Walks o'er the earth with silent tread;
He bears our best-loved things away,
And then we call them dead.

Born into that undying life,
They leave us but to come again;
In all, in everything, the same,
Except in grief and pain.

And ever near us, though unseen,
The dear immortal spirits tread.
For all the boundless universe is life;
There are no dead.

Mr. DOREMUS resumed the chair as Speaker pro tempore.

Mr. FITZGERALD. Mr. Speaker, I desire to join in this tribute to the memory of our deceased colleague, RICHARD E. CONNELL. The pressure of public business at this time in the session has prevented me from preparing that comprehensive review of the life and character of this remarkable man which I desired. I did not care, however, to permit the occasion to pass without recording my admiration for one whom I cherished as a loyal friend. Born in the Hudson Valley, he was a typical American citizen. He was one of those described by Artemus Ward as of the class that went to work at 14 years. All his life was a struggle. He was not born with the opportunities or advantages of wealth or social position. His only attributes were character, courage, and determination to do the best possible. Like many men born in the Hudson Valley, where that majestic stream flows quietly and serenely to the sea and nature stands out in bold and picturesque hills behind which the peace-inspiring valleys are cultivated to advantage, he had a deep, broad, and sympathetic nature and was bold and untiring in work and yet was peaceful and loving in manner, all the while doing those things which make the world better.

Mr. CONNELL came to the House well advanced in life, but he had accumulated wide information and had had an experience that well equipped him for the arduous duties of membership in the House. He was not ambitious to do things merely for the sensations resulting. He was not of the showy kind, and he had no desire to attract attention by peculiar and unusual expressions of views upon public questions. He was a man endowed with great common sense, with a very wide knowledge of the history of this country and of the forces and elements that go to make up the country's prosperity. He was an industrious man. Those who were acquainted with his work in the House are aware that he entered with great energy upon the performance of his duties. He was one of the many men who come here and contribute materially to the success of important legislation, and yet because their work is done in the quiet of the study or in the seclusion of the committee room few outside of their colleagues ever know or realize or appreciate how important the services are which they render or how valuable are their contributions to the country's development and well being. I had learned to know and to love Mr. CONNELL. He had a broad, kind, generous heart. He had a loving disposition. He was a loyal friend. His friendship was prized by all who knew him. It helped to make service in this House more satisfactory and more pleasant for many men.

He has left behind in many ways evidences of the good he has done, and his memory will be cherished and revered by all who had the opportunity and pleasure of having come in contact with him.

Mr. AYRES. Mr. Speaker, we are met here to-day to fittingly commemorate the life and public services of our lamented colleague, RICHARD E. CONNELL. In the term of his service in this House he earned the respect and affection of us all. I use the word "earned" advisedly, because Mr. CONNELL came here without the advantage of any previous legislative experience, and his career was one of continually increasing usefulness and appreciation. He was constant in attendance upon his duties, always faithful to every responsibility. His extraordinary oratorical gifts first came to the attention of the House upon the occasion of a speech delivered on the bill for the admission of Arizona and New Mexico. This gave a fitting opportunity for a display of the earnest and brilliant patriotism which was his most striking characteristic, and his eloquent peroration roused the audience to a high pitch of enthusiasm. The State of New York has in recent years sent to Congress few men who combine the ability to perform useful and effective work with the gift of eloquent and emotional expression, and Mr. CONNELL'S future was therefore looked forward to with more than ordinary interest.

Alas, the grim reaper, who is no respecter of personality, saw fit to remove our colleague upon the threshold of a greater usefulness, and we are left to mourn his loss. His death was dramatic. Just a week before the election, on October 30 last, in the midst of a hotly contested campaign, when the attention of his county and district were centered upon his every movement, the end suddenly came. Instantly his city was plunged into profound gloom. Flags flew at half-mast, shops were closed, the ordinary avocations of citizens were discontinued, thus showing the entire respect in which Mr. CONNELL was held alike by his partisans and by those who were politically opposed. At the memorial services, held at St. Mary's Church, crowds found it impossible to obtain admittance.

Mr. CONNELL'S life in Washington was but typical of his entire career. Born into humble circumstances, he progressed ever into constantly greater spheres of usefulness. Every step of advance was earned by faithful service. His life and the great success that attended him speak eloquently of the genius of American institutions.

Mr. Speaker, I ask unanimous consent that leave to print upon the life, character, and public services of Mr. CONNELL be granted for five legislative days.

The SPEAKER pro tempore. Is there objection?
There was no objection.

ADJOURNMENT.

Then, in accordance with the resolution heretofore agreed to (at 4 o'clock and 6 minutes p. m.), the House adjourned until to-morrow, Monday, February 17, 1913, at 12 o'clock noon.

SENATE.

MONDAY, *February 17, 1913.*

(Legislative day of Tuesday, February 11, 1913.)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

Mr. GALLINGER took the chair as President pro tempore under the order of the Senate of December 16, 1912.

CREDENTIALS.

Mr. BROWN. Mr. President, I have the honor to present the credentials of my successor, and I ask to have them read.

The PRESIDENT pro tempore. The credentials will be read.

The Secretary read the credentials of GEORGE W. NORRIS, chosen by the Legislature of the State of Nebraska a Senator from that State for the term beginning March 4, 1913, and they were ordered to be filed.

Mr. CATRON. Mr. President, I present the credentials of my colleague [Mr. FALL] and ask that they be read.

The PRESIDENT pro tempore. The credentials will be read.

The credentials of ALBERT BACON FALL, chosen by the Legislature of the State of New Mexico a Senator from that State for the term beginning March 4, 1913, were read and ordered to be filed.

Mr. CURTIS. Mr. President, I present the credentials of my successor.

The PRESIDENT pro tempore. The credentials will be read.

The credentials of WILLIAM H. THOMPSON, chosen by the Legislature of the State of Kansas a Senator from that State for the term beginning March 4, 1913, were read and ordered to be filed.

Mr. SMITH of Georgia presented the credentials of AUGUSTUS O. BACON, appointed by the governor of the State of Georgia a Senator from that State from the 4th day of March, 1913, until the next meeting of the legislature thereof, which were read and ordered to be filed.

COMMERCIAL AND AGRICULTURAL ORGANIZATIONS.

The PRESIDENT pro tempore laid before the Senate the following communication from the Secretary of Commerce and Labor, which was read:

DEPARTMENT OF COMMERCE AND LABOR,
Washington, February 15, 1913.

SIR: By direction of the President, and in conformity with Senate resolution No. 406 of December 12, 1912, I have the honor to transmit herewith lists of the commercial and agricultural organizations of the United States.

The list of the agricultural associations has been prepared through the courteous cooperation of the Department of Agriculture, at the request of the Secretary of this department.

The list of commercial organizations has been compiled in the Bureau of Foreign and Domestic Commerce of this department. That bureau in the exercise of its functions of promoting commerce and manufacture maintains close relations with those organizations throughout the United States which are engaged in promotive service for the commercial interests of their districts, and a record of the activities of these trade bodies is kept as a part of the current files of that office. Although this record was fairly complete, it has been supplemented as far as practicable in the time permitted, and the list which is transmitted herewith is believed to be a fairly complete one and to contain the names of practically all the commercial organizations in towns with 2,000 inhabitants or more. An acknowledgment should be made to a number of secretaries of important commercial organizations who have materially assisted the bureau in securing complete lists of associations in certain States.

As the value of the list of these organizations it is believed is greatly enhanced if the essential facts in regard to each association are also reported, there has been included as far as practicable with the list of names of commercial organizations herewith submitted a concise statement of the functions of each—its duties, income, number of members, special interests served, and the committees and bureaus under which this service is conducted. With this information, which has been recorded by the use of convenient symbols, it is possible for the business man to obtain a definite knowledge of the character of each trade body listed herewith.

Respectfully, CHARLES NAGEL, *Secretary.*

The PRESIDENT OF THE SENATE,
Washington, D. C.

(Inclosure No. 21167.)

Symbols are employed to indicate (1) the field of service of the respective local commercial organizations and (2) their special activities. Separate sets of symbols are used for this purpose, the first, or "A," series being given under the heading "Field of service," and the second, or "C," series under the heading "Remarks." The latter series indicates special activities of organizations directed by departments or committees. Following is a key to the various symbols:

FIELD OF SERVICE.

A1. Civic and industrial development of district.
A2. Interests of local retail merchants.
A3. Interests of local manufacturers of miscellaneous products.
A4. Civic improvements only.
A5. Interests indicated in title of organization or special service not indicated by preceding symbols.

SPECIAL ACTIVITIES.

C. Conventions.
CC. Foreign trade.
C1. Retail trade.
C2. Wholesale trade.
C3. Market quotations.
C4. Grain weighing and inspection.
C5. Charity investigations.
C6. Transportation.
C7. Classified library.
C8. Industrial.
C9. Local credits.
C10. Weekly journal.
C11. Monthly journal.
C12. Employment.
C13. Agriculture.
C14. Daily bulletin.
C15. Quarterly bulletin.
C16. Biweekly journal.

The PRESIDENT pro tempore. Without objection, the communication and accompanying papers will be referred to the Committee on Printing.

FINDINGS OF THE COURT OF CLAIMS.

The PRESIDENT pro tempore laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusion filed by the court in the following causes:

Kate P. Chesley, administratrix de bonis non cum testamento annexo of the estate of James A. Chesley, deceased (S. Doc. No. 1088); and

Washington Loan & Trust Co., administrator de bonis non cum testamento annexo of Edward S. Keyser, deceased (S. Doc. No. 1089).

The foregoing findings were, with the accompanying papers, referred to the Committee on Pensions and ordered to be printed.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE LEGARE.

Mr. TILLMAN. Mr. President, I wish to give notice that on March 1, 1913, I will ask the Senate to consider resolutions commemorative of the life and public character of GEORGE S. LEGARE, late a Representative in Congress from the State of South Carolina.

CONNECTICUT RIVER DAM.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8033) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

Mr. BRANDEGEE. Mr. President, I wish to make a parliamentary inquiry as to whether any morning business is in order at the present time.

The PRESIDENT pro tempore. The present occupant of the chair is of the opinion that it would not be in order. The matter that was laid before the Senate was on the desk of the President pro tempore.

Mr. BRANDEGEE. The Senator from Kansas [Mr. CURTIS] last Friday afternoon gave notice that he would call up the District of Columbia appropriation bill this morning. At that time unanimous consent had been granted that we should proceed to vote not later than 4 o'clock to-day upon all amendments pending and upon the bill authorizing the construction of a dam across the Connecticut River. As Senators know, there are quite a number of amendments pending and they will need explanation. I wish to suggest to the Senator from Kansas if he does not think the District appropriation bill should be laid aside in time for Senators to explain their amendments, so that they may be voted upon intelligently.

Mr. CURTIS. I will state to the Senator that at 2 o'clock, if that will give sufficient time, and if the appropriation bill is not then completed, I will ask that it be temporarily laid aside.

Mr. BRANDEGEE. Of course I am ready to vote upon the bill and the amendments now, but if other Senators request the Senator from Kansas to lay the bill aside I hope he will concur in the request.

Mr. CURTIS. I will gladly do so.

Mr. SMITH of Arizona. May I interrupt the Senator from Kansas?

Mr. CURTIS. Certainly.

Mr. SMITH of Arizona. Mr. President, I had expected to submit some observations on the pending bill and would prefer to do it now. I know of at least two other Senators who wish to occupy 30 or 40 minutes all told. I shall in the present condition of the bad cold I have ask the indulgence of the Senate to print many of the authorities, which are mere decisions of the courts, instead of reading them or having them read to the Senate. With the understanding that I can take the floor, say, at 2 o'clock, of course I shall yield that the appropriation bill may be proceeded with now.

Mr. CURTIS. I think the appropriation bill will be completed before 2 o'clock. If it is not, I will gladly consent to

lay it aside at that hour, or I will ask to have it laid aside before that hour if any Senator desires to take the floor on the pending bill.

Mr. SMITH of Arizona. With that understanding, I have no objection to the Senate proceeding with the appropriation bill.

Mr. CURTIS. I now move to take up the District of Columbia appropriation bill.

Mr. JONES. I simply desire to say that I wish to submit some observations on the bill relating to the Connecticut River, but I understand that the Senator from Kansas will be willing to yield at any time.

Mr. CURTIS. I said that I would yield at 2 o'clock, and I will yield at any time before 2 that any Senator desires.

Mr. JONES. With that understanding, I am willing that the Senator shall proceed with the appropriation bill.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the following bills:

S. 104. An act for the relief of Carl Krueger; and

S. 2733. An act for the relief of the estate of Almon P. Frederick.

The message also announced that the House had passed the following bills, with amendments, in which it requested the concurrence of the Senate:

S. 8178. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors;

S. 8274. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors;

S. 8275. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors; and

S. 8314. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 14053) to increase the pensions of surviving sailors of Indian wars in certain cases.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 2839. An act for the relief of William Hommelsberg;

H. R. 6793. An act for the relief of Charles A. Bess;

H. R. 8921. An act for the relief of William H. Seward;

H. R. 18727. An act for the relief of Lewis Wood;

H. R. 24296. An act for the relief of Alonzo D. Cadwallader;

H. R. 26648. An act for the relief of David Crowther;

H. R. 24661. An act for the relief of James Parsons;

H. R. 24942. An act for the relief of the administrator and heirs of John G. Campbell, to permit the prosecution of Indian depredation claims;

H. R. 28607. An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914;

H. R. 28672. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors; and

H. R. 28746. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors.

The message further transmitted to the Senate resolutions of the House on the life and public services of Hon. GEORGE S. NIXON, late a Senator from the State of Nevada.

The message also transmitted to the Senate resolutions of the House on the life and public services of Hon. JOHN GEISER MCHENRY, late a Representative from the State of Pennsylvania.

The message further transmitted to the Senate resolutions of the House on the life and public services of Hon. RICHARD E. CONNELL, late a Representative from the State of New York.

The message also transmitted to the Senate resolutions of the House on the life and public services of Hon. WILLIAM W. WEDEMEYER, late a Representative from the State of Michigan.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore and delivered to the committee to be presented to the President of the United States:

S. 186. An act for the relief of Francis Grinstead, alias Francis M. Grinstead;

S. 3873. An act for the relief of Lewis F. Walsh;

S. 4030. An act for the relief of Sylvester W. Barnes;

S. 4043. An act divesting intoxicating liquors of their interstate character in certain cases;

S. 5262. An act for the relief of Sylvester G. Parker; and

H. R. 14053. An act to increase the pension of surviving soldiers of Indian wars in certain cases.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. CURTIS. I move that the Senate proceed to the consideration of House bill 28499, the District of Columbia appropriation bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 28499) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1914, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. CURTIS. I ask unanimous consent that the formal reading of the bill be dispensed with, that it be read for amendment, and that the committee amendments be considered first.

Mr. SMITH of Georgia. I object to that course. It seems to me that the wise way to handle a bill of this kind is to have it read paragraph by paragraph and allow Senate committee amendments and floor amendments to be offered as we dispose of a paragraph.

Mr. CURTIS. If the Senator objects, I will not press the request.

Mr. SMITH of Georgia. I object.

The PRESIDENT pro tempore. Objection is made, and the Secretary will proceed to read the bill.

Mr. SMITH of Georgia. I do not object to dispensing with the reading of the bill. I object to taking up the committee amendments first.

The PRESIDENT pro tempore. The bill will be read, and amendments will be considered as they are reached, either committee amendments or amendments offered by individual Senators.

The Secretary proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the head of "General expenses," on page 2, line 3, after the word "one" where it occurs the third time, to strike out "$1,300" and insert "$1,400," so as to make the clause read:

Executive office: Two commissioners, at $5,000 each; engineer commissioner, so much as may be necessary (to make salary $5,000); secretary, $2,400; assistant secretaries to commissioners—one $1,500, one $1,200; clerks—one $1,600, one $1,500, one $1,400, two at $1,200 each, one, who shall be a stenographer and typewriter, $1,000, one $840, one $720, one $600; messengers—one $600, one $480; stenographer and typewriter, $840; two drivers, at $600 each.

Mr. SMITH of Georgia. I understand that all these salaries are fixed by law. If I am right about that, I make the point of order that they can not be changed in this way.

Mr. CURTIS. This increase was made by the committee upon the recommendation of the Commissioners of the District of Columbia.

Mr. SMITH of Georgia. But that is not sufficient. If there is a general statute fixing a salary, it is a part of the organic law, and you can not change it in an appropriation bill. It takes a special statute to make the increase. I make the point of order that the proposed increases can not be made in this way.

Mr. CURTIS. Mr. President, I do not think the point of order is well taken. This is an item that was estimated for by the Commissioners of the District of Columbia, and it has been reported by one of the standing committees of the Senate. Therefore it is not subject to the point of order.

The PRESIDENT pro tempore. The Chair is of the opinion that the point of order is not well taken and will overrule the point of order. The question is on agreeing to the amendment of the committee.

Mr. SMITH of Georgia. I desire to make an objection to these increases. All through the bill there runs a systematic line of increases in the salaries. I believe that the expense of administration in this District has been just as great as it ought to be, and that this is not a proper time to increase the salaries.

The PRESIDENT pro tempore. Senators agreeing to the amendment of the committee will say "aye." [Putting the question.] The ayes appear to have it.

Mr. SMITH of Georgia. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHAMBERLAIN (when Mr. BOURNE's name was called). I desire to state that my colleague [Mr. BOURNE] is detained on a joint committee between the two Houses upon official business.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. STONE]. I withhold my vote in the absence of that Senator.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON]. He is not present, and I withhold my vote.

Mr. SMITH of South Carolina (when his name was called). I have a general pair with the Senator from Delaware [Mr. RICHARDSON]. He is not present, and therefore I withhold my vote.

Mr. WILLIAMS (when his name was called). I ask if the Senator from Pennsylvania [Mr. PENROSE] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. WILLIAMS. I have a pair with him, and will therefore withhold my vote.

The roll call was concluded.

Mr. SMITH of Michigan. I am paired with the Senator from Missouri [Mr. REED]. I transfer that pair to the Senator from Oregon [Mr. BOURNE] and vote. I vote "yea."

Mr. SMITH of South Carolina. I transfer my general pair with the Senator from Delaware [Mr. RICHARDSON] to the Senator from Oklahoma [Mr. GORE] and vote. I vote "nay."

The result was announced—yeas 43, nays 28, as follows:

YEAS—43.

Bradley	Cummins	McCumber	Root
Brandegee	Curtis	McLean	Smith, Ariz.
Bristow	Dillingham	Martine N. J.	Smith, Md.
Brown	du Pont	Nelson	Smith, Mich.
Burnham	Fall	Newlands	Smoot
Burton	Gallinger	Oliver	Stephenson
Catron	Gamble	Page	Sutherland
Chamberlain	Guggenheim	Paynter	Swanson
Clark, Wyo.	Jackson	Percy	Townsend
Crane	Jones	Perkins	Wetmore
Crawford	Lodge	Poindexter	

NAYS—28.

Ashurst	Gardner	Myers	Smith, Ga.
Bacon	Gronna	O'Gorman	Smith, S. C.
Brady	Johnson, Me.	Overman	Stone
Bryan	Johnston, Ala.	Pomerene	Thomas
Clarke, Ark.	Kenyon	Sheppard	Thornton
Culberson	Kern	Shively	Tillman
Fletcher	Lea	Simmons	Webb

NOT VOTING—24.

Bankhead	Cullom	La Follette	Reed
Borah	Dixon	Lippitt	Richardson
Bourne	Foster	Martin, Va.	Warren
Briggs	Gore	Massey	Watson
Chilton	Hitchcock	Owen	Williams
Clapp	Kavanaugh	Penrose	Works

So the amendment of the committee was agreed to.

The reading of the bill was resumed, on page 2, line 3, and the Secretary read as follows:

Purchasing division: Purchasing officer, $3,000; deputy purchasing officer, $1,600; computer, $1,440; clerk, $1,500; clerks—one $1,300.

Mr. SWANSON. On page 2, line 13, after the word "one," I move to strike out the sum "$1,300" and to insert in lieu thereof "$1,450."

Mr. President, I wish to say in connection with this amendment that the District Commissioners have repeatedly recommended that this salary be fixed in accordance with my amendment. The committee in the House of Representatives examined the matter and reported it at that sum, but it went out in the House on a point of order. This is one clerk who has been isolated; he does the same work as do the other clerks in that office but gets only $1,300. By some past legislation, which I can not understand, he has not been promoted with the others. It seems to me to be an act of justice and equality that the amendment should carry.

Mr. CURTIS. Mr. President, the increase was recommended by the commissioners, and, so far as I am personally concerned, I have no objection to the amendment. However, this amendment was not agreed to by the committee.

The PRESIDENT pro tempore. The question is upon the amendment.

Mr. SMITH of Georgia. Mr. President, all through this bill run increases; all through this bill are amendments from the committee which, I think, involve changes that will cause large outlays of money. I am not objecting to these small increases one by one on account of simply the two or three cases that first appear, but my objection is to the increase of the appropriation which the amendments suggested by the Senate committee will provide. I think that it is a mistake, especially at this time, when there is to be a change of the administration of the District, to increase these salaries. I think we ought to hold down the expense of administering the affairs of the District. I do not think the appropriations contained in the bill, a number of them suggested by amendments which will be reached later on, ought to be made. My objection now and my resistance of these particular items of increase have not reference so much to those items, but are made to emphasize my objection to practically all of the increases of expenditure that the amendments from the Senate committee will provide.

Mr. CURTIS. Mr. President, I want to state for the committee that in this bill there are fewer increases than in any bill that has ever heretofore been reported from the Committee on the District of Columbia. There was no increase made until after a very careful study of the estimates; there was no increase made that did not meet the approval of all of the members of the committee who were present.

Mr. CLARKE of Arkansas. May I ask the Senator from Kansas a question?

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Arkansas?

Mr. CURTIS. I do.

Mr. CLARKE of Arkansas. I wish to ask the Senator whether this particular item has been estimated for or was recommended by a standing committee?

Mr. CURTIS. This item has been estimated for.

Mr. CLARKE of Arkansas. Then, why did not the committee include it in the bill as reported to the Senate?

Mr. CURTIS. As I stated a moment ago, the committee made just as few increases as possible, and thought that this one might be left out, because there were other employees similarly situated who would be entitled to the increase if granted in this case. We thought those whose salaries we reported to increase were more entitled to increases than the one proposed to be increased by the amendment of the Senator from Virginia.

Mr. CLARKE of Arkansas. Did I understand the Senator from Kansas correctly, then, when he said he accepted this amendment, so far as he might do so?

Mr. CURTIS. I said that, so far as I was personally concerned, I would not object to it; that it was estimated for. I did not make a point of order against it, because the point of order would not lie. Personally, I have no objection to the increase in this one case.

Mr. CLARKE of Arkansas. I supposed that the Senator was in charge of the bill and was sustaining the policy outlined by the committee when they reported the bill and omitted to recommend this increase.

Mr. CURTIS. I simply expressed my personal feeling in what I said.

Mr. SMOOT. Mr. President, I desire to call the Senator's attention to the fact that the increase was estimated for, as stated by the Senator from Kansas. It was also reported by the Committee on Appropriations of the House, but went out on a point of order in that body.

Mr. CLARKE of Arkansas. Never mind about its historical position before the Senate. What about the merits of the particular item?

Mr. SMOOT. The subcommittee, after considering the statement made by the commissioners as to whether the salary should be increased, decided that it should not and reported it at the present rate as provided by law—$1,300.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Virginia [Mr. SWANSON].

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 2, line 15, after the word "storekeeper," to strike out "$900" and insert "$1,000," so as to read:

Purchasing division: Purchasing officer, $3,000; deputy purchasing officer, $1,600; computer, $1,440; clerk, $1,500; clerks—one $1,300, 6 at $1,200 each, 3 at $900 each, 6 at $720 each; inspector of fuel, $1,500; assistant inspector of fuel, $1,100; storekeeper, $1,000.

Mr. SMITH of Georgia. I desire to ask for the yeas and nays on that amendment.

The PRESIDENT pro tempore. The Senator from Georgia demands the yeas and nays.

The yeas and nays were ordered.

Mr. OLIVER obtained the floor.

Mr. CRAWFORD. I ask that the amendment be stated.

The PRESIDENT pro tempore. The Senator from Pennsylvania first addressed the Chair.

Mr. OLIVER. I should like also to have the amendment stated.

The PRESIDENT pro tempore. The amendment will be again stated.

The SECRETARY. On page 2, line 15, after the word "storekeeper," the committee reported to strike out "$900" and to insert in lieu thereof "$1,000."

Mr. CURTIS. Mr. President, by unanimous consent, I should like to state what the District Commissioners said in reference to the matter.

The PRESIDENT pro tempore. The Senator does not need to ask unanimous consent. The Senator will proceed.

Mr. CURTIS. The Commissioners of the District of Columbia in regard to this matter say:

The duties of this position require a man of high integrity, one of good judgment, and with a general knowledge of the relative qualities of the various supplies furnished the District government, as upon the incumbent devolves the duty of the custody of all samples submitted by bidders; this duty is particularly onerous at the time annual bids are received on the more than 5,000 items of general supplies. After samples are accepted and used as the standard of qualities of the supplies that are to be furnished under respective contracts, it is his duty, upon request of the interested department, to compare all deliveries with the accepted samples, for the purpose of seeing that the supplies furnished equal the contract quality. He is also charged with the management of the storeroom of stationery and other supplies which is maintained in this office and from which are issued such supplies used by offices in the District Building. The person filling this position is not only required to receive and issue stock, but in addition is also required to do all the clerical work incident to the same, such as keeping record of receipts and issues and making deliveries to departments, renewing the stock as it becomes depleted, etc.

Mr. OLIVER. Mr. President, as a member of the subcommittee, I want to say that if I have any objection to the changes made by the subcommittee in the bill it is because they have not made sufficient advances in small salaries. They have made practically none in the larger salaries, and what advances they have granted have been to men who are underpaid. After hearing what has been read by the Senator from Kansas I say that I would be ashamed to vote against this advance; and, as an employer of men all my life, I would be ashamed in my private establishment to employ a man to perform such duties as this man performs and pay him only the salary that is provided for in this bill.

The cost of living has greatly advanced, and the small salaries have not advanced in proportion. I say that we, as lawmakers and fixers of salaries, ought to consider what it costs a man to live in these days and to grant him an advance, if not commensurate, at least to provide something to correspond to the increase which is involved in his cost of living from day to day.

Mr. SMITH of Maryland. Mr. President, as a member of the subcommittee, I want to say that we scrutinized these recommendations very carefully, and I think I can say that, if Senators will compare this bill with other District of Columbia appropriation bills which have been passed by the Senate, they will find fewer increases than in any bill for many years. So far as an increase of salary is concerned, I do not think it is anything out of order. We find it in our private business, we find it in the case of corporations employing men; and why is it that the men employed by the Government, who receive these small salaries, the increase of which is recommended by the departments, and in this case recommended by the commissioners, shall not be considered by the committee? I see no reason why they should not be considered at this time as well as at any other time, even if there is going to be a new administration; and so I hope that these small increases will not be refused by the Senate. I do not think they will amount in all to $10,000.

Mr. SMITH of Georgia. Mr. President, the reasons presented by the Senator from Kansas [Mr. CURTIS], by the Senator from Pennsylvania [Mr. OLIVER], and by the Senator from Maryland [Mr. SMITH] in this particular instance appeal to me, and if the order for the yeas and nays may be vacated by unanimous consent, I am willing to have that done and yield on this question. The important matters that I have in view come in a little later.

The PRESIDENT pro tempore. In the absence of objection, the ordering of the yeas and nays will be vacated.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 2, line 16, after the word "driver," to strike out "$480" and insert "$600," so as to read "driver, $600."

The amendment was agreed to.

The next amendment was, on page 3, line 1, after the word "one," where it occurs the first time, to strike out "$1,500" and insert "$1,800," so as to make the clause read:

Building inspection division: Inspector of buildings, $3,000; principal assistant inspector of buildings, $1,800; assistant inspectors of buildings—11 at $1,200 each; fire-escape inspector, $1,400; temporary employment of additional assistant inspectors for such time as their services may be necessary, $3,000; civil engineers or computers—1, $1,800; 1, $1,500; chief clerk, $1,500; clerks—1 at $1,050, 1 at $1,000, 1 who shall be a stenographer and typewriter, $1,000, 1 at $900; messenger, $480; assistant inspector, $1,500.

The amendment was agreed to.

The next amendment was, on page 3, line 20, after the word "necessary," to strike out "$1,700" and insert "$2,400," so as to read:

Plumbing inspection division: Inspector of plumbing, $2,000; principal assistant inspector of plumbing, $1,550; assistant inspectors of plumbing—1 at $1,200, 4 at $1,000 each; clerks—1 at $1,200, 1 at $900; temporary employment of additional assistant inspectors of plumbing and laborers for such time as their services may be necessary, $2,400.

The amendment was agreed to.

The next amendment was, on page 4, line 4, after the words "In all," to strike out "$114,510" and insert "$115,830," so as to make the clause read:

In all, $115,830.

The amendment was agreed to.

Mr. CURTIS. Mr. President, to save time, I ask unanimous consent that when the bill is completed the Secretary may be permitted to correct the totals.

The PRESIDENT pro tempore. Without objection, that order will be made.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 5, line 15, after the words "assistant cashier," to strike out "$1,400" and insert "$1,500," and in line 18, after the words "in all," to strike out "$21,700" and insert "$21,800," so as to make the clause read:

Collector's office: Collector, $4,000; deputy collector, $2,000; cashier, $1,800; assistant cashier, $1,500; bookkeeper, $1,600; clerks—3 at $1,400 each, 1, $1,200, 1, $1,000, 3 at $900 each; clerk and bank messenger, $1,200; messenger, $600; in all, $21,800.

The amendment was agreed to.

The next amendment of the Committee on Appropriations was, on page 5, line 23, after the words "chief clerk," to strike out "$2,250" and insert "$2,500," and on page 6, line 5, after the words "in all," to strike out "$43,656" and insert "$43,906," so as to make the clause read:

Auditor's office: Auditor, $4,000; chief clerk, $2,500; bookkeeper, $1,800; accountant, $1,500; clerks—3 at $1,600 each, 3 at $1,400 each, 1, $1,350, 4 at $1,200 each, 5 at $1,000 each, 1, $936, 2 at $900 each, 2 at $720 each; messenger, $600; disbursing officer, $3,000; deputy disbursing officers, $1,600; clerks—1, $1,200, 2 at $1,000 each, 1, $900; messenger, $480; in all, $43,906.

Mr. CURTIS. Mr. President, I move that that amendment be disagreed to.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 6, line 6, after the words "corporation counsel," to insert "to be appointed by the President, by and with the advice and consent of the Senate," so as to make the clause read:

Office of corporation counsel: Corporation counsel, to be appointed by the President, by and with the advice and consent of the Senate, $4,500; first assistant, $2,500; second assistant, $1,800; third assistant, $1,600; fourth assistant, $1,500; fifth assistant, $1,500; stenographers, one $1,200, one $840; clerk, $720; in all, $16,160.

Mr. SMITH of Georgia. Mr. President, I move to amend that amendment by adding, after the word "President," the words "of the United States," to distinguish it from the president of the board of commissioners.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 6, line 15, after the word "janitor," to strike out "$480" and insert "$600"; in line 16, after the word "janitor," to strike out "$360" and insert "$480," and in the same line, after the words "in all," to strike out "$3,360" and insert "$3,600," so as to make the clause read:

Coroner's office: Coroner, $1,800; morgue master, $720; assistant morgue master and janitor, $600; hostler and janitor, $480; in all, $3,600.

The amendment was agreed to.

The next amendment was, on page 7, after line 2, to insert:

For the erection of shelters on the open space at the intersection of Ohio and Louisiana Avenues with Tenth and Twelfth Streets, bounded by Tenth and Twelfth and B and Little B Streets NW., known and designated as the farmers' produce market, and the necessary paving in connection therewith, $32,000; and the limitation of 10 cents per day for each space at the above-mentioned market contained in the act of June 27, 1906, is hereby revoked, and the Commissioners of the District of Columbia are authorized to charge hereafter not to exceed 20 cents per day for each space in accordance with the provisions of the aforesaid act.

Mr. LODGE obtained the floor.

Mr. SMITH of Georgia. I desire to make the point of order that this is legislation. If the Senator from Massachusetts——

Mr. LODGE. I thought I was recognized. I did not mean to interfere with the Senator's remarks.

Mr. SMITH of Georgia. I hope the Senator will proceed.

Mr. LODGE. Mr. President, if I understand the situation of these proposed shelters, it is directly opposite the National Museum.

Mr. SMITH of Georgia. That is just the point I was about to make.

Mr. LODGE. That is a building containing collections of enormous value. It seems to me that fact in itself is an objec-

tion to establishing the hay market there permanently, if we can find some other position for it. Then I think it is proper to say that the Regents of the Smithsonian Institution were informed the other day that Mr. Freer, whose great collections have been made over to the United States, has increased his gift for the construction of a building to house his collections from $500,000 to $1,000,000. He is going to give this great building and these great collections to the United States. It is very much desired by the Regents of the Smithsonian Institution, and all who are connected with that portion of the affairs of the Government, to use that space, if possible, in the future for the construction of this great building, which undoubtedly will be a very handsome one, which is a gift to the people of the United States. I had hoped the committee would not press this amendment to make permanent the hay market at that point. It seems to me it might be put somewhere else.

Mr. SMITH of Georgia. Mr. President, I intended to make very much the same suggestion that has been made by the Senator from Massachusetts. I intended to add, also, that I had no idea that Congress would permit such a structure to remain there for any length of time if it should be put there. It would be an eyesore; it would be a serious interference with the improvements that have taken place and are to take place. Beyond any question, if built, the first thing Congress would do would be to order it torn down and removed. It is to just such waste of public moneys as this that I desire to urge objections.

Mr. SMOOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMOOT. I thought the Senator had concluded.

Mr. SMITH of Georgia. No. I desire to make the point of order.

The PRESIDENT pro tempore. The Senator from Georgia makes the point of order against the item that it is general legislation.

Mr. SMITH of Georgia. If there is any doubt about it, Mr. President, I desire to submit precedents in support of the point of order.

The PRESIDENT pro tempore. The Chair thinks it is not necessary.

Mr. SMOOT. Mr. President, I desire to state that the first part of the amendment is not subject to a point of order, because it has been regularly estimated for. I believe myself that the latter part, from "$32,000," on page 7, line 8, down to and including the word "Act," in line 14, is no doubt subject to a point of order.

The committee considered this matter very carefully. I will state frankly that there was doubt in the minds of the committee as to whether or not it was a proper provision to put in. About 260 wagons come to this market every day, and the produce is distributed from them. I am told by the commissioners that sometimes there have been as many as 545 wagons down there.

The commissioners have thought a great deal over the problem of locating this market at some point that would be a central point, not only for the farmers, but for the people of the District who wish to buy their produce.

I believe myself that if this market is to be removed, we should spend no more money there; but if we are going to continue it in the place where it is at present, the expenditure asked for is absolutely necessary. Every Senator who has ever visited this market knows that the present condition is a disgrace to the District of Columbia. It is a dirty place; it is kept in such a way that it is unwholesome and unclean, and it is an eyesore before the National Museum.

I am not going to object if the whole thing goes out on a point of order; but I wished to state that much, as far as the committee were concerned, as to why they put it in.

The PRESIDENT pro tempore. The point of order made by the Senator from Georgia [Mr. SMITH] is sustained. The Secretary will proceed with the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 7, after line 20, to insert:

Fish wharf and market: Market master and wharfinger, who shall have charge of the landing of vessels, the collection of wharfage and dockage rentals, and the collection of rents for fish houses at the municipal fish wharf and market hereinafter established, for not exceeding 16 months at the rate of $75 per month, beginning March 1, 1913, $1,200; assistant market master, who shall also act as laborer, for the same period, at the rate of $50 per month, not exceeding $800; in all, $2,000, to be immediately available; and the Commissioners of the District of Columbia are authorized and directed in the name of the District of Columbia to take over, exclusively control, regulate, and operate as a municipal fish wharf and market, the water frontage on the Potomac River lying south of Water Street, between Eleventh and Twelfth Streets, including the buildings and wharves thereon, and said wharf shall constitute the sole wharf for the landing of fish and oysters for sale in the District of Columbia; and said commissioners shall have power to make leases, fix and determine rentals, wharfage and dockage fees, and to collect and pay the same into the Treasury, one-half to the credit of the United States and one-half to the credit of the District of Columbia, and to make and amend, from time to time, all such regulations as they may deem proper for the control, regulation, and operation of said municipal fish wharf and market; and all leases, subleases, and other private rights of occupancy in and to any or all of said property are terminated on, from, and after March 15, 1913; and all laws and parts of laws requiring the advertisement and sale of rights and privileges for a fish wharf or dock, and all laws or parts of laws inconsistent with the provisions hereof are repealed.

The amendment was agreed to.

The next amendment was, on page 11, line 5, after the word "repairs," to strike out "$1,600" and insert "$1,800," and in line 9, after the words "in all," to strike out "$26,050" and insert "$26,250," so as to make the clause read:

Municipal architect's office: Municipal architect, $3,600; superintendent of construction, $2,000; chief draftsman, $1,700; draftsmen—one $1,400, one $1,300; heating, ventilating, and sanitary engineer, $2,000; superintendent of repairs, $1,800; assistant superintendent of repairs, $1,200; boss carpenter, boss tinner, boss painter, boss plumber, boss steam fitter, five in all, at $1,200 each; boss grader, $1,000; machinist, $1,200; clerks—one $1,050, one $620; copyist, $840; driver, $540; in all, $26,250.

The amendment was agreed to.

The next amendment was, on page 12, line 11, after the word "surveyor," to strike out "$1,800" and insert "$2,000," and in line 17, after the words "in all," to strike out "$25,725" and insert "$25,925," so as to make the clause read:

Surveyor's office: Surveyor, $3,000; assistant surveyor, $2,000; clerks—1 at $1,225, 1 at $975, 1 at $675; 3 assistant engineers, at $1,500 each; computer, $1,200; record clerk, $1,050; inspector, $1,200; draftsmen—1 $1,225, 1 $900; assistant computer, $900; 3 rodmen, at $825 each; chainmen—3 at $700 each, 2 at $650 each; computer and transitman, $1,200; in all, $25,925.

The amendment was agreed to.

The next amendment was, on page 12, line 25, after the word "Library," to strike out "including Takoma Park branch"; on page 13, line 3, after "$1,000," to insert "one in charge of periodicals, $1,000"; in line 4, after "$1,000," to strike out "six" and insert "five"; in line 5, before the word "at," to strike out "including one in charge of Takoma Park branch"; in line 5, after the word "five," to strike out "including one for the Takoma Park branch"; in line 6, after the word "three," to strike out "including one in charge of Takoma Park branch"; in line 16, after the words "in all," to strike out "$41,900" and insert "$42,180"; and in line 18, after the word "open," to strike out "on the same days and during the same hours" and insert "at least seven hours per day on the same week days," so as to make the clause read:

Free Public Library: Librarian, $3,500; assistant librarian, $1,500; chief circulating department, $1,200; children's librarian, $1,000; librarian's secretary, $900; reference librarian, $1,000; assistants—1 $1,000, 1 in charge of periodicals, $1,000, 5 at $720 each, 5 at $600 each, 3 at $540 each, 3 at $480 each; copyist, $480; classifier, $900; cataloguers—1 $720, 1 $600, 2 at $540 each; stenographer and typewriter, $720; attendants—6 at $540 each, 5 at $480 each; collator, $480; 2 messengers, at $480 each; 10 pages, at $360 each; 2 janitors, at $480 each, 1 of whom shall act as night watchman; janitor of Takoma Park branch, $360; engineer, $1,080; fireman, $720; workman, $600; library guard, $720; 2 cloakroom attendants, at $360 each; 6 charwomen, at $180 each; in all, $42,180; and hereafter the Takoma Park branch shall be kept open at least seven hours per day on the same week days as the Free Public Library shall be open to the public.

The amendment was agreed to.

The next amendment was, on page 14, line 3, after the word "Library," to strike out "including Takoma Park branch," so as to make the clause read:

Miscellaneous, Free Public Library: For books, periodicals, and newspapers, including payment in advance for subscriptions to periodicals, newspapers, subscription books, and society publications, $7,500.

The amendment was agreed to.

The next amendment was, on page 14, after line 14, to insert:

Takoma Park branch: For maintenance, employment of branch librarian and assistants, substitutes, and other special and temporary service, extra service for Sundays and holidays, purchase of books, newspapers, and periodicals, including payment in advance for subscriptions to newspapers and periodicals, binding, fuel, lighting, repairs, including the employment of personal services therefor, and other contingent expenses, the rates of compensation of all employees to be determined by the board of library trustees, $4,000.

The amendment was agreed to.

The next amendment was, on page 14, after line 23, to insert:

National Library for the Blind: For aid and support of the National Library for the Blind located at 1729 H Street NW., $5,000.

Mr. CURTIS. I move to strike out the word "National" before "Library," where it occurs the second time.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, under the head of "Contingent and Miscellaneous Expenses," on page 15, line 15, after the words

"Board of Charities," to strike out "including an allowance to the purchasing officer and to the secretary of the Board of Charities of not exceeding $360 each per annum for maintenance of vehicle for use in the discharge of their official duties," so as to read:

For contingent expenses of the government of the District of Columbia, namely: For printing, checks, books, law books, books of reference, and periodicals, stationery; detection of frauds on the revenue; surveying instruments and implements; drawing materials; binding, rebinding, repairing, and preservation of records; maintaining and keeping in good order the laboratory and apparatus in the office of the inspector of asphalt and cement; damages; livery, purchase, and care of horses and carriages or buggies and bicycles not otherwise provided for; horseshoeing; ice; repairs to pound and vehicles; use of bicycles by inspectors in the engineer department not to exceed $800; and other general necessary expenses of District offices, including the sinking-fund office, Board of Charities, excise board, personal-tax board, harbor master, health department, surveyor's office, superintendent of weights, measures, and markets office, and department of insurance, and purchase of new apparatus and laboratory equipment in office of inspector of asphalt and cement, $36,000; and the commissioners shall so apportion this sum as to prevent a deficiency therein.

The amendment was agreed to:

The next amendment was, on page 16, after line 18, to insert:

Telephones connected with the system of the Chesapeake & Potomac Telephone Co. may be maintained in the residences of the superintendent of the water department, superintendent of sewers, secretary of the Board of Charities, health officer, chief engineer of the fire department, and superintendent of police, of the District of Columbia, under appropriations contained in this act.

The amendment was agreed to.

The next amendment was, on page 19, line 20, before the word "materials," to strike out "other"; in line 24, before the word "under," to strike out "Bureau of Standards" and insert "testing bureaus of the Federal Government," so as to make the clause read:

Hereafter materials for fireproof buildings, other structural materials, and all materials other than fuel purchased for and to be used by the government of the District of Columbia, and necessary to be tested, shall be tested by the testing bureaus of the Federal Government under the same conditions as similar testing is required to be done for the United States Government.

Mr. CURTIS. In line 22, I move to amend the amendment by inserting after the word "shall" and before the words "be tested" a comma and the words "if requested by the commissioners."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment was, on page 22, after line 2, to insert:

Repaving with asphalt or asphalt block the roadway of C Street NE. from First Street to Fourth Street, 32 feet wide, $12,000.

The amendment was agreed to.

The next amendment was, on page 22, after line 5, to insert:

For paving Twenty-third Street from Kalorama Road to S Street with concrete pavement, including curb on both sides where not already set, for a roadway 24 feet wide, $8,000.

The amendment was agreed to.

The next amendment was, on page 22, after line 9, to insert:

For constructing a suitable viaduct and bridge to carry Benning Road over the tracks of the Pennsylvania, Baltimore & Washington Railroad Co. and of the Baltimore & Ohio Railroad Co., in accordance with plans approved by the Commissioners of the District of Columbia, to be available until expended, $110,000; and authority is hereby given to purchase or condemn, in accordance with existing law, any land necessary to widen said Benning Road so as to permit the construction of said viaduct and bridge in accordance with the approved plans, as above, the cost of said purchase or condemnation to be paid out of this appropriation, and the said commissioners are hereby authorized to make the necessary expenditures for the construction of said viaduct and bridge and approaches under the like conditions prescribed for the expenditure of the appropriation for a subway and bridge at Cedar Street, contained in the act of May 18, 1910, making appropriations for the expenses of the District of Columbia for the fiscal year 1911: *Provided*, That the cost of constructing said viaduct and bridge within the limits of the rights of way of said Philadelphia, Baltimore & Washington Railroad Co. and the Baltimore & Ohio Railroad Co. shall be borne and paid, half by said railroad companies in proportion to the widths of their respective rights of way and half by the United States and the District of Columbia, as provided in section 10 of an act entitled "An act to provide for a union railroad station in the District of Columbia, and for other purposes," approved February 28, 1903, and said sums shall be paid by said companies to the Treasurer of the United States, one half to the credit of the District of Columbia and the other half to the credit of the United States, and the same shall be valid and subsisting liens against the franchises and property of said Philadelphia, Baltimore & Washington Railroad Co. and the Baltimore & Ohio Railroad Co., respectively, and shall be a legal indebtedness of said companies in favor of the District of Columbia, jointly for its use and the use of the United States as aforesaid, and the said lien or liens may be enforced in the name of the District of Columbia by bill in equity brought by the commissioners of said District in the supreme court of said District, or by any other lawful proceedings against the said Philadelphia, Baltimore & Washington Railroad Co. or said Baltimore & Ohio Railroad Co., or both, and any relocation in the line or change in the grade of the tracks of the Washington Railway & Electric Co. necessary to permit the completion in accordance with approved plans of the viaduct and bridge and approaches herein provided for shall be made by and at the cost of said railway company, and in the event of said railway company failing or refusing to do such work the same shall be done by the Commissioners of the District of Columbia, the cost to be paid from the appropriation for said bridge and viaduct and collected from said street railway company in the manner provided for in section 5 of "An act providing a permanent form of government for the District of Columbia," approved June 11, 1878, and paid into the Treasury, one-half to the credit of the United States and one-half to the credit of the District of Columbia.

The amendment was agreed to.

The reading was continued to line 23, on page 25.

Mr. CURTIS. After line 23, I move to insert the following:

The Commissioners of the District of Columbia are hereby authorized and directed to strike from the plan of the permanent system of highways for the District of Columbia Crittenden Street NW., between Iowa Avenue and Seventeenth Street, and to omit the said street between the limits named from any future subdivision of the parcel of ground through which the said Crittenden Street runs.

I wish to state that I offer the amendment at this time because I promised to bring it to the attention of the committee, but failed to do so, for I thought there was nothing from the commissioners on the subject. I afterwards found that I had a letter from the commissioners recommending it and it had been reported by the Committee on the District of Columbia and passed the Senate. Therefore I offer the amendment in the Senate.

Mr. SMITH of Georgia. I make the point of order that that is undoubtedly new legislation.

Mr. CURTIS. I think it will be subject to the point of order on the ground that it is not estimated for and it is new legislation.

Mr. SMITH of Georgia. And also that it is new legislation.

The PRESIDENT pro tempore. The point of order is sustained on the ground that it is general legislation.

The reading of the bill was resumed.

The next amendment was, on page 26, line 8, after the word "streets," to insert "to be disbursed and accounted for as 'Construction of suburban roads and suburban streets,' and for that purpose shall constitute one fund," so as to make the clause read:

Construction of suburban roads: For construction of suburban roads and suburban streets, to be disbursed and accounted for as "Construction of suburban roads and suburban streets," and for that purpose shall constitute one fund, as follows.

Mr. SMITH of Georgia. I wish to ask the chairman of the subcommittee just what that is for. I do not understand it.

Mr. CURTIS. That is put in so that they may keep all accounts on that subject together and simply have one separate account for suburban roads.

Mr. SMITH of Georgia. It has no bearing whatever upon the proposed change charging a part of the expense of building these roads against the property holders?

Mr. CURTIS. It has not.

The amendment was agreed to.

The next amendment was, on page 27, after line 17, to insert:

Northwest, Kalmia Street, end of macadam to Rock Creek Park, grade and improve, $10,200.

The amendment was agreed to.

The next amendment was, on page 27, after line 19, to insert:

Northwest, Sherman Avenue, Florida Avenue to Columbia Road, improve, $25,000.

Mr. SMITH of Georgia. I desire to ask the Senator in charge of the bill whether these road extensions are included in general legislation already adopted?

Mr. CURTIS. They are carrying out a part of the plan adopted for street improvement which was recommended by the commissioners. A great many more were recommended than we put in.

Mr. SMITH of Georgia. If they are simply recommended and if there has been no legislation establishing these extensions, I make the point of order against the amendment.

Mr. CURTIS. The commissioners, of course, have the authority under the law to recommend the improvement of streets whenever deemed necessary. The committee has inserted the items upon their recommendation.

Mr. SMOOT. All these are highways now, and they have been established by law.

Mr. CURTIS. Yes; by law.

Mr. SMOOT. This is an appropriation for repairs.

Mr. CURTIS. And for grading and paving.

Mr. SMOOT. And the items are estimated for. I will state to the Senator, however, that in footing them all up there is a little more than the estimate called for—a few thousand dollars more.

Mr. SMITH of Georgia. There is an increase of $10,000 by the Senate committee on these streets, I understand.

Mr. CURTIS. The bill carries some $90,000 more than the House allowed for that purpose and is some $30,000 in excess of the amount estimated in gross sum; but we thought in conference we could determine those that needed paving most and reduce those amounts. We thought that was better than to pick them out, because in the House they had very long and

extensive hearings on these streets, and we did not. We put them in with that object in view. They are not for new streets.

Mr. SMITH of Georgia. It is my understanding of the rule that a street can not be extended in an appropriation bill.

Mr. CURTIS. These are not——

Mr. SMITH of Georgia. Let me finish. A street can not be extended or laid out in an appropriation bill.

Mr. CURTIS. It is not the object to lay out any new streets. I misunderstood the Senator's question. This is only to improve existing streets. These are merely improvements on existing streets. No new streets are laid out.

Mr. SMITH of Georgia. Then the Senator did not understand my question.

Mr. CURTIS. I misunderstood the Senator's question.

The PRESIDENT pro tempore. Is the point of order withdrawn?

Mr. SMITH of Georgia. It is withdrawn.

The amendment was agreed to.

The next amendment was, on page 27, after line 21, to insert:

Northeast. Franklin Street, Twenty-second Street eastward, grade and improve, $5,500.

The amendment was agreed to.

The next amendment was, on page 27, after line 23, to insert:

Northeast. Thirteenth Street, Rhode Island Avenue to Franklin Street, grade, $3,400.

The amendment was agreed to.

The next amendment was, at the top of page 28, to insert:

Northwest. For paving, with asphalt, Connecticut Avenue NW., between Calvert Street and the north end of the Connecticut Avenue Bridge, $2,800.

The amendment was agreed to.

The next amendment was, on page 28, after line 3, to insert:

Northeast. Hamlin Street, Twelfth to Thirteenth Streets, grade, $4,450.

The amendment was agreed to.

The next amendment was, on page 28, after line 5, to insert:

Northwest. Chesapeake Street, Wisconsin Avenue to River Road, grade and improve, $3,000.

The amendment was agreed to.

The next amendment was, on page 28, after line 7, to insert:

Northwest. Illinois Avenue, Kennedy Street to Ingraham Street, and Kennedy Street, Ninth Street to Georgia Avenue, grade and improve, $8,700.

The amendment was agreed to.

The next amendment was, on page 28, after line 10, to insert:

Northwest. Eighth Street, Jefferson to Longfellow Streets, grade and improve, $2,300.

The amendment was agreed to.

The next amendment was, on page 28, after line 12, to insert:

Northwest. V Street, Flagler Place to First Street, pave (30 feet), $3,800.

The amendment was agreed to.

The next amendment was, on page 28, after line 14, to insert:

Northwest. Nineteenth Street, Park Road to Newton Street, grade and improve, $3,500.

The amendment was agreed to.

The next amendment was, on page 28, after line 16, to insert:

Northwest. Macomb Street, Thirty-third to Thirty-sixth Streets, grade and improve, $8,500.

The amendment was agreed to.

The next amendment was, on page 28, after line 18, to insert:

Northwest. Kalorama Road, Twenty-third Street to Connecticut Avenue, pave (30 feet), $6,500.

The amendment was agreed to.

The next amendment was, on page 28, after line 20, to insert:

Northeast. Otis Street, Twelfth to Fourteenth Streets, grade, $4,200.

The amendment was agreed to.

The next amendment was, on page 28, line 23, after the words "In all," to strike out "$100,600" and insert "$192,450," so as to read:

In all, $192,450.

The amendment was agreed to.

Mr. SMITH of Michigan. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. On page 29, after line 6, it is proposed to insert:

Hereafter Sixteenth Street NW. shall be known and designated as "Avenue of the Presidents."

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, at the top of page 31, to insert:

For new sidewalks and curbs around the Patent Office, $1,500.

The amendment was agreed to.

The next amendment was, on page 31, after line 2, to insert:

For replacing sidewalks and curbs around old Post Office Building, Seventh and Eighth, E and F Streets NW., $2,500.

The amendment was agreed to.

The next amendment was, on page 33, line 15, before the word "thereof," to strike out "one-third" and insert "15 per cent," so as to read:

And the Capital Traction Co. is authorized and required, within 90 days after said bridge shall be ready for the reception thereof, to remove its track from Twenty-sixth Street NW. between Pennsylvania Avenue and M Street and from M Street NW. between Twenty-sixth and Twenty-ninth Streets, and relocate the same in Pennsylvania Avenue and across the bridge herein provided for to a junction with their present tracks at Twenty-ninth Street and Pennsylvania Avenue NW., and to repave the said street space and the space on the M Street Bridge over Rock Creek from which said tracks are removed, all in accordance with plans to be approved by the Commissioners of the District of Columbia and to their satisfaction, and the same law now governing the paving and repairing of street pavements between rails and for a distance of 2 feet exterior thereto shall govern on the bridge herein provided for. And the Capital Traction Co. shall, after the completion of said bridge, pay into the Treasury of the United States, one-half to the credit of the District of Columbia and one-half to the credit of the United States, a portion of the total cost of said bridge and all incidental work thereto equal to 15 per cent thereof, and the same shall be a valid and subsisting lien against the franchises and property of said Capital Traction Co., and shall be a legal indebtedness of said company in favor of the District of Columbia.

Mr. SMITH of Georgia. Mr. President, I regard this modification of the bill as presented to us by the other House as a very serious one. I think the Capital Traction Co. ought to pay one-third of the expense of this bridge. It will be constructed, at least one-third for its benefit, and, as there seems to be no quorum present now——

Mr. CURTIS. Will the Senator from Georgia, before he asks for a quorum, permit me to have a letter read from the attorney of the Capital Traction Co., giving their side of this case? They made a very strong showing by letter before the committee.

Mr. SMITH of Georgia. But we know that the Capital Traction Co. has received enormous franchises——

Mr. CURTIS. That is true.

Mr. SMITH of Georgia. And that it has been given so much in this city, that it is as little as we can do to make it pay a fair proportionate part of an expenditure like this.

Mr. CURTIS. With the permission of the Senator, I ask that the letter which I send to the desk may be read by the Secretary.

The PRESIDENT pro tempore. Without objection, the letter will be read.

The Secretary read as follows:

THE CAPITAL TRACTION CO.,
Washington, D. C., February 17, 1913.

Hon. CHARLES CURTIS,
Chairman of Subcommittee of
Senate Committee on Appropriations.

DEAR SIR: I desire to protest against the enactment into law of the provision in bill (H. R. 28499) requiring the Captial Traction Co. to pay any part of the cost of the new bridge over Rock Creek at Pennsylvania Avenue, and as a basis for such exaction to compel the said company to remove its tracks from their present location and to run over said bridge. The Capital Traction Co.'s tracks are not on said bridge and the company has no desire to go on or over said bridge. Under its charter its tracks were run over said bridge and were accordingly operated from 1863 until 1875. In 1875 at the instance of the chief engineer of the Washington Aqueduct, Congress compelled the company to remove their railway tracks from the Pennsylvania Avenue Bridge over Rock Creek, then called the Washington Aqueduct Bridge, within one year from the date of said act; and by the same act required the company to lay their tracks along Twenty-sixth Street from Pennsylvania Avenue to M Street north, and thence along M Street into Georgetown to connect with their tracks on M Street. The requirements of this act were complied with by the company, and all the expense of relocating in order to go over M Street Bridge as required was borne the company. About 1890, when the company were contemplating the substitution of cable construction for horse-car service, in order to avoid the difficulties of cable construction at Twenty-sixth and M Streets, it applied to Congress for the privilege of returning to the Pennsylvania Avenue or Aqueduct Bridge, and offered to pay for any needed strengthening of the bridge for its accommodation with the cable construction. An act was introduced accordingly, Senate bill 4594, December 10, 1890, but this legislation failed of enactment and instead, by a provision of the District appropriation bill approved July 14, 1892, the company was required to repair the bridge across Rock Creek at M Street, at a cost not exceeding $10,000, and this repair (which was practically the rebuilding of said bridge) was under such compulsion done by the company.

When there was a reason and an advantage to the company for straightening its route and running over the Pennsylvania Avenue or Aqueduct Bridge, the right to do so was refused. Now, when the underground electric construction has superceded the cable construction, and the difficulties growing out of the angle or curve at Twenty-sixth and Pennsylvania Avenue no longer effect detrimentally the company by reason of the substitution of the underground system, it is sought by the pending act to compel us to remove from the M Street Bridge, practically built at the expense of the Capital Traction Co., to abandon its tracks down Twenty-sixth Street and on M Street approaching said M Street Bridge, and to remove to the Pennsylvania Avenue Bridge, for the purpose of giving color to an enforced contribution to the cost of building this new bridge. Not only are we required to lose what we have expended on the M Street Bridge and its approaches, but we have to build approaches to the Pennsylvania Avenue Bridge at a large cost and for no benefit whatever to the company.

We do not believe these facts were understood when this item was inserted in the bill by the House committee. No notice or knowledge of the intention to insert this provision was given to the company and, accordingly, no opportunity of making a statement afforded. Because of the pressure upon the Senate committee no hearings were had, and the only communication made by the company was a letter addressed to the subcommittee.

To compel the company to pay in part for this bridge when they are not an occupant of said bridge and do not desire to become an occupant of the bridge, and to undergo the expense that such removal would entail, comes very near to a violation of the rights of property, which are safeguarded by the Constitution and by law.

It is earnestly urged that this wrong be avoided, and I ask that when this item is discussed in the Senate that the facts herein stated shall be disclosed.

Respectfully submitted.

GEORGE E. HAMILTON, *President.*

Mr. CURTIS. Mr. President, I should like to state further to the Senator from Georgia that the Senate committee also recommended reducing the amount to that estimated by the District Commissioners, leaving the balance open; that is, from 15 per cent to one-third, to be settled in conference, and, if necessary, to give these people a chance to be heard.

Mr. SMITH of Georgia. Mr. President, I shall wish to discuss the matter at some length a little later; but I now merely want to say that I am not willing to see this matter simply left for settlement in conference. If the one-third is right, I should like to see the Senate make the record that it is right, instead of apparently being forced to make a better record by conference with the House. If it is wrong, then we, of course, ought not to do it. I think the one-third charge is right, and I should much prefer not to see the Senate yield upon it. The Senator from the State of Washington [Mr. JONES], however, desires to discuss the Connecticut River dam bill, which is to be voted on at 4 o'clock, and he has suggested that, instead of asking for a quorum now, he would be able to consume the time and let us pass over this amendment for the moment.

Mr. CURTIS. Then, Mr. President, I ask unanimous consent that the District of Columbia appropriation bill be temporarily laid aside, giving notice that I shall call it up at the first opportunity after the disposition of the Connecticut River dam bill.

The PRESIDENT pro tempore. Further consideration of the appropriation bill will be postponed, and the Senator's notice will be entered.

PENSIONS AND INCREASE OF PENSIONS.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 8275) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War, and to certain widows and dependent relatives of such soldiers and sailors.

Mr. McCUMBER. I move that the Senate disagree to the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. McCUMBER, Mr. BURNHAM, and Mr. SHIVELY conferees on the part of the Senate.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 8314) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

Mr. McCUMBER. I move that the Senate disagree to the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. McCUMBER, Mr. BURNHAM, and Mr. SHIVELY conferees on the part of the Senate.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 8178) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

Mr. McCUMBER. I move that the Senate disagree to the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. McCUMBER, Mr. BURNHAM, and Mr. SHIVELY conferees on the part of the Senate.

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 8274) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

Mr. McCUMBER. I move that the Senate disagree to the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. McCUMBER, Mr. BURNHAM, and Mr. SHIVELY conferees on the part of the Senate.

HOUSE BILLS REFERRED.

The following bills were severally read twice by their titles and referred to the Committee on Military Affairs:

H. R. 2839. An act for the relief of William Hommelsberg;
H. R. 6793. An act for the relief of Charles A. Bess;
H. R. 8921. An act for the relief of William H. Seward;
H. R. 18727. An act for the relief of Lewis Wood;
H. R. 24296. An act for the relief of Alonzo D. Cadwallader;
H. R. 26648. An act for the relief of David Crowther; and
H. R. 24661. An act for the relief of James Parsons.

H. R. 24942. An act for the relief of the administrator and heirs of John G. Campbell, to permit the prosecution of Indian depredation claims, was read twice by its title and referred to the Committee on Claims.

The following bills were severally read twice by their titles and referred to the Committee on Pensions:

H. R. 28672. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; and

H. R. 28746. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors.

H. R. 28607. An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, was read twice by its title and referred to the Committee on Appropriations.

CONNECTICUT RIVER DAM.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 8033) to authorize the Connecticut River Co. to relocate and construct a dam across the Connecticut River above the village of Windsor Locks, in the State of Connecticut.

Mr. JONES obtained the floor.

Mr. McLEAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Washington yield for one moment?

Mr. JONES. Certainly.

Mr. McLEAN. I want to offer an amendment to the pending bill and have it printed. As the amendment is very short, I should like to have it read before it is printed.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Connecticut will be stated.

The SECRETARY. At the end of section 1 it is proposed to insert the following:

And provided further, That if said company shall neglect or refuse to pay any charge or return demanded of said corporation by the Secretary of War, either by order or under any contract, and such neglect or refusal is based on the ground that said charge or return is invalid or unconstitutional and not within the power of Congress to require, such neglect or refusal on the part of the company shall not affect the rights of said company to hold and exercise all the powers, rights, and privileges granted in this act; and in any suit brought against said corporation for the collection of said charge or return the said corporation shall have the right to enter its proper plea to test the constitutionality or validity of said charge or return, and the courts shall take cognizance of the same; and nothing in this section shall be understood as committing the Government to a policy of imposing or not imposing such charges or returns as are herein described from any other company or corporation seeking the assent of Congress under like or similar circumstances.

The PRESIDENT pro tempore. The proposed amendment will lie on the table and be printed.

Mr. JONES. Mr. President, I yield to the Senator from Arizona [Mr. SMITH], who, I understand now, desires to address the Senate.

Mr. SMITH of Arizona. Mr. President, the great difficulty with the bill now under consideration is found in the wide difference of opinion amongst Senators as to the powers granted the Federal Government under what is known as the "commerce clause" of the Constitution. No strict construction of that instrument is required in order to condemn the bill before us, and no construction, however liberal or wide, can include the powers attempted to be exercised under the very remarkable provisions of the measure before us. So far as the bill itself is concerned I would not consume the time of the Senate or my own time by a discussion of it, except for the reason that it gives senatorial sanction to a dangerous principle, and if enacted into law establishes a precedent so far-reaching, so disastrous in effects on the people of the Western States, that I can not

refrain from giving some of the reasons which impel me to oppose its passage, especially against that provision which recognizes the right of the Federal Government to exercise any right whatever over any power generated by the flowing waters in any State where such waters are not needed for navigation. This bill presumes to give such power, and for that reason I oppose it.

It is well to see before proceeding farther what the bill under consideration proposes to do, as well as the facts to which it is to be applied. There is, and has been for more than half a century, a dam across the Connecticut River, built by private capital. It does not impair navigation. The proposal is to permit the same people, or their successors in interest, to raise this dam to a greater height for the purpose of creating power for an electric plant. This additional height will improve the navigation of the stream as well as create the power mentioned. The Secretary of War, however, refuses to grant permission to elevate this dam unless the investors in the power enterprise, and who furnished all the money, shall agree to certain provisions and stipulations in a contract giving the Federal Government control over the power produced. Being thus "held up," the proponents consent to the terms exacted by the Government. Against this exaction we raise our protest.

Let us examine the question and discover, if we can, the actual powers delegated to the Federal Government by the States on the adoption of the Constitution, and, ascertaining this, we can clearly see what governmental powers were retained by the people.

I presume that no man on this floor will question the fact that before the adoption of the Constitution the Colonies were the absolute owners and in full control of all the waters washing their shores—the arms of the sea, the inlets and bays, and all streams within their respective boundaries. On achieving their independence each State became the absolute sovereign over its navigable waters, could, if it chose, prevent the use of them to the boats or craft of any other State, and thus seriously interfere with the trade and commerce of any State it pleased to punish or obstruct.

In contemplating the formation of a more perfect union it became at once apparent that the regulation of commerce on these waters was essential to the Federal Government in order that open commerce might be maintained among all the States, free from any State regulation or exactions. Hence came that provision of the Constitution giving "Congress power to regulate commerce among the several States," and so forth. Does anyone here think for a moment that the States intended to surrender any right to the water of their rivers further than was necessary to the regulation of commerce on the streams? The people intended to give and did give only an easement over these waterways of commerce. That this right to regulate commerce amounted only to an easement has been decided time and time again by the Supreme Court of the United States. It is unnecessary to say to any lawyer that no easement ever carried any power with it other than was necessary to its full use and enjoyment.

The rivers as means of interstate commerce are in no essential sense different from railroads engaged in the same business. Each are subject to regulation by Congress to an equal extent. The railroads' right of way over land is in principle the same as the steamboats' right of way over the rivers; both are easements pure and simple. Take the two cases cited by the Senator from Alabama [Mr. BANKHEAD], where one railroad condemned and paid for a right of way over the lands of another, and in the right of way discovered a valuable rock quarry and proceeded to sell the rock as fast as it was taken out. The owner of the land brought suit against the railroad and recovered the value of the stone sold, the court deciding that the easement—the right of passage over the land—carried no other right with it. The second case was in all respects similiar, except in the latter sand was extracted and sold from the right of way, with the same result at the end of the suit. On the citation of these cases the Senator from Ohio [Mr. BURTON] interrupted with the statement that the cases did not apply in any way to any principle in the measure under discussion. In illustrating the powers granted or attempted in this bill, no cases, in my judgment, could be more in point. They seem to me to be decisive of the question at issue here.

As I have said, on forming the Constitution the States relinquished to the Federal Government the simple right to *regulate commerce*. There were no railroads then; sailing vessels and small boats did the business. The States then surrendered this power in order that each might protect its trade against any combination of the other States, but they made no grant of power further than that specifically mentioned. This has been for years the settled doctrine.

Turn from the established rule and see what is attempted in this bill, and a mighty difference appears. We have indeed come to a parting of the ways. From the doctrine that the States—and I mean by that the people—had remaining in them all power that they had not delegated to Congress, we behold an effort through this bill and others like it to hand over to Congress the most sacred rights of the people—rights on which their prosperity as States had grown; rights on which their freedom and independence had so long and so securely rested. Before I get through I hope to show from decisions of the Supreme Court that where the Congress does not act in the matter of improving navigation the States can act. The State can always act as it pleases with its rivers, provided navigation is not interfered with or commerce impeded.

In Huse *v.* Glover (119 U. S., 543) the court said (pp. 548, 549):

> The State is interested in the domestic as well as in the interstate and foreign commerce conducted on the Illinois River, and to increase its facilities, and thus augment its growth, it has full power. It is only when in the judgment of Congress its action is deemed to encroach upon the navigation of the river as a means of interstate and foreign commerce that that body may interfere and control or supersede it. If, in the opinion of the State, greater benefit would result to her commerce by the improvements made than by leaving the river in its natural state—and on that point the State must necessarily determine for itself—it may authorize them, although increased inconvenience and expense may thereby result to private individuals.

The Senator from New York [Mr. ROOT], in order to maintain his advocacy of this bill, was forced by logic to assert that Congress could *create* commerce, and my understanding of his argument was that if it created means of commerce by erecting a dam in a river it was entitled to use or otherwise profit by any incidental value that might accrue from such construction, such as the electric power to be generated in this case.

I deny that any such power rests in the Constitution. I deny that the Federal Government can go into a State and, without its consent, make a navigable stream out of a nonnavigable one; and even if it could do so it does not follow that the Federal Government could also use or sell or contract with anybody for the use of any water power that might be developed by such invasion as it attempted in this bill.

Let us see what the Supreme Court has said on this subject. In Mobile *v.* Eslava (16 Peters, p. 277) the court holds directly that the right of navigation of State waters is simply an easement, and uses this language:

> The United States, then, may be said to claim for the public an easement for the transportation of merchandise, etc., in the navigable waters of the original States while the right of property remains in the States.
>
> The original States possessing this interest in the waters within their jurisdictional limits, the new States can not stand upon an equal footing with them as members of the Union if the United States still retain over their navigable waters any other right than is necessary to the exercise of its constitutional powers.

These powers, of course, being the regulation of commerce.

Mr. NELSON. Mr. President——

The PRESIDENT pro tempore. Does the Senator yield to the Senator from Minnesota?

Mr. SMITH of Arizona. Certainly.

Mr. NELSON. What case is the Senator reading from?

Mr. SMITH of Arizona. The case of Mobile *v.* Eslava, in Sixteenth Peters, page 277.

Mr. BRANDEGEE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from Connecticut?

Mr. SMITH of Arizona. With pleasure.

Mr. BRANDEGEE. With reference to the statement made by the Senator from Arizona that Congress has no power to create navigation I should like to ask him if, in the case of an interstate river, a river flowing through more than one State, there is an obstruction in the channel, does he deny the power of the Government to appropriate money to go in and blast out rocks or deepen the channel?

Mr. SMITH of Arizona. On that condition; no. Is that an intrastate river or one running between two States?

Mr. BRANDEGEE. Interstate.

Mr. SMITH of Arizona. Navigable above and below?

Mr. BRANDEGEE. Irrespective of whether it is navigable above or below, if it can be made navigable by the operation of the Government under the clause of the Constitution authorizing it to regulate commerce among the States, would the Senator deny the right of the United States to appropriate in the river and harbor bill for blasting out rocks or deepening the channel?

Mr. SMITH of Arizona. That is wide of the question that we now have before us, for I have used that statement, "creating commerce," while conceding that it might probably have power under the word "regulate" to remove an obstruction

from an otherwise navigable stream. I was applying it to what I conceive to be the facts in this case—that at the head of navigation at the time of the adoption of the Constitution the State of Connecticut was the absolute owner of the confessedly nonnavigable waters above this ridge that now runs across the river.

Let me ask the Senator while he is on his feet how many miles of navigation on the river above the dam it is supposed that the dam will give?

Mr. BRANDEGEE. The present obstruction there, according to the report of the committee, consists of rapids to the extent of about 5 miles, and the lock provided for in the bill would make it navigable through to that extent. Of course, the Senator understands there is an existing lock there now, but it has become inefficient in view of the needs of modern navigation and the depth of draft of the boats. It adds 3 to 5 miles to the navigability of the stream.

Mr. SMITH of Arizona. Let me say right here, to test the purpose of this bill, whether it is for the purpose of improving the stream or whether it is for the purpose of creating electrical power, nobody on the face of the earth would think for a minute of spending millions of dollars to add 3 or 4 miles of navigation to a river in these days of modern transportation.

Mr. BRANDEGEE. Mr. President, I fear the Senator does not exactly understand what it is proposed to do. By making navigable this stretch 3 or 5 miles in length, that is at present nonnavigable, navigation will be opened up 50 miles above, away up into Massachusetts, up to Holyoke and Springfield.

Mr. SMITH of Arizona. That is the point about which I was asking the Senator. He misunderstood my question. So my criticism in that particular is probably unjustified.

Mr. BRANDEGEE. I did not understand the Senator.

Mr. SMITH of Arizona. I was asking how much more navigation it gave—how far it extended the line of commerce.

Mr. BRANDEGEE. Away up into the State of Massachusetts, making it an interstate stream.

Mr. SMITH of Arizona. But on the question of whether or not the Federal Government can create navigation, the State certainly owned all the water above this impediment in the river at the time of the adoption of the Constitution and it gave away nothing but the right to navigate. The State owned the balance of it; for in this same case of Mobile against Eslava the court uses this language, which I will read again:

> The original States possessing this interest in the waters within their jurisdictional limits, the new States can not stand upon an equal footing with them as members of the Union if the United States still retain over their navigable waters any other right than is necessary to the exercise of its constitutional powers. To recapitulate, we are of opinion: First, that the navigable waters within this State have been dedicated to the use of the citizens of the United States, so that it is not competent for Congress to grant a right of property in the same. * * *

Congress can not grant any right of property. Therefore can not supervise any contract concerning the surplus waters not needed for navigation.

Mr. BRANDEGEE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arizona yield further to the Senator from Connecticut?

Mr. SMITH of Arizona. Certainly.

Mr. BRANDEGEE. I agree to that; but what has that to do with this case?

Mr. SMITH of Arizona. That is what I am endeavoring to show the Senator. There is the whole difficulty with this case. Whenever we get to a decision that squarely says you can not do it, we are asked what it has to do with the case.

Mr. BRANDEGEE. What right of property is Congress trying to give to anybody?

Mr. SMITH of Arizona. What right has it at all, except in the interest of navigation?

Mr. BRANDEGEE. None.

Mr. SMITH of Arizona. Then what is it doing in interfering with this contract for the use of the surplus water confessedly belonging alone to the State?

Mr. BRANDEGEE. It is providing, as one of the conditions of the issuance of the license, that they shall pay some money to be used in the interest of navigation.

Mr. SMITH of Arizona. By what power, under this decision, can they say what the State shall pay for its water that is not used or needed in navigation?

Mr. BRANDEGEE. They are not stating what the State shall pay for any waters at all.

Mr. SMITH of Arizona. What is the United States Government doing there at all, then?

Mr. BRANDEGEE. They are not doing anything there yet. They are trying to get there for the purpose of building a dam and a lock to help the navigation of the river. That is what the Government is trying to do. The people who are asking for the license are trying to get the license to build a dam to generate electrical power.

Mr. SMITH of Arizona. We understand all that. I am trying to find out the power of the Government, aside from navigation, whereby it has anything whatever to do with the surplus water, either to sell it or contract for its use or sale.

Mr. BRANDEGEE. But the Government is not selling any water that belongs to the State of Connecticut or anybody else.

Mr. SMITH of Arizona. What the agent can do the principal can do. Can the Senator's mind distinguish between the right of the Government to control this contract and the Government's right to work under the contract itself?

Mr. BRANDEGEE. I do not distinguish that.

Mr. SMITH of Arizona. Nor can anyone else. If the Government can work under it itself, it can work through its agent for any purpose it pleases, can it not? Where does the Senator drive himself?

Mr. BRANDEGEE. I do not understand the Senator, Mr. President.

Mr. SMITH of Arizona. I am unfortunate in not being able to make myself clear. I will try to make my position clearer to the Senator. My contention is that the Government has no business meddling with the affairs of the State of Connecticut and its people——

Mr. BRANDEGEE. I agree to that.

Mr. SMITH of Arizona. In a matter that does not injuriously affect the navigability of a stream. Confessedly this does not injuriously affect the stream or they would not permit the dam to be built. If it does not injuriously affect the stream, the Federal Government has exercised all the power it has; and it has nothing to grant, nothing to give, no supervision over any contract, no right to speak as to what the State of Connecticut shall do with water belonging to the State. It has no right to come in and lay an embargo on the consumers. It has no right to put into its Treasury money thus extorted from the private investment of the citizens of Connecticut in property with which Congress has nothing to do.

The case cited holds unequivocally that all water not essential to the use of commerce belongs to the State, and the State alone can exercise sovereign power over such water.

The interruptions have led me beyond what I had intended thus early to say, and to make my position clear I must, in a measure, start at the beginning and probably repeat something already expressed.

Mr. President, I maintain, and shall show by the very words of the Constitution, by its spirit, and by decisions of the Supreme Court, that all the waters in a State, navigable and nonnavigable, belong primarily and absolutely to the States in which they flow, with this simple modification, to wit, on navigable streams the General Government has an easement for the protection and improvement of commerce between the States. The nonnavigable streams of a State are owned absolutely by the State, and are under the exclusive sovereignty and jurisdiction of the State to the utter exclusion of any control by the Federal Government of any kind whatever.

That the proprietary ownership of public lands within any State by the Federal Government gives it no more control or sovereignty or rights over the waters flowing through such lands than it has over such waters flowing through private lands in Virginia or Connecticut. I am unable to see, after all that has been said and all the light that the trained and acute intellects of the advocates of this bill could throw upon it, how any man reverencing the Constitution, or regarding the reserved rights of the people, or respecting the decisions of the Supreme Court in respect of these rights can for a moment assent to the horrible doctrine that the Federal Government can invade the local rights of the people and lay a tax, or any burden, on their property that it does not likewise lay on every other community similarly situated. Charging a fee or license for power incidentally developed by any improvement of navigation, confessedly not needful for navigation, such waters being owned by the States, and turning the enforced proceeds away from the State into the National Treasury, strikes me not only as monstrous but revolutionary, if not actually treasonable, against the reserved rights of the people, which are fully as sacred as the powers specifically granted in the Constitution. Think, for a moment, what this proposal means.

Mr. President, I make the broad assertion that no case can be found, since the illuminating decision of Pollard *v.* Hagan (3 How.), among all the decisions of the Supreme Court, on which the advocates of this bill can with any confidence rely.

The Fox River cases, cited by the Senator from Ohio [Mr. BURTON], decide no such thing as he claims for them, for the point at issue there was in all respects different from the ques-

tion before us, as is sufficiently demonstrated in the analysis made of those cases by the Senator from Texas [Mr. CULBERSON] and the Senator from New York [Mr. O'GORMAN] in the conclusions of each already printed by the Judiciary Committee of the Senate. Where the Senator from Ohio [Mr. BURTON] makes the prime mistake in his argument is the assumption that in granting a concession to build a dam in a navigable stream that the Government of the United States *has given away a valuable right it possesses*, and in parting with such valuable right it can and should collect for the public good—the United States Treasury—any burden, tax, or toll that Congress sees fit to impose. This error of the erudite Senator is fundamental. He is too well practiced in debate to permit any evasion of his conclusions, provided you grant his premise. The trouble is that the Federal Government has *no right* that it can grant or sell in the navigable or other waters of the State or any waters in the United States. The Government itself can not obstruct navigation in the Connecticut River. It can give no other person any such right.

If you grant that the United States has such ownership as gives the power to obstruct navigation, when it sees fit, by erecting a dam across a river, then you are in an attitude to claim that it can dispose of any power created by the work, to whom it pleases and for what purpose it pleases. But who will contend that the Government has such jurisdiction over or right in the waters of a State as to permit the Federal Government to obstruct the navigation? Could the Federal Government, under the commerce clause of the Constitution, enter a State and obstruct a railroad carrying merchandise between the States? Under that clause in the Constitution, as I have already said, the power over commerce is the same when applied to railroads engaged in interstate commerce as it is over the rivers carrying freight and merchandise. Apply your new-born doctrine to interstate railroads and find, if you can, what station you will get off at.

The Government can not charge the State or the people of a State anything for improving the navigation of a river. The States primarily have that right. Let Congress say that the dam constructed, or to be built, does not interfere with or in any way hinder or obstruct the free navigation of the stream and it has exercised all the power it has in respect of that river. I repeat, with all emphasis possible, the Government has nothing to sell nor bargains to make touching that water when commerce is unimpeded by the State's action or anyone acting under State authority.

The States own the rivers within them, banks, bottom, and stream, subject only to the right of all the people of the United States to use them for the purpose of carrying their commerce in and among the States. The State has a right to build a bridge over any stream within its borders if commerce be not interfered with. Commerce between the States might be and universally is much enhanced and improved by the bridge.

More merchandise would, or often does, pass over such bridge in a day than the stream would carry in a month. Congress, whatever it may have done, without any contest, has no right, moral or legal, to charge anything or receive anything for the construction of a bridge by anybody over any river anywhere, provided that the bridge does not interfere with the navigation of the stream; and even though it does impede or impair the navigation, Congress can not take pay or toll, but is bound to have the obstruction removed. The only interest the Government has in navigable streams is a mere easement, and it has the power, of course, to protect, maintain, and improve the rivers for the more perfect use of the easement, navigation, commerce. Let us see what the Supreme Court, as well as other courts, State and Federal, have said in construing the Constitution in this regard, and incidentally see what has been decided touching the sovereignty of the State over the public lands within its border. One of the early cases, and the one most frequently cited, is that of Pollard's Lessee *v.* Hagan (3 How., 212), where the court uses this language:

> The right of Alabama and every other new State to exercise all the powers of government which belong to and may be exercised by the original States of the Union must be admitted and remain unquestioned, except so far as they are temporarily deprived of control over the public lands.
>
> * * * * * * *
>
> Nothing remained to the United States, according to the terms of the agreement, but the public lands. And, if an express stipulation had been inserted in the agreement granting the municipal right of sovereignty and eminent domain to the United States, such stipulation would have been void and inoperative, because the United States have no constitutional capacity to exercise municipal jurisdiction, sovereignty, or eminent domain, within the limits of a State or elsewhere, except in the cases in which it is expressly granted.

And further on the court says:

> By the preceding course of reasoning we have arrived at these general conclusions: First, the shores of navigable waters and the soils under them were not granted by the Constitution to the United States, but were reserved to the States, respectively; secondly, the new States have the same rights, sovereignty, and jurisdiction over this subject as the original States; thirdly, the right of the United States to the public lands and the power of Congress to make all needful rules and regulations for the sale and disposition thereof conferred no power to grant to the plaintiffs the land in controversy in this case.

Justice Bradley, in Shivély *v.* Bowlby (152 U. S.), which is one of the leading cases on this question, says:

> Upon the acquisition of a Territory by the United States, whether by cession from one of the States or by treaty with a foreign country, or by discovery and settlement, the same title and dominion passed to the United States for the benefit of the whole people and in trust—

In trust, mark you—

> for the several States to be ultimately created out of the Territory.
>
> The new States admitted into the Union since the adoption of the Constitution have the same rights as the original States in the tidewaters and in the lands under them within their respective jurisdictions. The title and rights of riparian or littoral proprietors in the soil below high-water mark, therefore, are governed by the laws of the several States, subject to the rights granted to the United States by the Constitution.

Which rights were merely rights to regulate commerce.

> The United States, while they hold the country as a Territory—

Mark this distinction—

> having all the powers both of national and of municipal government, may grant, for appropriate purposes, titles or rights in the soil below high-water mark of tide waters.
>
> But they have never done so by general laws, and, unless in some case of international duty or public exigency, have acted upon the policy, as most in accordance with the interest of the people and with the object for which the Territories were acquired, of leaving the administration and disposition of the sovereign rights in navigable waters, and in the soil under them, to the control of the States, respectively, when organized and admitted into the Union.

It was never intended that the great natural resources of any State should be reserved by the Federal Government for the pleasure or profit of the citizens of other States or a money profit to the Government itself. It is inconsistent with the condition existing in the original States and with the free exercise of local sovereignty and dominion within their borders.

In the case of Withers *v.* Buckley (20 How., 84) in considering the act of Congress of 1817, prescribing the free navigation of the Mississippi River and its effect on the State powers, among many other interesting and important things, the court said:

> That it could have no effect to restrict the new State in any of its necessary attributes as an independent sovereign government, nor to inhibit or diminish its perfect equality with the other members of the confederacy with which it was to be associated. These conclusions follow from the very nature and objects of the confederacy, from the language of the constitution adopted by the States, and from the rule of interpretation pronounced by this court in the case of Pollard's Lessee *v.* Hagan (3 How., p. 223).
>
> * * * * * * *

Again the Supreme Court says:

> The act of Congress of March 1, 1817, in prescribing the free navigation of the Mississippi and the navigable waters flowing into this river, could not have been designed to inhibit the power inseparable from every sovereign or efficient government, to devise and to execute measures for the improvement of the State, although such measures might induce or render necessary changes in the channels or courses of rivers within the interior of the State, or might be productive of a change in the value of private property.

And the court further says:

> It can not be imputed to Congress that they ever designed to forbid, or to withhold from the State of Mississippi, the power of improving the interior of that State, by means either of roads or canals, or by regulating the rivers within its territorial limits, although a plan of improvement to be adopted might embrace or affect the course or the flow of rivers situated within the interior of the State.

From these decisions it is clear that the State and not the United States owns the surplus water in the Connecticut River and can do just what it pleases with it. Any attempted interference by the Federal Government is attempted usurpation; any actual control is usurpation.

The precedent established is what *the real sensible* conservationists most particularly object to, and for reasons which I shall attempt to make plain.
